Follow Up Flag: Flag for follow up
Flag Status: Flagged

Good afternoon Mayor. Tom DeSantis indicated that you had inquired as to how much the City has paid employees for overtime. That information is attached. Approximately $150,000 in overtime was paid last Fiscal Year; please note that the overtime inspection services in CEDD are paid by developers.

Subject: Citywide Camera System update

Follow Up Flag: Flag for follow up
Flag Status: Flagged

Good afternoon,

At the last Council meeting there was a question posed about the current status of the Citywide Camera System. As of today, 63 cameras have been installed at the following locations:

1. Ironwood and Pigeon Pass
2. Ironwood and Graham
3. Hemlock and Pigeon Pass
4. Sunnymead and Graham
5. Sunnymead and Perris
6. Frederick and Dracaea
7. Frederick and Allessandro
8. JFK and Perris
9. Old Hwy. 215 and Allessandro
10. Old Hwy. 215 and Cactus
11. Perris and Hemlock
12. Heacock and JFK
13. Perris and Nandina
14. Allessandro and Indian
15. Lassalle and Rancho Verde High School
16. Perris and Eucalyptus
17. Allessandro and Heacock
18. Heacock and Fir
19. Indian and Bay
20. Kitching and Allessandro
21. Hwy. 60 E. Perris off ramp and Sunnymead

Some of these locations still require power for the new devices, but that issue is being addressed. We hope to take delivery of the monitoring computers in the near future. The vendor indicates that installation of all cameras should be completed by early March 2013. We hope to have the system up and running by early April 2013. As soon as the system is functional, we will begin training our personnel on the use and care of the system.

Joel Ontiveros, Chief of Police
Moreno Valley Police Department

Subject: Final Agenda for Council/Staff Workshop and Topic Worksheets
Attachments: Final Agenda and Topic Cover Sheets.pdf; ED Action plan.pdf; GeneralLawCityvCharterCity.pdf; Directly Elected Mayor Feb 2013 study session130129.pdf; Campaign Finance130130.pdf

Mayor, Mayor Pro Tem, and Members of the City Council: The Special Study Session for the Council/Staff Workshop will begin at 8:30 a.m. on Saturday. Breakfast will be available starting at 8:00. Sabina Hernandez from Margarita's Grill will be bringing the hot breakfast as well as lunch for us. Attached for your information is the final agenda, worksheets for the discussion topics, and background information prepared for some of the topics. Hard copies of this information, as well as additional information regarding the discussion topics, will be provided for you as well as any members of the public on Saturday.
--Michelle

Council/Staff Workshop

Council Chamber, February 2, 2013

BREAKFAST 8:00

1. General Law v. Charter City (8:30 – 9:30)
   - Presentation of information by City Attorney
   - Discussion

2. Directly Elected Mayor (9:30 – 10:30)
   - Presentation of background information by City Attorney
   - Discussion

3. Term Limits and Campaign Finance Reform (10:30 – 11:30)
   - Presentation of information by Assistant City Manager/City Attorney
   - Discussion

BREAK 11:30—11:45

LUNCH SERVED DURING THE FOLLOWING DISCUSSION ITEMS:

4. 3-Year Economic Development Action Plan (11:45 –12:15)
   - Update provided by Henry Garcia and Barry Foster

5. Livability/Quality of Life Programming (12:15 – 12:45)
   - Presentation of concept by Henry Garcia
   - Discussion

BREAK 12:45—1:00

6. 3-Year Budget (1:00 – 2:00)
   - Presentation on Process by Rick Teichert
   - Council review and discussion of budget priorities

7. Feasibility of Revenue Measure (2:00 – 3:00)
   - Presentation of background information by Rick Teichert
     - Past successes & failures
     - Feasibility of measures: TOT/Street Lights/Public Safety
     - Next steps

8. Council Campaign Promises (3:00 – 3:30)
   - Discussion led by Mayor Owings

Council/Staff Workshop
Council Chamber, February 2, 2013

Topic: **General Law v. Charter City**

Background:

- The California Constitution authorizes the adoption of a city charter and provides that such a charter has the force and effect of state law.
- Charter cities may have plenary control over "municipal affairs."
- A charter can only be adopted, amended or repealed by a majority vote of a city's voters.
- The primary advantage of a charter is that it allows greater authority for a city's governance than that provided by state law.
- A charter city is still subject to the state's general laws on affairs that are not municipal in nature and are of statewide concern.
- For a city to reserve for itself the greatest amount of power it can when it adopts a charter, the charter must include a declaration that it is the intention of the city to avail itself of the full power provided by the state constitution to charter cities.
- See attached memorandum and chart.
- Potential Process[1]:
    - Prepare a draft;
    - Input regarding the draft;
    - Conduct study on redistricting (if applicable);
    - Must hold at least two public hearings with at least 21 calendar days' notice. The second public hearing must be at least 30 days after the first hearing. At least 21 days must pass after the second public hearing before the Council can vote as to whether to place it on the ballot;
    - To place it on a ballot, Council must decide at least 95 days before the election;
    - Election;
    - Has to be filed and accepted by the Secretary of State;
    - Would go into effect on the date specified in the Charter (if the form of government were to change by the Charter, follow the new processes and election cycle specified in the Charter).

Discussion:

- Desire to pursue changing the form of government to charter city?
- Subjects to be included in charter(which may include but are not limited to):
    - At-large or district elections?
    - Term limits?
    - Number of districts?
- Start the charter process by preparing a draft?

[1] This is not intended to be all-encompassing as to the procedure necessary to enact a charter.

Council/Staff Workshop
Council Chamber, February 2, 2013

Topic: **Directly Elected Mayor**

Background:

- The Office of Mayor in a general law city has the powers granted and conferred by state law (signing official documents, administering oaths, ceremonial functions, presiding over meetings of the agency, and appointments of members of boards and commissions) plus all other powers and duties of a council member.
- To change from the current method of the City Council selecting a Mayor to election of the Mayor by the voters, certain ballot questions and an ordinance must be submitted to the voters for their approval.
- At a general or special election, the electors of the City may determine whether to have a directly elected Mayor and may also determine the length of the term of office of such elected Mayor.
- A general law city proposing to have an elected Mayor must also choose whether to have four, six, or eight City Council districts.
- At the same election, the City Council must also submit an ordinance to the voters for approval. That ordinance "shall state the number of legislative districts, describe the boundaries of each, number them, and state whether members of the legislative body shall be elected … by or from districts except for an elective mayor", who shall be elected at large.
- See attached memorandum.

Discussion:

- Should the City move towards preparing a ballot measure to create the office of a directly elected mayor?
- If so, should the City be divided into four, six, or eight City Council Districts to submit to the voters if the City remains a general law city?
- Or should the issue of directly elected Mayor be presented as part of a Charter adoption?

(These discussion points are not intended to be all-encompassing as to the procedure necessary to effectuate placing the measure(s) on the ballot).

Council/Staff Workshop
Council Chamber, February 2, 2013

Topic: **Term Limits and Campaign Finance Reform**

Term Limits

Background:

- CA Govt. Code section 36502(b) states that voters can establish term limits for the city council or an elected mayor.
- A term limit measure may be placed on a ballot as a City Council proposed measure or as an initiative measure.
- Term limits can only be applied prospectively (may only apply to terms served after the effective date of the measure).
- A 2011 City of Lompoc survey indicates that, of the 481 California cities that existed at that time, 98 had term limits (survey attached).
- The majority of the term limits established for California Mayors and/or Council Members is 2 consecutive 4-Year Terms with a minimum 2-year break before they can seek reelection again. Some impose lifetime bans once the terms have been served.

Discussion

- Timing: If approved by voters in 2014 would apply to Council Members elected in 2016
- How many consecutive terms?
- Should a "break" or lifetime ban be imposed once terms are served?

Campaign Finance Reform

Background:

- The Political Reform Act imposes contribution limits for state candidates and requires all candidates and committees to disclose campaign contributions and expenditures.
- The Act leaves contribution limits for local candidates up to local governments. Numerous cities have passed ordinances creating contribution limits and other requirements (list attached). Limitations may also be enacted via ballot measure.

Discussion

- Expenditure limits
  - Involuntary expenditure limits are never allowed
  - Voluntary expenditure limits cannot be coercive
- Contribution limits
  - Cannot be too low (candidates must be able to conduct an effective campaign)
  - Should have a cost of living adjustment

- Contribution limits (continued)
  - Must be supported by a factual record demonstrating the need to prevent corruption or the appearance of corruption (for example, be prepared if challenged to cite specific instances of campaign violations, demonstrate voter approval of limits, etc.)
  - Differing contribution limits for the same office are highly suspect (for example, a city shouldn't allow candidates who accept voluntary expenditure limits to receive higher contributions than candidates who do not voluntarily limit their spending)
  - Cannot limit contributions to independent expenditure committees
- Sample ordinance attached: City of Murrieta Campaign Contributions and Voluntary Expenditure Limits

Topic: **Municipal Regulation of Local Campaigns**

Background:

- Contribution limits (restricting contributions to city council candidates to $100-$500 appears to be defensible).
- Expenditures by non-candidates (there is a long and growing line of Supreme Court cases concluding that limitations on independent expenditures are unconstitutional).
- Restrictions on Corporate Contributions (cities might be able prohibit all non-political party, corporate contributions to candidates when the restrictiveness of the regulatory scheme as a whole is considered).
- Contributions to Independent Expenditure Committees (Restrictions on contributions to independent expenditure committees that are not closely linked to a candidate, such as through a political party, have recently been deemed unconstitutional absent special findings on corrupting influence of such contributions).
- Timing of Contributions
- Reporting & Disclosure Requirements
- Ethics Commissions
- See attached memorandum.

Discussion:

- Contribution limits.
- Expenditures by non-candidates.
- Restrictions on Corporate Contributions.

Council/Staff Workshop
Council Chamber, February 2, 2013

- Contributions to Independent Expenditure Committees.
- Timing of Contributions.
- Reporting & Disclosure Requirements.
- Ethics Commission.

Council/Staff Workshop
Council Chamber, February 2, 2013

Topic: **Livability/Quality of Life Programming**

Background:

- Improving the quality of life for residents is a basic objective for local government officials.
- The long-standing "City Council Goals" generally speak to this focus:
  - Advocacy
  - Revenue Diversification and Preservation
  - Public Safety
  - Public Facilities and Capital Projects
  - Positive Environment
  - Community Image, Neighborhood Pride and Cleanliness
- In 1990 the Council established a "Blue Ribbon Committee for Moreno Valley Future Horizons"; applications were accepted but the Committee was never formed.
- Community Satisfaction Surveys
  - Performed annually; last one done in 2007:
    - 66% believed Moreno Valley was an "excellent" or "good place to live"
    - 40% believed the quality of life had improved over the previous few years
    - 59% gave positive ratings to the City for providing municipal services
    - The most important City services were "Fire and paramedic services," "police protection," "pick-up of garbage, yard waste, and recyclables," and "removal of graffiti."

Discussion

- How to define "Livability" and "Quality of Life"
  - Forbes measures the following factors:
    - Income growth
    - Current unemployment rate
    - Cost of living
    - Crime rate
    - Arts and culture
- Basic expectations (discuss City's efforts to date and planned initiatives for these):
  - Feel safe from crime
    - Crime stats
  - Live in affordable, well-maintained neighborhoods
    - Foreclosure strike team, squatter strike team
  - Access to quality education
    - Logistics training initiative
    - Mayor's Advisory Committee on Education: Goal of increasing grad rates

  - Access to quality employment
    - Economic Development Action Plan
- Further define "Livability" and "Quality of Life" beyond the basic expectations
  - Arts and Culture
  - Recreation
  - Library

Council/Staff Workshop
Council Chamber, February 2, 2013

Topic: **3-Year Budget**

3-Year Budget Process:

- Walk through major steps …
  - General Schedule …
  - Level of City Council Review … one-on-one briefings, Study Session Review of major funds; regular session presentation and review prior to adoption

Council Review and Discussion of Budget Priorities

- Key Policy Direction for Budget Development
  - Balance the Budget in FY 2013-14 or
  - Maintain key service levels and GF positions, balance over a two-year period
  - Extent of Community Involvement …

- Challenges to balancing in FY 2013-14
  - Streetlight subsidy of $1 million per year continues
  - Morrison Park Fire Station operating costs need to be funded - $1.5 million
  - DEP left about $800,000 of deficit unresolved at June 30, 2013
  - Loss of RDA has caused a cost shift to the GF
  - Solving the deficit will result in additional service and staff reductions to achieve the necessary expense reductions
  - Public Safety Contracts may exceed revenue growth of 2%

- General Fund Revenue/Tax Base continues to grow slowly overall
  - Current Year Revenue Budget is $74.5
  - Projected to grow to about $76.0 million, 2.0% growth is $1.5 million annually

- Review Expenditure Challenges in FY 2014-15 and FY 2015-16
  - What are major expenditures needs as revenues grow
    - Public Safety Contract growth - 3% growth in PD and Fire is $1.5 million annually
    - Public Safety Service Levels – Adding back one Sworn Officer is about $250,000 annually
    - Employee Compensation issues – 1% increase is $130,000 annually for GF
    - Animal Services – Service levels are proposed to be reduced to balance the budget, recent Council discussion of service levels indicates a desire to increase service levels
    - Resolve Street Light Subsidy -- $1 million annually

Council/Staff Workshop
Council Chamber, February 2, 2013

Topic: **Feasibility of a Revenue Measure**

Background/Process/Timing:

- Review the steps involved in a successful revenue measure …
  - Develop transparency and trust in City financial data/financial management actions
  - Survey voters through telephone surveys/focus groups to determine the key issues for voters in the community, assess what type of tax measure they may be willing to support
  - Write a clear ballot measure that garners support for the measure
  - Provide a clear informational message for the community, actively provide this information to community groups and ballot measure support groups
- Present timing of issues
  - Hold during a general election with Council Candidates running, or must declare a fiscal emergency
  - Next City General Election is November 2014
    - provides time to establish community support for a measure
- Issue of General (majority vote) and Special (super-majority vote) Taxes

Discussion:

- Past Successes and Failures
  - City of Moreno Valley's history (handout)
  - See Michael Coleman's recent statewide information (handout)

- Possible Ballot Measures to Consider
  - Hotel Tax Increase (Transient Occupancy Tax)
    - Currently at 8%, neighboring cities are 11-12%
  - Street Lights Tax – Special Tax (sales tax or parcel tax)
  - Public Safety Tax – Special Tax (sales tax or parcel tax)
  - General Sales Tax – simple majority
  - Property Transfer Tax – simple majority

- Next Steps
  - Direct staff to proceed to plan and implement a strategy for a ballot measure(s)
  - Determine the date/timing of a potential ballot measure
  - Proceed to finalize voter survey/focus group study with Lew Edwards Group
  - Complete a plan with milestones and timeline for a Ballot Measure targeted toward an election date directed by City Council

Council/Staff Workshop
Council Chamber, February 2, 2013

- Return to Council in Study Session to discuss the results of the survey/focus groups and determine a ballot measure structure based on this information
- Conduct all City Business transparently, improve communication to the community to gain community trust and support in all actions of the City in support of a Ballot Measure

Council/Staff Workshop

Council Chamber February 2, 2013

Topic: 3-Year Economic Development Action Plan

Background:

- In April 20011, Moreno Valley approved a 2-Year Economic Development (ED) Action Plan to capitalize on economic development opportunities in the short-term.
- The 2-Year ED Action Plan identified goal and objectives to advance economic development efforts in five geographic areas of the City including 1) TownGate, 2) Centerpointe Business Park, 3) South Moreno Valley Industrial Area, 4) City Center and 5) Eastern Moreno Valley-Rancho Belago.
- The 2-Year ED Action Plan also embraced the idea of strategically focusing the funding of projects within the Capital Improvement Program (CIP) to areas that can leverage economic development efforts.
- The advancement of a number of projects identified in the ED Action has been accomplished during the initial 15 months of the 2-Year ED Action Plan.

Discussion:

- A new 3-Year ED Action Plan has been drafted that would expand the focus of the ED Action Plan to eight geographic areas including 1) Edgemont, 2) TownGate, 3) Festival, 4) Centerpointe Business Park, 5) South Moreno Valley Industrial Area, 6) City Center & Medical/Healthcare Corridor, 7) World Logistics Center at Rancho Belago and 8) SR 60 East Corridor.
- The ED Action Plan is also recommended to include ten objectives aimed at increasing overall economic development efforts with 1) Business Attraction, 2) Business Retention and 3) Business Expansion.
- The preliminary schedule for the consideration and approval of the 3-Year ED Action Plan includes:

    1. Economic Development Subcommittee will review and evaluate the ED Action Plan on March 14
    2. ED Action Plan will be discussed at the April 2 City Council Study Session
    3. ED Action Plan will be considered for approval by the City Council on April 23

ECONOMIC DEVELOPMENT ACTION PLAN 2013-2016

An updated Economic Development Action Plan has been formulated to capitalize on near-term opportunities in eight geographic areas during a 3-year time frame. The focus of the updated Economic Development Action Plan includes the following goals and objectives in the eight recommended geographic areas:

Edgemont

Pursue the revitalization of the Edgemont area through the adoption of a multi-faceted redevelopment strategy.

- Work towards the upgrading the water system to ensure sufficient water pressure to allow for new development projects in this area.
- Use Neighborhood Stabilization program funding to acquire and land bank foreclosed properties-both single-family and multi-family residential.
- Conduct quarterly Neighborhood Clean-up programs.
- Retain a planning consultant to evaluate land uses to establish the highest and best land use designations for redevelopment efforts.
- Pursue a master developer to assist with the planning for redevelopment in the Edgemont area.

TownGate

Collaborate with the Fritz Duda Company and CW Capital towards stabilizing, upgrading and expanding retail and restaurant development opportunities in the TownGate area including the Moreno Valley Mall and the five shopping centers surrounding the regional mall including TownGate Center, TownGate Plaza, TownGate Crossing, TownGate Promenade and TownGate Square

- Continue to work with CW Capital-the owner of the Moreno Valley Mall in upgrading and attracting new users to the regional mall.
- Facilitate the planning and marketing for a 30,000 S.F. expansion project at the Moreno Valley Mall to include a new restaurant, retail and plaza area next to Harkins Theatres.
- Work with the Fritz Duda Company in the re-occupancy of vacant retail spaces and the overall stabilization of TownGate Center including new uses such as ULTA Beauty, BevMo and Planet Fitness.
- Assist in the processing of development plans for new projects in TownGate shopping centers including 24 Hour Fitness Sport, Miguels jr. Mexican Restaurant and Richie's Real American Diner.
- Cooperate with the Fritz Duda Company in pursuing the continued development of a 'Restaurant Row' area in TownGate Promenade.

Festival

Cooperate with the Kodash Company and Miller Family Trust-the ownership of the Festival Center, to explore ways to redevelop or enhance the viability of the Festival Center including rehabilitation efforts and incorporating new appropriate land uses.

- Help facilitate attracting new users and the upgrade of the Festival Center.
- Explore developing a new residential component at the Festival Center.
- Explore possibilities with Moreno Valley Unified School District of developing new education facilities at Festival.
- Evaluate developing sports or recreation facilities at Festival for use by the community to create a mixed-use development concept.

Centerpointe Business Park

Work with Ridge Property Trust and USAA Real Estate to expand development and business opportunities aimed at completing the Centerpointe Business Park.

- Assist Ridge Property Trust and Harbor Freight Tools (HFT) in the 507,720 S.F. expansion of HFT's Distribution Center at the NW corner of Cactus and Graham.
- Facilitate efforts for a user to occupy USAA's new 522,774 S.F. Centerpointe Logistics Center at the NW corner of Cactus and Frederick.
- Help advance the development of Ridge Property Trust's approved 607,960 S.F. industrial building at the NW corner of Brodiaea and Graham.
- Facilitate expansion plans for the Serta Mattress facility.
- Work with the owner of the Plaza Del Sol Center in stabilizing the center to provide needed shopping and restaurant opportunities in the Centerpointe Business Park area.

South Moreno Valley Industrial Area

Work with seven developers (Alere Property Group, First Industrial Realty Trust, IDS Real Estate Group, Panattoni Development Co., Sare-REGIS Group, Trammell Crow Company & Western RealCo) on new business attraction and development projects in the South Moreno Valley Industrial Area.

- Work with IDS Real Estate Group in securing a business user for the new 769,320 S.F. Nandina Distribution Center.
- Facilitate the completion of Trammell Crow Company's 1,250,000 S.F. I-215 Logistics Center project, including securing a user.
- Cooperate with First Industrial Realty Trust and Panattoni Development Co. in pursuing the speculative development of two industrial buildings with a total of nearly 2 million S.F.
- Assist Sares-REGIS Group and Western RealCo in build-to-suit opportunities for two approved industrial building projects with a total of more than 3.6 million S.F.
- Work with Alere Property Group, First Industrial Realty Trust and Trammell Crow Co. in the planning and entitlements for several new industrial projects with a proposed 4 million S.F.

City Center Medical/Healthcare Corridor

Cooperate with Riverside County Regional Medical Center (RCRMC), Kaiser Permanente, Moreno Valley College and Highland Fairview to help facilitate the further expansion of the City of Moreno Valley's Medical/Healthcare Corridor on Nason Street & Iris Avenue.

- Assist Riverside County with the implementation of the Master Plan for expanding the Riverside County Regional Medical Center including a new Trauma & Urgent Care, relocated & upgraded Operations Support building and facilities for the new UCR School of Medicine.
- Facilitate plans by Kaiser Permanente to expand the Moreno Valley Community Hospital with an expansion and upgrade of the Emergency Room facilities and development of a planned second tower.
- Cooperate with Moreno Valley College and Riverside Community College District in the development of a proposed 30,000 S.F. allied health sciences facility in the medical-healthcare corridor.
- Support the planning and marketing efforts of Highland Fairview to pursue the creation of a master planned 200-acre healthcare campus to be situated within the medical corridor and between the two existing hospitals-RCRMC and Kaiser's Community Hospital.
- Continue the planning and funding of capital improvement projects that will widen and construct the ultimate improvements on Nason Street from SR 60 to Iris Avenue to provide critical access to the two hospitals and the medical/healthcare corridor.

World Logistics Center at Rancho Belago

Collaborate with Highland Fairview in the development of the World Logistics Center—a 41.6 million S.F. master planned corporate park proposed to be developed on 2,700 acres in the Rancho Belago area of eastern Moreno Valley.

- Process an Environmental Impact Report and preliminary development plans for the World Logistics Center in eastern Moreno Valley—south of SR 60 and east of Redlands Boulevard to Gilman Springs Road.
- Assist in the drafting of a Specific Plan that will guide the orderly development for of World Logistics Center.
- Cooperate with Highland Fairview in the formulation of a Development Agreement to create a public-private partnership to help facilitate the development of new public infrastructure in eastern Moreno Valley associated with the World Logistics Center including roads, trails, utilities, storm water protection and fire protection facilities.
- Work with Highland Fairview in branding the World Logistics Center as one of the largest e-commerce focused development projects in the U.S.

SR 60 East Corridor

Pursue new development opportunities along the SR 60 East corridor—from Nason Street to the easterly City limits.

- Prepare an Overlay Study to determine the 'highest and best' land uses along the SR 60 East Corridor.
- Assist property owners and developers in marketing development opportunities along the SR 60 East Corridor.
- Work on opportunities to expand the Moreno Valley Auto Mall.
- Facilitate the stabilization and further development of Stoneridge Towne Centre and Moreno Beach Plaza.

In addition to activities in the eight geographic areas, a series of objectives are being recommended to assist with overall economic development efforts to assist with Business Attraction, Business Retention and Business Expansion including the following:

- Continue to coordinate the Capital Program (CIP) with economic development efforts
- Expand the Development Ombudsman Program to provide a comprehensive range of business support services for developers and businesses
- Restart the Business Visitation Program, including the participation of the Mayor in 1 on 1 visits annually with the Top 50 with the major employers in the community
- Implement new software that will enable business owners, developers, contractors and residents to electronically submit and manage their plans with the City of Moreno Valley
- Utilize the Chambers of Commerce to expand participation in the Small Business Counseling Services provided by the Small Business Development Center (SBDC)
- Work with the Community Investment Corporation and the Chambers of Commerce in a business incubator and micro-business loan program
- Pursue the reuse of vacant anchor retail spaces, including the use of the new ED-Retail Anchor Reuse Incentive Program
- Explore revising the scopes of work with the Agreements the Chamber of Commerce to better focus on business retention and expansion activities, including expansion of Shop MoVal, as well as establishing a program to promote more business to business transactions in Moreno Valley
- Utilize the Chambers of Commerce to undertake a survey of the small business community on ways to improve the business climate in Moreno Valley
- Pursue the creation of a Business Support Advisory Council comprised of major employers in Moreno Valley

What is the Constitutional Framework for Charter Cities?
Article XI, section 3(a) of the California Constitution authorizes the adoption of a city charter and provides that a charter has the force and effect of state law. Article XI, section 5(a), the "home rule" provision, affirmatively grants to charter cities supremacy over "municipal affairs." However, the California Constitution does not define the term "municipal affair."

What is a Charter?
A city charter is a unique document that, in many ways, acts like a constitution for the city adopting it. It can only be adopted, amended or repealed by a majority vote of a city's voters. The primary advantage of a charter is that it allows greater authority for a city's governance than that provided by state law. A city may tailor its organization and elective offices, taking into account the unique local conditions and needs of the community.

A charter transfers the power to adopt legislation affecting municipal affairs from the state legislature to the city adopting it. A city operating under a charter can acquire full control over its municipal affairs. These affairs are unaffected by the general laws passed by the state legislature on the same subject matters. This, in effect, gives the local voters more control over their local government and the affairs of the city. However, a city operating under a charter is still subject to the general laws, as passed by the state legislature, on affairs that are not municipal in nature, and are of statewide concern (e.g., California Vehicle Code).

What are "Municipal Affairs?"
It is the scope of the term "municipal affairs" that provides the opportunity for uncertainty. No easy analytical test exists. The threshold issue is whether there is a conflict between state law and a charter city enactment. The next issue is whether the state regulation addressed an issue of "state wide concern." Courts analyze these conflicts on a case-by-case basis.

What Activities Have the Courts Classified As Municipal Affairs?
There are some areas that the courts have consistently classified as municipal affairs. Examples include the following:

- Municipal Election Matters;
- Procedures for Initiative, Referendum and Recall;

- Procedures for Adopting Ordinances;
- Compensation of City Officers and Employees (labor relations is not a municipal affair; charter cities are subject to the Meyers-Milias Brown Act. Cal. Gov't Code § 3500);
- Term Limits for Council Members. *See Cawdrey v. City of Redondo Beach*, 15 Cal. App. 4th 1212 (1993); *but see* Cal. Gov't Code § 36502(b) (regulating term limits);
- Land Use and Zoning Decisions (with a few exceptions).

What Activities Have the Courts Classified as Statewide Concerns?
The following have consistently been classified by the courts as matters of statewide concern:

- Traffic and Vehicle Regulation;
- Licensing of Members of a Trade or Profession;
- Tort Claims against a Governmental Entity;
- Open and Public Meetings;
- Exercise of the Power of Eminent Domain.

What is in a Charter?
While a city charter is not required to have any particular provisions in it, a city will often reserve for itself the greatest amount of power it can when it adopts a charter. To accomplish this goal, the charter must include a declaration that it is the intention of the city to avail itself of the full power provided by the state constitution to charter cities. However, the city is not required to extend the breadth of its charter any further than it wishes.

Some of the common areas that are explicitly regulated in a charter are:
- The date and conduct of city elections;
- Form of government;
- Sub-government procedures in all or part of the city.

What is the (General) Procedure to Adopt a Charter?
There are two ways to adopt a charter. One way is to elect a charter commission. The commission then has the responsibility of debating over the provisions and the drafting of the charter. The other alternative allows the governing board of the city, on its own motion, to draft the charter. In either case, the charter is not

adopted by the city until it is ratified by a majority vote of the city's voters. Prior to approving the submission to the voters of a proposal to adopt a charter, the Council would have to hold at least two public hearings on the matter of the proposed charter. Notice of the public hearings shall be given by publication in a newspaper at least 21 calendar days prior to the date of each public hearing. The second hearing shall be held at least 30 days after the first public hearing. The Council shall not conduct a vote on whether to approve the submission to the voters of the proposal to adopt a charter until 21 days after the second public hearing.

If the Charter measure passes, it would not go into effect until it has been filed and accepted by the Secretary of State. If there were a change in the form of government included in the Charter, the Charter provisions about those topics would control.

General Law City v. Charter City

Characteristic	General Law City	Charter City
Ability to Govern Municipal Affairs	Bound by the state's general law, regardless of whether the subject concerns a municipal affair.	Has supreme authority over "municipal affairs." Cal. Const. art. XI, § 5(b).
Form of Government	State law describes the city's form of government For example, Government Code section 36501 authorizes general law cities be governed by a city council of five members, a city clerk, a city treasurer, a police chief, a fire chief and any subordinate officers or employees as required by law.	Charter can provide for any form of government including the "strong mayor," and "city manager" forms. *See* Cal. Const. art. XI, § 5(b); Cal. Gov't Code § 34450 *et seq*.
Elections Generally	Municipal elections conducted in accordance with the California Elections Code. Cal. Elec. Code §§ 10101 *et seq.*.	Not bound by the California Elections Code. May establish own election dates, rules, and procedures. *See* Cal. Const. art. XI, § 5(b); Cal. Elec. Code §§ 10101 *et seq.*.
Methods of Elections	Generally holds at-large elections whereby voters vote for any candidate on the ballot. Cities may also choose to elect the city council "by" or "from" districts, so long as the election system has been established by ordinance and approved by the voters. Cal. Gov't Code § 34871. Mayor may be elected by the city council or by vote of the people. Cal. Gov't Code §§ 34902.	May establish procedures for selecting officers. May hold at-large or district elections. *See* Cal. Const. art. XI, § 5(b).
City Council Member Qualifications	Minimum qualifications are: 1. United States citizen 2. At least 18 years old 3. Registered voter 4. Resident of the city at least 15 days prior to the election and throughout his or her term 5. If elected by or from a district, be a resident of the geographical area comprising the district from which he or she is elected. Cal. Elec. Code § 321; Cal. Gov't Code §§ 34882, 36502; 87 Cal. Op. Att'y Gen. 30 (2004).	Can establish own criteria for city office provided it does not violate the U.S. Constitution. Cal. Const. art. XI, § 5(b), 82 Cal. Op. Att'y Gen. 6, 8 (1999).

Characteristic	General Law City	Charter City
Public Funds for Candidate in Municipal Elections	No public officer shall expend and no candidate shall accept public money for the purpose of seeking elected office. Cal. Gov't Code § 85300.	Public financing of election campaigns is lawful. *Johnson v. Bradley*, 4 Cal. 4th 389 (1992).
Term Limits	May provide for term limits. Cal. Gov't Code § 36502(b).	May provide for term limits. Cal. Const. art. XI, § 5(b); Cal Gov't Code Section 36502 (b).
Vacancies and Termination of Office	An office becomes vacant in several instances including death, resignation, removal for failure to perform official duties, electorate irregularities, absence from meetings without permission, and upon non-residency. Cal. Gov't Code §§ 1770, 36502, 36513.	May establish criteria for vacating and terminating city offices so long as it does not violate the state and federal constitutions. Cal. Const. art. XI, § 5(b).
Council Member Compensation and Expense Reimbursement	Salary-ceiling is set by city population and salary increases set by state law except for compensation established by city electors. *See* Cal. Gov't Code § 36516.	May establish council members' salaries. *See* Cal. Const. art. XI, § 5(b).
Legislative Authority	Ordinances may not be passed within five days of introduction unless they are urgency ordinances. Cal. Gov't Code § 36934. Ordinances may only be passed at a regular meeting, and must be read in full at time of introduction and passage except when, after reading the title, further reading is waived. Cal. Gov't Code § 36934.	May establish procedures for enacting local ordinances. *Brougher v. Bd. of Public Works*, 205 Cal. 426 (1928).
Resolutions	May establish rules regarding the procedures for adopting, amending or repealing resolutions.	May establish procedures for adopting, amending or repealing resolutions. *Brougher v. Bd. of Public Works*, 205 Cal. 426 (1928).
Quorum and Voting Requirements	A majority of the city council constitutes a quorum for transaction of business. Cal. Gov't Code § 36810. All ordinances, resolutions, and orders for the payment of money require a recorded majority vote of the total membership of the city council. Cal. Gov't Code § 36936. Specific legislation requires supermajority votes for certain actions.	May establish own procedures and quorum requirements. However, certain legislation requiring supermajority votes is applicable to charter cities. For example, see California Code of Civil Procedure section 1245.240 requiring a vote of two-thirds of all the members of the governing body unless a greater vote is required by charter.

Characteristic	General Law City	Charter City
Rules Governing Procedure and Decorum	Ralph Brown Act is applicable. Cal. Gov't Code §§ 54951, 54953(a). Conflict of interest laws are applicable. See Cal. Gov't Code § 87300 *et seq.*.	Ralph Brown Act is applicable. Cal. Gov't Code §§ 54951, 54953(a). Conflict of interest laws are applicable. See Cal. Gov't Code § 87300 *et seq.*. May provide provisions related to ethics, conflicts, campaign financing and incompatibility of office.
Personnel Matters	May establish standards, requirements and procedures for hiring personnel consistent with Government Code requirements. May have "civil service" system, which includes comprehensive procedures for recruitment, hiring, testing and promotion. See Cal. Gov't Code § 45000 et seq. Meyers-Milias-Brown Act applies. Cal. Gov't Code § 3500.	May establish standards, requirements, and procedures, including compensation, terms and conditions of employment for personnel. *See* Cal. Const. art. XI, § 5(b). Procedures set forth in Meyers-Milias-Brown Act (Cal. Gov't Code § 3500) apply, but note, "[T]here is a clear distinction between the *substance* of a public employee labor issue and the *procedure* by which it is resolved. Thus there is no question that 'salaries of local employees of a charter city constitute municipal affairs and are not subject to general laws.'" *Voters for Responsible Retirement v. Board of Supervisors*, 8 Cal.4th 765, 781 (1994).

Characteristic	General Law City	Charter City
Public Contracts	Competitive bidding required for public works contracts over $5,000. Cal. Pub. Cont. Code § 20162. Such contracts must be awarded to the lowest responsible bidder. Pub. Cont. Code § 20162. If city elects subject itself to uniform construction accounting procedures, less formal procedures may be available for contracts less than $100,000. *See* Cal. Pub. Cont. Code §§ 22000, 22032. Contracts for professional services such as private architectural, landscape architectural, engineering, environmental, land surveying, or construction management firms need not be competitively bid, but must be awarded on basis of demonstrated competence and professional qualifications necessary for the satisfactory performance of services. Cal. Gov't Code § 4526.	Not required to comply with bidding statutes provided the city charter or a city ordinance exempts the city from such statutes, and the subject matter of the bid constitutes a municipal affair. Pub. Cont. Code § 1100.7; s*ee R & A Vending Services, Inc. v. City of Los Angeles*, 172 Cal. App. 3d 1188 (1985); *Howard Contracting, Inc. v. G.A. MacDonald Constr. Co.*, 71 Cal. App. 4th 38 (1998).
Payment of Prevailing Wages	In general, prevailing wages must be paid on public works projects over $1,000. Cal. Lab. Code § 1771.	Historically, charter cities have not been bound by state law prevailing-wage requirements so long as the project is a municipal affair, and not one funded by state or federal grants. The California Supreme Court decided that Vista, a charter city, could avoid paying prevailing wages on public works projects not built with state or federal monies.

Characteristic	General Law City	Charter City
Finance and Taxing Power	May impose the same kinds of taxes and assessment as charter cities. *See* Cal. Gov't Code § 37100.5. Imposition of taxes and assessments subject to Proposition 218. Cal. Const. art.XIIIC.	Have the power to tax. Imposition of taxes and assessments subject to Proposition 218, Cal. Const. art. XIIIC, § 2, and own charter limitations. May proceed under a general assessment law, or enact local assessment laws and then elect to proceed under the local law. *See J.W. Jones Companies v. City of San Diego*, 157 Cal. App. 3d 745 (1984). May impose real property transfer tax; does not violate either Cal. Const art. XIIIA or California Government Code section 53725. *See Cohn v. City of Oakland*, 223 Cal. App. 3d 261 (1990); *Fielder v. City of Los Angeles*, 14 Cal. App. 4th 137 (1993).
Streets & Sidewalks	State has preempted entire field of traffic control. Cal. Veh. Code § 21.	State has preempted entire field of traffic control. Cal. Veh. Code § 21.

Characteristic	General Law City	Charter City
Public Utilities/Franchises	May establish, purchase, and operate public works to furnish its inhabitants with electric power. *See* Cal. Const. art. XI, § 9(a); Cal. Gov't Code § 39732; Cal. Pub. Util. Code § 10002. May grant franchises to persons or corporations seeking to furnish light, water, power, heat, transportation or communication services in the city to allow use of city streets for such purposes. The grant of franchises can be done through a bidding process, under the Broughton Act, Cal. Pub. Util. Code §§ 6001-6092, or without a bidding process under the Franchise Act of 1937, Cal. Pub. Util. Code §§ 6201-6302.	May establish, purchase, and operate public works to furnish its inhabitants with electric power. *See* Cal. Const. art. XI, § 9(a); *Cal. Apartment Ass'n v. City of Stockton*, 80 Cal. App. 4th 699 (2000). May establish conditions and regulations on the granting of franchises to use city streets to persons or corporations seeking to furnish light, water, power, heat, transportation or communication services in the city. Franchise Act of 1937 is not applicable if charter provides. Cal. Pub. Util. Code § 6205.
Zoning	Zoning ordinances must be consistent with general plan. Cal. Gov't Code § 65860.	Zoning ordinances are not required to be consistent with general plan unless the city has adopted a consistency requirement by charter or ordinance. Cal. Gov't. Code § 65803.

Thanks to the California League of Cities for providing information.

History

In 1984 the Riverside County Board of Supervisors submitted Measures F and G to the voters for the incorporation of Moreno Valley with a five member City Council, and for the formation of the Moreno Valley Community Services District. That ballot asked voters in Measure G to decide whether future members of the City Council would be elected *by* or *from* districts. Election "*by districts*" means that Council Members must reside in that district and are elected by voters who only reside within that district. Election "*from districts*" means that Council Members must reside in that district, but they are elected by all voters in the City. Measure G passed with a majority of voters deciding that all future City Council Members would be elected *by* districts.

Pursuant to Government Code section 36801, all Moreno Valley City Councils have selected the Mayor from amongst themselves.

In 2010, the City Council placed two advisory ballot measures before the voters. The first advisory ballot measure asked "Do you support changing to an elected Mayor rather than one appointed by the City Council?" The second advisory ballot measure asked "Whether or not you support changing to an elected Mayor, should the City Council call a binding election for voters to decide the issue?" Both measures received a majority "yes" vote.

What Power Does A Mayor Have?

The Office of Mayor in a general law city has only those powers granted and conferred by state law. The powers of the Office of Mayor in a general law city are signing official documents, administering oaths, ceremonial functions, presiding over meetings of the agency, and appointments of members of boards and commissions. In addition, the Office of Mayor has all other powers and duties of a council member. Therefore, in general law cities, an elected Mayor has no greater power than an appointed Mayor.

Charter cities, on the other hand, can expand or contract the powers and duties of the Office of Mayor in the charter. A few large cities, such as Los Angeles and Oakland, have expanded the powers and duties of the Office of Mayor. That form of government is the Mayor-Council form of government and is commonly referred to as a "strong mayor." Only charter cities could adopt the Mayor-

Council form of government and expand the powers and duties of the Office of Mayor.

What is the Procedure to Change to a Directly Elected Mayor in a General Law City?

To change from the current method of the City Council selecting a Mayor to election of the Mayor by the voters, certain ballot questions and an ordinance must be submitted to the voters for their approval. Govt. Code §34871, §34900. At a general or special election, the electors of the City may determine whether to have a directly elected Mayor and may also determine the length of the term of office of such elected Mayor. Govt. Code §34900. General law cities proposing to have an elected Mayor must also choose whether to have four, six, or eight City Council districts. Govt. Code §34871. The ballot measures for the election on the issue would be in substantially the following form:

> Shall the electors elect a Mayor and _____ City Council Members? Yes or No
> Shall the term of office of Mayor be two years? Yes or No
> Shall the term of office of Mayor be four years? Yes or No

At the same election, the City Council must also submit an ordinance to the voters for approval. That ordinance "shall state the number of legislative districts, describe the boundaries of each, number them, and state whether members of the legislative body shall be elected … by or from districts except for an elective mayor", who shall be elected at large. Govt. Code §§34871-34872. Pursuant to Government Code section 34877, the ballot measure for the ordinance must be in substantially the following form:

> Shall members of the legislative body of the City of Moreno Valley be elected by (or from) districts described in Ordinance No. _____, and the Mayor of the City of Moreno Valley be elected on a citywide basis by the voters of the entire city? Yes or No

Before being submitted to the voters for approval, the proposed ordinance must first be submitted to the Planning Commission to make findings. Following the action by the Planning Commission, the proposed ordinance would be brought to the City Council, along with proposed ballot measures, for direction to submit the measures to the Riverside County Registrar of Voters to be included in the next

municipal general election, or special election held for that purpose at least no later than 88 days prior to the date of the election. Govt. Code §34871; §34901.

If the City is going to elect a Mayor and the election of the remaining Council Members for four-year terms are not evenly staggered in the election cycle, the City Council may, on a one time basis only and prior to the first day for circulating nomination papers for the municipal general election, designate one of the Council Member seats appearing on the municipal general election, other than the office of Mayor, to serve a two-year term until the next municipal general election. At all subsequent elections, that Council District seat shall serve a four-year term. For example, if the City Council directs that the City should have eight City Council districts, then one of the City Council districts (probably a newly created City Council district) will have to be designated as a two-year term by the City Council prior to the first day for the circulation of nomination papers for the next municipal general election for that City Council district. At the next succeeding municipal general election and thereafter, the Council Member from the City Council district so designated shall serve a four-year term.

What Compensation Would An Elected Mayor Receive?

An elected Mayor is a member of the City Council and would receive the same compensation as any other member of the City Council. An elected Mayor may, but is not required to, receive compensation in addition to the compensation established for Council Members. Govt. Code §36516.1. Such additional compensation may be provided by an ordinance adopted by the City Council or by a majority vote of the electors voting on the proposition at a municipal election. Additional compensation established by ordinance of the City Council may be increased or decreased by ordinance of the City Council. Additional compensation established by a vote of the electors can only be changed by a vote of the electors.

Establishment of Term Limits

Under current law, a city council may not unilaterally alter term limits. In both a general law and charter city, any proposed term limit "shall apply prospectively only and shall not become operative unless it is submitted to the electors of the city at a regularly scheduled election and a majority of the votes cast on the question favor the adoption of the proposal." Gov. Code § 36502(b).

Municipal Regulation of Local Campaigns

Under California law, both general law and charter cities have broad and near-equivalent authority to regulate campaigns and campaign contributions for local elective office if they do not impair compliance with the Political Reform Act ("the Act"). Govt. Code § 82008; 35 Ops. Cal. Atty. Gen. 230 (1960). The Act establishes disclosure requirements but does not limit contributions to candidates for local office. This area is left to local jurisdictions. But any such regulations must not impinge on the free speech and associative rights of the First Amendment.

Under the United States Supreme Court case *Buckley v. Valeo*, and its progeny, cities may restrict contributions to candidates, their controlled committees and expenditures coordinated with candidates in order to protect against corruption or the perception of corruption by "means closely drawn to avoid unnecessary abridgement of associational freedoms." (1976) 424 U.S. 1, 25, 45.

"[P]reventing corruption or the appearance of corruption are the only legitimate and compelling government interests thus far identified for restricting campaign finances." *Long Beach Area Chamber of Commerce v. City of Long Beach* (9th Cir. 2010) 603 F.3d 684, 694;[1] see also *Thalheimer v. City of San Diego* (9th Cir. 2011) 645 F.3d 1109, 1119 (internal quotation omitted); *Club's Freedom Club PAC v. Bennett* (2011) 131 S. Ct. 2806 (no compelling state interest in leveling the playing field by providing matching funds to candidates who accept campaign restrictions

[1] While the courts are willing to accept a wide range of sources of evidence—*Nixon v. Shrink Missouri Government PAC* (2000) 528 U.S. 377, 393-94 (newspaper articles on kickbacks); *Buckley v. Valeo* (D.C. Cir. 1975) 519 F.2d 821, 837-40 (testimony by politicians regarding pressure to seek large donations)—a merely hypothetical risk of corruption is not sufficient. *Citizens for Clean Govt. v. City of San Diego* (9th Cir. 2007) 474 F.3d 647.

against candidates who do not). More recently in *Citizens United v. Federal Election Commission* (2010) 558 U.S. 310, the Supreme Court has "narrowed the scope of the anti-corruption rationale to cover quid pro quo corruption only, as opposed to money spent to obtain `influence over or access to elected officials.'"

Contribution Limits

The Supreme Court has upheld a contribution limit of $275 for state-level candidates representing fewer than 100,000 people, explaining that it "rejected the contention that $1,000, or any other amount, was a constitutional minimum below which legislatures could not regulate[]" and instead considered whether "the contribution limitation is so radical in effect as to render political association ineffective, drive the sound of a candidate's voice below the level of notice, and render contributions pointless." *Nixon v. Shrink Missouri Govt. PAC* (2000) 528 U.S. 377, 397.

In a 2005 opinion, however, the Court struck down Vermont's candidate contribution limits of $400 per two-year election cycle, which included both a primary and general election, for the office of governor and lower limits for other statewide offices. *Randall v. Sorrell* (2005) 548 U.S. 230, 254. The Court applied a five-factor test (lack of distinction between political parties and individuals, extremely low dollar figures, inclusion of volunteer expenses as contributions, lack of inflation adjustment and no special justification for low figures based on the funds necessary to adequately compete) to determine that the contribution limit was not "closely drawn."

Based on *Nixon* and *Randall*, restricting contributions to city council candidates to $100-$500 appears to be defensible. The court in *Major v. Silna* (2005) 134 Cal. App. 4th 1485, 1502-03, accepted that the general law city of Malibu could prohibit contributions over $100. See City of Malibu Municipal Code, Chapter 2.20; Govt. Code § 84300 (prohibiting $100 cash contributions).

Expenditures by Non-Candidates

Limits on contributions by voters or corporations pertaining to ballot initiatives are subject to strict scrutiny and generally unconstitutional. *Citizens Against Rent Control v. City of Berkeley* (1981) 454 U.S. 290, 297-299. Additionally, a "[c]ity may not impose financial limits on [a] PACs' independent expenditures. This conclusion is compelled by the long and growing line of Supreme Court cases

concluding that limitations on independent expenditures are unconstitutional." *Long Beach Area Chamber of Commerce v. City of Long Beach* (9th Cir. 2010) 603 F.3d 684, 695.

Restrictions on Corporate Contributions

Despite the court's holding in *Long Beach Area Chamber of Commerce*, and the Supreme Court's recent expansion of First Amendment rights to corporations in *Citizens United v. Federal Election Commission* (2010) 558 U.S. 310, 330, if an anti-corruption justification is provided, cities may prohibit all non-political party, corporate contributions (including from PACs) to candidates. *Thalheimer v. City of San Diego* (9th Cir. 2011) 645 F.3d 1109, 1126. The Ninth Circuit accepted prohibiting corporate contributions as a valid means of preventing illegal circumventing of campaign restrictions. *Id*. at 1124. However, the court predicated its acceptance of this ban on other avenues of expression, such as direct expenditures and unlimited individual contributions. *Id.* at 1125. While the implication is that bans on corporate contributions will be upheld even if individual contributions are limited, courts will also consider the restrictiveness of the regulatory scheme as a whole.

Contributions to Independent Expenditure Committees

Restrictions on contributions to independent expenditure committees (i.e. committees that advocate or oppose the election of a candidate without any coordination with the candidate) that are not closely linked to a candidate, such as through a political party, have recently been deemed unconstitutional absent special findings on corrupting influence of such contributions. *Long Beach Area Chamber of Commerce,* 603 F.3d at 697-98 ("We are not told whether the candidate ever had any contact with the IEC, whether the money received or spent by the IEC had any corrupting influence on City politics, whether the voters suspected the IEC of corrupting the political process, or even whether the candidate won the race.")(This calls into question traditional restrictions: see e.g. Govt. Code § 85303 (yearly $5,000 cap for independent expenditure committees making contributions to candidates)).

Timing of Contributions

In *Thalheimer v. City of San Diego*, the Ninth Circuit upheld the City of San Diego's ban on contributions outside of the twelve-month pre-election window on the basis of the City's argument that the temporal ban "reduces actual and perceived

corruption because those contributions made near an election are clearer expressions of political speech, whereas off-year contributions are more likely linked to business the donor has before the city, thus creating the appearance of quid pro quo 'corruption by the sale of influence.'" 645 F.3d at 1121. The City of San Jose restricts contributions to 180 days before the election.

Reporting & Disclosure Requirements

Cities have discretion to impose disclosure and reporting requirements beyond those provided in Government Code section 84300 *et seq.* Cities that establish local disclosure standards must file their rules with the Fair Political Practices Commission. Govt. Code § 81009.5(a).

Ethics Commissions

Los Angeles, San Jose, San Diego, San Francisco and Oakland have ethics commission to administratively enforce campaign laws which arguably ensure a higher rate of oversight than under state law alone. However, city staff might have to referee candidate disputes.

Mayor, Mayor Pro Tem, and Members of the City Council: Attached for your information are the following items from Saturday's Workshop:

- Copies of the informational materials distributed by staff at the workshop;
- Notes from the Mayor's introductory comments;
- List of the items upon which the Council indicated consensus;
- List of the campaign promises mentioned during that specific discussion.

All of these items are currently posted on the main page of the City's web site.
--Michelle

Council/Staff Workshop

Council Chamber, February 2, 2013

BREAKFAST 8:00

1. General Law v. Charter City (8:30 – 9:30)
   - Presentation of information by City Attorney
   - Discussion

2. Directly Elected Mayor (9:30 – 10:30)
   - Presentation of background information by City Attorney
   - Discussion

3. Term Limits and Campaign Finance Reform (10:30 – 11:30)
   - Presentation of information by Assistant City Manager/City Attorney
   - Discussion

BREAK 11:30—11:45

LUNCH SERVED DURING THE FOLLOWING DISCUSSION ITEMS:

4. 3-Year Economic Development Action Plan (11:45 –12:15)
   - Update provided by Henry Garcia and Barry Foster

5. Livability/Quality of Life Programming (12:15 – 12:45)
   - Presentation of concept by Henry Garcia
   - Discussion

BREAK 12:45—1:00

6. 3-Year Budget (1:00 – 2:00)
   - Presentation on Process by Rick Teichert
   - Council review and discussion of budget priorities

7. Feasibility of Revenue Measure (2:00 – 3:00)
   - Presentation of background information by Rick Teichert
     - Past successes & failures
     - Feasibility of measures: TOT/Street Lights/Public Safety
     - Next steps

8. Council Campaign Promises (3:00 – 3:30)
   - Discussion led by Mayor Owings

Council/Staff Workshop
Council Chamber, February 2, 2013

Topic: **General Law v. Charter City**

Background:

- The California Constitution authorizes the adoption of a city charter and provides that such a charter has the force and effect of state law.
- Charter cities may have plenary control over "municipal affairs."
- A charter can only be adopted, amended or repealed by a majority vote of a city's voters.
- The primary advantage of a charter is that it allows greater authority for a city's governance than that provided by state law.
- A charter city is still subject to the state's general laws on affairs that are not municipal in nature and are of statewide concern.
- For a city to reserve for itself the greatest amount of power it can when it adopts a charter, the charter must include a declaration that it is the intention of the city to avail itself of the full power provided by the state constitution to charter cities.
- See attached memorandum and chart.
- Potential Process[1]:
    - Prepare a draft;
    - Input regarding the draft;
    - Conduct study on redistricting (if applicable);
    - Must hold at least two public hearings with at least 21 calendar days' notice. The second public hearing must be at least 30 days after the first hearing. At least 21 days must pass after the second public hearing before the Council can vote as to whether to place it on the ballot;
    - To place it on a ballot, Council must decide at least 95 days before the election;
    - Election;
    - Has to be filed and accepted by the Secretary of State;
    - Would go into effect on the date specified in the Charter (if the form of government were to change by the Charter, follow the new processes and election cycle specified in the Charter).

Discussion:

- Desire to pursue changing the form of government to charter city?
- Subjects to be included in charter(which may include but are not limited to):
    - At-large or district elections?
    - Term limits?
    - Number of districts?
- Start the charter process by preparing a draft?

[1] This is not intended to be all-encompassing as to the procedure necessary to enact a charter.

What is the Constitutional Framework for Charter Cities?
Article XI, section 3(a) of the California Constitution authorizes the adoption of a city charter and provides that a charter has the force and effect of state law. Article XI, section 5(a), the "home rule" provision, affirmatively grants to charter cities supremacy over "municipal affairs." However, the California Constitution does not define the term "municipal affair."

What is a Charter?
A city charter is a unique document that, in many ways, acts like a constitution for the city adopting it. It can only be adopted, amended or repealed by a majority vote of a city's voters. The primary advantage of a charter is that it allows greater authority for a city's governance than that provided by state law. A city may tailor its organization and elective offices, taking into account the unique local conditions and needs of the community.

A charter transfers the power to adopt legislation affecting municipal affairs from the state legislature to the city adopting it. A city operating under a charter can acquire full control over its municipal affairs. These affairs are unaffected by the general laws passed by the state legislature on the same subject matters. This, in effect, gives the local voters more control over their local government and the affairs of the city. However, a city operating under a charter is still subject to the general laws, as passed by the state legislature, on affairs that are not municipal in nature, and are of statewide concern (e.g., California Vehicle Code).

What are "Municipal Affairs?"
It is the scope of the term "municipal affairs" that provides the opportunity for uncertainty. No easy analytical test exists. The threshold issue is whether there is a conflict between state law and a charter city enactment. The next issue is whether the state regulation addressed an issue of "state wide concern." Courts analyze these conflicts on a case-by-case basis.

What Activities Have the Courts Classified As Municipal Affairs?
There are some areas that the courts have consistently classified as municipal affairs. Examples include the following:

- Municipal Election Matters;
- Procedures for Initiative, Referendum and Recall;

- Procedures for Adopting Ordinances;
- Compensation of City Officers and Employees (labor relations is not a municipal affair; charter cities are subject to the Meyers-Milias Brown Act. Cal. Gov't Code § 3500);
- Term Limits for Council Members. *See Cawdrey v. City of Redondo Beach*, 15 Cal. App. 4th 1212 (1993); *but see* Cal. Gov't Code § 36502(b) (regulating term limits);
- Land Use and Zoning Decisions (with a few exceptions).

What Activities Have the Courts Classified as Statewide Concerns?
The following have consistently been classified by the courts as matters of statewide concern:

- Traffic and Vehicle Regulation;
- Licensing of Members of a Trade or Profession;
- Tort Claims against a Governmental Entity;
- Open and Public Meetings;
- Exercise of the Power of Eminent Domain.

What is in a Charter?
While a city charter is not required to have any particular provisions in it, a city will often reserve for itself the greatest amount of power it can when it adopts a charter. To accomplish this goal, the charter must include a declaration that it is the intention of the city to avail itself of the full power provided by the state constitution to charter cities. However, the city is not required to extend the breadth of its charter any further than it wishes.

Some of the common areas that are explicitly regulated in a charter are:

- The date and conduct of city elections;
- Form of government;
- Sub-government procedures in all or part of the city.

What is the (General) Procedure to Adopt a Charter?
There are two ways to adopt a charter. One way is to elect a charter commission. The commission then has the responsibility of debating over the provisions and the drafting of the charter. The other alternative allows the governing board of the city, on its own motion, to draft the charter. In either case, the charter is not

adopted by the city until it is ratified by a majority vote of the city's voters. Prior to approving the submission to the voters of a proposal to adopt a charter, the Council would have to hold at least two public hearings on the matter of the proposed charter. Notice of the public hearings shall be given by publication in a newspaper at least 21 calendar days prior to the date of each public hearing. The second hearing shall be held at least 30 days after the first public hearing. The Council shall not conduct a vote on whether to approve the submission to the voters of the proposal to adopt a charter until 21 days after the second public hearing.

If the Charter measure passes, it would not go into effect until it has been filed and accepted by the Secretary of State. If there were a change in the form of government included in the Charter, the Charter provisions about those topics would control.

General Law City v. Charter City

Characteristic	General Law City	Charter City
Ability to Govern Municipal Affairs	Bound by the state's general law, regardless of whether the subject concerns a municipal affair.	Has supreme authority over "municipal affairs." Cal. Const. art. XI, § 5(b).
Form of Government	State law describes the city's form of government For example, Government Code section 36501 authorizes general law cities be governed by a city council of five members, a city clerk, a city treasurer, a police chief, a fire chief and any subordinate officers or employees as required by law.	Charter can provide for any form of government including the "strong mayor," and "city manager" forms. *See* Cal. Const. art. XI, § 5(b); Cal. Gov't Code § 34450 *et seq.*
Elections Generally	Municipal elections conducted in accordance with the California Elections Code. Cal. Elec. Code §§ 10101 *et seq.*.	Not bound by the California Elections Code. May establish own election dates, rules, and procedures. *See* Cal. Const. art. XI, § 5(b); Cal. Elec. Code §§ 10101 *et seq.*.
Methods of Elections	Generally holds at-large elections whereby voters vote for any candidate on the ballot. Cities may also choose to elect the city council "by" or "from" districts, so long as the election system has been established by ordinance and approved by the voters. Cal. Gov't Code § 34871. Mayor may be elected by the city council or by vote of the people. Cal. Gov't Code §§ 34902.	May establish procedures for selecting officers. May hold at-large or district elections. *See* Cal. Const. art. XI, § 5(b).
City Council Member Qualifications	Minimum qualifications are: 1. United States citizen 2. At least 18 years old 3. Registered voter 4. Resident of the city at least 15 days prior to the election and throughout his or her term 5. If elected by or from a district, be a resident of the geographical area comprising the district from which he or she is elected. Cal. Elec. Code § 321; Cal. Gov't Code §§ 34882, 36502; 87 Cal. Op. Att'y Gen. 30 (2004).	Can establish own criteria for city office provided it does not violate the U.S. Constitution. Cal. Const. art. XI, § 5(b), 82 Cal. Op. Att'y Gen. 6, 8 (1999).

Characteristic	General Law City	Charter City
Public Funds for Candidate in Municipal Elections	No public officer shall expend and no candidate shall accept public money for the purpose of seeking elected office. Cal. Gov't Code § 85300.	Public financing of election campaigns is lawful. *Johnson v. Bradley*, 4 Cal. 4th 389 (1992).
Term Limits	May provide for term limits. Cal. Gov't Code § 36502(b).	May provide for term limits. Cal. Const. art. XI, § 5(b); Cal Gov't Code Section 36502 (b).
Vacancies and Termination of Office	An office becomes vacant in several instances including death, resignation, removal for failure to perform official duties, electorate irregularities, absence from meetings without permission, and upon non-residency. Cal. Gov't Code §§ 1770, 36502, 36513.	May establish criteria for vacating and terminating city offices so long as it does not violate the state and federal constitutions. Cal. Const. art. XI, § 5(b).
Council Member Compensation and Expense Reimbursement	Salary-ceiling is set by city population and salary increases set by state law except for compensation established by city electors. *See* Cal. Gov't Code § 36516.	May establish council members' salaries. *See* Cal. Const. art. XI, § 5(b).
Legislative Authority	Ordinances may not be passed within five days of introduction unless they are urgency ordinances. Cal. Gov't Code § 36934. Ordinances may only be passed at a regular meeting, and must be read in full at time of introduction and passage except when, after reading the title, further reading is waived. Cal. Gov't Code § 36934.	May establish procedures for enacting local ordinances. *Brougher v. Bd. of Public Works*, 205 Cal. 426 (1928).
Resolutions	May establish rules regarding the procedures for adopting, amending or repealing resolutions.	May establish procedures for adopting, amending or repealing resolutions. *Brougher v. Bd. of Public Works*, 205 Cal. 426 (1928).
Quorum and Voting Requirements	A majority of the city council constitutes a quorum for transaction of business. Cal. Gov't Code § 36810. All ordinances, resolutions, and orders for the payment of money require a recorded majority vote of the total membership of the city council. Cal. Gov't Code § 36936. Specific legislation requires supermajority votes for certain actions.	May establish own procedures and quorum requirements. However, certain legislation requiring supermajority votes is applicable to charter cities. For example, see California Code of Civil Procedure section 1245.240 requiring a vote of two-thirds of all the members of the governing body unless a greater vote is required by charter.

Characteristic	General Law City	Charter City
Rules Governing Procedure and Decorum	Ralph Brown Act is applicable. Cal. Gov't Code §§ 54951, 54953(a). Conflict of interest laws are applicable. See Cal. Gov't Code § 87300 *et seq.*.	Ralph Brown Act is applicable. Cal. Gov't Code §§ 54951, 54953(a). Conflict of interest laws are applicable. See Cal. Gov't Code § 87300 *et seq.*. May provide provisions related to ethics, conflicts, campaign financing and incompatibility of office.
Personnel Matters	May establish standards, requirements and procedures for hiring personnel consistent with Government Code requirements. May have "civil service" system, which includes comprehensive procedures for recruitment, hiring, testing and promotion. See Cal. Gov't Code § 45000 et seq. Meyers-Milias-Brown Act applies. Cal. Gov't Code § 3500.	May establish standards, requirements, and procedures, including compensation, terms and conditions of employment for personnel. *See* Cal. Const. art. XI, § 5(b). Procedures set forth in Meyers-Milias-Brown Act (Cal. Gov't Code § 3500) apply, but note, "[T]here is a clear distinction between the *substance* of a public employee labor issue and the *procedure* by which it is resolved. Thus there is no question that 'salaries of local employees of a charter city constitute municipal affairs and are not subject to general laws.'" *Voters for Responsible Retirement v. Board of Supervisors*, 8 Cal.4th 765, 781 (1994).

Characteristic	General Law City	Charter City
Public Contracts	Competitive bidding required for public works contracts over $5,000. Cal. Pub. Cont. Code § 20162. Such contracts must be awarded to the lowest responsible bidder. Pub. Cont. Code § 20162. If city elects subject itself to uniform construction accounting procedures, less formal procedures may be available for contracts less than $100,000. *See* Cal. Pub. Cont. Code §§ 22000, 22032. Contracts for professional services such as private architectural, landscape architectural, engineering, environmental, land surveying, or construction management firms need not be competitively bid, but must be awarded on basis of demonstrated competence and professional qualifications necessary for the satisfactory performance of services. Cal. Gov't Code § 4526.	Not required to comply with bidding statutes provided the city charter or a city ordinance exempts the city from such statutes, and the subject matter of the bid constitutes a municipal affair. Pub. Cont. Code § 1100.7; *see R & A Vending Services, Inc. v. City of Los Angeles*, 172 Cal. App. 3d 1188 (1985); *Howard Contracting, Inc. v. G.A. MacDonald Constr. Co.*, 71 Cal. App. 4th 38 (1998).
Payment of Prevailing Wages	In general, prevailing wages must be paid on public works projects over $1,000. Cal. Lab. Code § 1771.	Historically, charter cities have not been bound by state law prevailing-wage requirements so long as the project is a municipal affair, and not one funded by state or federal grants. The California Supreme Court decided that Vista, a charter city, could avoid paying prevailing wages on public works projects not built with state or federal monies.

Characteristic	General Law City	Charter City
Finance and Taxing Power	May impose the same kinds of taxes and assessment as charter cities. *See* Cal. Gov't Code § 37100.5. Imposition of taxes and assessments subject to Proposition 218. Cal. Const. art.XIIIC.	Have the power to tax. Imposition of taxes and assessments subject to Proposition 218, Cal. Const. art. XIIIC, § 2, and own charter limitations. May proceed under a general assessment law, or enact local assessment laws and then elect to proceed under the local law. *See J.W. Jones Companies v. City of San Diego*, 157 Cal. App. 3d 745 (1984). May impose real property transfer tax; does not violate either Cal. Const art. XIIIA or California Government Code section 53725. *See Cohn v. City of Oakland*, 223 Cal. App. 3d 261 (1990); *Fielder v. City of Los Angeles*, 14 Cal. App. 4th 137 (1993).
Streets & Sidewalks	State has preempted entire field of traffic control. Cal. Veh. Code § 21.	State has preempted entire field of traffic control. Cal. Veh. Code § 21.

Characteristic	General Law City	Charter City
Public Utilities/Franchises	May establish, purchase, and operate public works to furnish its inhabitants with electric power. *See* Cal. Const. art. XI, § 9(a); Cal. Gov't Code § 39732; Cal. Pub. Util. Code § 10002. May grant franchises to persons or corporations seeking to furnish light, water, power, heat, transportation or communication services in the city to allow use of city streets for such purposes. The grant of franchises can be done through a bidding process, under the Broughton Act, Cal. Pub. Util. Code §§ 6001-6092, or without a bidding process under the Franchise Act of 1937, Cal. Pub. Util. Code §§ 6201-6302.	May establish, purchase, and operate public works to furnish its inhabitants with electric power. *See* Cal. Const. art. XI, § 9(a); *Cal. Apartment Ass'n v. City of Stockton*, 80 Cal. App. 4th 699 (2000). May establish conditions and regulations on the granting of franchises to use city streets to persons or corporations seeking to furnish light, water, power, heat, transportation or communication services in the city. Franchise Act of 1937 is not applicable if charter provides. Cal. Pub. Util. Code § 6205.
Zoning	Zoning ordinances must be consistent with general plan. Cal. Gov't Code § 65860.	Zoning ordinances are not required to be consistent with general plan unless the city has adopted a consistency requirement by charter or ordinance. Cal. Gov't. Code § 65803.

Thanks to the California League of Cities for providing information.

Council/Staff Workshop
Council Chamber, February 2, 2013

Topic: **Directly Elected Mayor**

Background:

- The Office of Mayor in a general law city has the powers granted and conferred by state law (signing official documents, administering oaths, ceremonial functions, presiding over meetings of the agency, and appointments of members of boards and commissions) plus all other powers and duties of a council member.
- To change from the current method of the City Council selecting a Mayor to election of the Mayor by the voters, certain ballot questions and an ordinance must be submitted to the voters for their approval.
- At a general or special election, the electors of the City may determine whether to have a directly elected Mayor and may also determine the length of the term of office of such elected Mayor.
- A general law city proposing to have an elected Mayor must also choose whether to have four, six, or eight City Council districts.
- At the same election, the City Council must also submit an ordinance to the voters for approval. That ordinance "shall state the number of legislative districts, describe the boundaries of each, number them, and state whether members of the legislative body shall be elected ... by or from districts except for an elective mayor", who shall be elected at large.
- See attached memorandum.

Discussion:

- Should the City move towards preparing a ballot measure to create the office of a directly elected mayor?
- If so, should the City be divided into four, six, or eight City Council Districts to submit to the voters if the City remains a general law city?
- Or should the issue of directly elected Mayor be presented as part of a Charter adoption?

(These discussion points are not intended to be all-encompassing as to the procedure necessary to effectuate placing the measure(s) on the ballot).

History

In 1984 the Riverside County Board of Supervisors submitted Measures F and G to the voters for the incorporation of Moreno Valley with a five member City Council, and for the formation of the Moreno Valley Community Services District. That ballot asked voters in Measure G to decide whether future members of the City Council would be elected *by* or *from* districts. Election *"by districts"* means that Council Members must reside in that district and are elected by voters who only reside within that district. Election *"from districts"* means that Council Members must reside in that district, but they are elected by all voters in the City. Measure G passed with a majority of voters deciding that all future City Council Members would be elected *by* districts.

Pursuant to Government Code section 36801, all Moreno Valley City Councils have selected the Mayor from amongst themselves.

In 2010, the City Council placed two advisory ballot measures before the voters. The first advisory ballot measure asked "Do you support changing to an elected Mayor rather than one appointed by the City Council?" The second advisory ballot measure asked "Whether or not you support changing to an elected Mayor, should the City Council call a binding election for voters to decide the issue?" Both measures received a majority "yes" vote.

What Power Does A Mayor Have?

The Office of Mayor in a general law city has only those powers granted and conferred by state law. The powers of the Office of Mayor in a general law city are signing official documents, administering oaths, ceremonial functions, presiding over meetings of the agency, and appointments of members of boards and commissions. In addition, the Office of Mayor has all other powers and duties of a council member. Therefore, in general law cities, an elected Mayor has no greater power than an appointed Mayor.

Charter cities, on the other hand, can expand or contract the powers and duties of the Office of Mayor in the charter. A few large cities, such as Los Angeles and Oakland, have expanded the powers and duties of the Office of Mayor. That form of government is the Mayor-Council form of government and is commonly referred to as a "strong mayor." Only charter cities could adopt the Mayor-

Council form of government and expand the powers and duties of the Office of Mayor.

What is the Procedure to Change to a Directly Elected Mayor in a General Law City?

To change from the current method of the City Council selecting a Mayor to election of the Mayor by the voters, certain ballot questions and an ordinance must be submitted to the voters for their approval. Govt. Code §34871, §34900. At a general or special election, the electors of the City may determine whether to have a directly elected Mayor and may also determine the length of the term of office of such elected Mayor. Govt. Code §34900. General law cities proposing to have an elected Mayor must also choose whether to have four, six, or eight City Council districts. Govt. Code §34871. The ballot measures for the election on the issue would be in substantially the following form:

> Shall the electors elect a Mayor and ____ City Council Members? Yes or No
> Shall the term of office of Mayor be two years? Yes or No
> Shall the term of office of Mayor be four years? Yes or No

At the same election, the City Council must also submit an ordinance to the voters for approval. That ordinance "shall state the number of legislative districts, describe the boundaries of each, number them, and state whether members of the legislative body shall be elected ... by or from districts except for an elective mayor", who shall be elected at large. Govt. Code §§34871-34872. Pursuant to Government Code section 34877, the ballot measure for the ordinance must be in substantially the following form:

> Shall members of the legislative body of the City of Moreno Valley be elected by (or from) districts described in Ordinance No. _____, and the Mayor of the City of Moreno Valley be elected on a citywide basis by the voters of the entire city? Yes or No

Before being submitted to the voters for approval, the proposed ordinance must first be submitted to the Planning Commission to make findings. Following the action by the Planning Commission, the proposed ordinance would be brought to the City Council, along with proposed ballot measures, for direction to submit the measures to the Riverside County Registrar of Voters to be included in the next

municipal general election, or special election held for that purpose at least no later than 88 days prior to the date of the election. Govt. Code §34871; §34901.

If the City is going to elect a Mayor and the election of the remaining Council Members for four-year terms are not evenly staggered in the election cycle, the City Council may, on a one time basis only and prior to the first day for circulating nomination papers for the municipal general election, designate one of the Council Member seats appearing on the municipal general election, other than the office of Mayor, to serve a two-year term until the next municipal general election. At all subsequent elections, that Council District seat shall serve a four-year term. For example, if the City Council directs that the City should have eight City Council districts, then one of the City Council districts (probably a newly created City Council district) will have to be designated as a two-year term by the City Council prior to the first day for the circulation of nomination papers for the next municipal general election for that City Council district. At the next succeeding municipal general election and thereafter, the Council Member from the City Council district so designated shall serve a four-year term.

What Compensation Would An Elected Mayor Receive?

An elected Mayor is a member of the City Council and would receive the same compensation as any other member of the City Council. An elected Mayor may, but is not required to, receive compensation in addition to the compensation established for Council Members. Govt. Code §36516.1. Such additional compensation may be provided by an ordinance adopted by the City Council or by a majority vote of the electors voting on the proposition at a municipal election. Additional compensation established by ordinance of the City Council may be increased or decreased by ordinance of the City Council. Additional compensation established by a vote of the electors can only be changed by a vote of the electors.

Council/Staff Workshop
Council Chamber, February 2, 2013

Topic: **Term Limits and Campaign Finance Reform**

Term Limits

Background:

- CA Govt. Code section 36502(b) states that voters can establish term limits for the city council or an elected mayor.
- A term limit measure may be placed on a ballot as a City Council proposed measure or as an initiative measure.
- Term limits can only be applied prospectively (may only apply to terms served after the effective date of the measure).
- A 2011 City of Lompoc survey indicates that, of the 481 California cities that existed at that time, 98 had term limits (survey attached).
- The majority of the term limits established for California Mayors and/or Council Members is 2 consecutive 4-Year Terms with a minimum 2-year break before they can seek reelection again. Some impose lifetime bans once the terms have been served.

Discussion

- Timing: If approved by voters in 2014 would apply to Council Members elected in 2016
- How many consecutive terms?
- Should a "break" or lifetime ban be imposed once terms are served?

Campaign Finance Reform

Background:

- The Political Reform Act imposes contribution limits for state candidates and requires all candidates and committees to disclose campaign contributions and expenditures.
- The Act leaves contribution limits for local candidates up to local governments. Numerous cities have passed ordinances creating contribution limits and other requirements (list attached). Limitations may also be enacted via ballot measure.

Discussion

- Expenditure limits
  - Involuntary expenditure limits are never allowed
  - Voluntary expenditure limits cannot be coercive
- Contribution limits
  - Cannot be too low (candidates must be able to conduct an effective campaign)
  - Should have a cost of living adjustment

- Contribution limits (continued)
  - Must be supported by a factual record demonstrating the need to prevent corruption or the appearance of corruption (for example, be prepared if challenged to cite specific instances of campaign violations, demonstrate voter approval of limits, etc.)
  - Differing contribution limits for the same office are highly suspect (for example, a city shouldn't allow candidates who accept voluntary expenditure limits to receive higher contributions than candidates who do not voluntarily limit their spending)
  - Cannot limit contributions to independent expenditure committees
- Sample ordinance attached: City of Murrieta Campaign Contributions and Voluntary Expenditure Limits

Topic: **Municipal Regulation of Local Campaigns**

Background:

- Contribution limits (restricting contributions to city council candidates to $100-$500 appears to be defensible).
- Expenditures by non-candidates (there is a long and growing line of Supreme Court cases concluding that limitations on independent expenditures are unconstitutional).
- Restrictions on Corporate Contributions (cities might be able prohibit all non-political party, corporate contributions to candidates when the restrictiveness of the regulatory scheme as a whole is considered).
- Contributions to Independent Expenditure Committees (Restrictions on contributions to independent expenditure committees that are not closely linked to a candidate, such as through a political party, have recently been deemed unconstitutional absent special findings on corrupting influence of such contributions).
- Timing of Contributions
- Reporting & Disclosure Requirements
- Ethics Commissions
- See attached memorandum.

Discussion:

- Contribution limits.
- Expenditures by non-candidates.
- Restrictions on Corporate Contributions.

Council/Staff Workshop
Council Chamber, February 2, 2013

- Contributions to Independent Expenditure Committees.
- Timing of Contributions.
- Reporting & Disclosure Requirements.
- Ethics Commission.

Chapter 2.05
CAMPAIGN CONTRIBUTION AND VOLUNTARY EXPENDITURE LIMITS

Sections:

2.05.010 Purpose and intent.

2.05.020 Relation to Political Reform Act of 1974.

2.05.030 Definitions.

2.05.040 Limitations on campaign contributions.

2.05.050 Voluntary expenditure ceiling.

2.05.060 Violation and penalty.

2.05.010 Purpose and intent.

High costs and large campaign contributions associated with campaigns for local elective office can undermine the public's trust and confidence in the electoral process and lead to unfair competition between candidates. It is the intent of this chapter to promote the small town atmosphere of local elections consistent with community values and to end the fundraising "race" by lowering campaign costs and slowing the increase in campaign spending by implementing comprehensive campaign finance reforms including a voluntary expenditure ceiling, mandatory contribution limits and an effective enforcement mechanism.

In furtherance of those goals, a reasonable campaign contribution limitation and a voluntary campaign expenditure limitation are hereby enacted that are similar to those enacted by other communities. In those communities, such limitations have not inhibited city council candidates' ability to conduct meaningful and effective campaigns, but they have limited the appearance and incidents of corruption that have been experienced.

The council finds that the city may enact an ordinance limiting campaign contributions in municipal elections as provided by Section 10202 of the Elections Code of the state. Further, pursuant to Section 81013 of the Government Code of the state, it is determined that the additional requirements imposed by this chapter do not preclude any person from complying with the Political Reform Act of 1974, being California Government Code Sections 81000 - 81016.

(Ord. 231 § 1 (part), 2001)

2.05.020 Relation to Political Reform Act of 1974.

This chapter is intended to be a supplement to and in no way to conflict with the Political Reform Act of 1974, being California Government Code Sections 81000 - 81016, which is codified in Title 9 of the California Government Code and its implementing regulations. Unless otherwise defined in this chapter, words and phrases have the same meanings here as those given to them by Title 9 of the California Government Code, and

as the same may be amended from time to time, and its implementing regulations, and with the interpretations of these provisions by the California Fair Political Practices Commission.

(Ord. 231 § 1 (part), 2001)

2.05.030 Definitions.

As used in this chapter:

"City council candidate" means an individual who is listed on the ballot or who has qualified to have write-in votes on his or her behalf counted by election officials, for nomination for or election to the Murrieta city council, or who receives a contribution or makes an expenditure or gives his or her consent for any other person to receive a contribution or make an expenditure with a view to bringing about his or her nomination or election to the Murrieta city council, whether or not he or she has announced his or her candidacy or filed a declaration of candidacy at such time. "Candidate" also includes any city council member who is the subject of a recall election. An individual who becomes a candidate for the Murrieta city council shall retain his or her status as a candidate until such time as that status is terminated pursuant to Section 84214 of the Government Code.

"Contribution" means any payment made for political purposes for which full and adequate consideration is not made to the donor.

1. A "contribution" includes:

a. Any goods or services received by or requested by a city council candidate at no charge or at a discount from the fair market value, unless the discount is given in the regular course of business to members of the public;

b. Cash;

c. A loan or an extension of credit for more than thirty (30) days, other than loans from financial institutions given in the normal course of business.

2. A "payment made for political purposes" is a payment made:

a. For the purpose of influencing or attempting to influence the action of the voters for or against the nomination or election of a city council candidate; or

b. Received by or made at the request of a city council candidate.

(Ord. 231 § 1 (part), 2001)

2.05.040 Limitations on campaign contributions.

A. Declaration of Candidacy. No person may make, and no candidate for city of Murrieta elective office and the controlled committee of that candidate may solicit, accept or receive, any campaign contribution until a FPPC Form 501, Candidate Intention Statement, has been filed. However, Form 501 is not required if no contributions are received and the only expenditure is from personal funds for the candidates statement in the sample ballot.

B. Contribution Limits.

MV00250594

1. Candidates or controlled committees who agree to limit their campaign expenditures pursuant to Section 2.05.050 may accept contributions of up to one thousand dollars ($1,000.00) from any single source in any single election. This contribution will be adjusted annually following the November, 2006 election in accordance with Section 2.05.040B.3.

2. Candidates or controlled committees who do not agree to limit their campaign expenditures pursuant to Section 2.05.050 may accept contributions of up to five hundred dollars ($500.00) from any single source in any single election. This contribution will be adjusted annually following the November, 2006 election in accordance with Section 2.05.040B.3.

3. The contribution limits established in this subsection shall be automatically adjusted annually, following the November, 2001 election, based on the Consumer Price Index for "all urban consumers" from April to April among U.S. West and/or Los Angeles, Long Beach, Anaheim metropolitan area. Such adjustments shall be rounded to the nearest ten and no/100ths dollar ($10.00) amount.

C. Return of Contributions. A contribution will not be considered to be received or accepted if it is not cashed, negotiated, or deposited, and is returned to the donor before the closing date of the campaign statement on which the contribution would otherwise be reported.

D. Family Contributions. Contributions by a husband and wife shall be treated as contributions by separate persons and shall not be aggregated. Contributions by children under eighteen (18) years of age are presumed to be a contribution from the parent or guardian of the child.

E. Personal Funds. The limitations of this subsection shall not apply to contributions of a candidate's personal funds to his or her controlled campaign committee on behalf of his or her own candidacy, but shall apply to contributions from the candidate's spouse.

(Ord. 301 § 1-3, 2004; Ord. 231 § 1 (part), 2001)

2.05.050 Voluntary expenditure ceiling.

A. Amount Per Registered Voter. No candidate or controlled committee who voluntarily accepts expenditure ceilings shall make campaign expenditures in excess of an amount equal to one dollar and fifty cents ($1.50) per registered voter of the city of Murrieta. The number of registered voters for such calculation shall be determined by the city clerk from the last available certification of registered voters to the California Secretary of State on the first day of the nomination campaign period.

B. Statement of Acceptance or Rejection. Each candidate for city elective office must file with the city clerk a statement of acceptance or rejection of the voluntary expenditure ceiling prior to accepting any contributions.

C. Relationship to Contribution Limits. Any candidate for city elective office who accepts the voluntary expenditure ceiling or any controlled campaign committee of that candidate may not make campaign expenditures cumulatively in excess of the voluntary expenditure ceiling.

1. If a candidate accepts such campaign expenditure limits, the candidate shall be subject to the campaign contribution limit set forth in Section 2.05.040(B)(1).

2. If a candidate rejects such campaign expenditure limits, the candidate shall be subject to the campaign contribution limits set forth in Section 2.05.040(B)(2).

D. Committee Expenditures. Expenditures by a candidate's controlled committee shall be deemed

MV00250595

expenditures by the candidate for the purposes of this chapter.

(Ord. 301 § 4, 2004; Ord. 231 § 1 (part), 2001)

2.05.060 Violation and penalty.

In accordance with the provisions of Section 1.32.010 et seq. of the Murrieta Municipal Code, violations of this chapter shall be prosecuted as misdemeanors.

(Ord. 231 § 1 (part), 2001)

Council/Staff Workshop
Council Chamber, February 2, 2013

Topic: **Municipal Regulation of Local Campaigns**

Background:

- Contribution limits (restricting contributions to city council candidates to $100-$500 appears to be defensible).
- Expenditures by non-candidates (there is a long and growing line of Supreme Court cases concluding that limitations on independent expenditures are unconstitutional).
- Restrictions on Corporate Contributions (cities might be able prohibit all non-political party, corporate contributions to candidates when the restrictiveness of the regulatory scheme as a whole is considered).
- Contributions to Independent Expenditure Committees (Restrictions on contributions to independent expenditure committees that are not closely linked to a candidate, such as through a political party, have recently been deemed unconstitutional absent special findings on corrupting influence of such contributions).
- Timing of Contributions
- Reporting & Disclosure Requirements
- Ethics Commissions
- See attached memorandum.

Discussion:

- Contribution limits.
- Expenditures by non-candidates.
- Restrictions on Corporate Contributions.
- Contributions to Independent Expenditure Committees.
- Timing of Contributions.
- Reporting & Disclosure Requirements.
- Ethics Commission.

Establishment of Term Limits

Under current law, a city council may not unilaterally alter term limits. In both a general law and charter city, any proposed term limit "shall apply prospectively only and shall not become operative unless it is submitted to the electors of the city at a regularly scheduled election and a majority of the votes cast on the question favor the adoption of the proposal." Gov. Code § 36502(b).

Municipal Regulation of Local Campaigns

Under California law, both general law and charter cities have broad and near-equivalent authority to regulate campaigns and campaign contributions for local elective office if they do not impair compliance with the Political Reform Act ("the Act"). Govt. Code § 82008; 35 Ops. Cal. Atty. Gen. 230 (1960). The Act establishes disclosure requirements but does not limit contributions to candidates for local office. This area is left to local jurisdictions. But any such regulations must not impinge on the free speech and associative rights of the First Amendment.

Under the United States Supreme Court case *Buckley v. Valeo*, and its progeny, cities may restrict contributions to candidates, their controlled committees and expenditures coordinated with candidates in order to protect against corruption or the perception of corruption by "means closely drawn to avoid unnecessary abridgement of associational freedoms." (1976) 424 U.S. 1, 25, 45.

"[P]reventing corruption or the appearance of corruption are the only legitimate and compelling government interests thus far identified for restricting campaign finances." *Long Beach Area Chamber of Commerce v. City of Long Beach* (9th Cir. 2010) 603 F.3d 684, 694;[1] see also *Thalheimer v. City of San Diego* (9th Cir. 2011) 645 F.3d 1109, 1119 (internal quotation omitted); *Club's Freedom Club PAC v. Bennett* (2011) 131 S. Ct. 2806 (no compelling state interest in leveling the playing field by providing matching funds to candidates who accept campaign restrictions

[1] While the courts are willing to accept a wide range of sources of evidence—*Nixon v. Shrink Missouri Government PAC* (2000) 528 U.S. 377, 393-94 (newspaper articles on kickbacks); *Buckley v. Valeo* (D.C. Cir. 1975) 519 F.2d 821, 837-40 (testimony by politicians regarding pressure to seek large donations)—a merely hypothetical risk of corruption is not sufficient. *Citizens for Clean Govt. v. City of San Diego* (9th Cir. 2007) 474 F.3d 647.

against candidates who do not). More recently in *Citizens United v. Federal Election Commission* (2010) 558 U.S. 310, the Supreme Court has "narrowed the scope of the anti-corruption rationale to cover quid pro quo corruption only, as opposed to money spent to obtain `influence over or access to elected officials.'"

Contribution Limits

The Supreme Court has upheld a contribution limit of $275 for state-level candidates representing fewer than 100,000 people, explaining that it "rejected the contention that $1,000, or any other amount, was a constitutional minimum below which legislatures could not regulate[]" and instead considered whether "the contribution limitation is so radical in effect as to render political association ineffective, drive the sound of a candidate's voice below the level of notice, and render contributions pointless." *Nixon v. Shrink Missouri Govt. PAC* (2000) 528 U.S. 377, 397.

In a 2005 opinion, however, the Court struck down Vermont's candidate contribution limits of $400 per two-year election cycle, which included both a primary and general election, for the office of governor and lower limits for other statewide offices. *Randall v. Sorrell* (2005) 548 U.S. 230, 254. The Court applied a five-factor test (lack of distinction between political parties and individuals, extremely low dollar figures, inclusion of volunteer expenses as contributions, lack of inflation adjustment and no special justification for low figures based on the funds necessary to adequately compete) to determine that the contribution limit was not "closely drawn."

Based on *Nixon* and *Randall*, restricting contributions to city council candidates to $100-$500 appears to be defensible. The court in *Major v. Silna* (2005) 134 Cal. App. 4th 1485, 1502-03, accepted that the general law city of Malibu could prohibit contributions over $100. See City of Malibu Municipal Code, Chapter 2.20; Govt. Code § 84300 (prohibiting $100 cash contributions).

Expenditures by Non-Candidates

Limits on contributions by voters or corporations pertaining to ballot initiatives are subject to strict scrutiny and generally unconstitutional. *Citizens Against Rent Control v. City of Berkeley* (1981) 454 U.S. 290, 297-299. Additionally, a "[c]ity may not impose financial limits on [a] PACs' independent expenditures. This conclusion is compelled by the long and growing line of Supreme Court cases

concluding that limitations on independent expenditures are unconstitutional." *Long Beach Area Chamber of Commerce v. City of Long Beach* (9th Cir. 2010) 603 F.3d 684, 695.

Restrictions on Corporate Contributions

Despite the court's holding in *Long Beach Area Chamber of Commerce*, and the Supreme Court's recent expansion of First Amendment rights to corporations in *Citizens United v. Federal Election Commission* (2010) 558 U.S. 310, 330, if an anti-corruption justification is provided, cities may prohibit all non-political party, corporate contributions (including from PACs) to candidates. *Thalheimer v. City of San Diego* (9th Cir. 2011) 645 F.3d 1109, 1126. The Ninth Circuit accepted prohibiting corporate contributions as a valid means of preventing illegal circumventing of campaign restrictions. *Id.* at 1124. However, the court predicated its acceptance of this ban on other avenues of expression, such as direct expenditures and unlimited individual contributions. *Id.* at 1125. While the implication is that bans on corporate contributions will be upheld even if individual contributions are limited, courts will also consider the restrictiveness of the regulatory scheme as a whole.

Contributions to Independent Expenditure Committees

Restrictions on contributions to independent expenditure committees (i.e. committees that advocate or oppose the election of a candidate without any coordination with the candidate) that are not closely linked to a candidate, such as through a political party, have recently been deemed unconstitutional absent special findings on corrupting influence of such contributions. *Long Beach Area Chamber of Commerce,* 603 F.3d at 697-98 ("We are not told whether the candidate ever had any contact with the IEC, whether the money received or spent by the IEC had any corrupting influence on City politics, whether the voters suspected the IEC of corrupting the political process, or even whether the candidate won the race.")(This calls into question traditional restrictions: see e.g. Govt. Code § 85303 (yearly $5,000 cap for independent expenditure committees making contributions to candidates)).

Timing of Contributions

In *Thalheimer v. City of San Diego*, the Ninth Circuit upheld the City of San Diego's ban on contributions outside of the twelve-month pre-election window on the basis of the City's argument that the temporal ban "reduces actual and perceived

corruption because those contributions made near an election are clearer expressions of political speech, whereas off-year contributions are more likely linked to business the donor has before the city, thus creating the appearance of quid pro quo 'corruption by the sale of influence.'" 645 F.3d at 1121. The City of San Jose restricts contributions to 180 days before the election.

Reporting & Disclosure Requirements

Cities have discretion to impose disclosure and reporting requirements beyond those provided in Government Code section 84300 *et seq*. Cities that establish local disclosure standards must file their rules with the Fair Political Practices Commission. Govt. Code § 81009.5(a).

Ethics Commissions

Los Angeles, San Jose, San Diego, San Francisco and Oakland have ethics commission to administratively enforce campaign laws which arguably ensure a higher rate of oversight than under state law alone. However, city staff might have to referee candidate disputes.

Council/Staff Workshop

Council Chamber February 2, 2013

Topic: 3-Year Economic Development Action Plan

Background:

- In April 20011, Moreno Valley approved a 2-Year Economic Development (ED) Action Plan to capitalize on economic development opportunities in the short-term.
- The 2-Year ED Action Plan identified goal and objectives to advance economic development efforts in five geographic areas of the City including 1) TownGate, 2) Centerpointe Business Park, 3) South Moreno Valley Industrial Area, 4) City Center and 5) Eastern Moreno Valley-Rancho Belago.
- The 2-Year ED Action Plan also embraced the idea of strategically focusing the funding of projects within the Capital Improvement Program (CIP) to areas that can leverage economic development efforts.
- The advancement of a number of projects identified in the ED Action has been accomplished during the initial 15 months of the 2-Year ED Action Plan.

Discussion:

- A new 3-Year ED Action Plan has been drafted that would expand the focus of the ED Action Plan to eight geographic areas including 1) Edgemont, 2) TownGate, 3) Festival, 4) Centerpointe Business Park, 5) South Moreno Valley Industrial Area, 6) City Center & Medical/Healthcare Corridor, 7) World Logistics Center at Rancho Belago and 8) SR 60 East Corridor.
- The ED Action Plan is also recommended to include ten objectives aimed at increasing overall economic development efforts with 1) Business Attraction, 2) Business Retention and 3) Business Expansion.
- The preliminary schedule for the consideration and approval of the 3-Year ED Action Plan includes:

    1. Economic Development Subcommittee will review and evaluate the ED Action Plan on March 14
    2. ED Action Plan will be discussed at the April 2 City Council Study Session
    3. ED Action Plan will be considered for approval by the City Council on April 23

ECONOMIC DEVELOPMENT ACTION PLAN

2011-2013

SUMMARY OF INITIAL 15 MONTHS

JOBS CREATED IN 5 EDAP AREAS

- Distribution/Manufacturing 1,522
- Office/Healthcare 395
- Automobile Dealerships 77
- Retail/Restaurant 567

Total 2,560

CONSTRUCTION JOBS CREATED

- 5,736

Harbor Freight Tools

- Opened new 779,016 S.F. Distribution Center
- Opened 2nd DC-691,960 S.F
- Employ 430
- 507,720 S.F. expansion approved

Ceterpointe & South MV Industrial & Logistics Development

- 3.23 million S.F. of Industrial Buildings started construction
- 3 million S.F. planned to start construction
- 10 million S.F. in planning process

Eastern Moreno Valley Development

- Skechers USA Opens
- WestRidge approved/Negotiations Underway for 850,000 S.F. User
- World Logistics Center Planning Underway (EIR & SP)

City Center Development

- $75 million in CIP Projects
- Planning and Marketing for expansion of Medical/Healthcare Corridor
- RCRMC & Kaiser expansions
- Moreno Valley College Expansion
- Moreno Valley Auto Mall Expansion & Upgrade
- LA Fitness Coming to Moreno Beach Plaza

TownGate

- Opening of New Retail Stores—TJ Maxx, HomeGoods, Rue 21
- Opening of New Restaurants—Buffalo Wild Wings, Five Guys Burgers, Chipotle
- Opening of Round 1

ECONOMIC DEVELOPMENT ACTION PLAN 2013-2016

An updated Economic Development Action Plan has been formulated to capitalize on near-term opportunities in eight geographic areas during a 3-year time frame. The focus of the updated Economic Development Action Plan includes the following goals and objectives in the eight recommended geographic areas:

Edgemont

Pursue the revitalization of the Edgemont area through the adoption of a multi-faceted redevelopment strategy.

- Work towards the upgrading the water system to ensure sufficient water pressure to allow for new development projects in this area.
- Use Neighborhood Stabilization program funding to acquire and land bank foreclosed properties-both single-family and multi-family residential.
- Conduct quarterly Neighborhood Clean-up programs.
- Retain a planning consultant to evaluate land uses to establish the highest and best land use designations for redevelopment efforts.
- Pursue a master developer to assist with the planning for redevelopment in the Edgemont area.

TownGate

Collaborate with the Fritz Duda Company and CW Capital towards stabilizing, upgrading and expanding retail and restaurant development opportunities in the TownGate area including the Moreno Valley Mall and the five shopping centers surrounding the regional mall including TownGate Center, TownGate Plaza, TownGate Crossing, TownGate Promenade and TownGate Square

- Continue to work with CW Capital-the owner of the Moreno Valley Mall in upgrading and attracting new users to the regional mall.
- Facilitate the planning and marketing for a 30,000 S.F. expansion project at the Moreno Valley Mall to include a new restaurant, retail and plaza area next to Harkins Theatres.
- Work with the Fritz Duda Company in the re-occupancy of vacant retail spaces and the overall stabilization of TownGate Center including new uses such as ULTA Beauty, BevMo and Planet Fitness.
- Assist in the processing of development plans for new projects in TownGate shopping centers including 24 Hour Fitness Sport, Miguels Jr. Mexican Restaurant and Richie's Real American Diner.
- Cooperate with the Fritz Duda Company in pursuing the continued development of a 'Restaurant Row' area in TownGate Promenade.

Festival

Cooperate with the Kodash Company and Miller Family Trust-the ownership of the Festival Center, to explore ways to redevelop or enhance the viability of the Festival Center including rehabilitation efforts and incorporating new appropriate land uses.

- Help facilitate attracting new users and the upgrade of the Festival Center.
- Explore developing a new residential component at the Festival Center.
- Explore possibilities with Moreno Valley Unified School District of developing new education facilities at Festival.
- Evaluate developing sports or recreation facilities at Festival for use by the community to create a mixed-use development concept.

Centerpointe Business Park

Work with Ridge Property Trust and USAA Real Estate to expand development and business opportunities aimed at completing the Centerpointe Business Park.

- Assist Ridge Property Trust and Harbor Freight Tools (HFT) in the 507,720 S.F. expansion of HFT's Distribution Center at the NW corner of Cactus and Graham.
- Facilitate efforts for a user to occupy USAA's new 522,774 S.F. Centerpointe Logistics Center at the NW corner of Cactus and Frederick.
- Help advance the development of Ridge Property Trust's approved 607,960 S.F. industrial building at the NW corner of Brodiaea and Graham.
- Facilitate expansion plans for the Serta Mattress facility.
- Work with the owner of the Plaza Del Sol Center in stabilizing the center to provide needed shopping and restaurant opportunities in the Centerpointe Business Park area.

South Moreno Valley Industrial Area

Work with seven developers (Alere Property Group, First Industrial Realty Trust, IDS Real Estate Group, Panattoni Development Co., Sare-REGIS Group, Trammell Crow Company & Western RealCo) on new business attraction and development projects in the South Moreno Valley Industrial Area.

- Work with IDS Real Estate Group in securing a business user for the new 769,320 S.F. Nandina Distribution Center.
- Facilitate the completion of Trammell Crow Company's 1,250,000 S.F. I-215 Logistics Center project, including securing a user.
- Cooperate with First Industrial Realty Trust and Panattoni Development Co. in pursuing the speculative development of two industrial buildings with a total of nearly 2 million S.F.
- Assist Sares-REGIS Group and Western RealCo in build-to-suit opportunities for two approved industrial building projects with a total of more than 3.6 million S.F.
- Work with Alere Property Group, First Industrial Realty Trust and Trammell Crow Co. in the planning and entitlements for several new industrial projects with a proposed 4 million S.F.

City Center Medical/Healthcare Corridor

Cooperate with Riverside County Regional Medical Center (RCRMC), Kaiser Permanente, Moreno Valley College and Highland Fairview to help facilitate the further expansion of the City of Moreno Valley's Medical/Healthcare Corridor on Nason Street & Iris Avenue.

- Assist Riverside County with the implementation of the Master Plan for expanding the Riverside County Regional Medical Center including a new Trauma & Urgent Care, relocated & upgraded Operations Support building and facilities for the new UCR School of Medicine.
- Facilitate plans by Kaiser Permanente to expand the Moreno Valley Community Hospital with an expansion and upgrade of the Emergency Room facilities and development of a planned second tower.
- Cooperate with Moreno Valley College and Riverside Community College District in the development of a proposed 30,000 S.F. allied health sciences facility in the medical-healthcare corridor.
- Support the planning and marketing efforts of Highland Fairview to pursue the creation of a master planned 200-acre healthcare campus to be situated within the medical corridor and between the two existing hospitals-RCRMC and Kaiser's Community Hospital.
- Continue the planning and funding of capital improvement projects that will widen and construct the ultimate improvements on Nason Street from SR 60 to Iris Avenue to provide critical access to the two hospitals and the medical/healthcare corridor.

World Logistics Center at Rancho Belago

Collaborate with Highland Fairview in the development of the World Logistics Center—a 41.6 million S.F. master planned corporate park proposed to be developed on 2,700 acres in the Rancho Belago area of eastern Moreno Valley.

- Process an Environmental Impact Report and preliminary development plans for the World Logistics Center in eastern Moreno Valley—south of SR 60 and east of Redlands Boulevard to Gilman Springs Road.
- Assist in the drafting of a Specific Plan that will guide the orderly development for of World Logistics Center.
- Cooperate with Highland Fairview in the formulation of a Development Agreement to create a public-private partnership to help facilitate the development of new public infrastructure in eastern Moreno Valley associated with the World Logistics Center including roads, trails, utilities, storm water protection and fire protection facilities.
- Work with Highland Fairview in branding the World Logistics Center as one of the largest e-commerce focused development projects in the U.S.

SR 60 East Corridor

Pursue new development opportunities along the SR 60 East corridor—from Nason Street to the easterly City limits.

- Prepare an Overlay Study to determine the 'highest and best' land uses along the SR 60 East Corridor.
- Assist property owners and developers in marketing development opportunities along the SR 60 East Corridor.
- Work on opportunities to expand the Moreno Valley Auto Mall.
- Facilitate the stabilization and further development of Stoneridge Towne Centre and Moreno Beach Plaza.

In addition to activities in the eight geographic areas, a series of objectives are being recommended to assist with overall economic development efforts to assist with Business Attraction, Business Retention and Business Expansion including the following:

- Continue to coordinate the Capital Program (CIP) with economic development efforts
- Expand the Development Ombudsman Program to provide a comprehensive range of business support services for developers and businesses
- Restart the Business Visitation Program, including the participation of the Mayor in 1 on 1 visits annually with the Top 50 with the major employers in the community
- Implement new software that will enable business owners, developers, contractors and residents to electronically submit and manage their plans with the City of Moreno Valley
- Utilize the Chambers of Commerce to expand participation in the Small Business Counseling Services provided by the Small Business Development Center (SBDC)
- Work with the Community Investment Corporation and the Chambers of Commerce in a business incubator and micro-business loan program
- Pursue the reuse of vacant anchor retail spaces, including the use of the new ED-Retail Anchor Reuse Incentive Program
- Explore revising the scopes of work with the Agreements the Chamber of Commerce to better focus on business retention and expansion activities, including expansion of Shop MoVal, as well as establishing a program to promote more business to business transactions in Moreno Valley
- Utilize the Chambers of Commerce to undertake a survey of the small business community on ways to improve the business climate in Moreno Valley
- Pursue the creation of a Business Support Advisory Council comprised of major employers in Moreno Valley

Council/Staff Workshop
Council Chamber, February 2, 2013

Topic: **Livability/Quality of Life Programming**

Background:

- Improving the quality of life for residents is a basic objective for local government officials.
- The long-standing "City Council Goals" generally speak to this focus:
  - Advocacy
  - Revenue Diversification and Preservation
  - Public Safety
  - Public Facilities and Capital Projects
  - Positive Environment
  - Community Image, Neighborhood Pride and Cleanliness
- In 1990 the Council established a "Blue Ribbon Committee for Moreno Valley Future Horizons"; applications were accepted but the Committee was never formed.
- Community Satisfaction Surveys
  - Performed annually; last one done in 2007:
    - 66% believed Moreno Valley was an "excellent" or "good place to live"
    - 40% believed the quality of life had improved over the previous few years
    - 59% gave positive ratings to the City for providing municipal services
    - The most important City services were "Fire and paramedic services," "police protection," "pick-up of garbage, yard waste, and recyclables," and "removal of graffiti."

Discussion

- How to define "Livability" and "Quality of Life"
  - Forbes measures the following factors:
    - Income growth
    - Current unemployment rate
    - Cost of living
    - Crime rate
    - Arts and culture
- Basic expectations (discuss City's efforts to date and planned initiatives for these):
  - Feel safe from crime
    - Crime stats
  - Live in affordable, well-maintained neighborhoods
    - Foreclosure strike team, squatter strike team
  - Access to quality education
    - Logistics training initiative
    - Mayor's Advisory Committee on Education: Goal of increasing grad rates

- Access to quality employment
  - Economic Development Action Plan
- Further define "Livability" and "Quality of Life" beyond the basic expectations
  - Arts and Culture
  - Recreation
  - Library

"Riverside County Sheriff's Department and it's contract agency (Moreno Valley) implemented a records management system mid-year 1999 and experienced technical problems with the system. Totals reported for 1999 were not valid and should not be used to make comparisons. Therefore, to maintain comparability of 2000 data with 1999 data, counts are shown but not included in the subtotals or total selected jurisdiction counts."

Note * 2: Shown above is the approximate % change for 1999 using 1998 v 2000 comparison. Per Lt. Hill at Riverside County Sheriff's Technical Services Bureau (TSB): "The Riverside County Sheriff's Department implemented a new records management system in 1999 and experienced technical problems with the system. Totals reported for 1999 were not valid and should not be used to make comparisons." What is shown is an average decrease in crime for 1999 by percentages using 1998 as base year and 2000 as the comparison year and then divide the year 2000 percentages by 2 to show an average for each year, 1999 & 2000.

Council/Staff Workshop
Council Chamber, February 2, 2013

Topic: **3-Year Budget**

3-Year Budget Process:

- Walk through major steps ...
  - General Schedule ...
  - Level of City Council Review ... one-on-one briefings, Study Session Review of major funds; regular session presentation and review prior to adoption

Council Review and Discussion of Budget Priorities

- Key Policy Direction for Budget Development
  - Balance the Budget in FY 2013-14 or
  - Maintain key service levels and GF positions, balance over a two-year period
  - Extent of Community Involvement ...

- Challenges to balancing in FY 2013-14
  - Streetlight subsidy of $1 million per year continues
  - Morrison Park Fire Station operating costs need to be funded - $1.5 million
  - DEP left about $800,000 of deficit unresolved at June 30, 2013
  - Loss of RDA has caused a cost shift to the GF
  - Solving the deficit will result in additional service and staff reductions to achieve the necessary expense reductions
  - Public Safety Contracts may exceed revenue growth of 2%

- General Fund Revenue/Tax Base continues to grow slowly overall
  - Current Year Revenue Budget is $74.5
  - Projected to grow to about $76.0 million, 2.0% growth is $1.5 million annually

- Review Expenditure Challenges in FY 2014-15 and FY 2015-16
  - What are major expenditures needs as revenues grow
    - Public Safety Contract growth - 3% growth in PD and Fire is $1.5 million annually
    - Public Safety Service Levels – Adding back one Sworn Officer is about $250,000 annually
    - Employee Compensation issues – 1% increase is $130,000 annually for GF
    - Animal Services – Service levels are proposed to be reduced to balance the budget, recent Council discussion of service levels indicates a desire to increase service levels
    - Resolve Street Light Subsidy -- $1 million annually

Council/Staff Workshop
Council Chamber, February 2, 2013

Topic: **Feasibility of a Revenue Measure**

Background/Process/Timing:

- Review the steps involved in a successful revenue measure ...
  - Develop transparency and trust in City financial data/financial management actions
  - Survey voters through telephone surveys/focus groups to determine the key issues for voters in the community, assess what type of tax measure they may be willing to support
  - Write a clear ballot measure that garners support for the measure
  - Provide a clear informational message for the community, actively provide this information to community groups and ballot measure support groups
- Present timing of issues
  - Hold during a general election with Council Candidates running, or must declare a fiscal emergency
  - Next City General Election is November 2014
    - provides time to establish community support for a measure
- Issue of General (majority vote) and Special (super-majority vote) Taxes

Discussion:

- Past Successes and Failures
  - City of Moreno Valley's history (handout)
  - See Michael Coleman's recent statewide information (handout)

- Possible Ballot Measures to Consider
  - Hotel Tax Increase (Transient Occupancy Tax)
    - Currently at 8%, neighboring cities are 11-12%
  - Street Lights Tax – Special Tax (sales tax or parcel tax)
  - Public Safety Tax – Special Tax (sales tax or parcel tax)
  - General Sales Tax – simple majority
  - Property Transfer Tax – simple majority

- Next Steps
  - Direct staff to proceed to plan and implement a strategy for a ballot measure(s)
  - Determine the date/timing of a potential ballot measure
  - Proceed to finalize voter survey/focus group study with Lew Edwards Group
  - Complete a plan with milestones and timeline for a Ballot Measure targeted toward an election date directed by City Council

- Return to Council in Study Session to discuss the results of the survey/focus groups and determine a ballot measure structure based on this information
- Conduct all City Business transparently, improve communication to the community to gain community trust and support in all actions of the City in support of a Ballot Measure

Local Revenue Measures in California

November 2012 Results

The November 6, 2012 presidential election featured 368 local measures in California on questions including land use development, government organization, bond authorizations and tax increases. Among these were 240 measures seeking approval for taxes, bonds or fees, including three by initiative. Three other measures sought by initiative to reduce previously approved taxes.

This volume of local measures is quite comparable to the number of local measures on each of the last two presidential election ballots in California. In November 2008, there were 233 revenue measures including 116 school bonds and taxes. In November 2004, there were 249 revenue measures including 86 school bonds or taxes.

K-12 schools districts and community colleges requested total of $14.5 billion in 106 separate bond measure authorizations for school bonds to construct facilities, acquire equipment and make repairs and upgrades. There were 25 measures to increase or extend school parcel taxes.

Among the 109 non-school local revenue measures were seven general obligation bond measures and 36 special taxes and parcel taxes requiring two-thirds voter approval. There were 35 proposals to extend or increase transactions and use taxes (so-called add-on sales taxes) and 24 proposals to increase or extend non-school parcel taxes.

Proposed Local Revenue Measures
November 2012

MV00250618

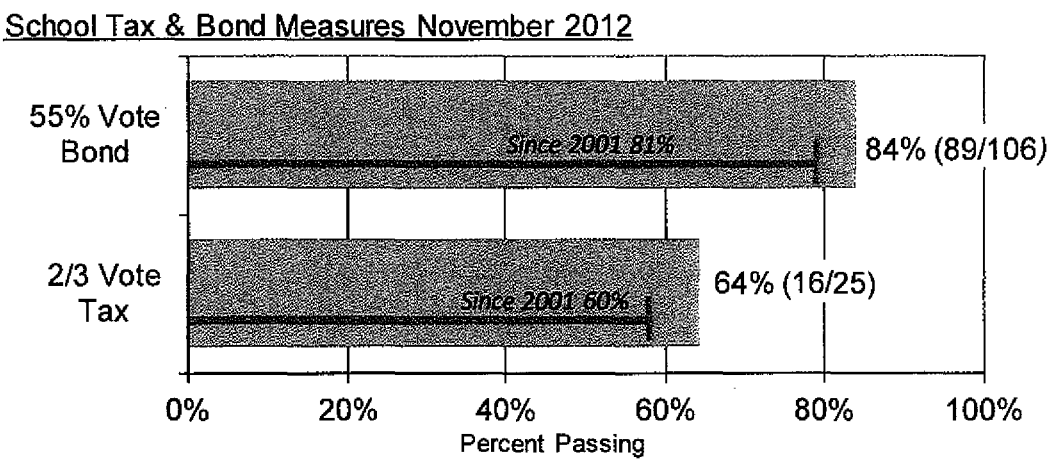
Overall Passage Rates

Following canvas updates by most county elections offices, the results of nearly all measures appear final. Since election night, the updated counts have four additional 55% school bond measures and one additional two-thirds vote school parcel tax passing. In addition, in Tuolumne County the Summerville Union High School District bond measure is undergoing a recount after falling just two votes short of 55% yes vote passage out of 4731 votes tabulated. This brings the total number of passing measures to 176 of the 240 tax/revenue measures proposed.

Local Revenue Measures November 2012

	Total	Pass	Passing
City General Tax (Majority Vote)	60	48	80%
County General Tax (Majority Vote)	6	4	67%
City SpecialTax orG.O.bond (2/3 Vote)	15	5	33%
County (Special Tax) 2/3 Vote	12	7	58%
Special District (2/3)	16	7	44%
School ParcelTax2/3	25	16	64%
School Bond 2/3 or 55%	106	89	84%
Total	240	176	73%
Redux by intitative	3	0	0%

The rate of passage of school measures slightly exceeded historic passage rates. Near final results indicate 89 of the 106 school bonds and 16 of the 25 school parcel taxes passed.

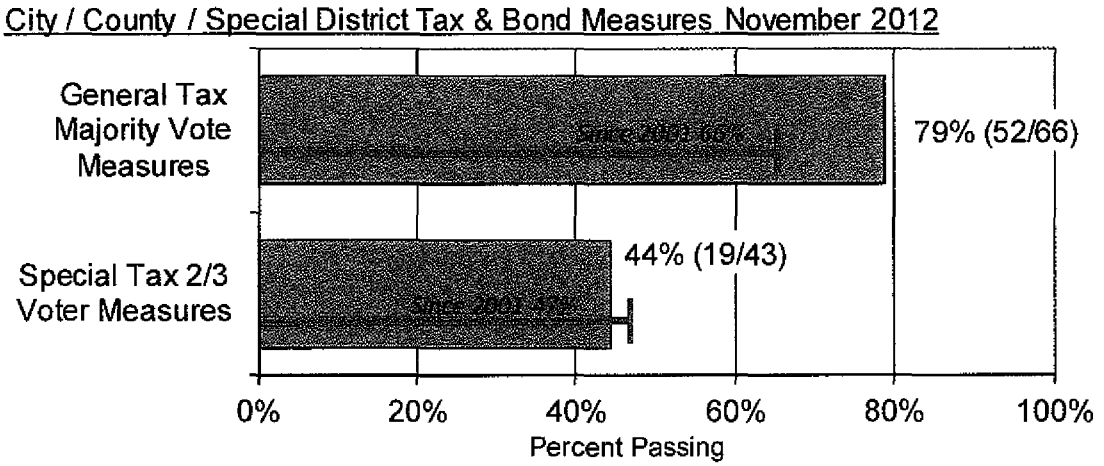


Local non-school majority vote tax measures did somewhat better this election than in prior years with 52 of 66 passing. Among the failing measures were three taxes proposed in San Diego County cities as a part of marijuana dispensary initiatives. These taxes on the sale of marijuana probably could not have been implemented had they passed.

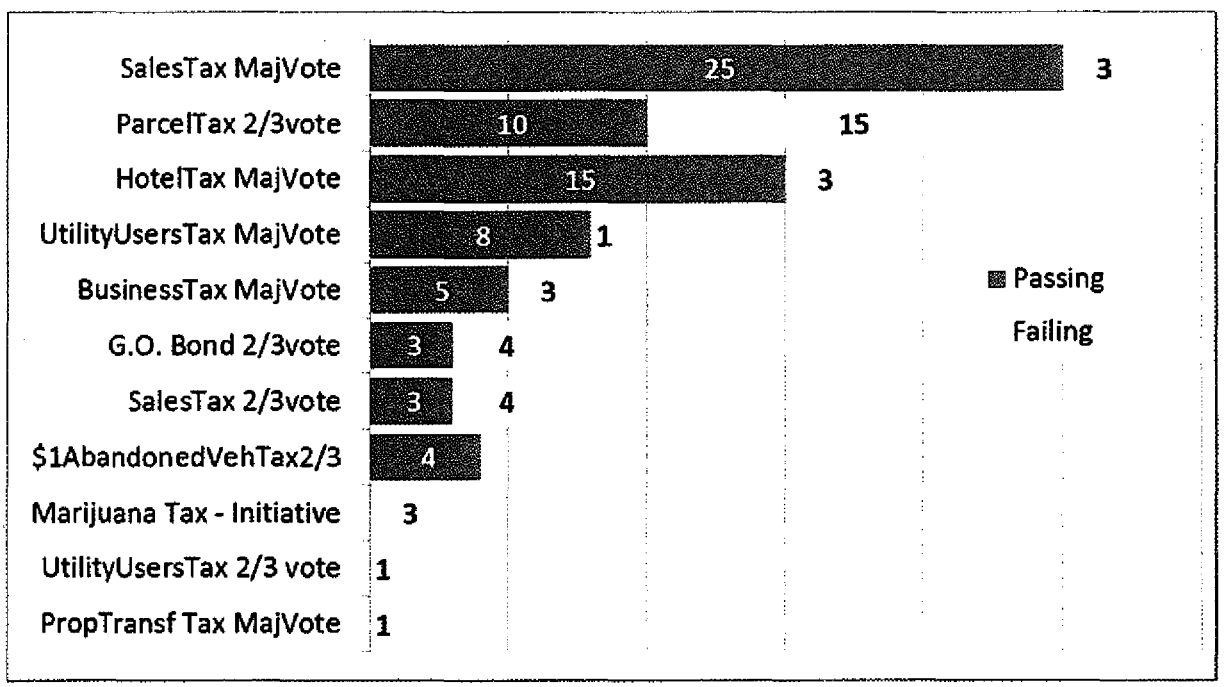
Among the 43 non-school special taxes, parcel taxes and bonds requiring two-thirds voter approval, 19 passed, a very similar passage rate compared to past elections.

© 2012 Michael Coleman

MV00250619



General purpose tax measures fared especially well, especially add-on sales taxes (local transactions and use taxes). Parcel taxes and G.O. bonds had a much more difficult time, mostly, it appears, due to the two-thirds supermajority vote thresholds. Five of the 25 non-school parcel taxes failed to even garner 50% yes votes.



© 2012 Michael Coleman

MV00250620

Local Add-On Sales Taxes (Transaction and Use Taxes)

Twenty five cities and three counties proposed general purpose majority vote add-on sales tax rates ranging from 1/8 percent in Santa Clara County to one percent in several cities. Voters approved all but three of these measures.

There were seven add-on sales tax measures earmarked for specific purposes. Five of these were county-wide measures. All seven received over 60% yes votes, but four fell short of the two-thirds approval needed including transportation measures in Alameda and Los Angeles and two measures related to roads and water quality in Lake County.

Utility User Taxes

Voters in ten cities considered measures to increase or expand utility user taxes. Several of the proposals were to modernize existing taxes on telecommunications and among these, five proposed a reduction in the tax rate as a part of effectively expanding the tax base to wireless communications. Chico is one of very few cities to have rejected this approach at the polls.

Among the ten measures, only Citrus Heights earmarked the tax for specific purposes. But voters rejected the proposed increase.

Voters in Arcata approved a novel UUT, a 45% tax on excessive electricity use aimed at home grow houses.

Utility User Taxes

Agency Name	County		Rate		%Needed	YES%	NO%

Business License Taxes

There were eight business license tax measures, including two proposals to tax sugared beverages, a new idea among local measures in California. A proposal to increase local taxes on "businesses engaged in the manufacture, piping, refining, storage and wholesale distribution of petroleum products" failed in Rialto. The sugared beverage taxes were resoundingly rejected. Companion measures in both cities that expressed the preferred use of the funds for particular programs did not help. Six other measures passed easily.

Property Transfer Tax

A proposal to increase the property transfer tax in Pomona failed. Pomona pursued the ill-advised approach of placing multiple tax measures on the ballot at once: a hotel tax, a parcel tax (2/3 vote), and this property transfer tax. All failed.

Property Transfer Taxes

Agency Name	County	Measure Na	Rate	YES%	NO%	
Pomona	Los Angeles	Measure W	from $1.10 to $2.20	24.6%	75.4%	FAIL

Parcel Taxes and Special Taxes (non-school)

There were 25 parcel taxes including 13 in special districts, ten in cities, and two in counties. Under a state constitutional provision included in Proposition 13 (1978), parcel taxes require two-thirds supermajority approval. Ten of 25 measures passed. Among these ten, six extended -- but did not increase -- existing parcel taxes.

An initiative measure to revise and reduce a fire parcel tax in Newcastle was rejected by voters in that community. The measure received 61% approval but required two-thirds approval.

City, County and Special District Parcel Taxes (2/3 vote)

Agency Name	County		Amount	Purpose	YES%	NO%

Abandoned Vehicle Abatement Taxes

© 2012 Michael Coleman

MV00250624

Four counties had measures to extend $1 per motor vehicle charges to fund abandoned vehicle abatement programs. These charges were once imposed by the County Boards of Supervisors as fees without a vote of the people. The passage of Proposition 26 in 2010 requires voter approval as taxes of any extension of these charges. All four measures passed.

Abandoned Vehicle Abatement Tax
(Fees prior to Prop26 of 2010) - 2/3 voter approval required

County of Mendocino	Measure G	$1/veh	**78.8%**	21.2%	PASS	extend
County of Butte	Measure H	$1/veh	**73.4%**	26.6%	PASS	extend
County of Calaveras	Measure B	$1/veh	**70.9%**	29.1%	PASS	extend
County of Amador	Measure U	$1/veh	**68.8%**	31.2%	PASS	extend

General Obligation Bonds

There were seven local general obligation bond measures in three cities and three special districts. The three passing measures are all in the San Francisco Bay Area. Voters in Berkeley approved a bond for critical drainage and water quality improvements but turned failed to garner the two-thirds approval needed for a parks improvement bond. A hospital bond in Fremont and a parks and environmental clean-up bond in San Francisco also passed.

City, County and Special District Bond Measures (2/3 vote)

School Parcel Taxes

School parcel taxes fared better than non-school parcel taxes. The ballot included 25 local school parcel taxes. Sixteen passed. San Leandro USD's tax passed by 24 votes after training in the election night tally. Historically, around four out of five school parcel tax measures are approved.

School Bonds

There were 106 school bond measures on the ballot for a total of over $14.5 billion in bonds. Most required 55% approval. Near final tabulations show 89 of the measures passing for bonds totaling $13.267 billion, among these a $2.8 billion bond in San Diego. In Tuolumne County the Summerville Union High School District bond measure is just two votes short of passage out of 4731 votes tabulated and is in recount.

Observations

At the local government level, voters can usually connect the direct consequences of the passage or failure of a tax measure to specific public services or facilities – rather than just dollar values. This confidence and understanding in what the money will do is essential to passing a measure. By contrast, a source of the failure of many statewide tax measures has been voter uncertainty about what the funds will truly be used for, that the government has done reasonably the best it can with the revenues it already receives, and what the consequences are of passage or failure in terms of specific important public services and facilities.

The success of most city majority vote general purpose tax proposals in this election demonstrates this. Most of the successful city or county measures were majority vote general purpose taxes in cities where a majority of the voters were apparently confident that the money is necessary and trusted their local elected leaders to use it well. They had seen enough of the city's efforts to balance their budgets with existing resources and believed those efforts were sincere and that the additional tax revenue is necessary and worth paying.

On the other hand, very few non-school super-majority taxes are passing these days except for extensions of existing taxes.

But supermajority vote parcel taxes for schools continue to pass – about two out of three succeed – consistent with what we have seen historically. As for school bonds, 89 of 106 bond measures passed, slightly exceeding historic passage rates.

Council/Staff Workshop
Council Chamber, February 2, 2013
MAYOR OWINGS' INTRODUCTORY COMMENTS:

Discussion will be at the 30,000 FT level

We need a new vision!

Strategy plan for MV

Our vision for our City

Performance

Trust the people to make the right decisions

Credibility Know your job

Think how to get it done, not why we can't

Let's agree on what we can agree on and act

Council/Staff Workshop
Council Chamber, February 2, 2013

ITEMS UPON WHICH THE CITY COUNCIL REACHED CONSENSUS DURING THEIR WORKSHOP DISCUSSIONS:

If the City were to draft a Charter, would like to see it include the following:

- Council election runoffs
- Council member qualifications
- Term limits
- Zoning: same as in Gen. Law
- City determine rules for vacancies/terminations
- City determine quorum/ voting requirements
- Legislative authority: same as in Gen. Law
- Fin/Tax (review charter options)
- Street, sidewalk: same as in Gen. Law
- Public contracts: charter w/competitive bid
- Outsourcing
- Prevailing wage addressed in Charter for cost saving purposes
- More open/sunshine rules
- No change in relationship w/city employees

Council item on future agenda to take action on Charter Subcommittee, with a Citizens Review Committee, 2014 election

Directly-elected Mayor

Efforts of city to focus on medical corridor

Highest/best use study for 60 acres on Nason owned by the City

Seek innovative measures to enhance Economic Development efforts

Business incubators – higher priority

Emphasize incentives for ecommerce fulfillment centers

Continue to emphasize residential development

Performing arts overlay

Mayor's council on education a priority

Augment street maintenance budget in 1-2 yrs.

More aggressive flood control enforcement

Develop neighborhood program

Balance General Fund budget in FY 13/14 (but also present a 2-yr option)

Discuss unfunded liabilities w/3 yr budget

Study session: surplus properties

Conduct Neighborhood budget meetings

Support Nov. 2014 revenue ballot measure(s)

Include Sunnymead Blvd on Economic Development list

Council/Staff Workshop
Council Chamber, February 2, 2013
CAMPAIGN PROMISES:

• Private sector jobs	• Reduce City salaries/benefits
• Balanced budget	• More Police Patrols
• Maintain Fire Department	• Education initiative
• Support Youth	• Jobs
• Reduce/Eliminate UUT	• Keep street lights on
• Reduce Regulatory Burdens	• No car allowances
• Education Initiative	• More financial analysis
• Fully Fund Public Safety	• Widen Pigeon Pass
• Resolve Squatter Issue	• Keep MARB
• Campaign Finance Reform	• RTE 60 widening

CITY OF MORENO VALLEY
Community & Economic Development Department
Building & Safety Division

MEMORANDUM

To: Barry Foster, Community and Economic Development Director

From: Anne Schneider, PE, Building Official

Date: January 24, 2013

Subject: Response of the Building and Safety Division to CRM

This is the partial text of the CRM we received Tuesday January 22, 2013.

Please investigate on behalf of Mayor Owings and advise the outcome.

Mr. Fisher submitted a letter (attached) regarding a dispute with Building and Safety regarding the building permits for a "guest house" located at 13850 Belia Ct.
Text of letter is attached separately.

Here is the proposed response.

Anne Schneider, PE, Building Division Manager/Building Official on 01/24/13: Building & Safety received a complaint of substandard conditions at 13850 Belia Ct. An inspection was conducted on November 26, 2012 and substandard living conditions were found to exist at the property.

A review was conducted of the permit history for the property with the following items noted. See attached map for identification of each structure on property.

Structure 1

Structure 1 is a 2812 square foot home with a detached 800 square foot garage and 592 square feet of patios & porches.
The property owner obtained a custom home approval from Planning, Plot Plan PP1946 and a Building permit, #9411845 from Building & Safety. (See attached copy). The home received final approval for occupancy on September 9, 1994.

Structure 2

Structure 2 is a 1000 square foot addition to Structure 1 that was permitted for a workshop and storage room, with plumbing and electrical installations but no mechanical (heating or air-conditioning) equipment under Building permit #9412845. (See attached copy). This area was specifically noted on the permit, which is signed by Mrs. Beverly Fisher, as "No second unit permit'd".

Structure 3

Structure 3 is a 2400 square foot home with an attached 500 square foot garage.
The property owner obtained a custom home approval for a second unit on the property from Planning, Plot Plan PP2003 and a Building permit, #9414588 from Building & Safety. The "second unit" home received final approval for occupancy on April 28, 1995.

Per the Planning Division requirements, a maximum of two dwelling units are permitted at the property. A third unit is not permitted. The property owner was informed of this in writing at the time the permit for the "workshop and storage room" was issued and the room was in compliance with that requirement at the time of the final inspection in April of 1995.

The tenant renting the "workshop" provided access to the rental unit for inspection on November 26, 2012. The photographs taken during the inspection clearly show the use of the "workshop & storage room" as a separate dwelling unit. (See attached photos.) The photographs document construction done after the final inspection was completed. There have been no permits for this construction obtained.

On December 19, 2012, the property owner provided eviction paper work for the workshop unit to Building & Safety. The landlord initiated eviction proceedings against the tenant on November 28, 2012. The property owner provided a rental agreement showing that the space is being rented as a separate unit. Based on receipt of the eviction notice, further enforcement action against the property owner has been suspended until the hearing date of February 8, 2013 as shown in the eviction papers. As long as the property owner diligently continues with the eviction proceedings, further punitive action against the property owner is suspended. If the property owner fails to complete the eviction and allows the tenant to remain, the enforcement action will immediately resume.

The property owner must remove all illegal construction, including the entire kitchen, separate water heater system, new heating system and interior partitions constructed without permits.

No documentation that is contrary to these stated facts had been provided by the property owner. If he wishes to submit the information he believes clarifies the situation at the property, he is welcome to do so. He will be contacted and a request made to

MV00250639

submit any information that he feels is relevant to this issue. All information provided herein is from public records available to the property owner.

CRM MV-14669-P356

Sir

My wife and I are writing you to solicit your help in solving a dispute we are having with the Building and Safety Dept. We have spoken to a number of people both in the Building and Safety and Planning Departments with no resolution to the problem.

In 1994 my father had built the house we are living in now. In addition to this house he had built a small house attached to the rear of this house. The purpose of the rear house was for him to live there during the last years of his life and we could take care of him. He was the sole owner of the property and house. In 1996 he added my wife and I to the deed to make an easier transfer of title after his death. When he died in 1998 we became sole owners of the house.

After his passing I found a copy of the building permits and inspection records for both the main house and the rear unit. Both the building permit and inspection record labels the rear house a "Guest House" After his passing my wife and I rented out the rear house. We did not receive criteria concerning what a guest house can and cannot be used for.

Last month we gave the couple that were renting notice that we no longer wanted to rent to them. They became very vindictive and they did everything they could think of to get even with us. In fact it became so bad that we had to get a court ordered restraining order against the man. One thing this man did was call the building and safety department to complain about a number of things. The inspector came out and spoke to him. While he was there I tried to speak to him but he refused to talk to me. So my wife and I went down to the office and spoke to the person at the counter. We explained to her what we had and what was going on. She than told us that we cannot rent out a "guest house". We told her that we did not know and we are in the process of evicting the tenant now. We also told her once he is out we will not rent it out in the future. She said that was good. It shows we are trying to comply with the code.

Since that time we managed to speak to the inspector who came out for this person's complaint. During the conversation he told us that we converted a "workshop" into a livable house. I tried to tell him and show him written proof that this house was built as a guest house and we did not convert anything. We inherited it from my father just the way it is today. He refused to listen to me and look at the written proof I had. He also told be that I was the owner and I built the house as a licensed contractor without a business license. I tried to tell him I did not build the house as a licensed contractor. I helped my father build it as his son. He did not hire me to do the work. But again he refused to listen to me.

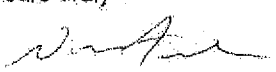
Now here is the problem. I asked the inspector what does he want me to do. He said I have to basically gut the inside so it will no longer be livable. We tried to tell him that is an unreasonable request since everything in it was inspected and approved. We were fined $100 dollars for the, quote, illegal conversion and given until Jan 2, 2013 to comply with his request. My wife and I told him that we cannot do that because the people we are evicting will not move out and in all likelihood they will not move until they are ushered out by the police. We told him we need more time. We also told him we did not convert the house, we inherited it the way it is today. He said he will not give it to us and the fine will continue to increase. I asked to speak to his supervisor but he ignored me. We than went up to your office and asked to see you. The woman we spoke to asked what was it concerning. We told her and she said she would be right back. In a few minutes she returned and told us that the head of the Building and Safety department said for us to bring in the eviction papers and we would be given more time. As soon as we received the papers from our attorney we brought them into the office.

While we were there we spoke to someone in the planning department and asked if Guest houses were permited in the city. She said they were as long as we meet the criteria. She told us what they were and we do meet them. So I than asked her what do we need to do in order to keep this rear unit as a guest house, not to rent in out, but to use for family and friends who visit us from time to time. We than went to the Building department and asked them the same thing. Basically we were told that we just have to start from scratch. We have to pay all the fees and have it inspected again. We just don't understand why we have to pay all the fees again and have it inspected when the fees were paid and it was inspected and approved when it was first built. They gave us an estimate of what the fees would be and they could amount to almost $5000. I am retired and my wife does not work. We cannot afford that amount.

Why is it when a vindictive person calls to complain we suddenly have to either have to tear down what has been approved or pay more money to keep it as it is. This house has been in existence for nearly 20 years. Our only mistake was renting it out after my father's death. We did that not knowing any better. Now that we know we will comply with the code. It is not fair nor right for us to repay all the fees again.

Any help and clarification on this matter will be greatly appreciated

Yours Truly



Norman Fisher

Division of Industrial Safety Permit No. _____

HAZARDOUS MATERIALS AND EMISSIONS CERTIFICATION
(These requirements do not apply to residential construction)

Permit Number: _____ Date: _____

1. Will the applicant or present or future building occupant need to file and certify a Business Plan for emergency response to a release or threatened release of a hazardous material?

Yes ☐ No ☐

(Section 25505 of the California Health and Safety Code requires, with some exceptions, that a Business Plan be filed with the County of Riverside by every business which has at any one time during a reporting year a quantity of hazardous materials equal to or greater than a weight of 500 pounds, or a volume of 55 gallons, or 200 cubic feet of compressed gas at standard temperature and pressure).

2. Does or will the applicant or present or future building occupant need to file a registration form for acutely hazardous material?

Yes ☐ No ☐

(Section 25533 of the California Health and Safety Code, with some exceptions, requires registration with the County of Riverside by each business which at any one time has on hand a quantity of acutely hazardous materials equal to or greater than a weight of 500 pounds, or a volume of 55 gallons, or 200 cubic feet of compressed gas at standard temperature and pressure).

3. Does or will the applicant or present or future building occupant need to prepare an RMPP (Risk Management and Prevention Program for acutely hazardous materials)?

Yes ☐ No ☐

(Section 25534 of the California Health and Safety Code provides that the County of Riverside may require the preparation, certification and filing with the County of an RMPP by businesses which are required to register acutely hazardous materials with the County).

4. If an RMPP is presently required, has Section 25534 of the California Health and Safety Code been fully complied with?

Yes ☐ No ☐

5. Does or will the applicant or present or future building occupant required for the work which is the subject of this application a permit for such construction or modification from the South Coast Air Quality Management District or from any other air pollution control district or agency?

Yes ☐ No ☐

(Section 65850.2 of the California Government Code requires that the requested information be furnished on applications for non-residential building permits).

6. Will any part of the facility to be constructed under this permit be within 1000 feet from the outer boundaries of a school?

Yes ☐ No ☐

(If "yes", the facility must meet the requirement of Sections 25534 and 42301 of the California Health and Safety Code).

7. If a permit from the South Coast Air Quality Management District or other air pollution control district or agency is required for the work which is the subject of this application, have all of the disclosures prescribed by California Health and Safety Code Section 42303 been made?

Yes ☐ No ☐

(If "yes", attach certificate of compliance from the appropriate air pollution control district).

Certificate of compliance: I certify that under penalty of perjury the information given above is correct. I agree to comply with all state laws and city ordinances regarding Hazardous Materials and Emissions.

4. If an RMPP is presently required, has Section 25534 of the California Health and Safety Code been fully complied with?

Yes ☐ No ☐

5. Does or will the applicant or present or future building occupant require for the work which is the subject of this application a permit for such construction or modification from the South Coast Air Quality Management District or from any other air pollution control district or agency?

Yes ☐ No ☐

Section 65850.2 of the California Government Code requires that the requested information be furnished on applications for non-residential building permits.

6. Will any part of the facility to be constructed under this permit be within 1000 feet from the outer boundaries of a school?

Yes ☐ No ☐

If "Yes", the facility must meet the requirement of Sections 25534 and 42301 of the California Health and Safety Code.

7. If a permit from a South Coast Air Quality Management District or other air pollution control district or agency is required for the work which is the subject of this application, have all of the requirements prescribed by California Health and Safety Code Section 42303 been made?

Yes ☐ No ☐

(If "no", attach explanation.) Compliance from the appropriate air pollution control district.

Certification of compliance: I certify that under penalty of perjury the information given above is correct. I agree to comply with all state laws and city ordinances regarding Hazardous Materials and Emissions.

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code): Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for the permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

SIGNATURE — DATE

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proof that he did not build or improve for the purpose of sale).

SIGNATURE — DATE

I as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

SIGNATURE — DATE

I am exempt under Sec. Business and Professions Code for this reason:

CITY OF MORENO VALLEY
Community & Economic Development Department
Building & Safety Division

MEMORANDUM

To: Barry Foster, Community and Economic Development Director

From: Anne Schneider, PE, Building Official

Date: January 24, 2013

Subject: Response of the Building and Safety Division to CRM

This is the partial text of the CRM we received Tuesday January 22, 2013.

Please investigate on behalf of Mayor Owings and advise the outcome.

Mr. Fisher submitted a letter (attached) regarding a dispute with Building and Safety regarding the building permits for a "guest house" located at 13850 Belia Ct.
Text of letter is attached separately.

Here is the proposed response.

Anne Schneider, PE, Building Division Manager/Building Official on 01/24/13: Building & Safety received a complaint of substandard conditions at 13850 Belia Ct. An inspection was conducted on November 26, 2012 and substandard living conditions were found to exist at the property.

A review was conducted of the permit history for the property with the following items noted. See attached map for identification of each structure on property.

Structure 1

Structure 1 is a 2812 square foot home with a detached 800 square foot garage and 592 square feet of patios & porches.
The property owner obtained a custom home approval from Planning, Plot Plan PP1946 and a Building permit, #9411845 from Building & Safety. (See attached copy). The home received final approval for occupancy on September 9, 1994.

Structure 2

Structure 2 is a 1000 square foot addition to Structure 1 that was permitted for a workshop and storage room, with plumbing and electrical installations but no mechanical (heating or air-conditioning) equipment under Building permit #9412845. (See attached copy). This area was specifically noted on the permit, which is signed by Mrs. Beverly Fisher, as "No second unit permit'd".

Structure 3

Structure 3 is a 2400 square foot home with an attached 500 square foot garage.
The property owner obtained a custom home approval for a second unit on the property from Planning, Plot Plan PP2003 and a Building permit, #9414588 from Building & Safety. The "second unit" home received final approval for occupancy on April 28, 1995.

Per the Planning Division requirements, a maximum of two dwelling units are permitted at the property. A third unit is not permitted. The property owner was informed of this in writing at the time the permit for the "workshop and storage room" was issued and the room was in compliance with that requirement at the time of the final inspection in April of 1995.

The tenant renting the "workshop" provided access to the rental unit for inspection on November 26, 2012. The photographs taken during the inspection clearly show the use of the "workshop & storage room" as a separate dwelling unit. (See attached photos.) The photographs document construction done after the final inspection was completed. There have been no permits for this construction obtained.

On December 19, 2012, the property owner provided eviction paper work for the workshop unit to Building & Safety. The landlord initiated eviction proceedings against the tenant on November 28, 2012. The property owner provided a rental agreement showing that the space is being rented as a separate unit. Based on receipt of the eviction notice, further enforcement action against the property owner has been suspended until the hearing date of February 8, 2013 as shown in the eviction papers. As long as the property owner diligently continues with the eviction proceedings, further punitive action against the property owner is suspended. If the property owner fails to complete the eviction and allows the tenant to remain, the enforcement action will immediately resume.

The property owner must remove all illegal construction, including the entire kitchen, separate water heater system, new heating system and interior partitions constructed without permits.

No documentation that is contrary to these stated facts had been provided by the property owner. If he wishes to submit the information he believes clarifies the situation at the property, he is welcome to do so. He will be contacted and a request made to

MV00250651

submit any information that he feels is relevant to this issue. All information provided herein is from public records available to the property owner.

CRM MV-14669-P356

Sir

My wife and I are writing you to solicit your help in solving a dispute we are having with the Building and Safety Dept. We have spoken to a number of people both in the Building and Safety and Planning Departments with no resolution to the problem.

In 1994 my father had built the house we are living in now. In addition to this house he had built a small house attached to the rear of this house. The purpose of the rear house was for him to live there during the last years of his life and we could take care of him. He was the sole owner of the property and house. In 1996 he added my wife and I to the deed to make an easier transfer of title after his death. When he died in 1998 we became sole owners of the house.

After his passing I found a copy of the building permits and inspection records for both the main house and the rear unit. Both the building permit and inspection record labels the rear house a "Guest House" After his passing my wife and I rented out the rear house. We did not receive criteria concerning what a guest house can and cannot be used for.

Last month we gave the couple that were renting notice that we no longer wanted to rent to them. They became very vindictive and they did everything they could think of to get even with us. In fact it became so bad that we had to get a court ordered restraining order against the man. One thing this man did was call the building and safety department to complain about a number of things. The inspector came out and spoke to him. While he was there I tried to speak to him but he refused to talk to me. So my wife and I went down to the office and spoke to the person at the counter. We explained to her what we had and what was going on. She than told us that we cannot rent out a "guest house". We told her that we did not know and we are in the process of evicting the tenant now. We also told her once he is out we will not rent it out in the future. She said that was good. It shows we are trying to comply with the code.

Since that time we managed to speak to the inspector who came out for this person's complaint. During the conversation he told us that we converted a "workshop" into a livable house. I tried to tell him and show him written proof that this house was built as a guest house and we did not convert anything. We inherited it from my father just the way it is today. He refused to listen to me and look at the written proof I had. He also told be that I was the owner and I built the house as a licensed contractor without a business license. I tried to tell him I did not build the house as a licensed contractor. I helped my father build it as his son. He did not hire me to do the work. But again he refused to listen to me.

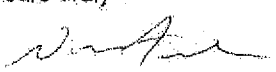
Now here is the problem. I asked the inspector what does he want me to do. He said I have to basically gut the inside so it will no longer be livable. We tried to tell him that is an unreasonable request since everything in it was inspected and approved. We were fined $100 dollars for the, quote, illegal conversion and given until Jan 2, 2013 to comply with his request. My wife and I told him that we cannot do that because the people we are evicting will not move out and in all likelihood they will not move until they are ushered out by the police. We told him we need more time. We also told him we did not convert the house, we inherited it the way it is today. He said he will not give it to us and the fine will continue to increase. I asked to speak to his supervisor but he ignored me. We than went up to your office and asked to see you. The woman we spoke to asked what was it concerning. We told her and she said she would be right back. In a few minutes she returned and told us that the head of the Building and Safety department said for us to bring in the eviction papers and we would be given more time. As soon as we received the papers from our attorney we brought them into the office.

While we were there we spoke to someone in the planning department and asked if Guest houses were permited in the city. She said they were as long as we meet the criteria. She told us what they were and we do meet them. So I than asked her what do we need to do in order to keep this rear unit as a guest house, not to rent in out, but to use for family and friends who visit us from time to time. We than went to the Building department and asked them the same thing. Basically we were told that we just have to start from scratch. We have to pay all the fees and have it inspected again. We just don't understand why we have to pay all the fees again and have it inspected when the fees were paid and it was inspected and approved when it was first built. They gave us an estimate of what the fees would be and they could amount to almost $5000. I am retired and my wife does not work. We cannot afford that amount.

Why is it when a vindictive person calls to complain we suddenly have to either have to tear down what has been approved or pay more money to keep it as it is. This house has been in existence for nearly 20 years. Our only mistake was renting it out after my father's death. We did that not knowing any better. Now that we know we will comply with the code. It is not fair nor right for us to repay all the fees again.

Any help and clarification on this matter will be greatly appreciated

Yours Truly



Norman Fisher

HAZARDOUS MATERIALS AND EMISSIONS CERTIFICATION
(These requirements do not apply to residential construction)

Permit Number: _____ Date: _____

1. Will the applicant or present or future building occupant need to file and certify a Business Plan for emergency response to a release or threatened release of a hazardous material?

Yes ☐ No ☐

(Section 25505 of the California Health and Safety Code requires, with some exceptions, that a Business Plan be filed with the County of Riverside by every business which has at any one time during a reporting year a quantity of hazardous materials equal to or greater than a weight of 500 pounds, or a volume of 55 gallons, or 200 cubic feet of compressed gas at standard temperature and pressure).

2. Does or will the applicant or present or future building occupant need to file a registration form for acutely hazardous material?

Yes ☐ No ☐

(Section 25533 of the California Health and Safety Code, with some exceptions, requires registration with the County of Riverside by each business which at any one time has on hand a quantity of acutely hazardous materials equal to or greater than a weight of 500 pounds, or a volume of 55 gallons, or 200 cubic feet of compressed gas at standard temperature and pressure).

3. Does or will the applicant or present or future building occupant need to prepare an RMPP (Risk Management and Prevention Program for acutely hazardous materials)?

Yes ☐ No ☐

(Section 25534 of the California Health and Safety Code provides that the County of Riverside may require the preparation, certification and filing with the County of an RMPP by businesses which are required to register acutely hazardous materials with the County).

4. If an RMPP is presently required, has Section 25534 of the California Health and Safety Code been fully complied with?

Yes ☐ No ☐

5. Does or will the applicant or present or future building occupant required for the work which is the subject of this application a permit for such construction or modification from the South Coast Air Quality Management District or from any other air pollution control district or agency?

Yes ☐ No ☐

(Section 65850.2 of the California Government Code requires that the requested information be furnished on applications for non-residential building permits).

6. Will any part of the facility to be constructed under this permit be within 1000 feet from the outer boundaries of a school?

Yes ☐ No ☐

(If "yes", the facility must meet the requirement of Sections 25534 and 42301 of the California Health and Safety Code).

7. If a permit from the South Coast Air Quality Management District or other air pollution control district or agency is required for the work which is the subject of this application, have all of the disclosures prescribed by California Health and Safety Code Section 42303 been made?

Yes ☐ No ☐

(If "yes", attach certificate of compliance from the appropriate air pollution control district).

Certificate of compliance: I certify that under penalty of perjury the information given above is correct. I agree to comply with all state laws and city ordinances regarding Hazardous Materials and Emissions.

Section 25505 of the California Health and Safety Code requires, with some exceptions, that a Business Plan be filed with the County of Riverside by every business which has at any one time during a reporting year a quantity of hazardous material equal to or greater than a weight of 500 pounds, or a volume of 55 gallons, or 200 cubic feet of compressed gas at standard temperature and pressure.

2. Does or will the applicant or present or future building occupant need to file a registration form for storing hazardous materials?

Yes ☐ No ☐

Section 25533 of the California Health and Safety Code, with some exceptions, requires registration with the County of Riverside by each business which at any one time has on hand a quantity of acutely hazardous material equal to or greater than a weight of 500 pounds, or a volume of 55 gallons, or 200 cubic feet of compressed gas at standard temperature and pressure.

3. Does or will the applicant or present or future building occupant need to prepare an RMPP (Risk Management and Prevention Program) for acutely hazardous materials?

Yes ☐ No ☐

Section 25534 of the California Health and Safety Code provides that the County of Riverside may require the preparation, certification and filing with the County of an RMPP by businesses which are required to register acutely hazardous materials with the County.

4. If an RMPP is presently required, has Section 25534 of the California Health and Safety Code been fully complied with?

Yes ☐ No ☐

5. Does or will the applicant or present or future building occupant require for the work which is the subject of this application a permit for such construction or modification from the South Coast Air Quality Management District or from any other air pollution control district or agency?

Yes ☐ No ☐

Section 65850.2 of the California Government Code requires that the requested information be furnished on applications for non-residential building permits.

6. Will any part of the facility to be constructed under this permit be within 1000 feet from the outer boundaries of a school?

Yes ☐ No ☐

If "Yes", the facility must meet the requirement of Sections 25534 and 42301 of the California Health and Safety Code.

7. If a permit from a South Coast Air Quality Management District or other air pollution control district or agency is required for the work which is the subject of this application, have all of the requirements prescribed by California Health and Safety Code Section 42303 been made?

Yes ☐ No ☐

(If "no", attach compliance schedule.)

Certification of compliance: I certify that under penalty of perjury the information given above is correct. I agree to comply with all state laws and city ordinances regarding Hazardous Materials and Emissions.

On Jan 25, 2013, at 12:34 PM, "Brandon Ford" <cford@riversidesheriff.org> wrote:

> Dear Mr. Mayor and Council members,
>
> Following the Council meeting on January 22, 2013, Chief Ontiveros and I thought it was appropriate to offer you some comments in regard to the number of people who submitted speaker slips to either comment on a "spike" in their neighborhood crime or the MVPD effectiveness in addressing that crime. Our bailiff estimated about twelve people submitted slips to offer commentary on these subjects; but in the end I believe we only heard from one, two if you count Mayor Pro Tem Co. I am not counting Mr. Kruger, but I assure you his concerns are being addressed.
>
> In addition to our weekly Chief's Staff meeting, all the MVPD Lieutenants meet twice a month to evaluate resources and crime data. The conclusions we draw from our analysis lead us to deployment and priorities adjustments that help us improve our effectiveness. Much of our decision making is driven by the relatively sterile analysis of our call for service volume, and the seriousness of the offenses. So at the outset of the Council meeting, I was excited to see so many people taking the time out of their day to come out and let us know how their Police Department was doing. I was excited to hear what each person had to say and disappointed that most of them had to leave the meeting early without comment. All of the Police Department Command Staff believe that our professionalism and effectiveness is directly related to the input (good or bad) that we receive from our community.
>
> I also need to admit I was not completely surprised by the number of people who submitted speaker slips on this topic. Not because I was aware of a need in any particular area of the City, but because in the hours before the Council meeting our staff began receiving an inordinate number of phone calls from citizens who related various general complaints about the crime in their neighborhood and the police response to that crime. Some of the callers used the words "spike in crime," and some spoke of personal experiences. But when our staff sought specific details about the concerns, the callers declined to provide additional information. In fact, some of the callers refused to identify themselves. One caller angrily stated they would provide the details at the Council meeting.
> Based on the consistencies in this group of calls and combined with the few people who did identify themselves, our staff determined the callers were most likely all residents of a neighborhood on the southeast side of the city. The specific streets included La Palma Way, Via De La Real Dr., Adobe Way, Legendary Dr. and La Casa Dr. While we have provided police service in this neighborhood, until these feedback calls came in, we did not know that residents felt they were experiencing a "spike" in crime.

Because there was such an increase in calls from this neighborhood so close to a Council meeting and with at least one caller stating their concerns would be expressed at the Council meeting, I naturally expected to see some of the other callers at the meeting too. In preparation for the meeting, I looked at the crime statistics in this neighborhood. As luck would have it, the relevant streets fell neatly within, and made up the majority of a single reporting district. In this neighborhood there were 18 Part One Crimes in 2011 and 20 Part One Crimes in 2012. There were in fact two more Part One Crimes in 2012 than 2011. The most common complaint made by the callers seemed to be associated with a perceived increase in residential burglaries. In 2011 there were 2 residential burglaries and in 2012 there were 4 residential burglaries. This neighborhood is comprised of more than 300 residences, a middle school, and a golf course.

As you can see, the numbers do show an increase, but based on the actual numbers, and without the community input, we would not likely characterize the difference in crimes between the two years as a "spike." More importantly without the community input, the annual crime differences alone would not ordinarily drive a shift in deployment or priorities. But when we receive personalized voices behind those statistics, it can be very helpful to get an idea of what is really going on in the neighborhood.

Before the Council meeting concluded, I spoke with Mr. Tyler Hansen, the gentlemen who spoke about crime in his neighborhood. Mr. Hansen lives in the neighborhood described above and has recently started a neighborhood watch. So far he has about 29 people from the neighborhood committed to participate in the neighborhood watch. I would like to note that in response to a request from a resident in this neighborhood, in October of last year, our POP team met with about 15 residents at a home on La Palma Way. During that meeting our POP team provided information about our neighborhood watch program and other related information. However, until the Council meeting this week, we had not received any follow-up interest in the neighborhood watch program from that community. So needless to say, we are very excited to learn Mr. Hansen has chosen to volunteer his time, and we look forward to partnering with him and his neighbors.

Mr. Hansen told me he and his neighbors met with Mayor Pro Tem Co about a week earlier to voice their concerns about the perceived "spike" in crime. However, the phone calls on Tuesday, Mr. Hansen's public comments and Mayor Pro Tem Co's public comments represented the first information the MVPD received regarding the public perception in this neighborhood. As I mentioned earlier, we very much value public feedback, good or bad; but there is a real correlation between our effectiveness in addressing public concern and the timeliness of our knowledge of that concern.

Mr. Hansen was pleasantly surprised to learn the neighborhood perception about a spike in crime did not reflect the reality. At least it did not reflect a reality known to the Police Department in the form of reported crimes. Mr. Hansen did let me know about a resident, who could not attend the meeting, who felt she had not received adequate follow-up on a burglary report. I assured him we would close the loop with the burglary victim he spoke of, and on Wednesday I assigned our POP Team to close that loop. Mr. Hansen also explained he wanted the Police present at his next Neighborhood Watch meeting; so on Wednesday I assigned our Community Services Unit to contact him to work out the details. I enjoyed my conversation with Mr. Hansen and I thanked him for taking the time to provide the feedback.

We do not believe Mr. Hansen's neighborhood has seen a real "spike" in crime, and we do not believe the community concerns will drive significant changes in Police Department deployment or priorities. However, we do believe the relationships formed through the personal interface and the involvement of our Community Services and POP Team will go a long way to ease misperceptions in that neighborhood. We will also take a closer look at the overall non-criminal call volume in the neighborhood in an effort to identify problems the Police Department might be able to find solutions for.

As always, if you have any questions or concerns, please do not hesitate to contact us. Your Chief and I both answer our phones 24/7/365.

Best regards,

Brandon Ford, Lieutenant
Moreno Valley Police Department
Administrative Division

Dear Mr. Timme-

Thank you for bringing your concern re the subject sign location to our attention and we apologize for the inconvenience.

I have had my staff field visit the location and speak to our contractor who is in charge of the Nason/60 freeway bridge project. It appears that they had to perform some work during the night hours. The good news is that all that work is completed and we have instructed the contractor to place sign and lights far from residences in the future for any night work.

Once again, we regret the inconvenience and if you have any other concerns or questions, please feel free to email or call me directly. Also, the sign and light should have been removed from the location by now. If that's not the case, please let me or Margery Lazarus, Senior Civil Engineer of my staff know.

Thank you,

Ahmad R. Ansari, P.E.

Mayor, Mayor Pro Tem, and Members of the City Council: we recently had a request from the Council office for a list of the vacant properties owned by the City. The Finance Department has provided the attached information. Please note that we will be providing information to you regarding this (specifically the processes and procedures that are required for the disposition of City properties) at an upcoming Study Session.
--Michelle

Subject: Re: (((Sign in bad location)))

Thank you Ahmad for your same day response. I wish every manager had your sense of service and professionalism. Someday I hope we will achieve true customer service to all our residents at every level of city provided services.

As always,

Tom

> Thank you for bringing your concern re the subject sign location to our attention and we apologize for the inconvenience.
>
> I have had my staff field visit the location and speak to our contractor who is in charge of the Nason/60 freeway bridge project. It appears that they had to perform some work during the night hours. The good news is that all that work is completed and we have instructed the contractor to place sign and lights far from residences in the future for any night work.
>
> Once again, we regret the inconvenience and if you have any other concerns or questions, please feel free to email or call me directly. Also, the sign and light should have been removed from the location by now. If that's not the case, please let me or Margery Lazarus, Senior Civil Engineer of my staff know.

A new City Council member asked for information about what ROPS is. Attached is a summary of what a Recognized Obligation Payment Schedule (ROPS) is. With a 4th round of ROPS coming up, staff thought it would be helpful to remind all City Council members what ROPS is.

Please let me know if you have any questions.

Barry Foster

ROPS.docx

RECOGNIZED OBLIGATION PAYMENT SCHEDULE (ROPS)

Assembly Bill 26 (AB 26) established new legislation to dissolve all California redevelopment agencies (RDA's) effective February 1, 2012. The City, as Successor Agency to the former Moreno Valley RDA, is responsible for winding down the affairs of the former RDA, including disposing of its assets; making payments and performing other legal commitments. Thisresponsibilityincludes the preparation and approval ofa Recognized Obligation Payment Schedule (ROPS). The ROPS is a document that looks forward and details in six month increments all tax revenue funding necessary to satisfy all legally binding and enforceable payment obligations (including bonds, loans, judgments, settlements, agreements or contracts)and administrative costs necessary to wind down the affairs of the former RDA within that six month period. Once approved by the Successor Agency, the ROPS is then submitted to the Oversight Board for review and approval prior to being transmitted to the County-Auditor Controller, the State Controller's Office, and the Department of Finance (DOF) for final review.

The next ROPS will be presented to the Successor Agency and the Oversight Board for consideration and approval on February 27, 2013 for submission to the DOF by March 1, 2013. It will include all payment obligations necessary to fulfill the former RDA's legally binding and enforceable obligations for the period of July 2013 through December 2013.

MORENO VALLEY
WHERE DREAMS SOAR

City Manager's Office

MEMORANDUM

To: Mayor, Mayor Pro Tem, and Members of the City Council

From: Michelle Dawson, Assistant City Manager

Date: February 12, 2013

Subject: Staff Follow Up on Consensus Items Identified at Council Workshop

Staff is following up on your items from the February 2 Council Workshop per the following timeframes:

Council item on future agenda to take action on Charter Subcommittee, with a Citizens Review Committee, 2014 election:

- **The City Manager's Office and City Attorney are preparing a staff report for the Feb. 26th regular Council meeting**

Directly-elected Mayor:

- **To be discussed as part of the Charter drafting process**

Efforts of city to focus on medical corridor:

- **This area is included in the 3-Year Economic Development Action Plan**

Highest/best use study for 60 acres on Nason owned by the City:

- **Initiating the RFP process in April to retain a planning consultant (note that we are already doing this for the SR 60 East overlay)**

Seek innovative measures to enhance Economic Development efforts:

- **Included in overall Economic Development effort**

Business incubators – higher priority:

- **Program idea will be presented at the April 11 Economic Development Subcommittee meeting**

Emphasize incentives for ecommerce fulfillment centers:

- **To be discussed at the June 13 Economic Development Subcommittee meeting**

Continue to emphasize residential development:

- **This is included in the 3-year Economic Development Action Plan**

Performing arts overlay:

- **To be discussed at the June 13 Economic Development Subcommittee meeting**

Mayor's council on education a priority:

- **The City Manager's Office is preparing a staff report for the Feb. 26th regular Council meeting**

Augment street maintenance budget in 1-2 yrs.:

- **Will be discussed as part of the budget development process**

More aggressive flood control enforcement:

- **First notifications to owners of privately-owned dirt channels were sent out in October; second notices pending.**

Develop neighborhood program:

- **To be discussed at the May 7 Economic Development Subcommittee meeting**

Balance General Fund budget in FY 13/14 (but also present a 2-yr option):

- **Options will be discussed with Council Members initially at their 1 on 1 meetings with the budget team April 22-29**

Discuss unfunded liabilities w/3 yr budget:

- **Scheduled for April 16 Study Session**

Study session: surplus properties:

- **Scheduled for March 19 Study Session**

Conduct Neighborhood budget meetings:

- **To be held in each Council District between May 6-30**

Include Sunnymead Blvd on Economic Development list:

- **This is included in the 3-year Economic Development Action Plan**

APPROVALS	
BUDGET OFFICER	
CITY ATTORNEY	
CITY MANAGER	

Report to City Council

TO: Mayor and City Council

FROM: Richard Teichert, Financial & Administrative Services Director
Joel Ontiveros, Chief of Police

AGENDA DATE: August 28, 2012

TITLE: AWARD OF CITYWIDE CAMERA SURVEILLANCE PROJECT CONTRACT AND AUTHORIZATION FOR CITY MANAGER TO EXECUTE CONTRACT AND SUPPORT AGREEMENT WITH AVRIO GROUP SURVEILLANCE SOLUTIONS, LLC PROJECT NO. TS-CCSS 2012-02

RECOMMENDED ACTION

The Public Safety Subcommittee recommends that the City Council take the following actions:

1. Authorize the award of the Citywide Camera Surveillance Project contract to Avrio Group Surveillance Solutions, LLC (Avrio), 3 N. Harrison Street, Suite 100, Easton, Maryland 21601 in an amount not-to-exceed $1,800,000 for installation.

2. Authorize the City Manager to sign the contract with Avrio.

3. Authorize the City Manager to execute the support agreement with one-year of maintenance with additional one-year options for maintenance as follows:

Year 1 maintenance	Included - No Charge
Year 2 maintenance	$98,000
Year 3 maintenance	$112,000
Year 4 maintenance	$125,000
Year 5 maintenance	$145,000

BACKGROUND

The Citywide Camera Surveillance System was first presented to the Public Safety Sub-Committee in a meeting on June 27, 2011. The citywide camera surveillance system

was presented in a Study Session before City Council on September 20, 2011. The Public Safety Sub-Committee recommended that the Police Department continue to move forward with this project at their October 31, 2011 meeting. On November 23, 2011 a Request for Proposals (RFP) was issued for a Project Manager for this project; the RFP process successfully concluded on January 11, 2012. On April 2, 2012 the City issued a RFP concerning the camera surveillance system and eleven proposals were received on May 9, 2012.

Several cities in California, such as the Cities of Redlands, Compton, Bakersfield, Santa Monica, Lynnwood, Fresno, and Vallejo, have camera surveillance systems throughout their cities with varying degrees of coverage. These cameras contribute to the overall safety of the entire community and aid law enforcement's effort in crime prevention and solving crimes.

During the fourth quarter of 2011 and the first quarter of 2012, Police and City Staff reviewed surveillance systems and met with representatives from several Southern California cities concerning their camera system. After evaluating various camera systems, City Staff determined that a citywide camera surveillance system would enhance the law enforcement capabilities of the Moreno Valley Police Department. During this investigation phase, all City Council members expressed support for the citywide camera surveillance system.

DISCUSSION

After eleven proposals were received on May 9, 2012, an evaluation committee was formed to choose a vendor to build the citywide camera surveillance system. The evaluation committee included a Police Lieutenant, a Police Sergeant, the Project Manager, and the City's Technology Services Division Manager. All proposals were read and scored by each member of the evaluation committee, resulting in a ranking of the proposals. The scoring revealed a natural break where four of the proposals were superior to the remaining proposals; these four vendors were considered finalists. A representative from another local city who manages that City's camera system was added to the evaluation committee when finalists were identified.

Proposals from the four finalists were further scrutinized in order to identify the company that staff would recommend to the City Council. A questionnaire, consisting of both common and customized questions, was sent to each finalist. Finalists were asked to both respond to the questionnaire in writing and in person in order to make a presentation to the evaluation committee. Each company was given 4 hours to make their presentation and engage the evaluation committee during the days of May 29 & 30, 2012. After the conclusion of the presentations, the evaluation committee met several additional times. Two of the finalists made proposals that fit the City's needs very well and addressed all of the evaluation criteria. Best and final offers were requested from these two companies. Based on the final offers the committee chose Avrio as the company that best fit the City's requirements.

Avrio submitted a proposal that covers all locations in the City, as identified by the Police Department, in project phases 1, 1a, and 2; the RFP also identifies phase 3 locations. Avrio's proposal covers a total of 67 locations throughout the City; each

location will include at least 3 cameras. The proposal also included 3 mobile camera systems which will be placed as the Police Department identifies an area in need of the use of these cameras.

In addition to cameras the complete system includes two other major components. One of these components is a wireless system to transmit the video images to City Hall and the Police Department. Avrio has proposed a collection of common, well-known wireless equipment placed throughout the city that establishes a network capable of transmitting high quality video images back to storage facilities at City Hall. The exact placement and height of the wireless radios required to be placed remains subject to site surveys, but the proposed system has been designed to require only minimal additions in the future.

The last major component of the system is called the Video Management System (VMS). The VMS is the software responsible for managing all the cameras, stored videos, user permissions, video clip exports, and many other features. Avrio has proposed a common, well-known VMS that has an outstanding list of features.

Avrio's final offer includes price guarantees to the City for any equipment and services that are purchased during the next three years to expand the system. These guarantees give the City a known cost for expanding the coverage of the system to additional locations at a known cost.

Police Department and City staff confidently recommends Avrio based on the merits of their proposal and the checking of several references. The Cities contacted as references for Avrio were very pleased with their camera system and with Avrio's customer service; several of the cities plan to expand their camera systems and view Avrio as the preferred vendor for those expansions.

Project Schedule

The project schedule includes milestones that will enable the Police Department to begin viewing live video from some locations by December of this year. A detailed project schedule is currently being developed and is being heavily influenced by the wireless radio system site surveys.

Project Budget

The City Council, on December 3, 2011, approved the total project funding of $1.9 million, which includes $95,000 for Project Management Services and $1.8 million for the Citywide Camera Surveillance System.

Annual Maintenance

Camera systems, like all hardware and software systems, require annual maintenance agreements in order to continue using the system, to receive enhancements and fixes, and to enable support calls when problems arise. Avrio has agreed to provide the first year of maintenance at no charge; the schedule for annual maintenance is shown below under Alternatives.

The City has budgeted asset depreciation (replacement costs) and annual maintenance for this system at a level that should ensure the success of this on-going system.

ALTERNATIVES

1. Authorize the award of the Citywide Camera Surveillance Project contract to Avrio Group Surveillance Solutions, LLC (Avrio), 3 N. Harrison Street, Suite 100, Easton, Maryland 21601 in an amount not-to-exceed $1,800,000 for installation.

2. Authorize the City Manager to sign the contract with Avrio.

3. Authorize the City Manager to execute the support agreement with one-year of maintenance with additional one-year options for maintenance as follows:

Year 1 maintenance	Included - No Charge
Year 2 maintenance	$98,000
Year 3 maintenance	$112,000
Year 4 maintenance	$125,000
Year 5 maintenance	$145,000

4. Do not authorize the Citywide Camera Surveillance System contract. ***This action would prevent the building of the Citywide Camera Surveillance System and hamper the plans of the Police Department to enhance public safety in the City.***

5. Provide staff with further direction.

Staff recommends Alternative Nos. 1, 2 and 3.

FISCAL IMPACT

Funding for the $1,900,000 Citywide Camera Surveillance System project budget is available in a Technology Services Capital Improvement Project account (7210-30-39-80010) due to the City Council's previous funding of this project.

Due to the availability of the funding source identified above, approval of the Citywide Camera Surveillance System project contract will have no further impact on the City's General Fund operating budget.

CITY COUNCIL GOALS

The Citywide Camera Surveillance System will contribute towards the City Council's goal of Public Safety, which states: Provide a safe and secure environment for people and property in the community, control the number and severity of fire and hazardous material incidents, and provide protection for citizens who live, work and visit the City of Moreno Valley.

SUMMARY

Following an extensive evaluation process, staff has selected Avrio RMS Group (Avrio) as the preferred vendor for a Citywide Camera Surveillance System through a competitively bid Request for Proposals (RFP) process. Avrio has submitted the proposal that best fits the City's needs from among a field of 11 proposals. The Citywide Camera Surveillance System is anticipated to begin in July 2012 and be completed by March, 2013 with the first cameras operational in December 2012. Avrio has also given the City a price guarantee on any equipment and services that are purchased during the next three years. Therefore, it is recommended that the City Council award the project to Avrio, authorize the Mayor to execute the contract, authorize the City Manager to execute a purchase order for one-time project costs not-to-exceed amount $1,800,000, and authorize the City Manager to execute the one-year maintenance options related to the contract starting in year 2 of the contract.

The proposed Citywide Camera Surveillance System has been reviewed and is supported by the Public Safety Subcommittee.

I am pleased to announce the lateral transfer of Isa Rojas from the Neighborhood Preservation Division to the Land Development Division within the CEDD Department. Isa comes to us as a Management Analyst and has many years of service with the City. She is a great addition to our team and will fill the position left when Anitra Holt recently retired. Welcome aboard Isa!

Mark W. Sambito, P.E.

Hello,

I double checked with our voting system vendor and our current voting system does not have Ranked Choice Voting. Below is more information. Please let me know if you have any other questions.

Rebecca Spencer
Riverside County Registrar of Voters
Assistant Registrar of Voters
[redacted]2
RAMartine@co.riverside.ca.us

Be sure to follow the Registrar of Voters on Facebook and Twitter, so you can receive election updates.

Subject: Re: Ranked Choice Voting Riverside

The current system of WinEDS 3.12 does not have RCV in it. WinEDS 4.0 does and with CA SOS administrative Approval, which can be obtained, you upgrade your system and have RCV.

I believe that I can sell this to you for $350,000.

If you wait for the new DVS system, RCV will be in the next version and the cost will be less with less issues in running it. Better functioning and better reporting.

I would suggest that any city that wants to run RCV must adopted the San Francisco model in their charter and commit to spending $1,000,000.00 in voter outreach.

Regards,

STEVEN A BENNETT | REGIONAL SALES MANAGER

Subject: MVPD Volunteer Cadre

Good afternoon,

Mayor Owings recently asked about the status of Volunteer forces at MVPD. In addition to the following active volunteers, we are currently processing 37 new applicants for various volunteer positions at the PD.

Current active volunteers:

31 Explorer Scouts
10 Reserve Officers
47 Citizens on Patrol/Station Volunteers
07 Mounted Posse Volunteers

Total active volunteers: 95

MVPD has had a robust Volunteer Unit for more than a decade. MVPD Volunteers, Explorers, and Reserve Officers have provided thousands of hours of dedicated service through the years. MVPD administration clearly understands the critical importance of the Volunteer program and will continue to work hard to keep the program healthy.

Cross Street Info:

Parcel # (if available): 487494015

Resolution Information

Code & Neighborhood Services Official Al Brady responded.

Code Compliance staff investigated Mr. Keenan's concerns and discovered he has been issued two parking citations on separate occasions for storage of his recreational vehicle on the public street in violation of posted street sweeping requirements. Staff has reviewed both tickets and has confirmed they were issued correctly by parking enforcement personnel (see photos and citation information attached in the notes field below).

The act of street sweeping, and the enforcement of this activity, are performed by staff to comply with the requirements of our regional water quality permit by removing sediments and pollutants from the roadway as required by the City's urban run-off management program. Personnel attached a copy of the applicable sections of water quality permit and the drainage area management plan for council review.

Staff has contacted Mr. Keenan and explained the purpose of our street sweeping program and our enforcement efforts. He stated he understands our position but still does not agree with our enforcement activities. Mr. Keenan intends on appealing the citations as allowed by code provisions.

City of Moreno Valley

Council Summary

2/21/2013 2:13:53 PM

	Case Information
Issue Category:	Code & Neighborhood Services
Issue:	**Street Sweeping Citation**
Council District:	3
Issue Description:	Please investigate Mr. Keenan's concerns on behalf of Mayor Owings, and advise Mayor Owings of the outcome. ***** Mr. Keenan stated he is tired of receiving street sweeping citations. He stated he was packing up his RV to leave town, and he went into the house to get more items, and when he returned, he had received a street sweeping citation. He stated when he talks to the street sweeper, the street sweeper won't give him his name, and Mr. Keenan stated he is entitled to that information. He stated if he had money to pay the citations, he would use that money to put his RV in storage. He stated he tries to move the RV when he can, but he can't always get it moved in time. Mr. Keenan stated other cities don't have street sweeping; and if he doesn't stop receiving citations, he is going to sue the city for having street sweeping and citations.
Responsible for Follow-thru:	Cathy Parada

STATE OF CALIFORNIA
CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
SANTA ANA REGION

ORDER NO. R8-2010-0033
NPDES NO. CAS 618033

NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) PERMIT AND WASTE DISCHARGE REQUIREMENTS FOR THE RIVERSIDE COUNTY FLOOD CONTROL AND WATER CONSERVATION DISTRICT, THE COUNTY OF RIVERSIDE, AND THE INCORPORATED CITIES OF RIVERSIDE COUNTY WITHIN THE SANTA ANA REGION

AREA-WIDE URBAN RUNOFF MANAGEMENT PROGRAM

The following Discharger(s) are subject to waste discharge requirements as set forth in this Order:

Table 1. Municipal Permittees (Dischargers)

Principal Permittee	Riverside County Flood Control and Water Conservation District (RCFC&WCD)*	
Co-Permittees	1. Beaumont	9. Moreno Valley
	2. Calimesa	10. Murrieta
	3. Canyon Lake	11. Norco
	4. Corona	12. Perris
	5. County of Riverside (County)	13. Riverside
	6. Hemet	14. San Jacinto
	7. Lake Elsinore	15. Wildomar
	8. Menifee	

The Principal Permittee and the Co-Permittees are collectively referred to as the Permittees or the Dischargers.

Table 2. - Administrative Information

This Order was adopted by the Regional Water Board on:	**January 29, 2010**
This Order will become effective on:	**January 29, 2010**
This Order will expire on:	**January 29, 2015**
The U.S. Environmental Protection Agency (USEPA) and the California Regional Water Quality Control Board have classified this discharge as a major discharge.	
The Discharger must file a Report of Waste Discharge in accordance with Title 23, California Code of Regulations, as application for issuance of new waste discharge requirements no later than 180 days in advance of the Order expiration date.	

continue to educate the public regarding the impact of human activities on the quality of Urban Runoff.

3. In addition to the Regional Board, a number of other stakeholders are involved in the management of the water resources of the Region. These include, but are not limited to, the incorporated cities in the Region, POTWs, the three counties, and the Santa Ana Watershed Project Authority and its member agencies. The entities listed in Appendix 2 are considered as potential dischargers of Urban Runoff in the Permit Area. It is expected that these entities will also work cooperatively with the Permittees to manage Urban Runoff. The Regional Board, pursuant to 40 CFR 122.26(a), has the discretion and authority to require non-cooperating entities to participate in this Order or to issue individual MS4 permits. The Permittees may request the Regional Board to issue a separate NPDES Permit to any discharger into MS4 facilities they own or operate.

4. Cooperation and coordination among the stakeholders (regulators, Permittees, the public, and other entities) are critical to optimize the use of finite public resources and ensure economical management of water quality in the Region. Recognizing this fact, this Order focuses on integrated watershed management and seeks to integrate the programs of the stakeholders, especially the holders of the three MS4 permits within the Regional Board's jurisdiction.

5. Education is an important aspect of every effective Urban Runoff management program and the basis for changes in behavior at a societal level. Education of municipal planning, inspection, and maintenance department staff is especially critical to ensure that in-house staff understand how their activities impact water quality, how to accomplish their jobs while protecting water quality, and their specific roles and responsibilities for compliance with this Order. Public education, designed to target various urban land users and other audiences, is also essential to inform the public of how individual actions affect Receiving Water quality and how adverse effects can be minimized.

6. Some Urban Runoff issues, such as public education and training, can be effectively addressed on a regional or statewide basis. Regional approaches to Urban Runoff management can improve program consistency and promote sharing of resources, which can result in implementation of more efficient programs. In particular the counties of San Bernardino and Riverside and their collective municipalities are encouraged to cooperatively work together and generate a unified education and training program.

S. PERMITTEE FACILITIES AND ACTIVITIES

1. The Permittees own/operate facilities where industrial or related activities take place that may have an impact on Urban Runoff quality. Some of the Permittees

enter into contracts with outside parties to carry out activities that may also have an impact on Urban Runoff quality. These facilities and related activities include, but are not limited to, street sweeping, catch basin cleaning, maintenance yards, vehicle and equipment maintenance areas, waste transfer stations, corporation and storage yards, parks and recreational facilities, landscape and swimming pool maintenance activities, MS4 maintenance activities and the application of herbicides, algaecides and pesticides.

2. This Order requires continued implementation of BMPs intended to reduce Pollutant discharges from those Permittee activities/facilities that are found to be significant sources of Pollutants in Urban Runoff. This Order prohibits non-storm water discharges from facilities owned or operated by the Permittees unless the discharges are exempt under Section VI of this Order or are permitted by the Regional Board under an individual NPDES permit.

3. Program evaluations conducted during the term of the 2002 MS4 Permit indicated varying degrees of compliance/noncompliance at Permittee facilities and activities. This Order requires each Permittee to review its inventory of fixed facilities, field operations and drainage facilities to ensure that Permittee facilities do not cause or contribute to a Pollution or Nuisance in Receiving Waters. Permittee fixed public facilities and field operations are to be inspected annually.

T. MUNICIPAL CONSTRUCTION PROJECTS

1. The 2002 MS4 Permit authorized the discharge of storm water from construction activities on an acre or more, that are under ownership or direct responsibility of the Permittees. Permittees were required to notify the Regional Board prior to commencement of construction activities, and to comply with the latest Statewide General Construction Permit. Permittees were also required to develop a SWPPP and monitoring program specific to the Construction Site. Program evaluations conducted during the term of the 2002 MS4 Permit indicated that some Permittees were not submitting or were not aware of the requirement to submit a NOI and subsequent Notice of Termination (NOT) for Permittee Construction Sites. This Order continues the notification requirement.
2. This Order builds upon the requirement of the 2002 MS4 Permit by requiring Permittees to include post-construction BMP information for Permittee Construction Sites meeting WQMP and General Construction Permit criteria along with the NOT submitted to the Executive Officer upon completion of the construction activity. The NOT must include photographs of the completed project, a site map including structural post-construction BMP locations, long term operation and maintenance responsibility information, field verification report and copies of the final field verification reports required under Section XII.I. Permittees are required to develop

10. Restaurant or food processing facility wastes such as grease, floor mat and trash bin wash water, food waste, etc.

G. Within 24 months after Order adoption, each Co-Permittee shall submit a certification statement, signed by its legal counsel, that the Co-Permittee has obtained all necessary legal authority in accordance with 40 CFR 122.26(d)(2)(i) (A-F) and to comply with this Order through adoption of ordinances and/or municipal code modifications. A copy of the certification shall also be placed in the LIP.

H. Annually thereafter, Permittees shall evaluate the effectiveness of implementation and enforcement response procedures with respect to the above items. The findings of these reviews, along with recommended corrective actions, where appropriate, and schedules shall be submitted as part of the Annual Report for the corresponding reporting period. The LIP shall be updated accordingly.

IX. ILLICIT CONNECTIONS/ILLEGAL DISCHARGES (IC/ID); LITTER, DEBRIS AND TRASH CONTROL

A. Consistent with each Co-Permittees statutory authority, the Co-Permittees have adopted Storm Water Ordinances. The Co-Permittees must continue to prohibit IC/IDs to the MS4 through their Storm Water Ordinances and the Principal Permittee must do so through its statutory authority. In addition, the Permittees must continue to implement and improve routine inspection and monitoring and reporting programs for their MS4 facilities. If routine inspections or Dry Season monitoring indicate IC/IDs, they must be investigated and eliminated or permitted within sixty (60) calendar days of receipt of notice by its staff or from a third party.

B. The Permittees upon being put on notice by staff or a third party must immediately (within 24 hours of receipt of notice by its staff or from a third Party) investigate all spills, leaks, and/or other illegal discharges to the MS4. Based upon their assessment and as specified below, the Permittees must provide notifications and reporting as described in Section 4 of the DAMP and Section XVI of this Order.

C. The Permittees shall control Illegal Dumping that may result in a discharge of Pollutants to the MS4 to the MEP. The Permittees shall describe their procedures and authorities for managing Illegal Dumping in their LIP.

D. Within 18 months of adoption of this Order, the Permittees shall review and revise their IC/ID program to include a pro-active IDDE using the Guidance Manual for Illicit

Discharge, Detection, and Elimination by the Center for Watershed Protection[40] or any other equivalent program consistent with Section IX.E below. The result of this review shall be reported in the Annual Report and include a description of the Permittees' revised pro-active program, procedures and schedules. The LIP shall be updated accordingly.

E. The Permittees' revised IC/ID programs shall specify an IDDE program for each Co-Permittee to individually, or in combination:

   a. Develop an inventory and map of Permittee MS4 facilities and Outfalls to Receiving Waters.

   b. Develop a schedule to be submitted within 18 months to conduct and implement systematic investigations of MS4 open channels and Major Outfalls.

   c. Use field indicators to identify potential Illegal Discharges, if applicable;

   d. Track Illegal Discharges to their sources[41] where feasible; and

   e. Educate the public about Illegal Discharges and Pollution Prevention where problems are found.

F. The Permittees shall continue to integrate IC/ID detection and elimination into their inspection programs, training of Permittee staff, and monitoring data collection and other indicator data.

G. The Permittees shall annually review and evaluate their IC/ID program, including litter/trash BMPs, to determine if the program needs to be adjusted. Findings of the review and evaluation shall be submitted with the Annual Report.

H. The Permittees shall maintain a database summarizing IC/ID incident response (including IC/IDs detected as part of field monitoring activities). This information shall be updated on an ongoing basis and submitted with the Annual Report.

I. The Permittees shall control, consistent with the MEP standard, Illegal Discharges (including the discharge of spills, leaks, or dumping of any materials other than storm water and authorized non-storm water) into the MS4. All reports of Illegal Discharge shall be promptly investigated and reported as specified in Section XVI (Notification Requirements).

⇒ J. In the 2004-2005 Annual Report, the Permittees characterized trash, determined its main source(s) and developed and implemented appropriate BMPs to reduce and/or

---

[40] USEPA (Illicit Discharge Detection and Elimination - A Guidance Manual for Program Development and Technical Assessments) by the Center for Watershed Protection and Robert Pitt, University of Alabama, October 2004, updated 2005).

[41] Table 2: Land uses, Generating Sites and Activities that Produce Indirect Discharges from IDDE, A Guidance Manual for Program Development and Technical Assessments, October 2004 CWP.

⇒ to eliminate the discharge of trash and debris to Waters of the US to the MEP. The BMPs should be continued and their effectiveness must be reported in the Annual Report.

K. Where non-jurisdictional IC/IDs within a Permittees jurisdiction are identified, the Permittees will notify the responsible party and the Executive Officer of the discharge.

X. SEWAGE SPILLS, INFILTRATION INTO THE MS4 SYSTEMS FROM LEAKING SANITARY SEWER LINES, SEPTIC SYSTEM FAILURES, AND PORTABLE TOILET DISCHARGES

A. The Permittees shall continue to provide local sanitation districts 24-hour access to the MS4 to address sewage spills. The Permittees shall continue to work cooperatively with the local sewer agencies to determine and control the impact of infiltration from leaking sanitary sewer systems on Urban Runoff quality. Each Permittee shall implement control measures necessary to minimize infiltration of seepage from sanitary sewers to the MS4 through routine preventative maintenance of the MS4.

B. Each Permittee shall continue to cooperate and coordinate with the sewage collection/treatment agencies as described in Appendix I of the DAMP to swiftly respond to and contain sewage spills that may discharge into its MS4. Management and/or preventive measures shall continue to be implemented for sources including portable toilets, failing septic systems, and failing private laterals that may cause or contribute to Urban Runoff Pollution problems in Permittee jurisdictions.

C. Permittees who are regulated under the SSO Order No. 2006-0003-DWQ, shall continue to comply with that Order to control sanitary system overflows.

D. Permittees with septic systems in their jurisdiction shall maintain the inventory of septic systems within its jurisdiction completed in 2008. Updates to the inventory will be maintained by County Environmental Health via a database of new septic systems approved since 2008.

XI. CO-PERMITTEE INSPECTION PROGRAMS

The Permittee inspection programs are outlined in Sections 7 and 8 of the DAMP and describe some of the minimum inspection and enforcement procedures utilizing existing inspection programs, provides criteria for characterizing the significance of violations, criteria for prioritizing violations, appropriate response actions corresponding to the priority of violations and identifies the hierarchy of enforcement/compliance responses. Section 3.4 of the DAMP provides a framework to standardize the implementation and enforcement by the Co-Permittees of their respective Storm Water Ordinances. The Co-Permittees shall continue to enforce their respective Storm Water Ordinances consistent with the DAMP and this Order.

Storm Water
Clean Water
PROTECTION PROGRAM

RIVERSIDE COUNTY
DRAINAGE AREA MANAGEMENT PLAN

SANTA ANA AND SANTA MARGARITA REGIONS

APRIL 2007

MV00250766

2007 NPDES Drainage Area Management Plan

Construction Site inspectors, Industrial and Commercial Facility inspectors, and other Permittee departments, including fire and wastewater inspectors, will report potential IC/IDs discovered during the course of existing routine inspections to the Regional Board if they are perceived to be in violation of the General Storm Water Permits. In addition, although Construction Site and Industrial and Commercial Facility violations may be enforced initially through Co-Permittee Storm Water Ordinances and erosion control ordinances, referrals are made to the Regional Board if compliance is not achieved. In all cases, the notification of potential non-compliance should be routed through the Permittee's storm water compliance coordinator before notifying Regional Board staff.

4.9 Litter Control

The Permittees implement control measures to reduce and/or to eliminate the discharge of Pollutants, including trash and debris, to and from the MS4 to the Receiving Waters. These control measures are reported in the Annual Report. Typical litter control activities may include public education, street sweeping, code enforcement activities targeted at Illegal Discharges, watershed cleanup events and/or other activities implemented by the Permittees collectively or individually.

4.10 Sanitary Wastes

Sanitary Sewer Overflows and Private Laterals

The Executive Officer of the Santa Ana Regional Board requested the local sewering agencies to take the lead in the development of a unified response to sewage spills that may have an impact on Receiving Water quality. This procedure includes notification of all sewage spills from private laterals and failing septic systems into the MS4 and coordination of sewage spill prevention, containment and response activities though appropriate departments, programs and agencies. The District collaborated with the local sewering agencies in the development of this procedure, a copy of which is included as Appendix E. The Permittees provide local sanitation districts 24-hour access to the MS4s to address sewage spills. The Permittees work cooperatively with the local sewering agencies to determine and control the impact of infiltration from leaking sanitary sewer systems on Urban Runoff quality.

Failing Septic Systems

The Department of Environmental Health (DEH) regulates septic tanks and portable toilets under Ordinance No. 712. This ordinance requires sanitary waste haulers to inform residential septic tank pumping customers in writing of:

- The number of compartments within the system to be pumped;
- An assessment of tank condition as to necessity for pumping chambers, in addition to the primary chamber. For routine maintenance, all compartments of a septic tank should be made available for pumping of liquid and solids;
- The number of compartments actually pumped;
- The number of gallons removed;
- The pH value of the load.

MV00250767

effectiveness of its litter/trash BMPs by assessing the volume and character of trash removed during annual catch basin and MS4 Facility maintenance described in Section 5.3.1 above. The findings of the reviews are reported in the Annual Report (IX.G & J).

5.3.2 Other Permittee Facilities and Activities

The 1996 SAR MS4 Permit required the Permittees to develop a Municipal Facilities Strategy to identify BMPs for activities conducted at Permittee facilities. The 1996 SAR MS4 Permit also identified the activities for which the Permittees were required to select BMPs to reduce the potential for storm water Pollution. These facilities and activities included street sweeping, catch basin cleaning, maintenance yards, vehicle and equipment maintenance areas, waste transfer stations, corporation and storage yards, parks and recreational facilities, landscape and swimming pool maintenance activities, MS4 maintenance activities, and the application of pesticides. The Municipal Facilities Strategy is incorporated into this section of the DAMP.

As part of the development of the Municipal Facilities Strategy, the Permittees identified the types of facilities they operate. During this process, the types of facilities and the activities conducted at those facilities were identified as having the potential to contribute Pollutants to Urban Runoff as shown in Table 5-2. Table 5-3 lists the types and numbers of facilities operated by the Permittees in the SAR. ABOP collection centers were not identified as facilities of concern in the SAR as they are otherwise regulated under the Resource Conservation and Recovery Act (RCRA). Permittee facilities such as wastewater treatment plants, airports, and landfills have coverage under the Industrial General Permit or under an individual NPDES permit.

No waste transfer stations were identified as being operated by the Permittees and facilities that consisted of only administrative buildings and parking areas were not identified to be of concern regarding Urban Runoff Pollution. Identification of the potential Pollutants at each Permittee's facilities was necessary in order to select appropriate candidate BMPs to reduce Pollutants in Urban Runoff to the MEP. In addition, the Permittees were surveyed to identify the potential Pollutants of Concern typically associated with the activities performed at or based from the identified facilities of concern. Table 5-4 identifies Pollutants of Concern that may be associated with activities conducted at or based from Permittees' facilities.

During the development of the facility specific strategies, the Permittees identified existing Non-storm Water discharges and characterized the discharges with respect to frequency, volume, flow, and duration. The Permittees eliminated or permitted such discharges. A template facility Pollution Prevention Plan for Permittee facilities, including an annual inspection form, was developed and is provided in Appendix F. Facility-specific Pollution Prevention Plans based on this template, or similar templates, have been prepared for each of the facilities and activities listed in Table 5-3. These Pollution Prevention Plans are maintained and updated by the Permittees annually. Re-inspections and corrective actions are taken where deficiencies are found. The inspection reports, and documentation of resulting corrective actions, are kept for five years and are incorporated into the Pollution Prevention Plans.

Based on the facilities, associated activities and the Pollutants of Concern identified, a list of potential Source Control BMPs was developed by the Permittees. This list utilizes the BMP designations used in

MV00250768

12.0 PROGRAM EVALUATION, REPORTING AND REVISION

12.1 ANNUAL REPORTING

Each year the Permittees prepare Annual Reports summarizing the implementation of the programs described in the DAMP for submittal to the Regional Board. To support preparation of the Annual Reports, the Permittees submit to the District documentation of their implementation of the DAMP compliance programs utilizing standardized reporting forms. Copies of these standardized reporting forms are included in Appendix K. The reporting forms will be amended by the Permittees as needed to facilitate changes in compliance programs or more accurate reporting of compliance programs.

12.2 PROGRAM EVALUATION

The Permittees regularly assess the component programs of the DAMP to identify improvements that will promote the reduction of Pollutants in Urban Runoff to the MEP while also supporting the responsible management and allocation of the public resources available to implement the DAMP.

The short-term strategy for assessing the effectiveness of the DAMP will focus on an overall program effectiveness using measurable goals, and direct and indirect assessment measurements. The Permittees will track and report the following data that are believed to have a positive influence on Urban Runoff and Receiving Water quality:

- The number of IC/ID reports received.
- Percentage/Number of IC/IDs that were sampled that exceeded criteria and required follow-up.
- Percent/Number of enforcement actions that reached each level of enforcement.
- Estimated volume of anthropogenic trash removed from Permittee MS4 facilities.
- Percent/Number of Permittee facilities with appropriate BMPs identified.
- Percent/Number of annual facility inspections that require follow-up actions.
- Average percent/number of follow-up actions identified in the previous year's Permittee facility inspections that were addressed.
- Number of Permittee facility and MS4 operators and maintenance staff that attended Municipal training.
- Estimated tons of Waste removed by Permittee street sweeping.
- Estimated tons of Waste removed from Permittee Open Channels.
- Estimated tons of Waste removed from Permittee storm drain inlets.
- Number of acres of Significant Redevelopment projects that incorporated LID-based BMPs that are built and completed.
- Number of applicable planning staff that attended WQMP training.
- Number of post construction BMPs properly maintained and operated.
- Number of illegal construction sites that are discovered (i.e., without building/grading permits).

MV00250769

SIP - Appendix 4 of the Policy for Implementation of Toxics Standards for Inland Surface Waters, Enclosed Bays, and Estuaries of California.

Site Design BMPs – Any project design feature that reduces the creation or severity of potential pollutant sources or reduces the alteration of the project site's natural flow regime. Redevelopment projects that are undertaken to remove Pollutant sources (such as existing surface parking lots and other impervious surfaces) or to reduce the need for new roads and other impervious surfaces (as compared to conventional or low-density New Development) by incorporating higher densities and/or mixed land uses into the project design, are also considered site design BMPs

Smart Growth Principles – Smart Growth refers to the use of creative strategies to develop ways that preserve natural lands and critical environmental areas, protect water and air quality, and reuse already-developed land.

SMC - Storm Water Monitoring Coalition

Source Control BMPs – In general, activities or programs to educate the public or provide low cost non-physical solutions, as well as facility design or practices aimed to limit the contact between Pollutant sources and stormwater or authorized Non-Storm Water. Examples include: activity schedules, prohibitions of practices, street sweeping, facility maintenance, detection and elimination of Illicit Connections, and other non-structural measures. Facility design (structural) examples include providing attached lids to trash containers, canopies for fueling islands, secondary containment, or roof or awning over material and trash storage areas to prevent direct contact between water and Pollutants.

Southern California Monitoring Coalition (SMC) - A regional group working to improve monitoring program design, parameter test methods, calibrate labs, evaluate the effectiveness of BMPs, and/or advance the science and understanding of Urban Runoff impacts on Receiving Waters.

SSMP – Sewer System Management Plan

SSO Order – Statewide General Waste Discharge Requirements for Sanitary Sewer Systems, Water Quality Order No. 2006-0003-DWQ

State Board –State Water Resources Control Board

Storm Water – Stormwater runoff and snow melt runoff from urban, open space, and agricultural areas consisting only of those discharges that originate from precipitation events. Stormwater is that portion of precipitation that flows across a surface to the MS4 or receiving waters. Examples of this phenomenon include the water that flows off a building's roof when it rains (runoff from an impervious surface); the water that flows into streams when snow on the ground begins to melt (runoff from a semi-pervious surface); and the water that flows from a vegetated surface when rainfall is in excess of the rate at which it can infiltrate into the underlying soil (runoff from a pervious surface). When all other factors are equal, runoff increases as the perviousness of a surface decreases. During precipitation events in urban areas, rain water may pick up and transport Pollutants through stormwater conveyance systems, and ultimately to Waters of the U.S.

Storm Water Ordinance – The Storm Water/Urban Runoff Management and Discharge Control Ordinances and ordinances addressing grading and erosion control adopted by each of the Co-Permittees

Community & Economic Development Department

Planning Division

Report prepared by:

Thomas M. DeSantis
Consultant

October 2011

Introduction

This study was undertaken to assist the Economic and Community Development Department and City Manager's Office in defining key issues and challenges facing the Planning Division. Research was targeted toward the following areas:

- Funding & Staffing
- Workload Indicators
- Best Practices
- Contracts
- Technology
- Customer Feedback & Process Enhancement
- General Management Practices
- Accountability
- Performance Measurements
- Communication/Reporting

The approach relied upon examination of a broad series of indicators through which stakeholders could effectively gauge the overall status of the Division in its important public service mission. Research included thorough review of existing documents, interviews with managers and analysis of specific information requested from City staff.

The report is presented in two sections, one pertaining to Organizational Culture & Practices, and the other addressing Productivity & Performance Measures. Observations/findings are presented in each, immediately followed by recommendations relevant to the topics addressed. Findings have been quantified according to the methodology presented herein, and are intended to present complex data and trends in a reader-friendly fashion.

The Consultant gratefully acknowledges the expert assistance provided by the Division Manager and his professional staff members who compiled extensive information essential for this study. In many cases, this involved compiling historical data not previously catalogued in the manner presented herein. The positive spirit with which they approached this undertaking is profoundly appreciated.

It is hoped that the results of this study, and the methods of data collection created for its purposes, will provide meaningful information for the many internal and external stakeholders in the continued success of Moreno Valley's Planning Division.

Planning Division

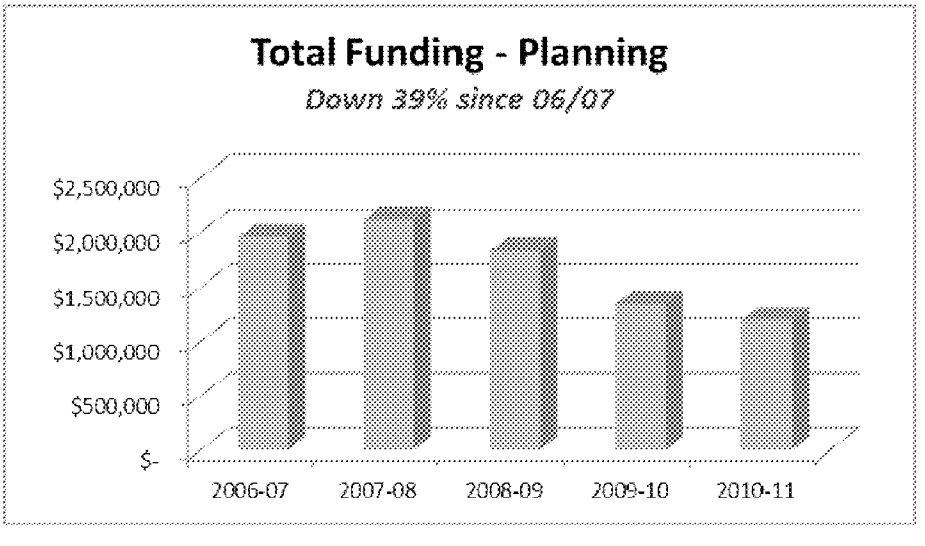
The mission of the Community & Economic Development Department is to facilitate new investment and development opportunities in the community through a variety of services including planning, building & safety, economic development, redevelopment, affordable housing and code compliance. As an integral component of CEDD, the Planning Division processes land use applications in accordance with the provisions of the City's Development Code, General Plan, Landscape Guidelines, applicable Specific plan requirements, CEQA, and other State and Federal requirements.

This report on the Planning Division is presented in two sections; the first addresses Organizational Culture & Practices and the second pertains to Productivity Measures. Observations/findings are presented in each sub-section, immediately followed by recommendations relevant to the topics addressed.

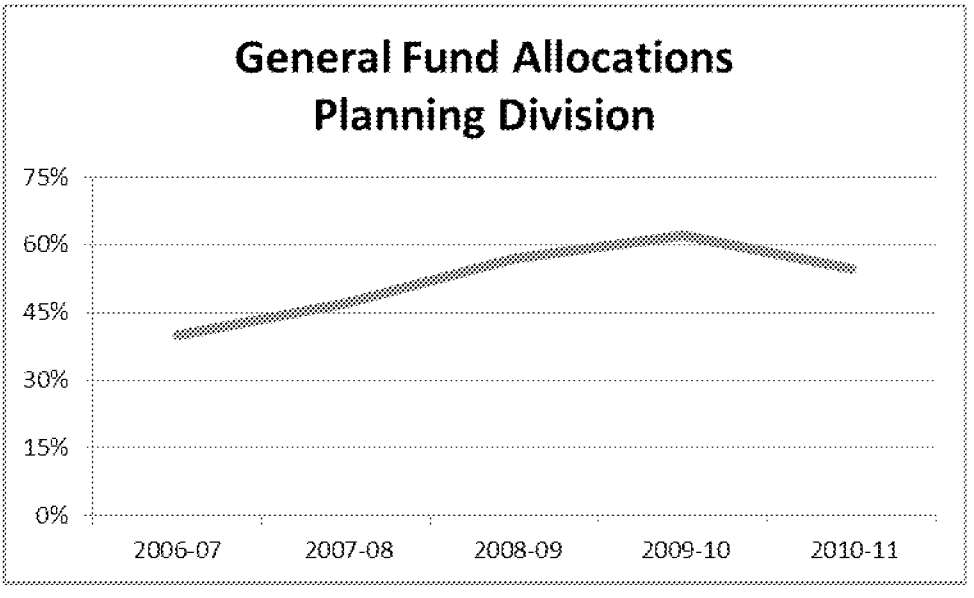
Part I: Organizational Culture & Practices

Funding and Staffing

Total funding for the Planning Division, like construction activity, has dropped steadily in recent years. The Division's budget has dropped approximately 39% since FY 2006/07 when it totaled $1,955,665.



The City's General Fund supports functions such as informational Counter service, updates to City development standards, General Plan/Zoning Changes, Municipal Code Amendments, review of outside agency plans, and review of City projects. Summary information is provided below.



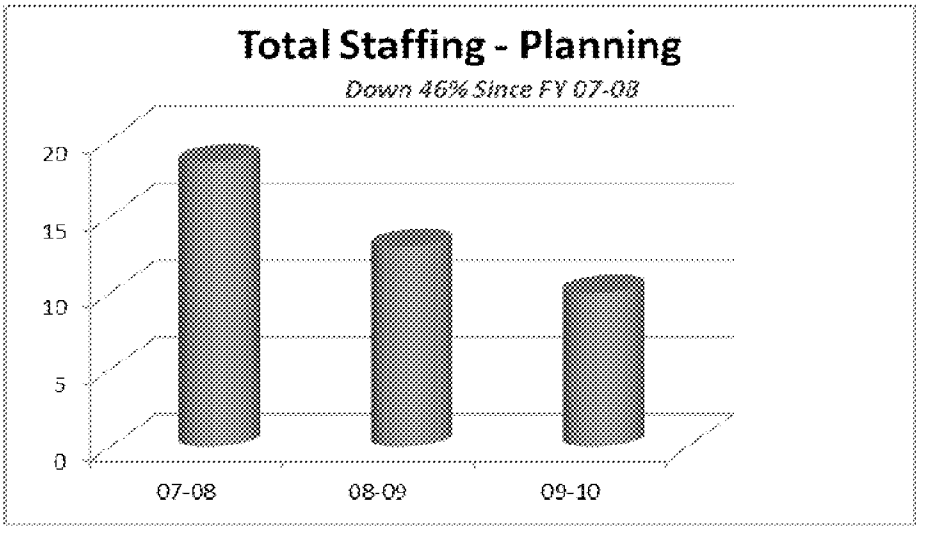
As illustrated, recent General Fund contribution levels have ranged from 40-62%, with a four-year average of 52%. After the total amount of General Fund allocations peaked in FY 2008/09 (at just over $1 million), the amount of City discretionary revenue allocated to Planning has dropped significantly each year thereafter. As development-driven workload and funding declined over this period, General Funding (to support ongoing functions) naturally became a larger percentage of the Division's budget and peaked (by percentage) in FY 2009/10. The relational trends observed between General Funds and Development Fee revenues appear to logically reflect the changing mix of the Division's workload from development-based to meeting the City's basic requirements.

As currently budgeted, the Planning Division comprises 12 FTE positions (not reflecting the 10% furlough for all City employees), including staff assigned entirely to grant funded activities (American Recovery and Reinvestment Act of 2009, Neighborhood Stabilization Program and a grant from Southern California Edison to prepare the City's Energy Efficiency and Climate Action Strategy). All of these

employees continue to be supervised by the Planning Division Manager.

This leaves 8 FTE employees to provide the full range of in-house Planning support, with 4 assigned to staff the Public Service Counter and the remaining 4 (including the Planning Official) to provide fee-supported case planning activities.

Staffing levels in the Division have decreased sharply from a total of 18.5 FTEs as recently as FY 2007/08. While staffing levels have alternately increased/decreased over the past decade, fiscal conditions, refinement of processes and introduction of technology have dramatically reshaped the Division since the early 1990s when it comprised nearly 40 employees.



Although employee workloads have been relatively stable over the recent short-term, gradual resumption of economic activity will increase workloads.

While the two Sr. Planners may act in a lead capacity at times, this activity is largely confined to assisting other staff members with processes and interpreting general requirements. The Division Manager interacts directly with all staff on issues requiring policy direction, or in instances where supervisory contact with a customer may prove beneficial.

Division staff members are cross-trained to assist with tasks performed by their colleagues. The administrative support team provides mutual back-up. Planners, as well as Sr. Planners, can help cover the Public Service Counter in situations when Techs may not be available. The Division Manager indicates that planned extended

absences do not affect workflow, as the small staff can interact effectively with one another to ensure continuity of service. Services which relate to planners' various areas of specialty can generally be scheduled to preclude delays due to staff absences (vacations).

Under the current fee structure, rates (when last adopted) are generally based upon units of service, and do not account for indirect costs associated with staffing the Division such as vacation hours, sick leave and associated backfill. Discussing these real and unavoidable costs would be appropriate when City staff next considers alternatives for rate structure recommendations.

FINDINGS: Staffing-related Deficit Reduction Options factored into the FY 11/12 budget reflect estimates for slight increases in activity and associated revenues; should these projections not materialize, further budget reductions will likely be necessary.

FINDINGS: Staffing reductions have been determined exclusively by workload driven revenue levels. The Department has been successful in precluding layoffs of additional staff members by assigning staff to grant funded activities. This technique is noteworthy in that it spares employees - - and the City organization - - from the negative impacts of further layoffs. It is also extremely beneficial to the Division in that it keeps experienced staff members available as workloads and associated revenue levels increase.

- Absent from active consideration, however, has been a proactive approach to using this fiscally-driven process to establish baseline staffing levels, which could be augmented (as development activity rises) via consultant staffing through contracts.

- Discussions of this concept with the Division Manager indicate a potential baseline staffing configuration (to provide routine Planning services) as follows:

    - ❖ Planning Official/Division Manager
    - ❖ 2 Administrative Support positions
    - ❖ 2-3 Planning Techs
    - ❖ 2 Senior Planners
    - ❖ 3-4 Planners
    - ❖ TOTAL: 10-12

- Because the high range of that configuration would represent an increase over the current staffing level (with return of current grant funded positions to carry out Planning duties), it is

advisable to consider the extent to which the current level may be a more suitable baseline for at least the next several years. While in-house staffing enhances cohesiveness among members of the Planning team, current economic conditions offer the ideal situation for steps to preclude the continuing cycle of staff reductions in the future.

It should be noted that although the Division Manager's historical experience with use of consultants has not been consistently positive, he indicates that contract support has been beneficial when assigned to a specific project (rather than rotating support for the same project between in-house and consultant staff). He also indicates that dedicated contract planning support was provided in this fashion for the Highland Fairview project, with positive results.

FINDINGS: The Division Manager is also open to use of contract positions as a stopgap method until new positions are created or until permanent hires can be made to replace staff members who leave the organization. While such uses of contract staffing are fully appropriate, a limited (stopgap) approach would lead the City to miss the opportunity to create a hybrid staffing configuration which could take the Division into a future likely to be quite different from the boom-bust-boom cycles seen since incorporation.

Among the concerns expressed by the Division Manager include unevenness between work conducted by consultants and projects undertaken by permanent staff. This is accurately attributed to the differing levels of familiarity with City standards as well as some of the finer aspects of community identity which might not be as readily apparent to a consultant. This situation can be addressed, however, if the City were to establish a multi-year contract with a very small number of firms who could designate individual planners to perform all assigned work within the City of Moreno Valley. Through such an arrangement, City staff could forge closer working relationships with consultants, who could develop significant expertise in City planning issues and function as fully effective extensions of in-house planners.

Work assignments are generally made in a consistent fashion, with minor permits and more routine tasks assigned to Planning Techs. As workload demands warrant, Techs handle more complex cases in conjunction with senior planning staff. On occasion, less complex cases are assigned to senior staff to enhance continuity and/or provide rapid response.

In most instances, cases are handled in a vertical fashion - - where a single staff member is responsible for processing from start to finish.

Deviations from this approach are seen under special circumstances (such as during peak workload periods) in order to ensure timely completion.

Employee evaluations are made in accordance with a standardized citywide approach which does not include measurement categories which represent specific Planning activities or performance measurements. Mention of specific work activities is made via narrative and/or listing of major work plans.

The small number of employees within the Division facilitates continuous monitoring and feedback, which is also supported by regular meetings of Planning staff.

Recommendation: In light of projected revenue increases factored into the FY 2001/12 Budget, the Planning Division should continue to closely track activity levels and associated revenue on a monthly basis. Reconciliation of estimates and actuals should be completed on a monthly or bi-monthly basis - - to confirm whether revenues are increasing as forecasted, and to provide the Executive Team with opportunities to increase/decrease Division spending levels as quickly as possible over the course of the fiscal year.

Recommendation: The Planning Division Manager and CEDD Director should use the current budget situation to prescribe recommended baseline staffing levels. Doing so would ensure that the Department retains the core level of in-house expertise to sustain basic operations, augmented (as needed) by contract staff. This approach would provide the Department with flexibility to rapidly adapt to changing workloads without the expense, or organizational trauma, associated with expanding/contracting the permanent (career position) work force through economic cycles. While this may be the intention of Department managers, plainly stating this objective in terms of a policy recommendation to the Council offers several distinct advantages:

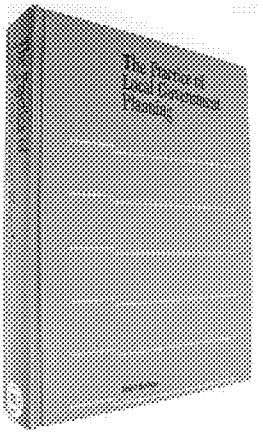
- Provide an increased sense of stability among remaining in-house staff, whose morale has been reported to be significantly impacted by ongoing reductions in force;
- Preclude continuing boom/bust cycles within the Planning Division in the years ahead;
- Create a minimal staffing configuration which could, if required, be adjusted if projected workloads far exceed projections used to establish baselines.

Recommendation: The City should evaluate direct and indirect costs for service when updates to development service rates are next considered. Whether or not the City ultimately decides to factor indirect costs (e.g. vacation, training time, sick leave, etc.) into the rates, considering these unavoidable costs will assist in evaluating appropriateness of General Fund subsidies as well as operational impacts when funding does not allow backfill during staff absences.

Recommendation: The City's Human Resources Department should consider opportunities to augment the standard employee evaluation format with several performance indicators unique to major departmental functions. Careful selection of these indicators will ensure that they remain valid (within the framework of the overall Evaluation methodology) while also assisting Department Heads in leading staff toward meeting organizational objectives. Because "*what gets measured gets done*," the types of indicators selected should tie directly to respective productivity measures instituted within the City's major departments.

Best Practices

While the City does not have its own Best Practices manual for Planning activities, the Planning Division Manager regularly receives information from the American Planning Association (to include the American Institute of Certified Planners) as well as through various LISTSERV e-mail connections with colleagues in other jurisdictions.



In terms of a standard Planning manual, the staff has access to the widely recognized text "The Practice of Local Government Planning" (known as The Green Book), a standard college textbook published by the International City/County Management Association and viewed as a staple of the planning profession. Referring to this text can assist Planning staff in understanding the overall process from theoretical and practical perspectives. As a problem solving tool, the book provides helpful context which assists professionals in transcending case-specific challenges and focusing on the results of the planning process.

Participation in the Western Riverside Council of Governments' Planning Technical Advisory Committee provides the Division Manager with opportunities to network and share ideas with colleagues in the region, many of whom face similar challenges.

FINDINGS: Among one of the industry Best Practices being implemented within Moreno Valley's Planning Division has been the move to electronic documentation. While this has reduced the volume of paper material which is processed and stored, the next step will be to transition the Planning Commission to paperless agenda packets.

Meetings among the Planning Division staff allow for cross-talk regarding the effectiveness of ideas implemented as a result of staff innovation and/or interaction with peers in other jurisdictions. These discussions, however, are exclusively qualitative and do not include analysis of statistics which could measure affects upon the Division's workflow.

FINDINGS: Through research conducted for this report, it was observed that the Planning Division does not offer Fast Track review processes to support private development where costs for accelerated review can be more than offset by savings derived from expedited project completion. This concept was also raised during the recent study of the City's Land Development Division and supported by the Community & Economic Development Director. The Planning Division Manager indicated that this technique has not been used for several reasons:

- Similar to the Land Development Division, Planning does not have any staff members serving in classifications which can carry out assignments beyond the standard business day on an overtime basis. This situation reflects an unintended consequence of necessary staffing reconfigurations which have reduced levels of staffing within the Division.

- Using outside consultants to conduct review has been complicated by lack of familiarity with City standards. This concern is similar to that raised earlier in this report with regard to using consultants to absorb future workload increases (as an alternative to hiring permanent Planning staff). As in that situation, consultants could be used for Fast Track support if the City were to establish a multi-year contract with a very small number of firms who could designate individual planners to perform all assigned work within the City of Moreno Valley.

- The Division Manager works closely with planners to manage priority reviews while minimizing the impact upon other pending applications.

- Unlike the Land Development Division, Planning staff members are less accustomed to working with outside consultants.

Notwithstanding these concerns, the City's consideration of a Fast Track Planning process would be entirely consistent with the City Council's policy emphasis on facilitating private sector investment in Moreno Valley's economic future.

FINDINGS: At present, the City does not offer a concise document which orients applicants (non-developers) to the entitlement or project approval processes. While professional developers are well-versed in this process, individual home/property owners are often unfamiliar with the various steps and their rationale. During the course of this study, Public Service Counter staff members have been observed providing individual applicants with much of this background verbally…in a consistently patient and cheerful manner.

A document titled "Project Review Process for Major Development" (shown here) is available on the Developer Help Desk section of the City's web site. It can be found at: http://www.moreno-valley.ca.us/city_hall/developer_zone.shtml The Planning Division Manager indicates that this document was largely created by Land Development staff, and could benefit from updates to time frames and descriptions of some processes.

Similarly, a wide range of Planning forms can be accessed through the City of Moreno Valley's website: (http://www.moreno-valley.ca.us/city_hall/forms.shtml#planning). Several forms (such as those pertaining to amendments of the General Plan, Development Code and Specific Plan) offer some helpful background on the process as well as submittal requirements. Expanding this type of information into a single handbook would speed access to helpful background in a more efficient manner; Counter staff could then respond to questions and provide supplemental information rather than providing complete orientations to many individual residents each week.

The City's "Developer Help Desk" web page provides a wide range of helpful information for commercial developers and residents…particularly for applicants who don't routinely interact with the City on land use or development-related matters. This information is readily accessible from the City's Home Page and via the "Business and Development" tab on that page. As this information pertains to processes managed by multiple Departments and Divisions, it would be helpful to assign a single Division of the Community and Economic Development Department to ensure that timeliness and accuracy of updates are coordinated with other areas of City government.

Recommendation: The Planning Division should begin to compile a local Best Practices Manual which can be used to generate discussion at regular staff meetings. Creating such a manual need not be a labor intensive effort; it can be as simple as a compendium of articles taken from professional periodicals and professional resources. For example, the American Planning Association website offers a wide range of helpful information regarding Best Practices, to include detailed narratives on Best Practice Awards and discussions of Best Practices in a range of Planning areas. The effort could begin by assigning one staff member each month to identify a relevant article to add to the Manual; the article could then be distributed electronically to all staff members in advance of the monthly staff meeting, during which a portion of the session could be devoted to discussion of the article. This relatively simple approach can add a brief instructional element to each staff meeting, and generate creative discussion of techniques and processes which could enhance efficiencies and measurable outcomes to the Division's regular activities.

Recommendation: The City should actively consider purchasing electronic devices which would allow the Planning Commission to utilize paperless agendas (as does the City Council). As the information regarding cases is now available electronically, the City can avoid the time and expense currently associated with printing paper copies of all agenda material for Planning Commissioners.

Recommendation: Implementation of key Planning process reforms (whether derived from staff innovation, interaction with peers in other jurisdictions or based upon research into industry best practices) should be undertaken in a measurable, results-oriented manner. This approach should include several fundamental steps:

- Identify desired outcomes in quantitative terms (e.g. review time, staff time devoted to a particular process, number of comments which appear in subsequent reviews which do not appear in initial reviews, etc.).

- Identify existing baseline statistics for these same measurements under existing processes. This will allow comparative analysis of the results garnered from process revisions.

- Schedule a date certain upon which the results will be reviewed and discussed among staff. The implementation period should vary, to reflect the nature of the process improvement undertaken and the length of time required to gather meaningful performance data with which to evaluate implementation results.

Recommendation: Consistent with the City's strong emphasis on job creation, the Planning Division should implement a Fast Track review process to support private development projects. Because current staffing configurations do not support reimbursable review on an overtime basis, and because the demand for this additional level of service will fluctuate, the Division should establish this option via contracts with outside engineering firms which could develop familiarity with the City's land use standards.

Recommendation: The Planning Division should update the flowchart currently posted on the Developer Help Desk (at http://www.moreno-valley.ca.us/city_hall/developer_zone.shtml) to ensure that it accurately conveys information and time lines pertaining to the City's land use approval processes.

Recommendation: The Planning Division should create a consolidated, easy-to-read handbook which can quickly orient property/home owners with the City's Land Use application and approval processes. The document should be made available on the City's web site and in printed form at the Public Service Counter in City Hall.

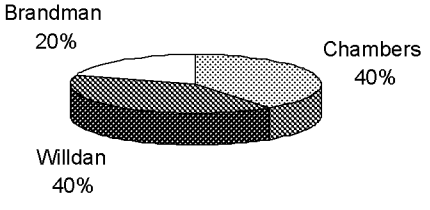
Recommendation: The Community and Economic Development Department should assign one of its Divisions to ensure timeliness and accuracy of updates to the Developer Help Desk web page, and coordination with other areas of City government.

Contracts

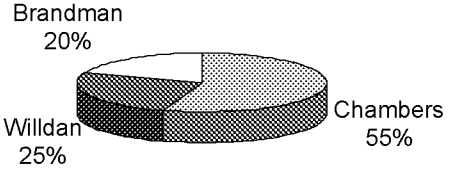
The Planning Division utilizes a modest level of professional services contracts, mostly to provide Environmental Impact Report peer review for industrial projects. Consultants are selected via a Request for Proposals issued for each project, rather than relying upon a pre-qualified panel of consultants. The Division Manager indicates that interviews are included in the selection process only in situations when the responding consultant is not known to City staff. Over the preceding three fiscal years, five such contracts have been issued, for a total cost of $223,570 and an average cost of just under $45,000.

Three firms have been utilized to perform this work; as shown below, the number of contracts awarded to these firms is spread in a reasonable manner, with the highest dollar value of work awarded to Chambers Group, Inc.

EIR Peer Review
# of Contracts



EIR Peer Review
Contract Value



FINDINGS: Given the limited usage of these services over the past several years, awarding work via the RFP process appears to have been a reasonable course of action. As economic activity increases in future years, however, establishing a pre-qualified panel of consultants would enhance the efficiency of assigning consulting contracts.

Recommendation: The Planning Division should carefully consider establishing a panel of pre-qualified consultants to perform Environmental Impact Report peer review as industrial development activity picks up within the City. A single Request for Qualifications process to establish a panel of firms to which work can be assigned over a period of 3-4 years would enhance the efficiency of this process and likely reduce the time required to bring a consultant on board. This approach will also enhance standardization of this process, to include interviews with all consultant firms.

Technology

The Planning Division has utilized the Permits Plus system since the mid-1990s, with minor updates over time to implement revisions to the City's processes. The system is used to track revenues as well as planning activity. Availability of timely revenue information was reported as an important benefit derived from this system.

While this legacy system can meet the Division's basic needs for the time being, newer technology is currently available to provide significant process efficiencies as well as real-time interfaces with other aspects of the City's Development and Financial systems. Per the City Council's approval of an Enterprise System solution, the Administrative Services Department is leading a citywide effort to identify and procure technology (to include Development Services Modules) which will meet present and future needs. This enterprise approach will also provide important options to merge/standardize processes in use by all Departments/Divisions engaged in the development process.

Although introduction of a new permitting system may appear to be a significant challenge given the Planning staff's current size, implementation during a slower point in the development cycle offers a unique opportunity to institute new processes while a smaller number of cases are moving through the planning process. It will also allow the system to be fully in place and ready to assist the City and developers as economic activity resurges.

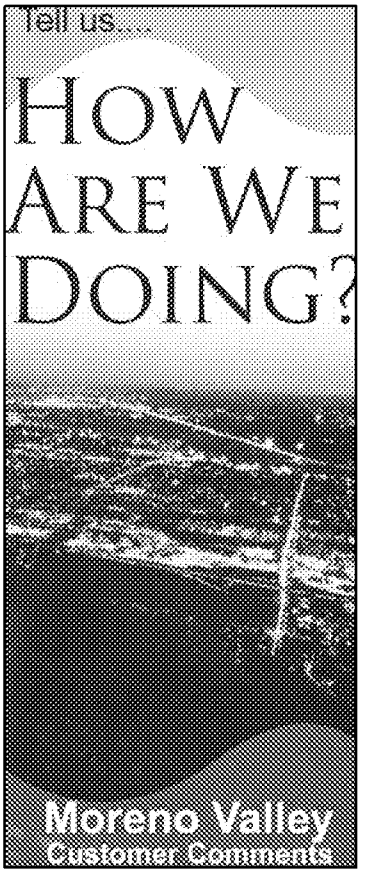
Recommendation: The Planning Division should ensure that the City's Administrative/Financial Services Division is provided complete information regarding Planning's business needs as the City reviews and selects technology solutions.

Recommendation: The Planning Division should implement relevant modules of the City's new Enterprise System in an "off the shelf" manner which capitalizes upon the Best Practices which have been engineered into that system. The Division should avoid - - to the maximum extent possible - - programming changes to require the system to follow unique local processes, as doing so would diminish the value of efficiencies available in the new software and complicate (and increase costs associated with) future software updates.

Recommendation: The Planning Division should implement relevant portions of the City's new Enterprise System as quickly as possible following review/selection by the City's Administrative/Financial Services Division. Rapid implementation, during a slower point in the City's development cycle, will ensure that the City is poised to respond as economic activity resurges.

Customer Feedback & Process Enhancement

Until 2009, the Planning Division used a unique survey card to gauge satisfaction among its customers. At present, the Division solicits feedback via the City's standardized tri-fold brochure available near the Public Service Counter in City Hall. This general survey instrument asks customers to provide basic information regarding the nature of their visit, inquires about wait time, and seeks ratings (Excellent/Good/Fair/Poor) on the manner in which service is provided. Rating categories include: Accuracy, Friendliness, Helpfulness, Knowledge, Professionalism, and Timeliness, as well as an Overall rating.

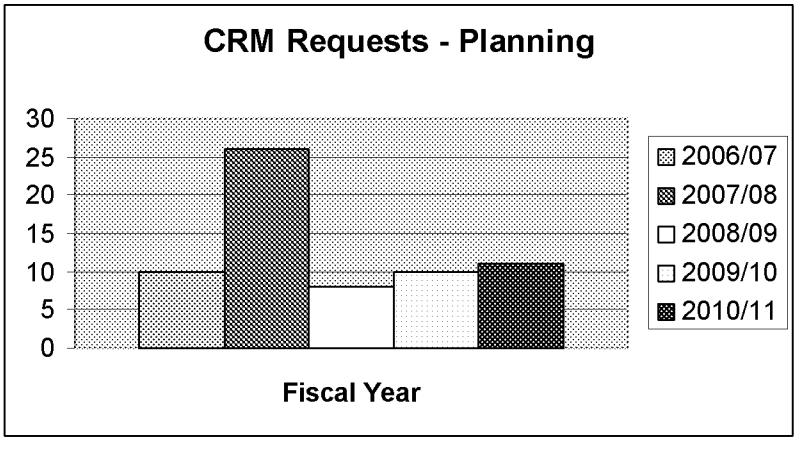


The survey brochure also allows customers to make suggestions to improve service and affords an opportunity to provide additional narrative comments. Customers also have the option to request a response from the City regarding the observations shared. The postage-paid brochure is addressed to return to the City Manager's Office.

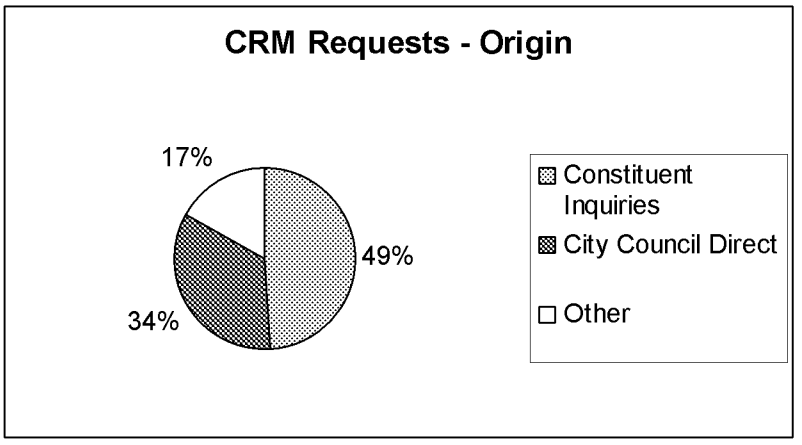
Survey results ultimately returned to the Planning Division Manager are discussed with employees; only upon rare instances is follow-up required from the Division Manager to the individual who completes the survey (reported as fewer than 4 such occasions per year).

FINDINGS: Over previous years, survey results were not logged, tabulated, or retained. Although the Division Manager indicates that nearly all surveys are positive, the absence of historical records precludes analysis of trends or even identification of process enhancements made in response to feedback received.

The Division also receives inquiries and comments via the City's Customer Relations Management (CRM) system, which are routed from the City Council office. The Division has received an annual average of 13 inquiries since 2006.



The majority of CRM interaction with the Planning Division constitutes requests for staff review and information gathering to assist Council Members in responding to constituent inquiries. The other significant percentage of CRM inquiries comes from Council Members (via follow-up requests made during Council Meetings as well as inquiries initiated directly by individual Members).



FINDINGS: While the CRM system effectively logs and tracks inquiries pertaining to Building & Safety cases, its usefulness as a customer feedback tool appears to be extremely limited.

FINDINGS: Real-time feedback is obtained from customers at the Public Service Counter. The Division Manager indicates that negative feedback pertains primarily to applicants' dissatisfaction over requirements imposed by legal mandate and/or the City's land use standards. In many such instances, Sr. Planners or the Division Manager effectively address customer concerns by explaining the rationale behind regulations/standards.

As part of its ongoing approach to seeking process enhancements, staff will sometimes seek informal input from applicants regarding their experiences with other jurisdictions. The Division Manager indicates that his insight sometimes prompts refinements to Planning Division processes.

On rare occasions, the Division receives customer feedback which indicates that a particular case may rise to the attention of City Executives and/or City Council members. In such instances, the Division Manager alerts the Department Head via telephone or e-mail.

Recommendation: The Planning Division should log and retain results of Customer Survey responses. Historical documentation will allow the Division to gauge progress over time, identify recurring themes (positive and constructive) and provide meaningful input for employee (and manager) evaluations.

Recommendation: The Community and Economic Development Department should consider adding an online customer service survey to the City's website. Affording customers an alternative to the hard copy Survey Brochure could increase the number of responses received, and provide data in a format which could be quickly tabulated and recorded.

Recommendation: The Community and Economic Development Department should consider placing survey forms nearer to the exit doors in City Hall rather than only having them available at the front desk nearest the Public Service Counter. Increasing their visibility may increase use of these forms; placing them in an unstaffed location may also boost response as some customers may feel more comfortable obtaining the forms in a more discreet manner.

Recommendation: The Community and Economic Development Department should consider adding a Spanish-language version of the Customer Service Survey now available near the Public Service Counter. As observed over the course of this study, Counter staff's level of (near daily) interaction with Spanish speaking customers indicates that a segment of those being served may not currently have access to feedback mechanisms via the existing English language survey.

General Management Practices

Supervision: The Division Manager, who serves as the City's designated Planning Official, also functions as the Division's sole supervisor. In this capacity, he closely oversees the full range of services provided to developers/residents and the manner in which services are provided. Throughout this study, it was common to observe the Manager interacting with staff and customers on a daily basis. This level of involvement reflects a management approach which is tailored for a small staff and seeks consistency in application of planning requirements.

Planning Technicians are expected to seek guidance from Sr. Planners or the Division Manager in situations where an appropriate degree of flexibility may be helpful to applicants while still meeting project requirements.

Every case letter is co-signed by the Division Manager, to ensure consistency and the completeness of staff work.

Consistency: As planners interact routinely with customers, it is reasonable to anticipate instances where a customer could be provided a response from planners which is subsequently refined following staff interaction with the Division Manager. While data is unavailable to measure the frequency of such situations, the Manager indicates that this occurs less than once per month. Steps undertaken to preclude conflicting guidance to customers include:

- Staff members are instructed to provide only generalized information during preliminary Public Service Counter review of material submitted by applicants.

- Detailed feedback is provided to applicants following thorough review (to include management concurrence) and circulation among all Departments involved in the development review process.

- Greater leeway is provided with regard to requirements which are "preferable" as opposed to those which must be made based upon Code requirements.

To further assist applicants, Planning staff will also offer insight regarding recent Planning Commission findings which may also pertain to a project being submitted for approval.

Communication: The Division takes several routine steps to help keep applicants informed regarding the status of their projects. The Letter of Completeness (signaling that formal review is underway) is followed by notification regarding the project's consideration by the Project Review Staff Committee (comprising staff from the Planning and Land Development Divisions). Interaction at the PRSC stage may include meeting with the applicant as well as distribution of written comments/findings. Form letter responses include information regarding the applicable appeal process(es) available to the applicant.

Strategic Planning: The Planning Division does not engage in formal discussions or strategic planning regarding how the Division should function in future years. Instead, the Division staff participates in "linear" discussions of specific issues or processes on a shorter-term horizon.

Miscellaneous: In prior years, the Planning Division's budget included workload statistics which are no longer prepared for submission with budget documents. The absence of aggregate workload information deprives the Division of an important opportunity

to conduct a comparative analysis of annual data with regard to efficiencies and consistency with organizational goals prescribed by the City Council.

Recommendation: The Planning Division staff should add discussions of strategic planning issues to the list of topics discussed at Division meetings. Such discussions can assist staff members in focusing on long-term goals which can understandably become otherwise eclipsed by the pace of daily work activities. This focus also offers a key benefit in guiding staff toward process innovations consistent with - - and bringing the Division closer to - - long range organizational goals.

Recommendation: The Planning Division, with input and guidance from the CEDD Director, should examine trends associated with multi-year workload statistics and discuss the results within the framework of organizational goals established by the City Council.

Part II:
Productivity/Performance Measures

Existing Measurements

The Planning Division's current approach to measuring productivity and performance includes provision of monthly workload statistics to the Finance Division coupled with ongoing review of applications moving through the approval process by the Division Manager.

Monthly statistical summaries capture the total number of:

- Planning Commission Applications
- Plan Checks
- Major Applications
- Minor Applications

For purposes of this review, specific data was collected to identify trends in workload, budget and staffing levels.

Workload/Staffing Trends

Consistent with economic trends, workload factors affecting the Planning Division have decreased markedly over the past 3 years. In terms of sheer volume, this trend is most vividly portrayed in major project submittals (down 71%), residential project plan check (down 65%) and commercial project plan check (down 62%).

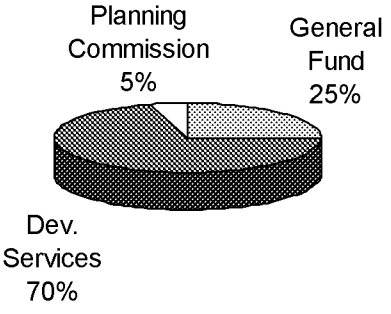
Planning Division: Budget/Workload/Staffing Trends

	07-08	08-09	09-10	Change since 07-08
Budget Actuals - General Fund	$538,033	$504,755	$433,477	**-19%**
Budget Actuals - Development Services	$1,485,047	$1,253,185	$846,618	**-43%**
Budget Actuals - Planning Commission	$96,386	$79,052	$68,857	**-29%**
Total Budget Actuals	$2,119,466	$1,836,992	$1,348,952	**-36%**
Counter Visits - Public Info (General Fund)	6550	4669	3875	**-41%**
Commercial Project Plan Check	702	450	269	**-62%**
Residential Project Plan Check	134	80	47	**-65%**
Major Project Submittals (Entitlements)	165	51	48	**-71%**
Minor Project Submittals (Entitlements)	183	128	107	**-42%**
Counter Project Submittals (Entitlements)	732	675	521	**-29%**
Personnel	18.5	13.0	10.0	**-46%**

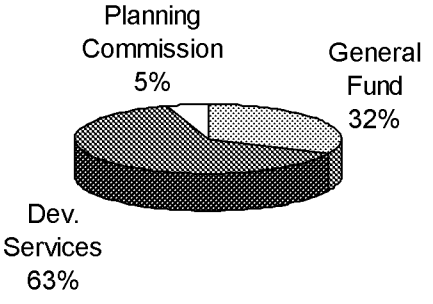
The Division's financing structure (General Fund and cost recovery) is consistent with industry standards which recognize that fee schedules may not capture all costs by virtue of their design as well as due to economic pressures. Allocation of City discretionary funding underwrites general functions such as informational Counter service, updates to City development standards, General Plan/Zoning Changes, Municipal Code Amendments, review of outside agency plans, and review of City projects. These activities, along with the need to retain a baseline level of staffing, largely account for the disparity between the declines in direct development-related workload and the reductions to overall budget and staffing.

Another illustration of the effects of the current economic cycle upon Planning Division workload and funding can be seen in the comparative relationship between General Fund and Development Services expenditures over a three-year period.

Expenditures - FY 07/08



Expenditures - FY 09/10

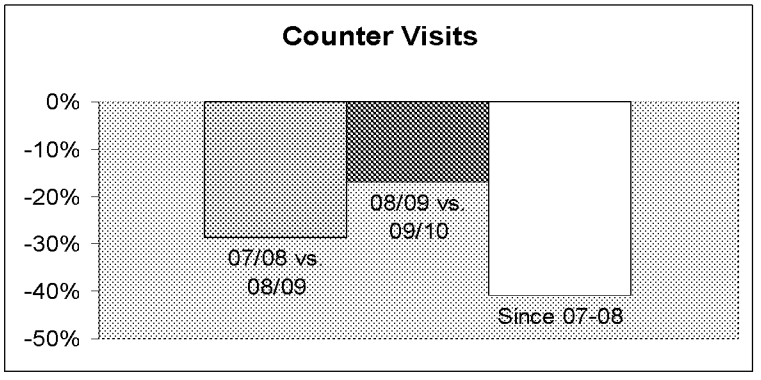


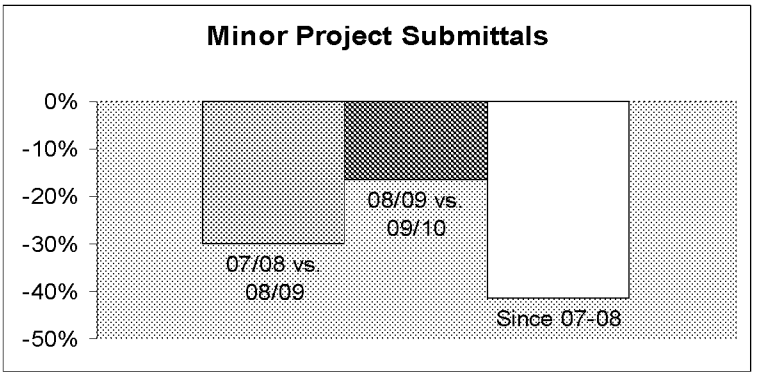
- In Fiscal Year 2007/08, General Fund expenditures comprised 25% of the total while Development Services Expenditures represented 70%.

- By Fiscal Year 2009/10, the 7% relative drop in Development Services expenditures was matched by a proportionate increase of 7% within the General Fund category. General Fund expenditures thus increased to represent 32%

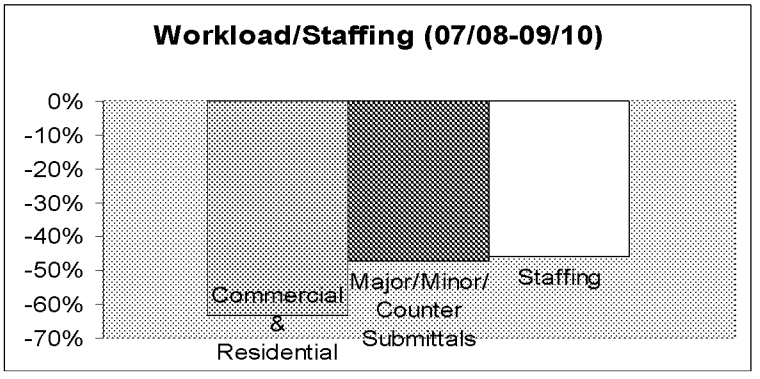
- While Planning Commission expenses dropped over the same period, they continued to account for 5% of Division spending.

FINDINGS: Visits to the Public Service Counter (in the City Hall lobby) offer another indicator of workload trends seen within the Planning Division. As shown below, multi-year trends are validated as consistent with Minor Project Submittals over the same period.





FINDINGS: Staffing levels over the past three fiscal years reflect the City's conservative approach to balancing cost containment with maintaining a basic level of in-house expertise with which to address key Division services. Staffing levels have decreased along with Counter Submittals (in all categories), while retaining sufficient staff with which to process existing levels of commercial and residential applications.



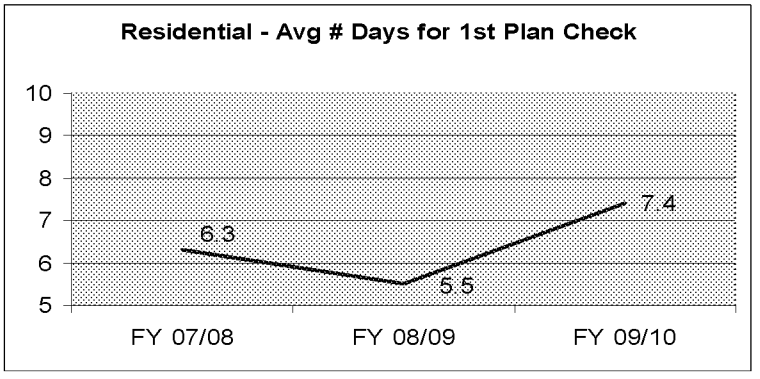
FINDINGS: The absence of any measurable workload indicators pertaining to administrative support staffing precludes findings and recommendations which could assist the Division Manager and CEDD Director in determining how best to assign these important staff resources for greatest benefit to the organization.

Productivity Measures

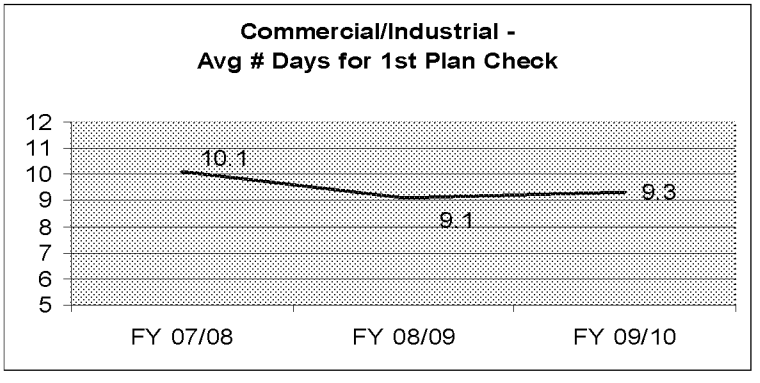
The Division's existing timeliness standard for first review of all residential and commercial/industrial plans is 14 calendar days. For purposes of this study, City staff was asked to provide samples of timeliness data for each type of review; samples ranged from one in every three to one in every ten depending upon the total number by type in each of the past three fiscal years. This methodology allowed data to be gathered for at least 20 reviews of each type of plan in each of the three years under study.

Residential plan checks constitute reviews of building plans. Such reviews are generally performed by Planning Technicians. Conversely, commercial/industrial plan checks include reviews of building, grading, landscaping and lighting plans. Those reviews are typically conducted by case Planners.

FINDINGS: Data sampling for timeliness of Residential plan checks over the preceding three fiscal years shows that reviews are conducted well within the 14 calendar day threshold. As shown below, the review period ranges from 5.5 days to 7.4 days, with a three year average of 6.4 days. While still well within the 14-day standard, *the average processing time has increased 17% over the three-year period.*



FINDINGS: Data sampling for timeliness of Commercial/Industrial plan checks over the preceding three fiscal years shows that reviews are conducted well within the 14 calendar day threshold. As shown below, the review period ranges from 9.1 days to 10.1 days, with a three year average of 9.5 days. It is noteworthy that the *average processing time has decreased 8% over the three-year period.*

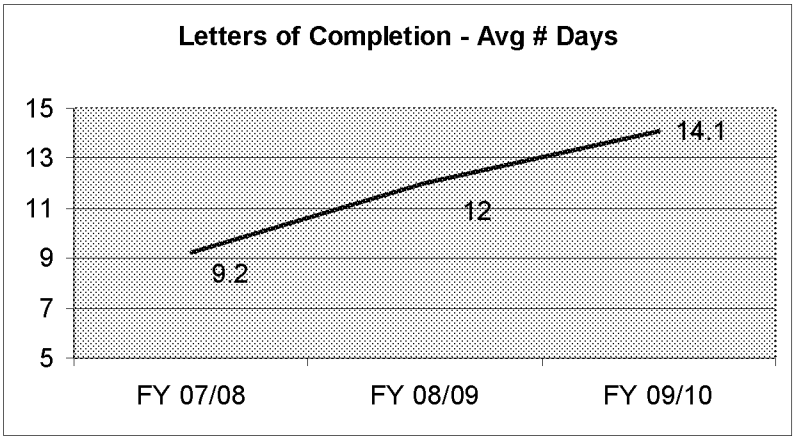


Another performance measure employed by the Planning Division is the time required to provide a Letter of Completeness to project applicants. This letter indicates that staff has conducted its preliminary review of the application and determined that it is:

A. Sufficiently complete to commence formal processing; *or*

B. Incomplete, with a requirement to provide specific additional information before the application can be processed.

FINDINGS: The Division's timeliness standard for issuance of these letters is 30 calendar days. As shown below, the actual review period ranges from 9.2 days to 14.1 days, with a three year average of nearly 12 days. *While still well within the 30-day standard, the average processing time has increased 53% over the three-year period.*



Time measurements applied to completion of all Planning Division processes must reflect the important roles of the Planning Commission and City Council in the land use process. The paces of these deliberative phases are appropriately set by decision makers at the policy level.

In a similar sense, it is not practical to associate all aspects of timely processing of land use applications with staff activities because some cases are delayed pending applicant follow-up on particular requirements. To help projects flow through the process, the Division Manager informally monitors the length of time that a case has been pending and follows up with staff when a delay is observed (generally defined as a minor application which is more than 90 days old and a major application pending for more 180 days). While this approach may be practical in the current environment (while caseloads are down), a more formalized tracking system would be required as development activity resurges. Although the Permits Plus system may provide such functionality, it would not make sense to invest any additional resources in this soon-to-be-replaced platform.

To assist applicants, the Planning Division emphasizes thoroughness in submissions for land entitlements. The clear objective is to address as many issues as possible during the entitlement phase, which streamlines the subsequent phases of the development process, to include plan checks performed by the Land Development Division.

Recommendation: The Planning Division should establish measurable workload indicators pertaining to administrative support staffing requirements, which could assist the Division Manager and

CEDD Director in determining how best to assign these important staff resources for greatest benefit to the organization.

Recommendation: The Planning Division should revise the standards against which timeliness of first review of all residential and commercial/industrial plans is measured. While the Planning Division's 14 calendar day standard to complete first plan checks is reasonable, it may not be a sufficient measure with which to compel increased timeliness. Adjusting the threshold to a more realistic (lower) number of days - - while taking clear steps to preserve the existing quality of reviews - - would provide the Division with a productivity target which would support continuous process improvement. This target can be subsequently adjusted (upward or downward) depending upon staffing levels in conjunction with workload statistics. In light of recent data sampling, the following standards are recommended for the City's consideration at this time:

- Residential: 7 days
- Commercial/Industrial: 9 days

Taking advantage of its existing data collection to chart timeliness statistics for individual staff members could further assist the Planning Division's ongoing efforts to enhance the efficiency of the Plan Check process.

Recommendation: The Planning Division should chart key performance data which, in the aggregate, allows all staff members and management to continually identify clear trends. Taking advantage of case tracking logs, the staff can continue to build upon the type of data collected for this study for ongoing measurements, capture greater efficiencies and enhance fiscal forecasting related to case-driven revenues.

Recommendation: The Planning Division should revise the standard against which timeliness for Letters of Completeness are measured. Given the Division's overwhelming success in submitting letters well within the 30-day time period, reducing this timeframe - - while taking clear steps to preserve the existing quality of preliminary reviews - - would provide the Division with a more meaningful productivity target. Such a revision would also assist the Division in focusing on steps to reverse the slide toward longer review periods which were seen over the past three years. In light of recent data sampling, the Division should consider implementing a 12-day standard at this time, which reasonably aligns with the recent average time period, and is shorter

than the average processing period in FY 09/10. This standard should be reviewed for similar downward adjustment at the start of the FY 2012/13 budget cycle.

Recommendation: The Planning Division should add fields into its existing data collection report to reflect the number of days associated with key processes. As indicated above, a manual sampling was required to develop timeliness statistics for this report. Adding such fields into the existing reporting system is essential to provide precise, ongoing measurement data with which the Department, Division and staff can quickly and accurately gauge efficiency and turnaround times.

Recommendation: The Planning Division should develop an automated approach (such as a variance report or a simple automated alert via existing technology such as Outlook) to ensure that the Division Manager is alerted regarding unresolved applications that have "aged" beyond a set parameter. While the existing 90 day (minor applications) and 180 day (major applications) periods may be sufficient in most cases, an automated alert ensures that all applications are monitored and allows unique deadline alerts to be set for high-priority projects. This interim approach would meet the recommended objective pending implementation of the City's enterprise system solution.

Accountability/Reporting

While the preceding section of this report focused upon workload and productivity statistics, it is also important to consider the steps taken by the Planning Division to monitor the quality of its work and communicate key information to Department and City executives.

FINDINGS: Among the factors which can delay processing is the extent to which applicants address comments made during plan checks. Because simply repeating these comments on each subsequent check doesn't go far enough to advance the approval process, Planning staff members track repetition of comments and will request meetings with applicants if issues continue to go unaddressed. Such informal resolution is helpful in explaining the rationale behind requirements, and assists Planning staff in better understanding unique issues affecting a particular project. In some cases, conditional approval can be granted which allows the project to move ahead with

compliance on remaining minor items required before the project is ultimately approved.

In situations where a requirement is overlooked by staff during the initial plan check, the Division Manager indicates that staff calls the applicant to provide this additional information and apologize for the initial error. The Division employs various steps to ease compliance in such situations:

- Consider whether exceptions can be made (for minor issues);
- Take all reasonable steps to simplify compliance by the applicant;
- Provide conditional approval, with compliance to be achieved in the Final Plan (e.g. allow grading to proceed in a timely manner with final approval of a landscaping plan to follow).

It is also noted that while an individual element of a plan (e.g. setback requirement) might occasionally be overlooked during the initial plan check, this information may not be entirely new to an applicant because those requirements would likely been included in the Entitlement approval, which forms the basis for the project design.

FINDINGS: Repeated observation of positive, helpful interaction between Planning staff and applicants revealed consistency with the Division Manager's strong inclination toward working cooperatively to achieve compliance with development standards.

Accountability among Division staff is factored into discussions regarding the Division Manager's expectations for prompt processing of applications. Although aggregate and individual statistics have not been gathered/analyzed prior to this study, these statistics can now be incorporated into such discussions in a meaningful and measurable way (as recommended in a previous section of this report).

FINDINGS: Another key aspect to accountability pertains to returning telephone calls and e-mails within 24 hours; the Division Manager indicates that this topic is reinforced in meetings with staff. The Manager is often able to monitor e-mail activity though being copied on such interactions. Telephone messages taken by the administrative support staff are logged, with the date received. Because the log does not reflect the date and/or time the call was returned, there is no means through which to measure compliance with this 24-hour directive.

FINDINGS: With regard to reporting, the Division provides basic data to the Community & Economic Development Director, to assist with preparation of narrative for the City Manager's report. Another detailed report (shown below) is forwarded to the Finance Division each month to show the level of activity. This information is reviewed by the Financial and Administrative Services Director and is being incorporated into monthly meetings with the Assistant City Manager during which City revenue statistics are analyzed for consistency with budget forecasts. Providing monthly statistical summaries of Planning activity would make further use of existing data to continually inform the City Manager's Office and City Council of emerging and comparative trends regarding development activity within the City.

2010 MONTHLY PLANNING STATS

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sept	Oct	Nov	Dec	TOTALS
Planning Commission Applications	4	3	2	0	3	0	0	0	1	2	1	2	24
Plan Checks	7	8	8	8	2	11	3	6	2	10	4	11	82
Plan Checks Revised (3 Yr Avg)	31	36	32	36	32	40	18	30	18	28	26	32	359
Major Applications	3	1	6	2	4	7	6	2	3	6	0	3	43
Minor Applications	43	50	35	39	44	45	35	39	49	36	50	46	503

Recommendation: The Planning Division should use a networked spreadsheet to automate the Log of calls received by the administrative support team. Data can be quickly captured to include date/time received, staff member to whom the message was referred, the date/time the call was returned, and the number of days elapsed. While the initial fields would be completed by administrative staff, the individual who returns the call could quickly access the networked spreadsheet to fill in the date/time upon which the call was returned. The spreadsheet can be designed to calculate elapsed time and generate reports for the Division Manager's review.

Recommendation: The Community and Economic Development Department should consider supplementing detailed narrative submitted for the regular City Manager's report by providing the City Manager's Office and City Council with monthly statistical summaries of Planning activity. This data should reflect residential as well as commercial/industrial activity in the following timeframes:

- Monthly Totals
- Year-to-Date Totals
- Prior Year Comparisons (month and YTD)

When coupled with monthly statistics regarding permit activity (by Building & Safety), this information can provide insightful updates on key economic indicators.

Community & Economic Development Department

Building & Safety Division

Report prepared by:

Thomas M. DeSantis
Consultant

October 2011

Introduction

This study was undertaken to assist the Economic and Community Development Department and City Manager's Office in defining key issues and challenges facing the Building & Safety Division. Research was targeted toward the following areas:

- Funding & Staffing
- Workload Indicators
- Best Practices
- Contracts
- Technology
- Customer Feedback & Process Enhancement
- General Management Practices
- Accountability
- Performance Measurements
- Communication/Reporting

The approach relied upon examination of a broad series of indicators through which stakeholders could effectively gauge the overall status of the Division in its important public service mission. Research included thorough review of existing documents, interviews with managers and analysis of specific information requested from City staff.

The report is presented in two sections, one pertaining to Organizational Culture & Practices, and the other addressing Productivity & Performance Measures. Observations/findings are presented in each, immediately followed by recommendations relevant to the topics addressed. Findings have been quantified according to the methodology presented herein, and are intended to present complex data and trends in a reader-friendly fashion.

The Consultant gratefully acknowledges the expert assistance provided by the Division Manager and her professional staff members who compiled extensive information essential for this study. In many cases, this involved compiling historical data not previously catalogued in the manner presented herein. The positive spirit with which they approached this undertaking is profoundly appreciated.

It is hoped that the results of this study, and the methods of data collection created for its purposes, will provide meaningful information for the many internal and external stakeholders in the continued success of Moreno Valley's Building & Safety Division.

Building & Safety Division

The mission of the Community & Economic Development Department is to facilitate new investment and development opportunities in the community through a variety of services including planning, building & safety, economic development, redevelopment, affordable housing and code compliance. The Building & Safety Division provides building plans examination services and conducts field inspections of buildings under construction to ensure that City's building environment adheres to established construction codes.

This report on the Building & Safety Division is presented in two sections; the first addresses Organizational Culture & Practices and the second pertains to Productivity Measures. Observations/findings are presented in each sub-section, immediately followed by recommendations relevant to the topics addressed.

Part I: Organizational Culture & Practices

Funding and Staffing

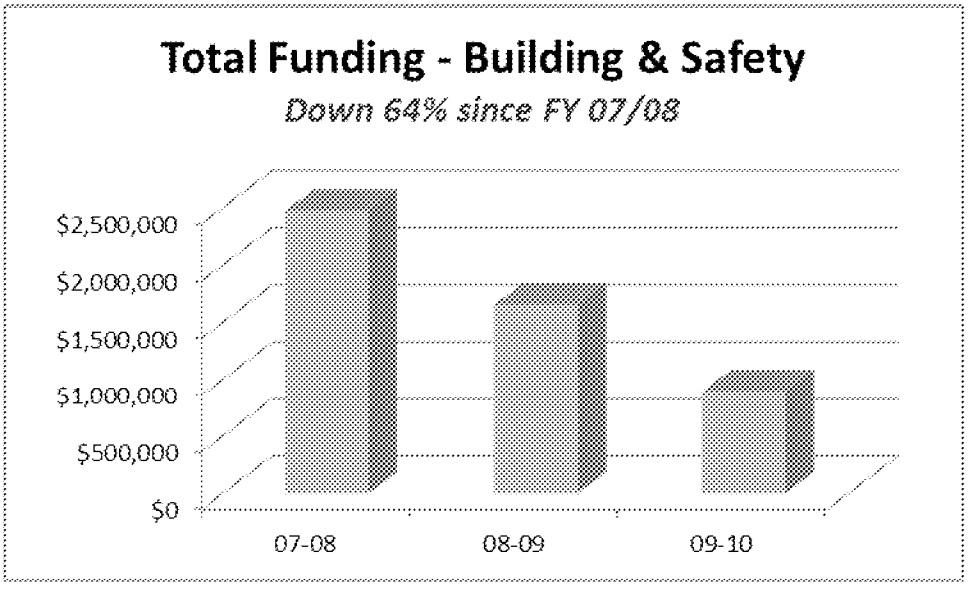
As currently budgeted, the Building & Safety Division comprises 9 FTE staff, which does not reflect the 10% furlough for all City employees. Funding for 7.7 FTE is derived from the Development Services budget. Fees largely remain at levels set years ago, with some intervening CPI and minor adjustments.

The remaining 1.3 FTE funding comes from Community Development Block Grants, Neighborhood Stabilization, Capital Projects and Nuisance Abatement resources.

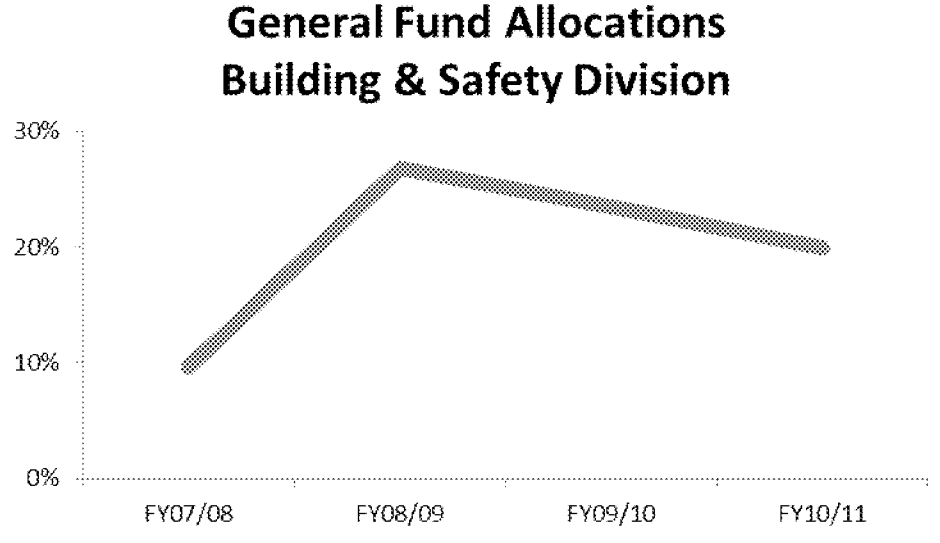
This staffing level represents approximately 50% of the Division's staffing prior to implementation of budget reduction measures in recent years. As recently as 2007-08, the Division had 16 funded positions.

Total funding for the Building & Safety Division has declined at a pace which reflects the steady drop in construction activity over the past

several years. The Division's budget has dropped nearly 64% since FY 2007/08 when it totaled $2,477,034.



Although all activities are funded through the Development Services budget, the City's General Fund supports basic services such as provision of general information, responses to public inquiries, general administrative operations customary for any City department, and various internal services costs. General Fund resources are also required to pay for costs not funded through rates or services provided strictly on a Time & Materials basis. Summary information is provided below.



As illustrated, recent General Fund contribution levels have ranged from 10-27% (FY 10/11 data is unaudited), with a four-year average of 20%. While these funding levels have been approved as part of the annual budget process, future rate studies would be enhanced by considering this data…as would subsequent budget processes.

Although four Building Inspectors are currently on staff, the nature of their assignments varies. Inspector assignments are shown below:

- Inspector #1: Available for daily inspection activities.
- Inspector #2: Available for daily inspection activities.
- Inspector #3: CDBG, Nuisance Abatement and NSP
- Inspector #4: Formerly assigned entirely to a fee-funded project (Highland Fairview development). As of October, this position was assigned entirely to Capital Projects activities.

FINDINGS: The Division manager reviews automated reports to monitor inspection workloads and completion time frames. With only two staff members available for daily inspection assignments, their activities are scheduled carefully to ensure that work is completed in a timely manner. The Division Manager sets the number of inspections to be completed in any given period based primarily upon the number of staff hours available to carry out this activity. Staff availability is affected by factors such as training, meetings, sick leave, and scheduled vacation. No contracts are currently in place to augment staffing to address workload spikes.

The Division Manager indicates that inspection schedules are developed on standard work hours and that overtime is authorized for extraordinary circumstances. A review of data from 2006 to 2011 indicates minimal use of overtime, with an average annual cost of $2065. Figures for calendar year 2011 show costs of nearly $4700, which primarily reflects weekend inspections requested for the Highland Fairview project and several minor projects for which the applicants paid associated costs.

FINDINGS: The Building & Safety Division uses neither contract nor part-time building inspectors. Due to efficiencies gained by on-staff Inspectors and the nature of current inspection work (homeowner upgrades and commercial building renovations), existing demand can

be met through scheduling. As building activity increases, however, the Division Manager anticipates the need for additional inspectors who are dedicated to this activity. At this juncture, the Division could return a grant-funded inspector to general inspection activity, which would then reduce the City's ability to carry out grant-funded activities at current levels while such funding remains available. Creating a mechanism through which additional inspectors can augment staffing on either a full-time (consultant) or part-time (consultant or employee) basis, would greatly expand the Division Manager's flexibility to meet rising demands…utilizing development services funds to offset costs. The staffing method could also be selected to correspond more closely to the existing rate structure which prescribes charges for such services. Such a mechanism would also be ideal to provide long-term inspection services to speed completion of significant commercial projects.

Two Permit Technicians (one of whom is a Senior Permit Technician) provide service at the Public Counter in City Hall. These services include responding to inquiries (in person and via telephone) regarding construction project permit requirements, coordinating with other City departments on processes relating to permits, project completion and occupancy. They also circulate plans to obtain plan check via consultants.

The Division's two Administrative Assistants (one of whom is a Senior Administrative Assistant) prepare and process operational, purchasing and financial documentation, respond to telephone calls, schedule inspections for field staff, and update public information material. As with other Divisions, Building & Safety provides rotational administrative staffing to support the front desk at the Public Counter.

Consultants provide all plan check support for the Building & Safety Division. The Division Manager reviews work performed by the consultant, and Permit Techs lend further support by logging/tracking and circulating plans within and beyond the Division for each round of plan revisions.

While Division staff members are generally cross-trained to assist with tasks performed by their colleagues, the Division Manager indicates staff absences can slow the Division's response to requests for service.

Under the Division's current fee structure, rates are based upon units of service, and do not account for indirect costs such as vacation hours, sick leave and associated backfill. Discussing these real and

unavoidable costs would be appropriate when City staff next considers alternatives for rate structure recommendations.

The Division's assignment of a dedicated Building Inspector to support the Highland Fairview project was its first recent experience in assigning staff in this manner. This Time & Material approach is also under consideration for several new projects. As with the general rate structure, this full-time T&M model does not currently reflect all costs associated with dedicated full-time support.

Employee evaluations are made in accordance with a standardized citywide approach which does not include measurement categories which represent specific Building & Safety activities or performance measurements.

Recommendation: The Financial and Administrative Services Department should consider identifying the level of General Fund allocations recommended in the Building & Safety Division's annual budgets. Availability of this information can assist budget writers in considering options as part of the City's multi-year deficit reduction plan.

Recommendation: The City should evaluate direct and indirect costs for service when updates to development service rates are next considered. Whether or not the City ultimately decides to factor all indirect costs (e.g. vacation, training time, sick leave, etc.) into the rates, considering these unavoidable costs will assist in evaluating potential General Fund subsidies as well as operational impacts when funding does not allow backfill during staff absences. This recommendation respects the City Council's important policy authority to set rates for services, and is solely intended to respectfully present additional information for their consideration in this important process.

Recommendation: The City should evaluate direct and indirect costs for service when setting rates charged for full-time dedicated Building Inspector assignments to private development projects. This approach would allow the City to consider all costs (e.g. vacation, training time, sick leave, etc.), in a manner consistent with its payment for Police and Fire services.

Recommendation: The City's Human Resources Department should consider opportunities to augment the standard employee evaluation format with several performance indicators unique to major departmental functions. Careful selection of these indicators will ensure that they remain valid (within the framework of the overall Evaluation methodology) while also assisting Department Heads in leading staff toward meeting organizational objectives. Because "*what gets measured gets done*," the types of indicators selected should tie directly to respective productivity measures instituted within the City's major departments.

Intradepartmental Synergy

The Building & Safety Division interacts regularly with other divisions within the Community and Economic Development Department. This level of collaboration reflects the nature of work performed by the Division and is enhanced by the current organizational structure which maximizes coordination of development-related services. Examples of interaction with other divisions are shown below:

- **Planning**
  - Review all projects submitted for entitlement
  - Coordinate approval for issuance and occupancy of new projects
  - Pre-review projects for compliance with State law prescribing the manner, location or occupancy proposed.

- **Code Enforcement & Neighborhood Services**
  - Perform joint inspections of properties in response to complaints
  - Support foreclosure identification and inspections under the CDBG program
  - Coordinate investigations of complex cases
  - Assist with issuance of orders to vacate dangerous properties
  - Assist as requested with the preparation of inspection warrants and other court filings.

- **Economic Development**
  - Provide data to support ED outreach
  - Support project processing through ombudsman and fast track process

- **Neighborhood Preservation**
  - Perform inspections in support of the NSP program
  - Provide annual inspection services for housing properties
  - Collaborate with NP staff for assistance in relocating families displaced from properties ordered vacated due to dangerous conditions

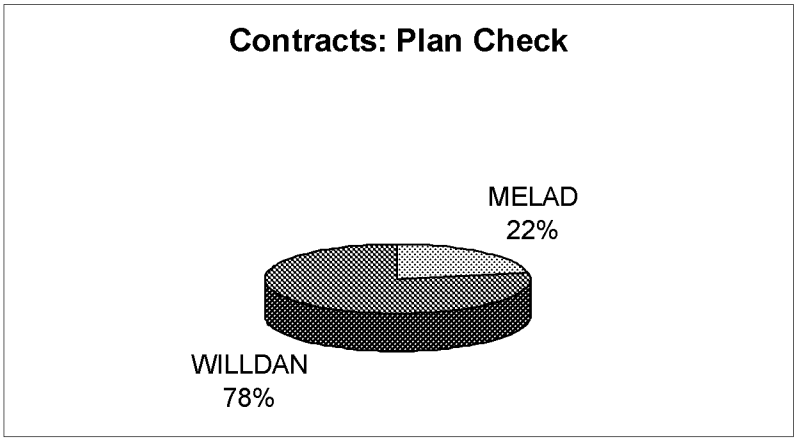
- **Land Development**
  - Review precise grading plans
  - Coordinate on issuance of building permits.

Contracts

The Building & Safety Division's recent use of contract support is limited to plan check services as well as citation collection/processing. As indicated in a previous section of this report, all of the Division's plan check services are performed under contract.

FINDINGS: In FY 2009/10, a contract was used for interim staffing of the Division Manager position provided by Willdan Engineering. Although the interim contract was established to provide critical staffing continuity by the City's former Building Official, it would appear that placing a Willdan employee in a position which oversaw provision of Willdan plan check services was less than ideal. This unique situation was ultimately resolved when the Division Manager position was filled by a City employee.

As would be expected, the vast majority (73%) of all contract consultant costs over the most recent three-year period were associated with provision of plan check services. These services were provided by two firms: Melad & Associates and Willdan Engineering. Both contracts are nearing the end of their five-year term. Comparative analysis of contractor billings over this period indicates a significant disparity in the value of work provided by the two firms.



FINDINGS: This usage pattern reflects the nature of work performed by each consultant; Willdan supports Commercial and Multi-Family development while Melad checks plans for single family residential projects. Use of a single contractor for each type of development may create the appearance of de facto "exclusive" contractors which could prove disadvantageous to the City when a new RFP is issued in 2012.

Recommendation: The Building & Safety Division should consider creating a panel consisting of at least two Plan Check contractors for each development type (Commercial/Multi-Family and Single Family Residence) at the start of the new contract period in 2012. Broader participation by multiple firms yields a more competitive climate in terms of both pricing and service delivery, and provides an added measure of security in continuity of service.

Technology

The Building & Safety Division has focused its primary technology efforts on enhancing the efficiency of field staff.

Real-time inspection status information is available to inspectors via Accela Wireless Tablets. Laptop computers also allow inspectors to access permitting software and therefore record and upload inspection results in a single process. This replaces the traditional method wherein results would be recorded in the field and then re-entered into the central permitting system upon the inspectors' return to the office.

FINDINGS: Originally funded in FY 2005/06, the technology project described above was completed in FY 09/10. Although the reasons for

delays in completing this project could not be discerned, implementation costs were approximately 5% below the $99,000 budget originally approved for the project. This modest investment has contributed significantly to the efficiency of project inspections, as detailed in the Productivity Measures section of this report.

The Division Manager praised the high caliber of support provided by the City's Technical Services staff. Present technology efforts are focusing upon program changes which will allow collection of specific data with which she can quantify performance aspects of the inspection process.

Per the City Council's approval of an Enterprise System solution, the Administrative Services Department is leading a citywide effort to identify and procure technology (to include Development Services Modules) which will meet present and future needs. This enterprise approach will also provide important options to merge/standardize processes in use by all Departments/Divisions engaged in the development process.

As discussed in this report, the Division's administrative staff takes telephone calls requesting project inspections, and they schedule these inspections. If calls are received after hours, messages can be captured via the standard voice mail message system and calls are returned the following business day. By the end of each business day, inspections are scheduled for the following day.

FINDINGS: The City's impending move to an enterprise system with development service modules may offer an opportunity to automate this process via telephone and/or internet. Although introduction of a new system may appear to be a significant challenge, implementation during a slower point in the development cycle offers a unique opportunity to institute new processes during a period of reduced demand. It will also allow the system to be fully in place as building activity resurges. The Division could examine the potential labor saving aspect of this automation to determine whether resources could be shifted from administrative support (even if less than a complete FTE) to field services (perhaps via contract) to speed the City's ability to respond to inspection requests…or to other Divisions or City Departments. Additional information on this concept is presented in Part II of this report.

Recommendation: The Building & Safety Division should ensure that its technology solutions remain fully compatible with the enterprise system being developed for citywide implementation. The umbrella system's ability to capture data from Building & Safety activities as well as integrate fiscal information will maximize the benefit derived from the City's strategic investment in workplace technology.

Recommendation: The Building & Safety Division should ensure that the City's Administrative/Financial Services Division is provided complete information regarding Building & Safety's business needs as the City reviews and selects technology solutions.

Recommendation: The Building & Safety Division should implement relevant modules of the City's new Enterprise System in an "off the shelf" manner which capitalizes upon the Best Practices which have been engineered into that system. The Division should avoid - - to the maximum extent possible - - programming changes to require the system to follow unique local processes, as doing so would diminish the value of efficiencies available in the new software and complicate (and increase costs associated with) future software updates.

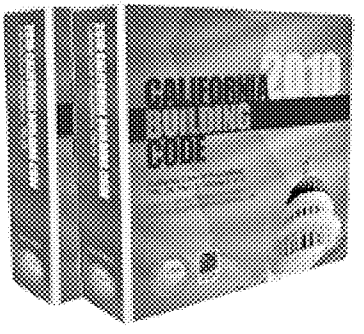
Recommendation: The Building & Safety Division should work closely with the Administrative Services team to explore options to include, as part of the forthcoming enterprise system acquisition, an automated process through which inspection requests can be taken…thereby reducing the overall demand for administrative support by shifting the focus toward scheduling. Such systems are widely in place; some offer users the option of requesting inspections (and checking status) via an Interactive Voice Response (IVR) telephone system and/or a web-based Automated Inspection Request System (AIRS). Ready examples of various options can be seen in jurisdictions such as:

- Loudoun County, Virginia (web based)
- Alameda County, California (IVR)
- Port St. Lucie, Florida (web)
- Denver, Colorado (IVR)
- Bend, Oregon (IVR)

If deemed viable, such a method could streamline responses to inspection requests and ultimately allow re-evaluation of resources currently dedicated to responding to telephone calls and messages.

Best Practices

While the Building & Safety Division does not have its own Best Practices manual, the Division Manager obtains information from pertinent regulations as well as several industry sources to ensure that City staff members remain abreast of emerging trends and can incorporate successful techniques into their work activities. These information sources include:



- Updates to the California Building Code
    - Training and professional development requirements are incorporated into Certification for Inspectors
- Training seminars through national conventions
- The International Code Council
    - E-Mail updates sent to building officials
    - Regular publications

INTERNATIONAL CODE COUNCIL
People Helping People Build a Safer World™

- California Building Officials (CALBO)
    - Education Week programs which provide training for Building Inspectors. Material obtained at these sessions is shared among Division staff, and incorporated into local discussions and training. Topics for the most recent sessions held in Ontario during October 2011 included: 2010 Building/ Residential/Plumbing/Electrical Code Updates, Green Building Code Standards, Residential Fire Protection Systems, Lateral Force Resisting Systems for Light Wood Frame Buildings, ADA Accessibility (and associated case law), Permit Technician training, Swimming Pools & Electricity, Solar Photovoltaic Systems,

California Building Officials

Code Enforcement, etc. The Division Manager and staff from the Building & Safety Division attended this recent session.

- Local Chapter activities which are open to Building Officials and Building Inspectors.

To monitor compliance with Code updates and related procedures, the Division Manager personally conducts follow-up inspections of various projects, as needed.

Applicants can access Building & Safety forms through the City's website: (http://www.moval.org/city_hall/forms.shtml#building). The website itself provides some basic instructions to help orient homeowners to interrelated requirements. A particularly helpful form provides excellent cautionary guidance to help protect unsuspecting homeowners from the potential pitfalls associated with applying for an "Owner-Builder" permit associated with work performed by unlicensed contractors.

At present, the City does not offer a concise document which orients applicants (non-developers) to overall permit application and building inspection processes. While professional developers are well-versed in these processes, individual home/property owners are often unfamiliar with the various steps and their rationale. During the course of this study, Public Service Counter staff members have been observed providing individual applicants with much of this background verbally…in a consistently patient and cheerful manner.

Recommendation: The Building & Safety Division should begin to compile a local Best Practices Manual which can be used to generate discussion at monthly staff meetings. Creating such a manual need not be a labor intensive effort; it can be as simple as a compendium of articles taken from professional periodicals and professional resources, as discussed above. The effort could begin by assigning one staff member each month to identify a relevant article to add to the Manual; the article could then be distributed electronically to all staff members in advance of a regular staff meeting, during which a portion of the session could be devoted to discussion of the article. This relatively simple approach can add a brief instructional element to each staff meeting, and generate creative discussion of techniques and processes which could enhance efficiencies and measurable outcomes to the Division's regular activities.

Recommendation: Implementation of key Building & Safety process reforms (whether derived from staff innovation, interaction with peers in other jurisdictions or based upon research into industry best practices) should be undertaken in a measurable, results-oriented manner. This approach should include several fundamental steps:

- Identify desired outcomes in quantitative terms (e.g. review time, staff time devoted to a particular process, number of comments which appear in subsequent reviews which do not appear in initial reviews, etc.).

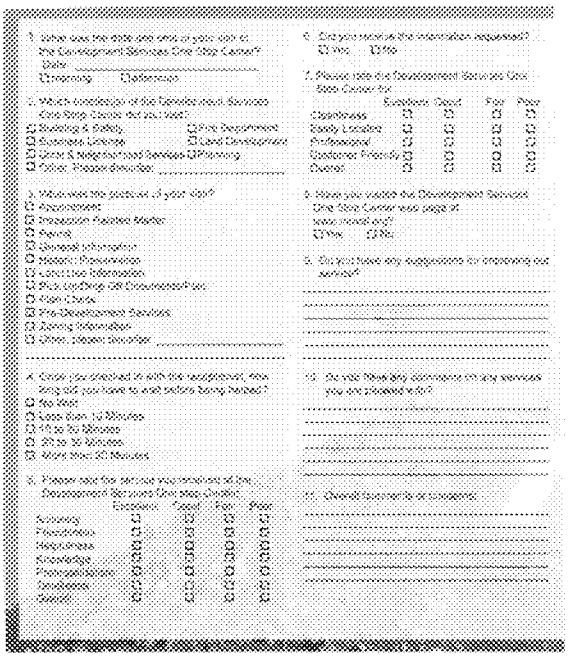
- Identify existing baseline statistics for these same measurements under existing processes. This will allow comparative analysis of the results garnered from process revisions.

- Schedule a date certain upon which the results will be reviewed and discussed among staff. The implementation period should vary, to reflect the nature of the process improvement undertaken and the length of time required to gather meaningful performance data with which to evaluate implementation results.

Recommendation: The Building & Safety Division should create a consolidated, easy-to-read handbook which can quickly orient property/home owners with building permit and inspection processes. The document should be made available on the City's web site and in printed form at the Public Service Counter in City Hall.

Customer Feedback & Process Enhancement

Among the Building & Safety Division's basic goals is to provide responsive service to resolve issues as quickly as possible for applicants. This approach is also consistent with the Division's funding mechanism through which permit fees are based upon the type of application rather than the number of staff interactions required to complete the process.



Until approximately 2009, the Building & Safety Division used a unique survey form to obtain feedback from City employees and external customers. Detailed reports were prepared for City management and Council Members based upon those surveys prior to discontinuation of that particular program. At present, the Division receives information via the City's standardized tri-fold brochure available near the Public Service Counter in City Hall. This general survey instrument asks customers to provide basic information regarding the nature of their visit, inquires about wait time, and seeks ratings (Excellent/Good/Fair/Poor) on the manner in which service is provided. Rating categories include: Accuracy, Friendliness, Helpfulness, Knowledge, Professionalism, and Timeliness, as well as an Overall rating.

The survey brochure also allows customers to make suggestions to improve service and affords an opportunity to provide additional narrative comments. Customers also have the option to request a response from the City regarding the observations shared. The postage-paid brochure is addressed to return to the City Manager's Office. Survey results are forwarded directly to the Division Manager for follow-up.

FINDINGS: Over previous years, survey results were not logged, tabulated, or retained. The Division Manager reports that five anonymously submitted comment cards have been received this calendar year, and that the feedback was complimentary regarding

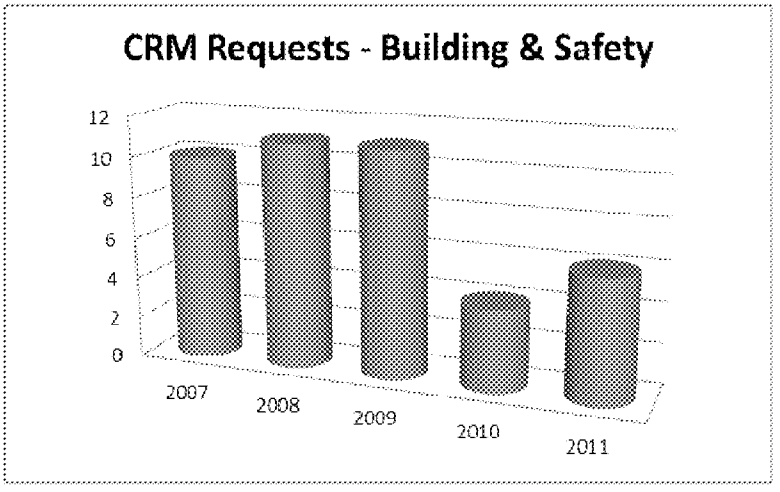
assistance provided by various staff members. Unfortunately, the absence of historical records precludes analysis of trends or even identification of process enhancements made in response to feedback received. This places the current Division Manager at a disadvantage as she can only focus such efforts prospectively.

The Division Manager's extensive experience working with and for other local jurisdictions provides a unique opportunity for ongoing review of routine practices to ensure responsiveness to customers' needs.

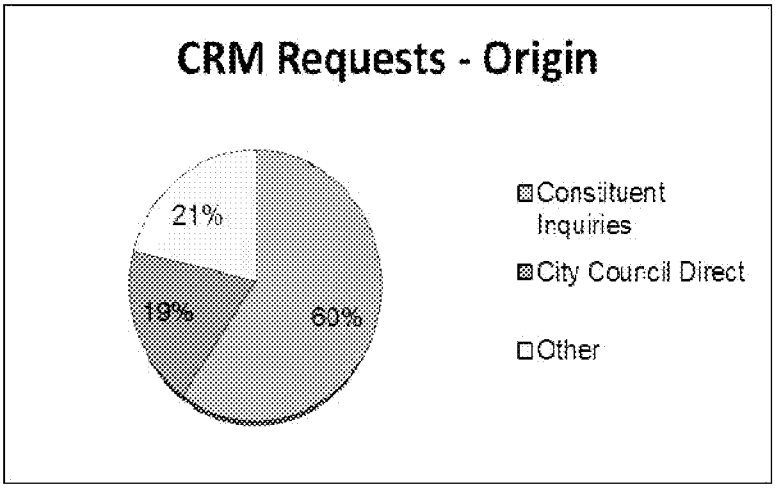
As would be expected, the Division has less frequent interaction (on a per project basis) with professional developers who have extensive experience in building permit/inspection processes. Residential applicants generally require more assistance, which reflects distinctive situations as well as less experience with related approval processes.

Customer feedback is shared with Division employees in several ways. Positive comments are reviewed by the Division Manager and forwarded to the employee whose efforts have been commended. Should constructive or critical comments be received, the Division Manager indicates that she would explore relevant issues with the employee involved…to determine the extent to which negative feedback is associated with the regulation being enforced and/or the manner in which the rule was explained/enforced by the individual employee. As described above, customer surveys received over the past year have all been complimentary of City staff.

The Division also receives inquiries via the City's Customer Relations Management (CRM) system, which are routed from the City Council office. The Division has received an annual average of just over 10 inquiries since 2007.



The majority of CRM interaction with the Building & Safety Division constitutes requests for staff review and information gathering to assist Council Members in responding to constituent inquiries. The other significant percentage of CRM inquiries comes from Council Members (via follow-up requests made during Council Meetings as well as inquiries initiated directly by individual Members). Responses to CRM requests generally take the form of written explanations of Code requirements; these responses are sent to the Department Head for review and approval.



FINDINGS: While the CRM system effectively logs and tracks inquiries pertaining to Building & Safety cases, its usefulness as a customer feedback tool appears to be extremely limited.

FINDINGS: Permit Technicians provide meaningful input to the Division Manager regarding their experiences with procedures which

can be updated and enhanced. A recent example pertains to coordination steps between Building & Safety and the Fire Department which faces increased review requirements for Photovoltaic Panel installations to ensure safety of fire suppression activities on buildings equipped with this emerging technology.

Real-time interaction between Public Counter customers and the Division Manager takes the form of responding to applicant questions regarding Code requirements.

Recommendation: The Building & Safety Division should log and retain results of Customer Survey responses. Historical documentation will allow the Division to gauge progress over time, identify recurring themes (positive and constructive) and provide meaningful input for employee (and manager) evaluations.

Recommendation: The Community and Economic Development Department should consider adding an online customer service survey to the City's website. Affording customers an alternative to the hard copy Survey Brochure could increase the number of responses received, and provide data in a format which could be quickly tabulated and recorded.

Recommendation: The Community and Economic Development Department should consider adding a Spanish-language version of the Customer Service Survey now available near the Public Service Counter. As observed over the course of this study, Counter staff's level of (near daily) interaction with Spanish speaking customers indicates that a segment of those being served may not currently have access to feedback mechanisms via the existing English language survey.

Recommendation: The Community and Economic Development Department should consider placing survey forms nearer to the exit doors in City Hall rather than only having them available at the front desk nearest the Public Service Counter. Increasing their visibility may increase use of these forms; placing them in an unstaffed location may also boost response as some customers may feel more comfortable obtaining the forms in a more discreet manner.

General Management Practices

SUPERVISION: All supervision of in-house staff is provided by the Division Manager. Given the size and composition (classifications) of Building & Safety staffing, along with funding levels, the existing span of supervision is appropriate.

CONSISTENCY: E-mail communication is used to convey the Manager's interpretations of Code requirements and associated direction to staff; e-mails are circulated to other staff members to enhance consistency within the Division. The deletion of Senior Inspector positions in recent years elevated most operational decisions to the Division Manager. Steps are underway at this time to designate decisions which can be made by inspectors, such as routine time extensions for projects with no other complications. To facilitate this delegation of authority, the Division Manager is drafting language which clearly prescribes how this revised procedure will be implemented.

In most instances, projects (i.e. inspections, permit applications) are handled in a vertical fashion - - where a single staff member is responsible for processing from start to finish. Deviations from this approach are seen during staff absences or in instances when assignments may be rotated (by the Division Manager) to ensure an appropriate balance of work and associated levels of responsibility.

POLICIES: The Building & Safety Division maintains a Policy Manual in hard copy form and intends for policies to be available to employees via the Division's network drive. To facilitate this review, the Division Manager provided her own copy of this manual, which was contained in a three-ring binder.

FINDINGS: The contents were largely outdated, with City Policies (such as Personnel Policies) approved as early as 1990/91 and as recently as 2006. A quick check of the City's intranet site indicates that citywide policies have been updated much more recently than those in the Building & Safety binder. Building & Safety Division policies in this binder are similarly outdated, with the majority having been updated in either 1999 or 2006 (with a small number of updates made in 2000 and 2002). The Division Manager indicates that the manual is currently under review by staff, with the intent to update policies to reflect the Division's current staffing patterns and mission scope.

- A check with Division staff indicates that electronic copies of the policies are neither located in a single location on the network drive nor are updated more recently than the 2006 versions contained in the Director's binder.

- The current state of the Building & Safety Division's policy manual renders it of limited use or value to the staff. Prior Division Managers apparently placed a low priority upon this management practice. Given the current Division Manager's recent arrival, and the daily workload demands facing the small staff, it is understandable that the policies have not been updated in the recent past.

- Although permit requirements do not change frequently, E-Mail communication is used to provide timely direction to Division staff regarding changes to various procedures. While use of this technique is effective and helpful, it should ideally be used to augment written policies/procedures in the period between timely updates.

Long-Range operational planning has not been undertaken by the Division in any measurable fashion. Having faced dramatic staff reductions over the past several years, the Division has focused its collective energies on providing essential services in a fiscally challenging environment.

Recommendation: The Building & Safety Division should continue to update its Policy Manual, which currently contains City Policies approved as early as 1990/91 and Division Policies no more recent than 2006. In undertaking this task, the Division should consider the following approaches:

- Remove citywide policies from the Division manual, as they are readily accessed via the City's intranet site and are maintained for currency by the responsible Department(s).

- Complete the ongoing systematic update of Administrative Policies. This effort (conducted over time) should focus on providing employees with documents which provide policy guidance to foster decision making which reflects organizational (City) objectives and values; procedural instructions should be organized separately into a Procedures Manual.

- Retire the hard copy binder version of the Division's Policy Manual.

- Create the new Policy Manual (and Procedures Manual) in a PDF format centrally and quickly accessible by all Division staff, and maintained by a single staff member for maximum efficiency.

Accountability/Reporting

While the Part II of this report focuses upon workload and productivity statistics, it is also important to consider the steps taken by the Building & Safety Division to monitor the quality of its work and communicate key information to Department and City executives.

FINDINGS: Continuity is a critical aspect of any approval process, and is particularly important in processing building permit applications and conducting building inspections. Vertical work assignments are used effectively to ensure that a single point of contact handles all aspects of a project to the greatest extent possible. This technique also adds to the speed and efficiency of Division processes since the Permit Tech or Building Inspector is already familiar with the particular project.

FINDINGS: Among the measures of accuracy/quality of building inspections is monitoring the extent to which "new" findings are added as a project progresses. The Division Manager's review of daily activity reports remains an essential - - and highly effective - - means of monitoring any such occurrences. The Data Sheet compiled through Permits Plus also allows the Division Manager to quickly see a complete history of activity on a particular project and provides her with detailed background with which to analyze trends and spot potential problems. Because these Data Sheets are public documents, they may be obtained by the property owner to provide more detailed information than might be available through his/her construction contractor.

In rare situations when concerns arise, the Division Manager will personally go on-site to evaluate the situation and to ensure continuity.

The Division's comprehensive record keeping is further enhanced through digital photos typically used to assist the Public Works

Department's Capital Projects Division monitor the status of projects and to support Notices of Violation issued by inspectors.

FINDINGS: The Building & Safety Division compiles reports of monthly permit activity with data extracted from the Permits Plus system. This information forms the basis for reports to Riverside County's Economic Development Agency which tracks activity levels in all jurisdictions. The Division Manager also relies upon these statistics to forecast development-based revenues; doing so, however, requires manual entry of data into a spreadsheet to calculate year-to-date revenue performance and to develop future projections.

The data available from the Permits Plus system can also be used to create a summary report to provide key trend information to the City Council and City Executives.

The Building & Safety Division uses e-mail to advise the Community and Economic Development Director of any particular situations which may come to the attention of City Council Members and/or City Executives. Routine advisories are also sent to update officials regarding the status of high priority projects moving through the approval process.

FINDINGS: Another key aspect to accountability pertains to returning telephone calls and e-mails within 24 hours; the Division Manager indicates that staff members have been instructed regarding this expectation. In some instances, Permit Techs can experience delays in returning calls because additional time is required to calculate estimated fees which have been requested by callers. Because there is no formal means to monitor the timeliness of returned calls by Building & Safety Division staff, the Division Manager is unable to monitor compliance with the 24-hour directive.

Recommendation: The Building & Safety Division should work closely with the Financial & Administrative Services Department to explore options to include activity reporting/projections as a feature of the enterprise system solution currently under development. Replacing the current manual process with automated reporting could assist the Division (and City) in continuing to track/project development-related activity and associated revenues.

Recommendation: The Building & Safety Division, with direction from the Community and Economic Development Director, should prepare a standardized monthly report for the City Council and all members of the City's executive team which succinctly presents key building permit activity. The report could contain information such as: Single Family & Commercial Permit activity, Valuations for Single Family & Commercial Permit activity, comparisons with the same month in the prior year, year-to-date activity/valuation, and comparisons with year-to-date activity/valuation in the prior year. This summary information, easily developed through the Permits Plus system, will assist key decision makers by providing them with important trend and comparative data on an ongoing basis.

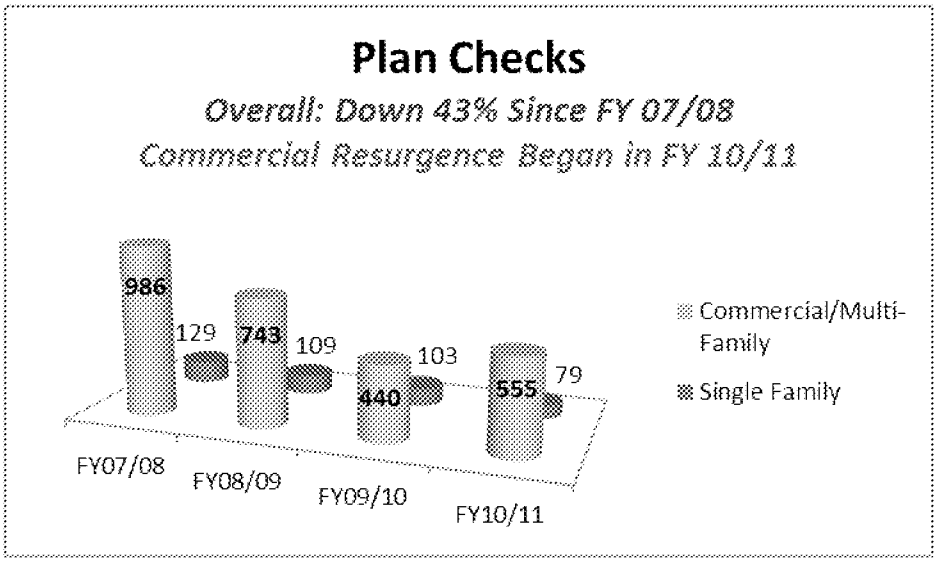
Recommendation: The Building & Safety Division should institute a networked spreadsheet to automate the Log of service-related telephone messages left for staff members. Data can be quickly captured to include date/time received, staff member to whom the message was referred, the date/time the call was returned, and the number of days elapsed. While the initial fields may sometimes be completed by administrative staff, the individual who returns the call could quickly access the networked spreadsheet to fill in the date/time upon which the call was returned. The spreadsheet can be designed to calculate elapsed time and generate reports for the Division Manager's review.

Part II:
Productivity/Performance Measures

To portray trends in Building & Safety Division productivity, this report will review data pertaining to Plan Check, Inspection, Permit and administrative support activities.

Plan Checks

All Plan Checks conducted by the Building & Safety Division are performed via contract, with Commercial/Multi-Family reviews performed exclusively by Willdan Engineering, and all Single Family Residential reviews conducted by Melad & Associates.

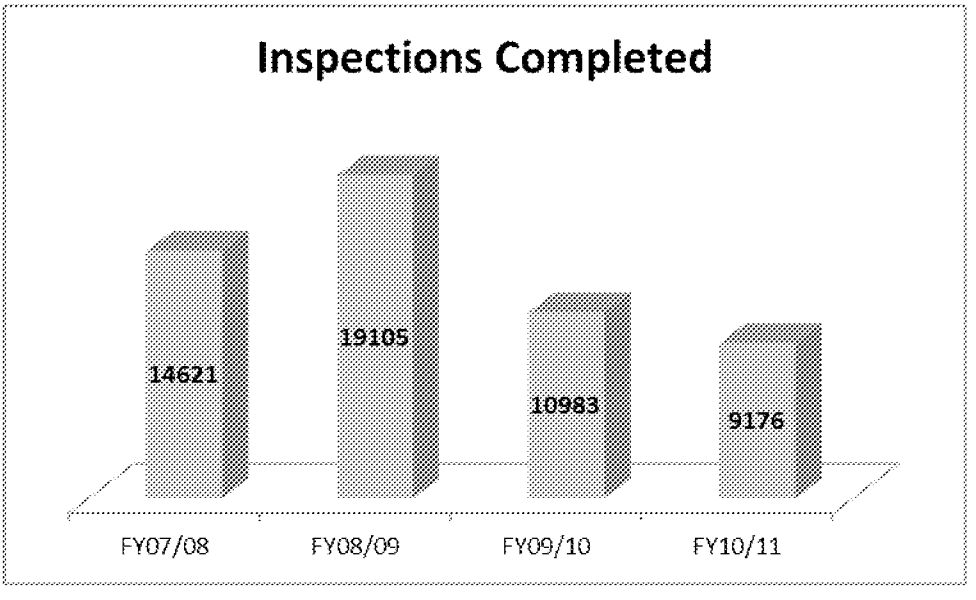


Plan Check data from Fiscal Year 2007/08 through 2010/11 were reviewed as part of this report. Consistent with national/regional economic trends, activity dropped off markedly throughout the period, with an overall decline of 43%. Although Plan Checks for Commercial and multi-family projects declined by 44% (when comparing FY 10/11 to 07/08), it is noteworthy that annual activity *increased* by 26% in FY 10/11. Although total single family residence Plan Checks have yet to rebound, recent figures indicate the resurgence of the commercial market. When reviewing residential Plan Check activity, it is also important to note that production home developments require only a single Plan Check for each model to be constructed within the tract.

KEY FINDINGS: The Building & Safety Division does not have access to data which shows the timeliness of plan checks over an extended period. Contracts require a 10-day turnaround for initial Plan Checks, and 5-day response for subsequent reviews; to speed the review process, applicants are placed in direct contact with the Plan Check contractors. Plan Check services are also generally available on a Fast Track basis, at additional cost to the applicant. The only data which currently exists with regard to timeliness of plan checks was provided by Willdan Engineering for first reviews of projects since June 2011, indicating an average completion period of 5.4 days. The Division Manager indicates that obtaining additional data would require a programming request from the City, and result in unspecified additional costs to respond to this query. The other plan check contractor, Melad, apparently does not keep any such information in a data base format; such data could only be mined through a physical review and tabulation of all individual project files. The absence of this key data precludes any meaningful review of the Division's overall timeliness (through its two contract consultants) in performing one of its key functions.

Building Inspections

Key indicators regarding building inspections correspond to economic trends and reflect major staffing changes…while revealing significant efficiencies achieved by the Building & Safety Division.



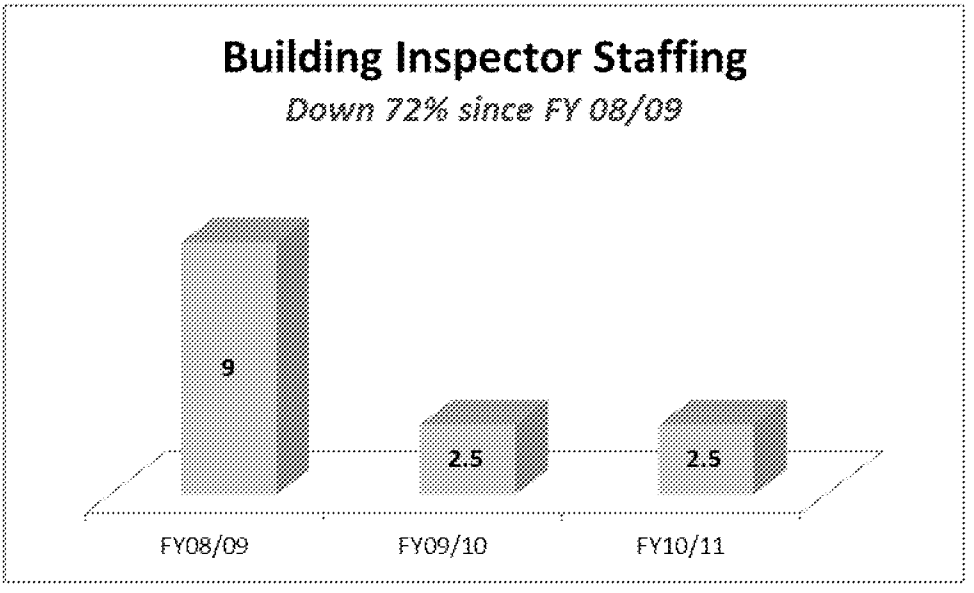
As anticipated, inspections have dropped over the previous four years. Although the inspection cycle is related to Plan Check workload, the relationship between the two cycles reflects the unique timing factors of each. Recent increases in commercial Plan Check activity indicates that inspection activity will increase as projects move from the drawing board into the construction phase.

Inspections are also conducted in response to unpermitted building activity. These inspections are currently conducted only in response to citizen complaints or referrals by Code Enforcement staff. Inspectors will also drive by sites where work has been ordered to stop, to ensure that activity does not resume prior to resolution of outstanding issues.

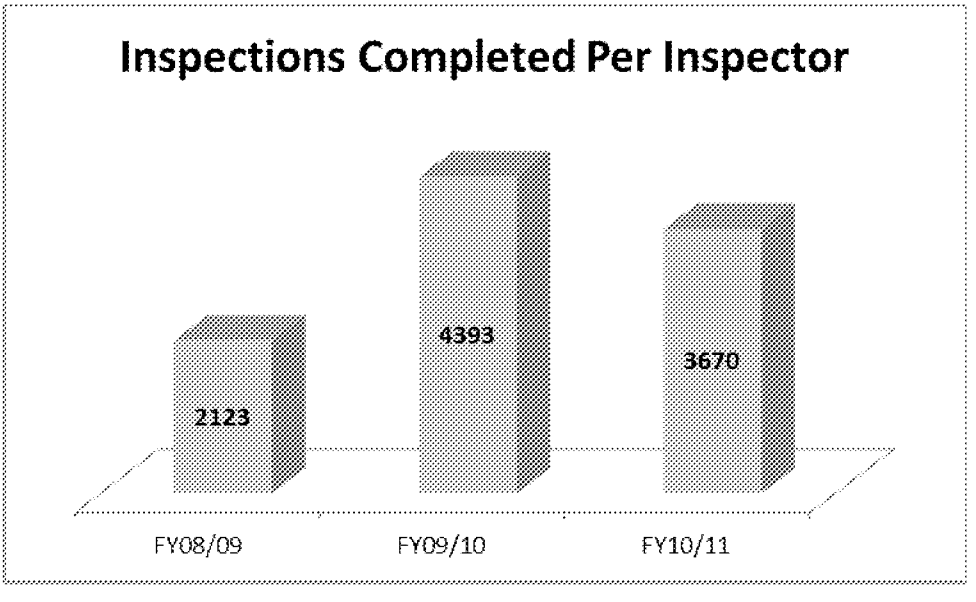
FINDINGS: In prior years, the Building & Safety Division obtained data regarding the timeliness of responding to requests for building inspections via daily e-mails addressing any backlog which existed. These historical e-mails are not retrievable; formal tracking of timeliness (and any backlogs) is not currently performed. As the Division Manager reviews daily automated reports regarding inspection activities, inclusion of data indicating inspection requests/completion would enhance the utility of these daily reports and allow tracking of trends over time.

Inspections are generally scheduled to occur the day after the request is submitted, although same day inspections can generally be accommodated if an Inspector is available for overtime work. Under the City's current furlough schedule, the cost of providing service on Fridays can exceed the fee for such service. In situations when staff cannot be available to render short-notice inspection services, the Division Manager can assist as needed.

Although the number of inspections has declined by 52% between FY 08/09 and FY 10/11, the number of inspectors dropped from 9 to 2.5 over that same period…constituting a 72% decrease in staffing.



With the City's inspection staffing declining even more steeply than the inspection workload, it becomes apparent that the Division has increased its efficiency in providing Inspection services. But charting the workload data reveals an even more impressive finding.



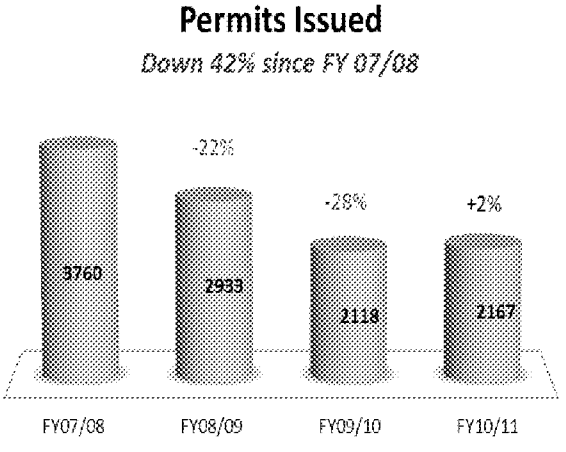
KEY FINDINGS: The efficiency of building inspections has increased dramatically over the past three years. In FY 08/09 each inspector conducted 2123 inspections, compared with 3670 inspections as recently as FY 10/11. *In what constitutes a major finding, staffing decreases already exceeded workload decreases by 20%...yet each*

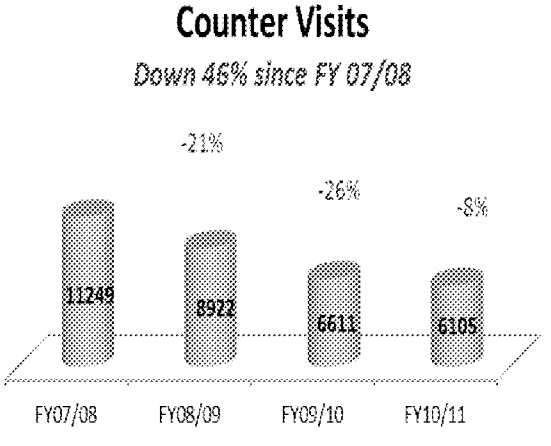
inspector also completed significantly more inspections (107% in FY 09/10 and 73% last year). The significance of this efficiency cannot be overstated, and offers clear insight into the professional approach taken by the City's Building Inspectors. This finding also attests to the benefits of the City's investment in technology. As addressed in the Technology section of this report, FY 09/10 was the first year during which staff had access to wireless tablet computers, which increased the time Inspectors could remain in the field by eliminating the need to return to the office at the end of the day to enter results into the permitting system. It should also be noted that this efficiency was achieved even though the reduced inspection staff must cover the entire City, which involves more travel time in comparison with earlier periods when a larger staff was able to focus on particular zones.

Recommendations regarding future staffing will appear in the "Future Staffing Model" section within this report.

Building Permits

While key indicators regarding Building Permit activity correspond to economic conditions, the nature of these processes required collection/analysis of significant amounts of data to better discern meaningful trends.





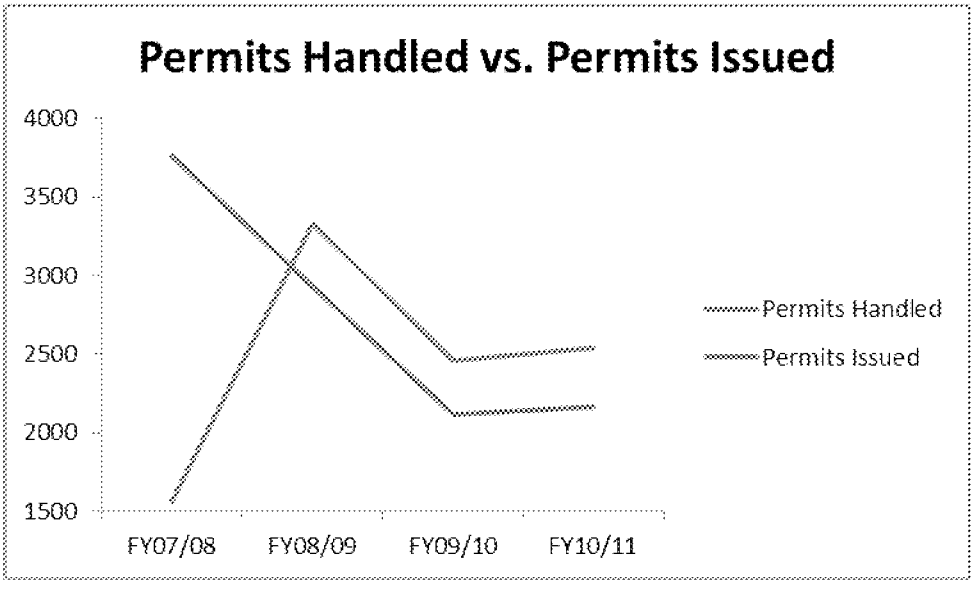
Over the past four years, the total number of building permits issued has declined 42%, with the sharpest decline recorded between FY 08/09 and 09/10. The number of Counter Visits has decreased on a largely commensurate basis. Productivity can be gauged within this historical framework by looking at specific aspects of staff activity.

The major functions carried out by Permit Techs include supporting Counter Visits, Issuing Permits and Handling Permits. The latter category reflects the varying levels of complexity associated with various building permits. The Division Manager indicates that while the most basic permits can be completed within a single 15-minute process, others can require significant additional time associated with numerous "handling" activities (e.g. receiving plans for plan check, packaging plans for shipping to plan check, receiving plans following plan check, contacting an applicant to pick up plans from plan check, distributing plans to the applicant after plan check, etc.).

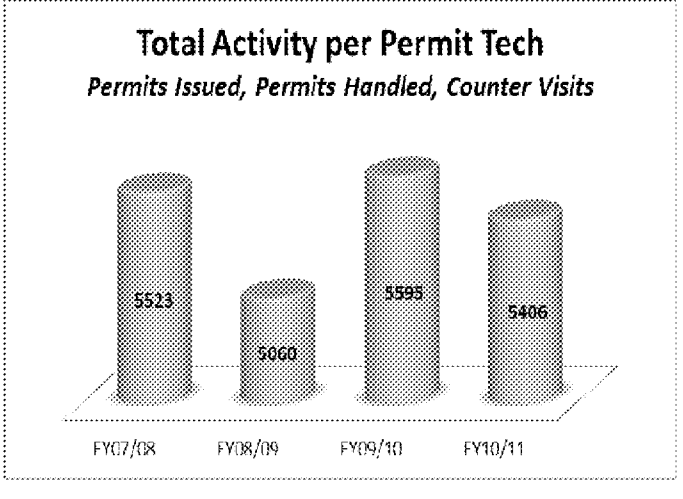
FINDINGS: Although this study found no evidence of customer dissatisfaction with the permit application process, the Division has no formal benchmarks which prescribe the average amount of time required to process applications. While the completion timeline, as a whole, is greatly affected by the applicant's actions, benchmarking time for the Division's responsibilities would assist in quickly identifying anomalies; detailed review of rapid processing would also prove insightful in identifying steps which could help address slower moving applications.

FINDINGS: Available data regarding permit processing activities by Permit Techs does not indicate the extent to which workload may fluctuate over particular days of the week, or times of day.

FINDINGS: While the Division makes a concerted effort to log work activities, limited staffing in the Permit Tech classification can appropriately necessitate assisting a waiting customer rather than logging minor "permit handling" activities. While this customer service focus is essential, and fully consistent with the City Council's goals of providing responsive public service, the lack of entirely accurate information regarding "handling" activities may diminish management's opportunities to fully analyze productivity. Reducing the number of times a permit is handled prior to issuance holds the potential to increase the Division's operational efficiency.

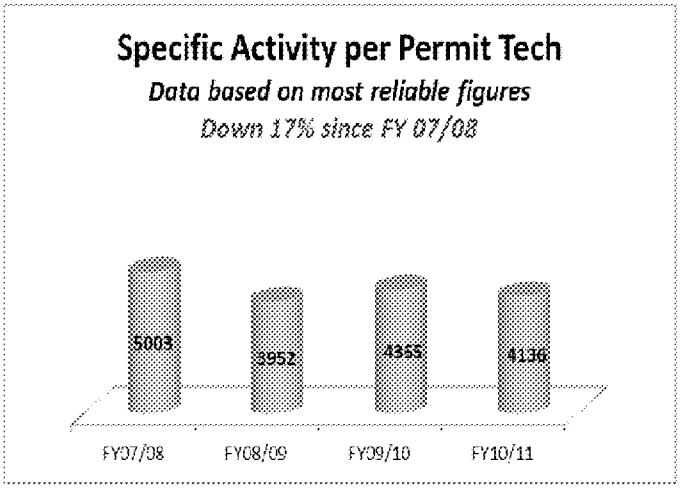


As shown above, the required "handling" associated with permit issuance increased markedly in FY 2008/09, as the number of permits being issued continued its multi-year slide. What initially appeared to be a remarkable inverse relationship between these statistics apparently reflects a process change implemented by a previous manager to record handling activities in a manner which allows tabulation via the Permits Plus system. (Prior to that point, this activity was reported in a narrative field from which data could not be automatically tabulated.) Since the relationship between handing and issuance appears to have remained fairly consistent over the past three years, the ability to gather data provides a valuable tool regularly used by the current Division Manager…and offers the potential to further enhance the efficiency of this process, particularly once these steps are no longer undercounted.



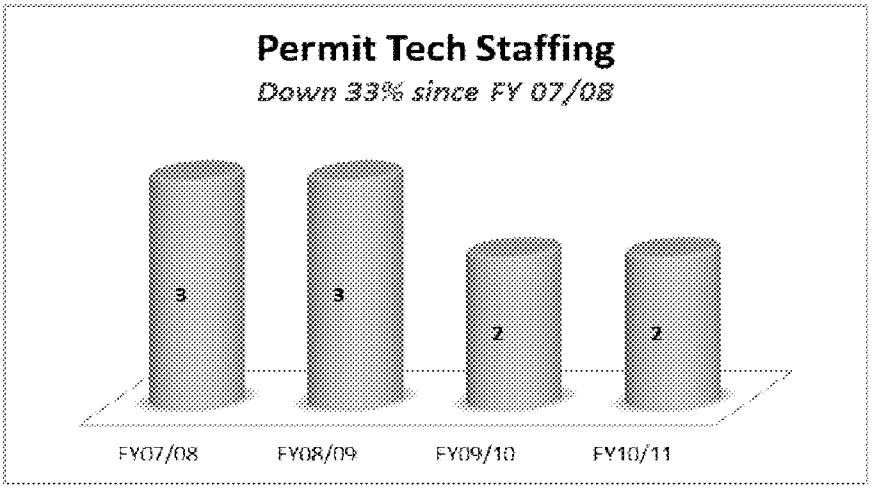
To gain a broader perspective on productivity trends, data was analyzed regarding all key activities performed by Permit Techs. These activities include the numbers of permits issued, permits handled and counter visits supported by staff. When viewing all activities, productivity in FY 10/11 declined only 2% when compared with FY

07/08. The apparent productivity decline in FY 08/09 reflects the year in which the number of counter visits and permits issued each dropped by more than 20% and Permit Tech staffing had not yet been reduced.



FINDINGS: In light of anticipated undercounts of permit handling activity, productivity statistics were also reviewed without inclusion of permit handling figures. Based solely upon the most reliable activity figures (permits issued and counter visits), productivity declined by 17% compared with the base year of FY 2007/08. Analysis of these figures, particularly in contrast to available data regarding all activities, further underscores the importance of enhancing processes to remedy any undercounting of permit handling activities performed by Permit Techs.

FINDINGS: Permit Tech staffing was decreased (from 3 to the current level of 2) in FY 2009/10. Workload trends which preceded and have followed that adjustment justify the decrease. From a scheduling and efficiency standpoint, however, further reductions would severely diminish the Division's ability to provide these important services.

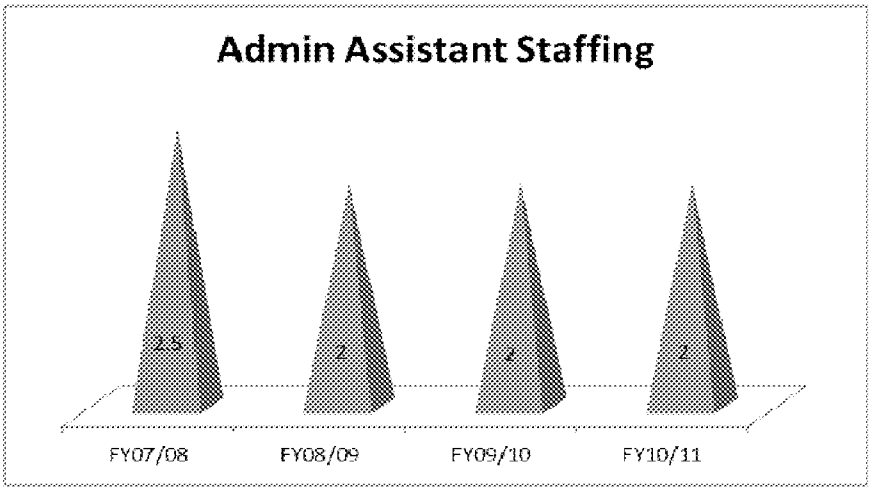


In light of current economic indicators which suggest resumption of development activity in several sectors, the City may wish to consider

the current staffing level of Permit Techs as a baseline for the foreseeable future. Recommendations regarding future staffing will appear in the "Future Staffing Model" section within this report.

Administrative Support

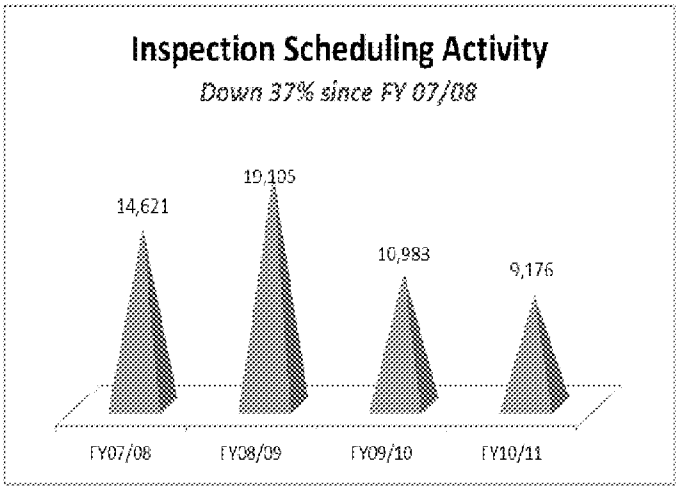
The final functional area to be addressed in terms of productivity is that of administrative support. This important aspect of Building & Safety Division services is carried out by two Administrative Assistants (one of whom is a Senior Administrative Assistant). The Division responds to contractors' requests for inspections which are made via telephone to the Building & Safety Division Office. These calls are taken (or messages returned) by the two Administrative Assistants.



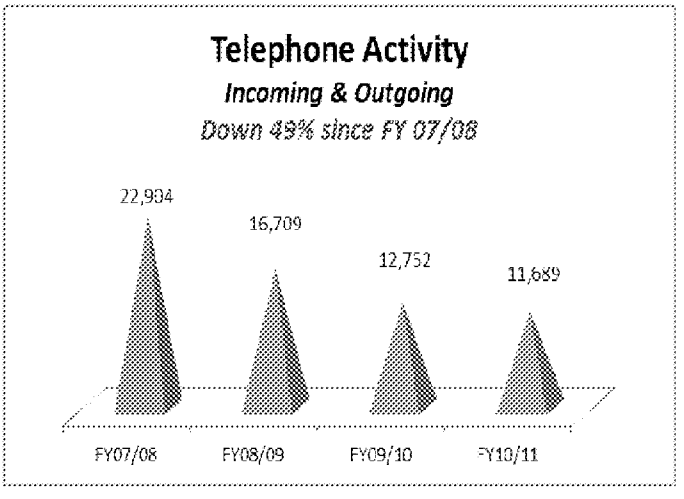
Staffing patterns have been largely stable within this function over the past four years; a part-time temporary position assigned to assist the administrative team was discontinued in FY 08/09. While these staff members carry out a range of office management duties, this report used all available data (which was limited to two key activities) to analyze productivity over time. The first activity is handling telephone calls, which is a particularly critical function as it is currently the only means through which building inspections can be requested. The second, and directly related, activity is scheduling of inspections to be conducted by field staff.

FINDINGS: Workload for these two activities has declined significantly since the base year (FY 2007/08).

While activity levels are consistent with economic trends affecting the Building & Safety Division, administrative support staffing levels remain largely unchanged over the four-year period.



The number of inspections scheduled by administrative staff is equal to the number of inspections conducted; as shown earlier in this report, the total number has declined over 37% in four years.



The number of telephone calls has declined even further, although this 49% drop may to some extent reveal increasing use of e-mail rather than placing all calls through the administrative section. Like their counterparts in other divisions, Building & Safety's administrative assistants also provide rotational support for the information desk at the public counter in City Hall.

Recommendation: The Building & Safety Division should require Plan Check consultants to collect and report data on the timeliness of plan check services provided under contract to the City. As this information is very limited, and not in a format which can be quickly retrieved/tabulated, instituting this requirement would allow the Building & Safety Division to receive summary reports on a regular basis.

Recommendation: The Building & Safety Division should immediately create its own data base with which to verify and retain data on the

timeliness of plan check services. The absence of such data in a quickly retrievable fashion, and sole reliance upon contractor files for this information severely limits the City's ability to independently gauge trends and enhance processes where required. This data can be easily obtained via existing City processes which note transfer of plans to and from plan check consultants.

Recommendation: The Building & Safety Division should augment existing automated daily inspection activity reports to reflect the points in time when each inspection was requested and completed. Inclusion of this readily available information will help document the timeliness of services rendered while providing meaningful trend data for ongoing analysis and process refinement.

Recommendation: The Building & Safety Division should establish formal benchmarks against which to measure timeliness of permit issuance processes. Although this study found no evidence of customer dissatisfaction with the permit application process, the Division has no formal benchmarks which prescribe the average amount of time required to process applications. The absence of timeliness data precludes the Division from objective evaluations which may reveal opportunities to streamline procedures.

Recommendation: The Building & Safety Division should, to the greatest extent feasible, gather data regarding the level of activity by Permit Techs in a manner which would show any fluctuations over days of the week or portions of each day. The results of this survey would greatly assist the Department in evaluating the extent to which additional staffing may be required to handle peak demand periods.

Recommendation: The Building & Safety Division should undertake a detailed study of the "handling" process to:

- Enhance the accuracy of activity counts and logging; and
- Identify/evaluate each step in the handing process to determine how best to reduce the number of times a permit application is handled, and the costs associated with each step.

Future Staffing Model

Building Inspectors

The Building & Safety Division uses neither contract nor part-time building inspectors. Due to efficiencies gained by on-staff Inspectors and the nature of current inspection work (homeowner upgrades and commercial building renovations), existing demand can be met through scheduling. Should building activity materialize at the levels and pace indicated to the Division manager by several local developers, she anticipates soon needing additional inspectors to support these projects. At this juncture, the Division could return a grant-funded inspector to general inspection activity, which would then reduce the City's ability to carry out grant-funded activities at current levels while such funding remains available. Alternatively, the Division could create a mechanism through which additional inspectors can augment temporary staffing on either a full-time or part-time basis to greatly expand the Division Manager's flexibility to meet rising demands…utilizing development services funds to offset costs. The staffing method could also be selected to correspond more closely to the existing rate structure which prescribes charges for such services. Such a mechanism would also be ideal to provide long-term inspection services to speed completion of significant commercial projects.

Recommendation: The Building & Safety Division Manager should seek additional budgetary authority to augment Building Inspector staffing to meet demands which exceed the number of inspectors currently available. Formulas for any future staffing enhancements should be based upon the existing efficiencies which have allowed each inspector to complete significantly more inspections during the past two fiscal years. Creating a mechanism through which additional inspectors can augment staffing on either a full-time or part-time temporary basis, would greatly expand the Division Manager's flexibility to meet rising demands…and align costs with the existing rate structure which prescribes charges for such services. Should the Council approve additional hiring authority, it could be structured for implementation only upon the City Manager's approval and based upon a minimum productivity threshold, perhaps in the range of 3600-3700 inspections per inspector (or the appropriate proportion per part-time inspector).

Permit Techs

As outlined in this report, the City may wish to consider the current staffing level of Permit Techs as a baseline for the foreseeable future, assuming that applications remain at or above existing levels. Reducing the number of Permit Techs would severely limit the Division's ability to provide coverage at the Public Counter and process applications in a timely manner.

Recommendation: The Building & Safety Division should take a multi-stage approach to determining the extent to which additional Building Tech staffing is required to address resumption of development activity. As a first step, the City should consider results from the recommended study of permit handling activities to implement (and measure the success of) any needed process revisions before augmenting staff. Should additional support be required, use of part-time staff should be considered before adding permanent employees who would be subject to position reductions in subsequent economic cycles. Studying activity levels over the course of the week (and portions of the day) would allow management to target part-time resources to address periods of higher demand for services.

Administrative Assistants

As outlined in this report, declining workload indicators suggest the need to consider adjusting staffing levels assigned to Building & Safety Division's administrative support functions.

Additionally, recommendations (in the Technology section of this report) to migrate to an automated inspection request system would further reduce key workload indicators for administrative staff positions.

These findings and associated recommendation are not presented as a negative reflection upon the administrative professionals who carry out these duties, nor do they suggest that staff members are not engaged in meaningful work activities throughout the business day. Instead, this information simply reflects the fiscal challenges faced by the City, ongoing emphasis by the CEDD Director to enhance operational efficiencies, potential benefits of enhanced technology, and the high demand for professional administrative support no longer available in some other City functions.

Recommendation: The Community and Economic Development Department Director should consider reallocation of administrative support staffing resources currently assigned to the Building & Safety Division, where key workload indicators have decreased significantly. As recommended in this report, migration to automated processes could enhance the efficiency of the processes and further reduce the workload of the Division's administrative support team. The Department Director may wish to consider alternatives to reassign an appropriate percentage of the current 2 FTE administrative positions to other CEDD divisions or to other City departments.

Overall

The Building & Safety Division's staffing and activity trends provide the City with an opportunity to chart a more precise course for the future of this important function.

Recommendation: The Building & Safety Division Manager and CEDD Director should use the current budget situation to prescribe recommended baseline staffing levels. Doing so would ensure that the Department retains the core level of in-house expertise to sustain basic operations, augmented (as needed) by temporary staff or via contract. This approach would provide the Department with flexibility to rapidly adapt to changing workloads without the expense, or organizational trauma, associated with expanding/contracting the permanent (career position) work force through economic cycles. While this may be the intention of Department managers, plainly stating this objective in terms of a policy recommendation to the Council offers several distinct advantages:

- Provide an increased sense of stability among remaining in-house staff;

- Preclude continuing boom/bust cycles within the Building & Safety Division in the years ahead; and

- Create a minimal staffing configuration which could, if required, be adjusted if projected workloads far exceed projections used to establish baselines.

Public Works Department

Land Development Division
Capital Projects Division

Report prepared by:

Thomas M. DeSantis
Consultant

July 2011

INTRODUCTION

This study was undertaken to assist the Public Works Department and City Manager's Office in defining key issues and challenges facing the Public Works Department.

The study focused on two of the Department's most high profile areas - - the **Land Development** and **Capital Projects** Divisions. Research was targeted toward the following areas:

- Functional Organization
- Staffing
- Workload Indicators
- Resource Management
- Best Practices
- Contracts
- Technology
- Customer Feedback & Process Enhancement
- General Management Practices
- Project Management
- Accountability
- Performance Measurements
- Communication/Reporting

The approach relied upon examination of a broad series of indicators through which stakeholders could effectively gauge the overall status of the Department in its important public service mission. Research included thorough review of existing documents, interviews with Public Works managers and analysis of specific information requested from City staff.

The report is presented in two sections, one pertaining to each Division. Observations/findings are presented in each, immediately followed by recommendations relevant to the topics addressed. Findings have been quantified according to the methodology presented herein, and are intended to present complex data and trends in a reader-friendly fashion. The Land Development Division report concludes by addressing a potential restructuring opportunity which could significantly enhance service delivery.

The Consultant gratefully acknowledges the significant effort required of the highly professional staff members within the Public Works Department who compiled extensive information essential for this study. In many cases, this involved compiling historical data not previously catalogued in the manner presented herein. The positive spirit with which they approached this undertaking is profoundly appreciated.

It is hoped that the results of this study, and the methods of data collection created for its purposes, will provide meaningful information for the many internal and external stakeholders in the continued success of Moreno Valley's Public Works Department.

Land Development Division

A high-visibility Division within the Public Works Department, Land Development is responsible for the review and approval of all private development projects within the public right-of-way including tentative maps, tract and parcel maps, lot line adjustments, monument inspection, environmental impact, and soil and hydrology reports. This Division generates entitlement conditions of approval and development agreements, establishes bond amounts for development projects, reviews and approves storm drain, street improvement and grading plans, and provides inspection services for all development-related projects. Other key functions include administering permits and inspections in the public right-of-way, coordinating engineering issues with other public agencies (regional, utility, water) and performing special engineering studies (such as drainage, alley identification and right-of-way clarification). The Storm Water Management Section implements a Watershed Management Program integrating programs and policies including best management practices to reduce pollutants in urban runoff and flooding of property.

The report on this Division is presented in two sections, the first which addresses organizational culture and practices and the second which pertains to Productivity Measures. Observations/findings are presented in each sub-section, immediately followed by recommendations relevant to the topics addressed.

Part I: Organizational Culture & Practices

Staffing

As indicated in a subsequent section of this report, workload and productivity measures are primarily associated with positive steps taken by the Division to extensively track the status of all pending applications/projects. While this comprehensive tracking method is focused upon accountability (being able to respond to inquiries regarding status and timing), it is not specifically mentioned in documents which pertain to staffing level adjustments.

While it is entirely likely that Deficit Reduction Options (DRO) to reduce staffing are crafted with workloads in mind, the absence of workload/productivity measures forces managers to rely upon their general perceptions forged over time rather than upon data.

DRO recommendations (to reverse a prior transfer of staff to Capital Projects) cite anticipated drops in workload driven by fewer capital projects. While DROs refer to anticipated negative impacts of position transfers and elimination, they cite overall declines in projects rather than specific workload indicators (tied to individual employees or work groups). Additionally, the DROs project significant negative impacts in customer service. Although project-specific support is also supported by fee revenues, it would have been logical to anticipate fee-supported use of consultant work to sustain basic services to customers. Noticeably absent are any references to using this fiscally-driven process to establish baseline staffing levels, which would be augmented (as development activity rises) via consultant staffing through contracts which cap contract rates at 80% of the fees generated.

In its current (reduced) configuration, the Division appears to be operating in an "all hands on deck" modality; staff members are handling tasks as they arise. The tasks and specialties of Engineers (in the Plan Check function) vs. Environmental Engineers (in the Stormwater Program) are as distinct as the funding sources which support their activities.

The extensive amount of tracking (financial and operational) associated with this Division, as well as the processes required for security reductions (as an example) indicates that the remaining Management Analyst position is well utilized.

The reduced staffing level within this Division is forcing maximum utility of the skill sets present within Land Development.

While formal cross-training of staff is limited, longevity and close working relationships greatly assist the staff in providing continuity of service in situations where a regularly assigned staff member is unavailable.

Recommendation: Productivity measures regarding individual functions should be established, particularly given the availability of data via the existing Case Tracking mechanisms. Any such approach must recognize that simply counting cases processed (for example) is an insufficient means by which to judge overall productivity, since cases differ in complexity and construct. But adding this dimension to the Division's existing management tool box will significantly enrich management's ability to pinpoint areas of concern, streamline processes and recognize outstanding employee performance.

Recommendation: The Department should use the current budget situation to prescribe specific baseline staffing levels. Doing so would ensure that the Department retains the core level of in-house expertise to sustain basic operations, augmented (as needed) by contract staff. This approach would

MV00250849

provide the Department with flexibility to rapidly adapt to changing workloads without the expense, or organizational trauma, associated with expanding/contracting the permanent (career position) work force through economic cycles. While this may be the intention of Department managers, plainly stating this objective in terms of a policy recommendation to the Council offers several distinct advantages:

- Provide an increased sense of stability among remaining in-house staff, whose morale has been reported to be significantly impacted by ongoing reductions in force;
- Preclude continuing boom/bust cycles within the Land Development Division in the years ahead;
- Potentially set the stage for further discussions and policy decisions by the City Council with regard to their vision for Moreno Valley as a Contract (or Hybrid Contract) City.

Intra-Departmental Synergy

The Land Development Division must work extremely closely with Planning throughout the Plan Check process. By virtue of their respective functions, Planning takes the lead on the Entitlement process (for conformance with General/Specific Plan requirements); Land Development moves to the lead on the public infrastructure Plan Check phase for engineering aspects (such as final maps and parcel maps). In contrast, Community Development retains responsibility for all phases of private development approvals through occupancy.

Within the Department, LD coordinates with Capital Projects via that Division's Quarterly Utility Coordination Meeting. All public utilities attend, where they discuss all City projects to identify potential problems/conflicts, and alert other parties to prepare for (or phase) their own project schedules. (This level of coordination minimizes repeated work in areas where activities, such as paving, are scheduled or have been recently completed.)

Several examples (below) reveal the extent to which intradepartmental coordination is taking place and enhancing Departmental efficiencies:

- LD provides peer review for Capital Projects staff (e.g. assisting with examining potential flooding impacts, etc.).

- LD coordinates with MVU on reduction requests (to partially release bonds).

MV00250850

- Close contact with the Capital Projects team allows LD to make them aware of private development projects occurring in the vicinity of City projects.

- LD loans staff to Capital Projects to assist with City's ADA Plan.

- LD and Capital Projects share inspectors to cover workload spikes (to include developer-paid overtime).

- LD works with Maintenance & Operations regarding easements for repairs of potholes, sidewalks, drainage, traffic cones for planned road closures (for special events).

- LD coordinates with Transportation for Traffic Signal issues (set devices to flash or pursue adequate battery backup) associated with work being done by developers or utilities.

- LD requires Transportation sign-off for approval of traffic signal plans.

- LD provides inspection services (fully reimbursable) to MVU. This use of staff is synergistic and cost-efficient for both Divisions, while reducing costs for both.

It should be noted, however, that the level of interaction seen between Land Development and other Divisions and Departments, is functionally logical and would exist whether Land Development were a component of the Public Works Department, a stand-alone Department, or merged into another City Department.

Best Practices

The Land Development Division neither refers to nor benchmarks its processes against any sources of external Best Practices. Division operations are guided primarily by the Subdivision Map Act as well as an internal Procedural Manual.

The Division Manager participates in forums which allow professional networking; these forums do allow occasional coordination among specialists in the field who exchange insights regarding how their respective agencies address specific situations.

The Division's "Walk the Process" Workshop (in late 2007) provided developers with a wealth of information to assist them in navigating the City's development review process. Although some time has elapsed since that training session, lasting benefit is derived through the Handbook created at that time. This

MV00250851

resource continues to provide developers with procedural information (to include flow charts) as well as helpful insight ("Tips & Tricks") to help equip them for efficient interaction with city staff members. As there is no similar "Tips & Tricks" training document to assist staff in quickly addressing common problems encountered by customers, development of such a reference tool could help round out the Division's commitment to customer service.

The lack of external Best Practices, combined with the Division's limited use of productivity indicators, could isolate the Division from opportunities to accurately gauge its performance and continue to refine its processes. Further, it places the Division largely in a *reactive* position, where process enhancements come largely in response to situations encountered locally.

Through research conducted for this report, it was observed that Land Development's current staffing configuration does not allow it to offer Fast Track review processes to support private development. While developers have the option of seeking rapid inspections on a full-cost reimbursement basis, engineering review services are not currently available on the same basis. This situation does not appear to reflect any lack of desire to provide quick turnaround on engineering services, but instead reflects an unintended consequence of necessary staffing reconfigurations which have left Land Development without Assistant Engineers (a classification which can carry out assignments beyond the standard business day on an overtime basis). Although continued funding constraints will likely preclude a return of the Assistant Engineer classification to Land Development, the Division could offer quick turnarounds on engineering review - - on a fully reimbursable basis - - via consulting contracts. When asked if this service would be seen as beneficial to the City's economic development programs, the EDD Director indicated interest in adding this option.

Recommendation: Recognizing the limitations of current staffing levels, the Public Works Department should consider approaching the University of California Riverside (Bourns College of Engineering) to explore the prospect of enlisting the assistance of graduate students in identifying Best Practices and proposing a measurement process for the Land Development Division.

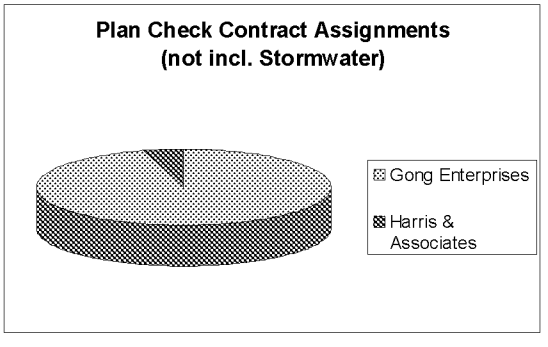
Recommendation: Consistent with the City's strong emphasis on job creation, the Land Development Division should immediately implement a Fast Track engineering review process to support private development projects. Because current staffing configurations do not support reimbursable engineering review (on an overtime basis), and because the demand for this additional level of service will fluctuate, the Division should establish this option via contracts with outside engineering firms.

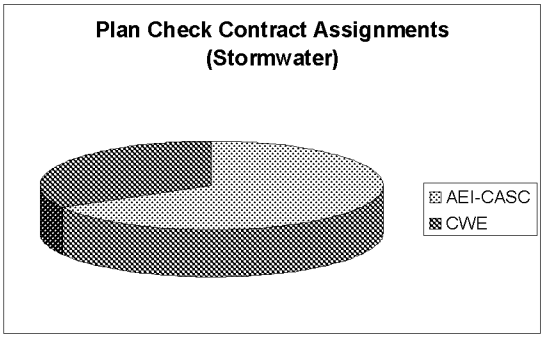
MV00250852

Contracts

Contracts are used to provide Final Map Check, primarily since the City staff does not include a licensed Land Surveyor. These contracts also allow the Division to augment in-house staffing to handle peak workloads; because contractor reimbursement is capped at 80% of the City's fee schedule, this alternative remains cost effective for developers as well as the City. The Division Manager reports previous situations (under previous city administrations) where expanded use of contractors to address workload was frowned upon because it leads to enhanced appropriation levels; since contract assistance is fully supported by fees, the appropriations are more than offset by available revenues.

The Division uses four contractors for plan review (two for general activities and two for the Stormwater program). Vendors were identified in 2006; at that point two additional firms were selected for participation but have since discontinued their support. Contracts have been renewed and are scheduled to be subject to RFP in 2012.





Staff indicates that work is regularly alternated between the two contractors supporting each respective work unit. But a review of actual projects assigned by Land Development (not including Stormwater) in Fiscal Years 08-09, 09-10 and 10-11 shows that 22 projects were assigned to Gong Enterprises and only 1 was assigned to Harris & Associates. Within the Stormwater Program, AEI-CASC reviewed 96 projects as compared to only 48 assigned to the CWE firm. Division staff indicated that rotation of work assignments could change in the event that a contractor is not sufficiently responsive; no mention was made of any requirement for specific skill sets when determining which pre-qualified firm to utilize. The information at hand clearly indicates that the assignment of work to contractors is extremely unbalanced, and warrants management attention. The potential for creating de facto "exclusive" contractors could prove disadvantageous to the City when a new RFP is issued in 2012; broader participation yields a more competitive climate in terms of both pricing and service delivery.

MV00250853

Recommendation: The Land Development Division Manager should review the current process through which staff assigns Plan Check projects among pre-qualified firms. Remedying the existing imbalance will enhance services and contract costs via the RFP process scheduled for 2012.

Technology

The Land Development Division has instituted the Grading component of the Permits Plus system. The tool, which meets the Division's basic needs, was selected for compatibility with other City Departments already using other components of this software. There are no measures which show the extent to which this initial Permits Plus implementation has affected productivity within the Land Development Division.

While deploying additional Permits Plus modules would allow the Division to more effectively integrate/automate its processes, the cost and time associated with programming all of the relevant fee components has precluded such an initiative. In the meantime, in-house tools such as Project TRAK are in use.

Recommendation: The Land Development Division should consider opportunities to obtain technology funding (grants, financing opportunities) to more thoroughly integrate its activities within the Citywide system (currently Permits Plus). Doing so would capitalize upon a unique situation wherein the current economic climate (with a significant decrease in the number of active projects) is particularly well-suited for adoption of new technology should resources become available for such a project.

Customer Feedback & Process Enhancement

The Land Development Division does not employ any formal processes to obtain feedback from its customers. In years past, customers were provided with the option of submitting written feedback through a comment card; reporting receipt of 3-4 comments annually, the Division Manager indicates that the program was discontinued.

In its place, the Division Manager indicates use of his regular interaction with customers as the counter, where he asks customers to let him know of their satisfaction. He also indicates regular observation of employee interaction with customers over the telephone, and follow-up praise and/or coaching with regard to problem solving skills.

MV00250854

The Division Manager reports efforts to seek feedback at recent meetings between City representatives and Developers, and (with one exception) receiving only glowing responses.

The feedback mechanisms currently in use are largely ineffective, in that they do not provide significant, measurable or comprehensive information. Similarly, the absence of negative comments should not be seen as an indicator of success. The absence of formal feedback mechanisms deprives the Division Manager, Department Head and City executives of ample opportunities to address customer concerns at earlier stages.

By requiring customers to identify themselves, the Department is also likely missing out on feedback opportunities from developers who may fear reprisal from staff on subsequent projects. While such a concern on the part of some developers may be unreasonable, it must be thoroughly considered as the Division constructs a viable feedback program.

The Division does receive a small number of inquiries and comments via the City's Customer Relations Management (CRM) system, which are routed from the City Council office. While the approval routing of CRM responses does make the Department Head aware of inquiries, there was no indication of responses to such inquiries being used to meet the objectives of a formalized customer service feedback process.

Recommendation: The Land Development Division should immediately institute a formal program through which meaningful performance feedback can be obtained from its customers. This program should afford respondents the options to submit identifiable or anonymous responses, select written or online formats, and allow users to send feedback to the Division, Department and/or City Manager's Office.

Recommendation: The Division should provide the Public Works Director and City Manager's Office with regular summary reports on information received from a newly-instituted feedback system.

Recommendation: The Department should consider partnering with one or more experienced (perhaps retired) private sector developers who would be willing to serve as "mystery shoppers" who could engage the Land Development Division at various levels. As envisioned, such an approach would not be conducted in a negative manner, but would instead provide staff with input meaningful enough to help staff members experience what it's like to be on "the other side of the counter."

MV00250855

General Management Practices

Approximately 20 Administrative and functional policies were provided for this review. The majority included definitions and procedures which clarify the intent of the policies; most of these policies are recent (approved in 2007 or later).

There is no indication of Long Range organizational planning activities within the Land Development Division.

Accountability/Reporting

The Land Development Division takes highly detailed steps to document the *status* of cases/applications. While this highly effective record keeping allows effective tracking of cases through the entire Land Development process, the focus of these efforts is not on charting productivity or enhancing efficiency. The primary objective of this process is to keep a record of where each case/application is so that accurate status information can be shared in response to inquiries from City officials or developers. The type of information catalogued appears extremely effective in achieving that goal.

Based upon this process, the Division Manager identifies situations where turnaround time for subsequent inspections increases beyond what would be expected as a project moves toward completion. An informal approach to case status data allows for these discussions.

An important corollary benefit to the tracking system is that data can be used to assist property/project owners by providing them with information which may not always be accurately transmitted to them by their own contract teams.

A review of case logs shows frequent lags (of multiple days) between the time an action is taken by Planning staff and the time which the next phase of work is begun by Land Development Division staff. The physical proximity of these work centers would generally seem to limit such lags to weekend/holiday periods. The current situation also leaves room for speculation as to why lags of multiple days occur in some situations (e.g. inaccurate dates entered into the tracking system, delays in routing, delays in receipt by LD staff assigned to the particular task, delays in opening material after receipt). Refining the routing process would tighten accountability and enhance trust among interdepartmental staff.

The type of status information kept on hand within Land Development is effectively suited for rapid response to questions from the City Manager's office

MV00250856

regarding where a project lies within the review process. No examples were seen, however, of regular summary information which can allow the CM or ACM to quickly gauge productivity information.

Recommendation: An automated "Variance Report" (like those generated within the Land Development Division's own financial section) would greatly assist all stakeholders in *quickly* identifying cases which warrant more detailed discussion due to extended timeframes.

Recommendation: The Land Development Division should take advantage of extensive systems currently in place (to track the status of cases/applications) to incorporate productivity statistics and standards. The Division staff's extreme familiarity with status tracking processes would amply prepare them to record/monitor broader productivity measurements and implementation of Best Practices.

Recommendation: A single point of contact should be established in each of the two Departments to receive/log case files transmitted between the Land Development Division and Planning staff. Adding this step would enhance the accuracy of the case logging system and increase efficiency by removing time lapses which cannot currently be analyzed/remedied.

Recommendation: Land Development should consider creating a monthly summary report which summarizes workload and productivity data for review by the Assistant City Manager. Flagging variances (such as delays or repeated plan checks) would assist the Manager's Office in quickly identifying potential problem areas, while also providing LD staff with meaningful monthly data against which they can chart their own results on a timely basis and spot trends over time.

Part II: Productivity/Performance Measures

Existing Measurements

Only 4 formal productivity measurements are tracked within the Land Development Division. These indicators are generally consistent with literature demonstrating the yardsticks by which Land Development functions commonly monitor their success.

1. Review of plans, maps, and lot line adjustments within the required timeline (14 calendar days). **Performance Goal: 95% Two-year average (March 2009 – Feb 2011): 98%**

MV00250857

2. Provide comments by deadline provided on the Planning Case Transmittal. **Two-year average (March 2009 – Feb 2011): 98%**

3. Prepare Conditions of Approval within two weeks of receipt. **Two-year average (March 2009 – Feb 2011): 99%**

4. Process permit applications within two working days of receipt. **Performance Goal: 95% Two-year average (March 2009 – Feb 2011): 99%**

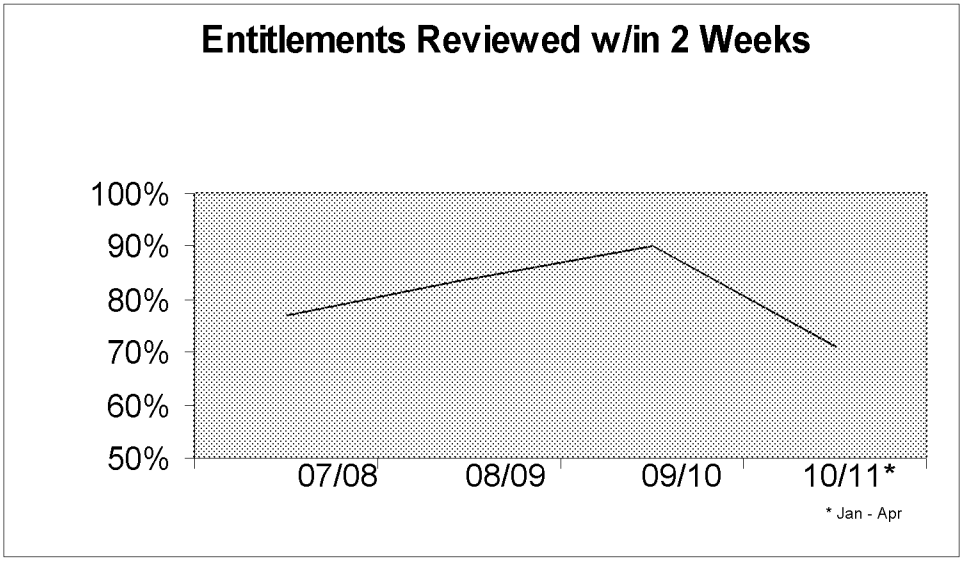
Productivity indicators, in the range of 98-99%, don't provide a comprehensive view of the Division's successes and challenges. Productivity measures used by the Division could also give the appearance of being selected specifically to convey only positive results. While these particular results are noteworthy, the Division's decision to exclude areas where results are not quite as timely (as in processing of Entitlement applications) could create a skewed self-image for Division staff which could logically cause them to be less receptive to negative assessments or perceptions by key stakeholders outside the Division or the Department. The potential for reduced sensitivity to negative external feedback could ultimately serve to deny the Division opportunities to achieve additional, meaningful customer service reforms.

The Plan Check process, a key Customer Service function, could be enhanced by introduction of qualitative analysis. A process through which accuracy of reviews is measured holds the potential to enhance productivity of LD staff, while creating time/cost savings for developers. While staffing constraints (and the fact that preliminary comments are not always retained) severely limit the Division's ability to undertake a retroactive analysis of this factor, it could be implemented prospectively as a means of measuring the efficacy of the plan check process.

Another helpful measure could be found in logging the number of interactions (meetings, telephone calls) associated with project reviews. While much of this data is captured in the project log, a statistical report would offer another means of gauging the efficiency of interaction between staff and customers. As with virtually any other type of measurement technique, counting "interactions" is not singularly effective in gauging effectiveness, particularly since extensive interaction could also be indicative of an ill-prepared developer.

MV00250858

A review of **Entitlement** applications processed since FY 2001/08 is based upon 1113 projects. While the overall rate of completion within two weeks averages 80%, the on-time rate increased until the current fiscal year, when an Associate Engineer (who previously assisted with these tasks) was assigned to other duties and the remaining Senior Engineer carried this workload along with additional responsibilities previously assigned to positions since vacated by the Division. Given the changing staffing and assignment dynamics within the Division, it is not possible to precisely isolate efficiency/productivity factors affecting the trend. Decisions to reduce staff members permanently assigned to support this activity are, however, consistent with a 71% drop in the number of Entitlement applications since FY 07/08.



MV00250859

Workload/Staffing Trends

As discussed above, productivity measurements are limited in this Division. Augmenting the several measures listed previously, the following data is presented to identify trends in workload, budget and staffing levels.

Land Development Division: Budget/Workload/Staffing Trends (Plan Check & Inspection)

	07-08	08-09	% Change	09-10	% Change	Change since 07-08
Budget Actuals	$3,837,808	$2,305,367	-40%	$1,817,390	-21%	-53%
Total Project Reviews	1230	744	-40%	454	-39%	-63%
Inspections	7398	5316	-28%	2346	-56%	-68%
DIF/TUMF Agreements	17	3	-82%	2	-33%	-88%
Public Improvement Agreements	28	27	-4%	4	-85%	-86%
Planning App Entitlement Reviews	525	309	-41%	154	-50%	-71%
Personnel	24.8	21.5	-13%	13.0	-40%	-47%

Consistent with economic trends, workload factors affecting the Land Development Division have decreased markedly over the past 3 years. In terms of sheer volume, this trend is most vividly portrayed in project reviews (down 63%), inspections (down 68%) and entitlement reviews (down 71%).

The Division's financing structure (General Fund and cost recovery) is consistent with industry standards which recognize that fee schedules do not capture all costs by virtue of their design as well as due to economic pressures. Allocation of City discretionary funding underwrites general LD functions such as counter service, fiscal activities, special studies, training programs/materials, etc. These activities, along with the need to retain a baseline level of staffing, largely account for the disparity between the declines in direct development-related workload and the reductions to overall budget and staffing. Should economic trends necessitate further reductions to the existing 9 FTEs (outside of the Stormwater program), the Division's ability to maintain current services would require rapid (fee-supported) augmentation via contract providers.

MV00250860

Land Development Division: Stormwater Program Budget/Workload/Staffing Trends

	07-08	08-09	% Change	09-10	% Change	Change since 07-08
Budget Actuals	$753,623	$791,843	5%	$836,256	6%	11%
Total Project Reviews	35	100	186%	53	-47%	51%
Business Compliance Inspections	265	434	64%	504	16%	90%
Total Inspections	1390	1124	-19%	837	-26%	-40%
Consultant Contracts (Project Review)	156	68	-56%	32	-53%	-79%
Personnel	3.25	4.0	23%	4.0	0%	23%

Funded predominantly through assessment revenues, the **Stormwater Program** is largely isolated from the economic factors which have affected the rest of the Land Development Division. Its functions are also quite distinct from those performed by the rest of the Division.

Over a multi-year period, the total number of project reviews by the Stormwater Program has also climbed, although the sharp drop between Fiscal Years 08-09 and 09-10 is logical. It's also important to note, however, that increases in reviews and inspections are not tied solely to economic conditions, as program/permit regulations drive program activities.

Although the total number of inspections has declined by 40% since FY 07-08, appropriations have not declined as the City must fund costs for its own review and permit fees imposed by other regulatory agencies.

Business Compliance inspections are up dramatically (90%) since FY 07-08. Upon request, the Riverside County Flood Control and Water Conservation District provided statistics from other jurisdictions which allows comparison of business inspections conducted in FY 07-08 compared with FY 09-10. Analysis of this data further underscores the complications caused by imprecise program requirements (discussed later in this section). The data shows the following trends:

Moreno Valley:	90% increase
Corona:	21% increase

MV00250861

Hemet:	14% decrease
Lake Elsinore:	95% decrease

While some of the differences between statistics reported by Corona and Moreno Valley may be attributed to Corona's practice of annually inspecting more businesses than required, the vast discrepancies between Moreno Valley's 90% increase and Lake Elsinore's 95% decline are remarkable. While both of these jurisdictions (seemingly on opposite ends of the compliance spectrum) have apparently met program requirements - - as evidenced by the absence of violation notices -- it could be asserted that Moreno Valley's program could be decreased in terms of scope and resources.

The Stormwater Program bases its business compliance inspection activities on the City's Business License data base. As a result, businesses which have failed to register with the City of Moreno Valley could also be unintentionally excluded from NPDES compliance inspections. Although audits of business license programs can be costly, Stormwater Program funding could potentially be used to help offset audit costs due to the reliance upon accurate data for compliance purposes.

While staffing in the Stormwater Division grew to 4 FTEs over a multi-year period, the use of consultant support has decreased markedly. While this reduction is anticipated due to declining development, the Division's compliance responsibilities remain. With approximately 20% of the total FY 2010-11 Budget comprising General Funds for unrecoverable (and mandatory) costs associated with the City's own NPDES permit, the DRO process has not affected the unit. What could not be discerned from the level of review undertaken in this project, however, is the extent to which the City's program requirements could be reduced while still meeting regulatory requirements. With the prospect of heavy fines for non-compliance, program managers in local jurisdictions logically focus their efforts on applying all available financial resources toward meeting the program compliance requirements prescribed by the nebulous term known as MEP (Maximum Extent Practicable). As compliance is ultimately determined by regulators based on an aggregation of factors rather than meeting a well defined list of minimally acceptable procedures, program staff are faced with hitting what is often described as a "moving target" of compliance. As a result, local jurisdictions typically design Stormwater program activities to preclude costly sanctions which could be imposed for non-compliance. Because regulatory agencies have not specified precise minimum compliance standards, jurisdictions are often left to implement higher levels of program activities more likely to be deemed acceptable by regulators. Absent precisely defined minimum compliance standards, extremely compelling rationale for exhaustive program review, and the existence of significant stand-alone revenue sources, it is common for Stormwater programs to operate in the manner seen within the City's Land Development Division. Should the City face the prospect of significant fee adjustments or additional General Fund support, an in-depth

MV00250862

technical program review could be considered to accurately gauge the extent to which some program activities could be curtailed. Any such review, however, must consider that "minimal compliance" standards are not clearly defined.

The Division Manager indicated a sense of frustration over the Division's reduced ability to complete some other tasks in a timely manner, particularly those which are not directly billable to developers. Specific examples which could be reviewed in terms of data were not available. One of the areas discussed by the Division Manager pertained to unavoidable delays in final Bond Releases (associated with the built-in lead time for submission of Agenda Items for the City Council). It was indicated that a proposal to authorize the PW Director to approve final bond release may be forthcoming to the Council. Based upon the increased speed with which partial security reductions can now be approved administratively, a similar process for final releases could offer similar positive benefits in terms of efficiency of the overall process and customer satisfaction, while preserving the Council's policy authority to accept improvements into the City's infrastructure system.

The Division Manager currently leads weekly meetings to review the list of active plan checks, to visually identify potential problems. Among the indicators used in this informal review are increased time periods for subsequent inspections (which could indicate potential process problems). While this valuable information merits ongoing review, simple steps could be used to enhance the efficiency and accuracy of the process through a variance reporting technique.

Recommendation: Additional performance measurement criteria should be established to track trends which provide a more complete picture of the successes *and* challenges facing the Land Development Division. These criteria must emphasize service delivery from the customers' view (e.g. public, other City departments) to capture the outcome measures most relevant to the customer.

Recommendation: The Land Development Division Manager and Public Works Director should formulate alternate strategies to assign additional staff support based upon workload peaks within the Entitlement review process. Cross-training of engineering staff in one or more of the other Divisions within the Public Works Department could allow quick augmentation of staff resources in this area to reclaim on-time successes achieved in previous years. As an additional alternative, contract support could be considered as a means through which to address workload spikes, recognizing that the efficacy of this approach would also require consultant familiarity with unique City requirements and processes.

Recommendation: The Land Development Division should begin to (prospectively) measure accuracy/quality of plan checks. This could be

MV00250863

accomplished by evaluating the number of comments which appear on subsequent plan checks but do not appear on the first check, with organizational goal to preclude such situations. The measurement process must also take into account that initial reviews can sometimes be conducted before the developer's plans are complete.

Recommendation: The Land Development Division should log the number of interactions associated with project reviews, as another means of gauging efficiency and flagging projects which are requiring an inordinate amount of interaction. Adding this to a wider array of measurements could provide Division and Department managers with additional barometers which can increase ready access to empirical information to help identify trends and craft process refinements.

Recommendation: That the Land Development Division institute spreadsheet-based tracking techniques to create visual flags when specific indicators (such as increasing inspection period intervals) suggest the need for additional review of active cases. The Division successfully uses these techniques for its extensive financial monitoring procedures, and could achieve similar benefits by streamlining the process so that the Director can quickly discern potential problem areas. Subsequent refinements could add automated e-mail alerts to Division staff in advance of the weekly meeting to provide immediate response information to the Division Manager.

Recommendation: That the City explore the potential use of Stormwater program funding to support audits of the Business License program to help ensure accurate registration. As the Stormwater program relies upon the accuracy of this data base for business inspection purposes, a sufficient nexus may exist to apply non-General Fund revenues for this activity.

Organizational Restructuring Opportunity

To a greater extent than any other facet of the City's Public Works Department, the demands placed upon the Land Development Division are driven directly by private development throughout the City's 50+ square miles. Land Development's processes play an important role in achieving the City Council's objectives for spurring job creation throughout Moreno Valley. Because the Economic Development Department spearheads the City's overall efforts in this area, creating greater synergies (and a direct link) between EDD and Land Development would be part of the City's forward lean to jump start the regional economy. A comprehensive approach toward retaining, attracting, and assisting local businesses would be bolstered by a minor reorganization which could have major positive impacts for the private sector.

MV00250864

Recasting the Land Development function and staff as a Division of the Economic Development Department would provide comprehensive assistance to the private sector throughout key facets of the development process and appropriately reflect Moreno Valley's emergence as a regional economic powerhouse and the medical/technology/commercial hub of western Riverside County. Synching land development and economic development under the EDD umbrella holds enormous potential to rev up the City's land development processes through a shared focus on fueling the economic engine which will sustain Moreno Valley for decades to come. It would also promote establishment of Fast Track Land Development services (as recommended in this report) while maintaining strong linkages with the Capital Projects section to ensure that the City remains proactive in sustaining the robust infrastructure program required to support long-term economic growth.

A restructuring of the Land Development function must also take into account the City's NPDES compliance program. The Stormwater Program's current placement within the Land Development Department is neither required for the Program's success, nor a logical fit within the City's Economic Development Department's arena. Stormwater was formerly a part of the Special Districts function, which reflects the program's assessment-based funding structure and its genesis in the formation of County Service Area 152. The current tie to Land Development reflects the City's need to ensure that development meets NPDES permit requirements. But the Program's responsibility to continually monitor (and ensure mitigation measures for) urban runoff diverge from the Land Development Division's focus on new development. The staff's regular interaction with regulatory agencies and co-permittees also reflects the distinct nature of this special program. Placement of the Stormwater program in other jurisdictions runs the gamut; association with Public Works reflects an operational tie to municipal catch basin/storm drain systems, while some cities have even appended this function to the City Manager's Office.

Recommendation: Recast the Land Development function and staff as a Division of the Economic Development Department to capture synergy and provide comprehensive support to local businesses which hold the key to job creation in Moreno Valley and the region. The revised configuration will also ensure the degree of knowledge transfer vital to synchronizing these vital activities.

Recommendation: *If the City restructures the Economic Development Department to create a Land Development Division,* the Stormwater Program should remain within the Public Works Department. Restoring the historical tie to the Special Districts Division would maintain the link with other Public Works responsibilities while reflecting the unique nature of NPDES compliance activities.

MV00250865

Capital Projects Division

As a Key Division within the Public Works Department, Capital Projects implements the City's capital improvement program. The Division is responsible for engineering design and contract administration, Requests for Proposal (RFPs) and construction for City-funded capital projects which include constructing storm drains, widening roads, installing and upgrading traffic signals, improving roadway conditions, curb and gutter installations and replacements, upgrade of roadway medians, bikeways, bridges and facilities. The Division also provides Real Property services to all departments in the City. These services include acquisitions/negotiations, appraisal reviews, cost estimates, legal description review, title and escrow services and oversee and coordinate Right-of-Way consulting services.

The report on this Division is presented in two sections, the first which addresses organizational culture and practices and the second which pertains to Project Management. Observations/findings are presented in each sub-section, immediately followed by recommendations relevant to the topics addressed.

Part I: Organizational Culture & Practices

Staffing

Staffing levels within the Capital Projects Division reflect the organizational culture which assigns Professional Engineers as project managers. Assignments (based upon this premise) reflect the unique strengths/experiences of individual members of the team. Projects are also rated/scored via a methodology which assigns points based on complexity; this criterion is also considered when assigning projects among the Engineering staff.

Over time, the Division has used alternate strategies for managing projects. Projects have been assigned vertically (where a single project manager would oversee all phases of a project through completion) as well as in a split fashion (where projects would be rotated between different managers who would handle design or construction). The former emphasizes accountability, while the latter provides additional checks & balances among the major project phases. With the Division's focus on delivering finished projects within budget and time constraints, the vertical assignment approach is the preferred method. By focusing accountability on a single project manager, this approach also greatly

MV00250866

reduces the potential for confusion or questions regarding responsibility for all phases of project delivery. During the course of this study, the Public Works Director directed the Capital Projects Division to return to a vertical assignment process.

Management assistants, who support multiple project managers, provide the range of support required to process documents/invoices/notices/etc. associated with capital projects. Real property agent services, formerly provided by in-house staff, are provided via contract. Although a cost analysis was not performed as part of this study, the use of contract assistance should be reevaluated if the capital projects workload increases significantly.

At present, the Capital Projects Division assigns professional engineers to manage consultant activities for all project phases through delivery. While there are obvious advantages to involving skilled engineers in overseeing engineering work, this traditional method also assumes that engineers have the background best suited to oversee activities such as property acquisition, environmental, design and construction. This may not always be the case, however, since these activities cross a wide range of disciplines. Some agencies employ experienced Project Managers who, while not professional engineers, possess a broad range of expertise in shepherding capital projects to completion. Private sector construction management firms also assign generalists (non-engineers) to oversee a wide range of capital projects. Data pertaining to the Division's varying degrees of success in delivering projects within time and budget (primarily soft cost) parameters suggests that an opportunity may exist to try an alternate strategy to assign private sector project managers (to include non-engineers) to deliver entire City projects. This concept is presented with the recognition that it may not be readily embraced by the Division's cadre of experienced engineers, which would be understandable. But the timeliness trends revealed by multi-year project data suggest that the time is right to consider alternatives to current project delivery methods.

A controlled experiment through which project management consultants are assigned several projects may assist the City in evaluating this option. At present, consultant project managers are used only for a portion of particular projects (e.g. Design, Construction); the other portion of the project is managed by in-house staff. As discussed previously in this report, a vertical approach to assigning project management is essential to maintaining accountability for project delivery; it is equally suited for consultant project management and would enhance the results of this experiment. A meaningful review would, of course, require steps to ensure that neither overly simple nor overly complex projects are assigned to in-house or consultant project managers. Comparing results would help position the City to make long-term decisions regarding the extent to which project management should be performed by professional engineers or by a blend of engineers and project managers.

MV00250867

Recommendation: While the current method of considering the strengths and backgrounds of individual engineers (along with project complexity) makes efficient use of in-house talent, the Capital Projects Division should consider forming project teams which allow engineers to work on projects beyond their realm of expertise and under the guidance of a colleague with specific experience in that area. While cross-talk and site visits are helpful in broadening the staff's exposure to project types, a more formalized project team approach would…over time…strengthen the experience base throughout the Capital Projects Division.

Recommendation: The Public Works Department, in conjunction with the City Manager's Office, should undertake an experiment to determine whether capital projects should continue to be managed solely by professional engineers, or whether a blend of engineers and generalist project managers (non-engineers) might better meet the City's needs for delivery of a wide range of capital projects. Such an experiment should be carefully structured to ensure that assignment of projects among contract consultants and in-house engineers fully represents the range of projects/conditions generally managed by existing staff. This will help ensure that the results (budget/time/quality) can be fairly compared to determine the extent to which refining the Capital Projects Division's project management methods could prove beneficial to the City.

Intra-Departmental Synergy

Formerly within the same Division, Land Development and Capital Projects continue to coordinate closely, reflecting the natural tie between private development and the need for capital improvements within the City.

The Capital Projects Division coordinates the City's Capital Improvements Program with the City's electric utility CIP to maximize efficiency and minimize inconvenience to residents and businesses.

Regular interaction between Capital Projects and Maintenance & Operations allows timely identification of projects to provide long-term remedies for recurring maintenance problems (e.g. roadways, catch basins, etc.).

Recommendation: To the greatest extent feasible, the Capital Projects Division should schedule work on multiple projects within the same area in a manner which maximizes use of General Fund resources. Projects which rely upon local funding should proceed first, with restoration (e.g. roadway remediation) costs legitimately borne by projects supported with external funding.

MV00250868

Best Practices

The Capital Projects Division routinely relies on rules and procedures promulgated by the California Department of Transportation. The Caltrans *Local Assistance Procedures Manual* (LAPM) is provided "to aid California local agencies scope, organize, design, construct and maintain their public transportation facilities when they seek Federal Highway Administration (FHWA) funded federal-aid or state funding." The publication describes "the processes, procedures, documents, authorizations, approvals and certifications which are required in order to receive federal-aid and/or state funds for many types of local transportation projects." The volume exceeds 1000 pages, provides extensive guidance on project preparation/construction/inspection and is a logical source of reference material to local project engineers.

The Division also provides training to project engineers through attendance in Caltrans' "Resident Engineer Academy." This 3½ day program is conducted by State transportation officials in cooperation with UC Berkeley's Institute of Transportation Studies. The curriculum includes: "Resident Engineer's Roles and Responsibilities, Federal-aid Project Records & Accounting, Control of Materials, Quality Assurance Programs, Control/Scope of Work, Legal Relations and Responsibilities, Prosecution and Progress, Labor Compliance and Equal Opportunity, Disadvantaged Business Enterprises, Labor Compliance, Claims and Claims Avoidance and Tort Liability." The Division Manager indicates that all of the City's project engineers attend the program once every 3-4 years.

Given Caltrans' role in setting industry/regulatory standards for projects in which it partners, the City staff's reliance upon state training and publications is to be expected.

The Capital Projects Division uses monthly meetings to review individual project schedules, facilitate cross-talk to resolve common issues. The Deputy Director leads these meetings.

Project expenditure reports provide detailed, timely information regarding costs assessed to each project to-date, which includes encumbrances. While this requires that project staff enter transactions (prior to the Deputy Director approves payments against invoices), the practice effectively supplements information currently available via the City's centralized financial system.

While not part of a formal Best Practices program, the Capital Projects Division Manager reports the benefits of interaction with counterparts via APWA meetings. Discussions at such forums have generated ideas (such as "cold in place recycling" and use of a laser-equipped Profilograph on paving projects) for incorporation in this City.

MV00250869

Although funding/staffing constraints preclude production of a local report of the same magnitude, the Public Works Department may find it instructive to review the "Performance Measures" report issued quarterly by Caltrans.

The following excerpt describes some of the key objectives behind its preparation: *"In addition to being an excellent tool for reporting Department's performance, this report is also a resource to guide management in decision making. The information contained within this report is an indication of past management decisions. The overall goal of this report is to provide managers critical information on performance so that future decisions will improve Department's performance."*

An outgrowth of strategic planning and reporting to senior State officials, it charts progress against key indicators with dashboard and narrative information. A recent report can be found online at: http://www.dot.ca.gov/perf/docs/FY2010-11_Q2_Quarterly_Performance_Report.pdf. In quantifying performance standards, the indicators also point to Best Practices for efficiency, safety and responsiveness.

Recommendation: The Capital Projects Division should review the Caltrans "Performance Measures" reports and consider opportunities to introduce additional Best Practices which are consistent with the *Local Assistance Procedures Manual* already in use locally.

Recommendation: The Capital Projects Division should ensure that the City's Administrative/Financial Services Division is provided complete information regarding processes currently used to track project expenditures; this step will help ensure exploration of this business need as the City implements financial system upgrades. As the City's financial system evolves, the Capital Projects Division should continue to evaluate the need to continue duplicate entry of project expenditure data (in the Departmental and Citywide systems).

Contracts

The Capital Projects Division makes extensive use of contract services for various phases of each project.

The Capital Projects Division tracks spending on contract services through its project expenditure tracking process. These reports show spending to-date, as well as the contract expiration date. The latter information is used by the Deputy Director to ensure that contracts are renewed as required; the data is populated into Microsoft Outlook Calendars to provide automated reminders (30-days in advance) to the Division's administrative support staff.

MV00250870

On-Call Consultants were selected via an RFQ process, conducted in 2008. Proposals were sought in the following disciplines: Architectural Services, Caltrans Local Assistance, Civil Engineering Design, Community Relations, Construction Management & Peer Review Plan Check, DBE Services, Environmental Services, Grant Preparation & Management, Landscape & Irrigation, Material Testing & Geotechnical, Pavement Management, Project Management, Right of Way, Surveying and Title Reports.

City staff members reviewed qualifications as submitted by interested firms. The review panels comprised employees from Public Works (Capital Projects, Land Development, and Special Districts) along with representatives from the Building & Safety, Planning and Parks Departments. Although many of these services are highly technical in nature, it is likely that employees from other key "customer" departments also possess sufficient background/experience to participate meaningfully in the review process.

At present, 77 firms (out of nearly 250 which initially expressed interest) are on this list of pre-qualified consultants.

Support activities for major capital projects (defined in CPD Policy 2008-01 as projects valued above $250,000) are awarded through a formal RFP process specific to such projects.

As support is required for smaller, less-complex projects, specific proposals are requested from pre-qualified vendors. CPD Policy 2008-01 (On-Call Consultants Utilization Policy) guides staff on the manner in which to interact with pre-qualified consultants; steps correspond to cost thresholds for the specific project. For projects valued at $50,000 or less, a "Fee Request Letter" is sent to consultants based on a numerically ordered list. (The order in which consultants are placed on this list is determined by the last time they performed work for the City, with the firm most recently awarded work moving back to the bottom of the list.) For these smaller projects, the procedure specifies that "if consultant has already contracted with the City, we will not solicit the same consultant in order to provide others on the list an opportunity to propose."

Policy 2008-01 provides weighted criteria for consultant selection/ranking for specific projects which includes Project Understanding (20%), executable Deliverable Plan (30%), Resource Allocation reflecting the project team (30%) and Deliverable Schedule (20%).

The Division Manager reports that shortly after initiating the process called for in CPD Policy 2008-01, staff found that the "numerical order of awarding contracts to the next in line" was not working. When firms that were next on the list were contacted, they were often not ready to take on a project at that particular time due to existing workloads. Another obstacle to accepting work was reportedly the firms' reduction in workforce due to lagging economic conditions (although it

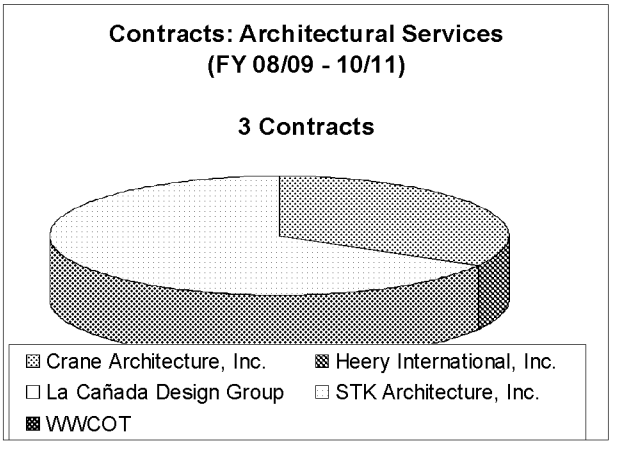
MV00250871

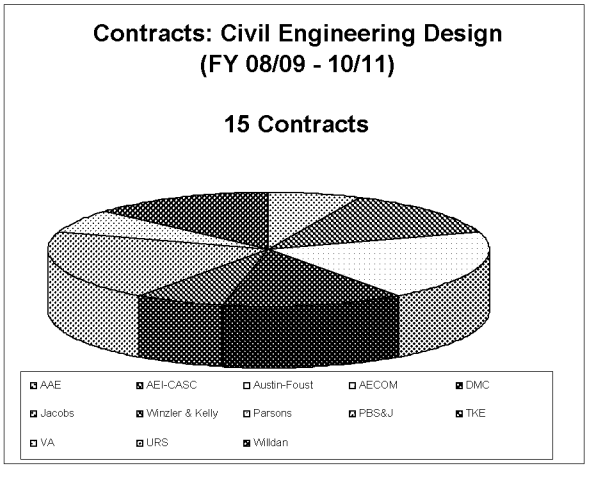
would seem that a firm would be able to quickly ramp up with specialized staff to accept new jobs to bolster profits). As a result, procedures being followed to award smaller consultant contracts are inconsistent with the requirements set forth in CPD 2008-01.

The Division Manager also reports that the rotational process prescribed by CPD 2008-01 has become less relevant since most of the capital projects undertaken are of higher value, thereby requiring acceptance of proposals from all On-Call Consultants within the applicable discipline(s).

For purposes of this study, data was gathered regarding the frequency of contract awards to pre-qualified consultants. For purposes of this analysis, four disciplines were selected because of the type or volume of activity among the 15 disciplines covered by these contracts. Please note that the data below pertains only to use of services by firms via the On-Call Consultant Listing; it does not reflect use of services secured by separate, project-specific RFPs.

Of the 5 contracts with On-Call architects, only 2 were used over a three-year period. STK Architecture received 2 assignments, and Crane received one. The remaining three firms performed no work under this contract. Despite the low volume of work in this category, the spread of work among pre-qualified consultants is less than would have been anticipated.

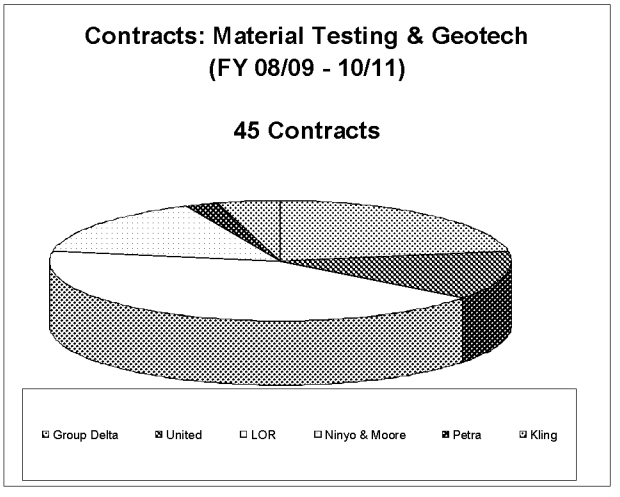


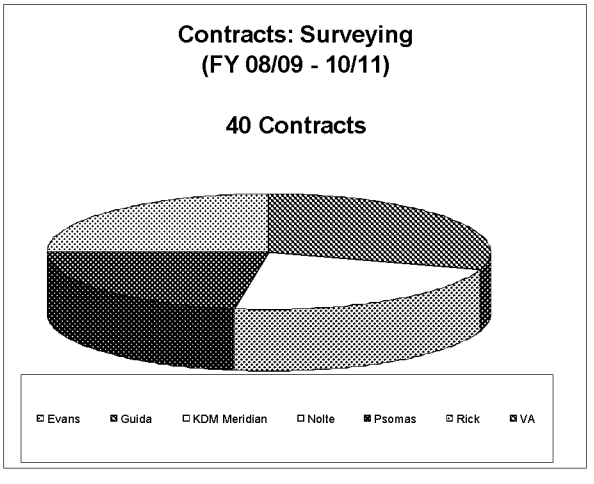


A total of 15 contracts were issued for Civil Engineering Design services, with work conducted by 8 of the pre-qualified firms. Two vendors (AECOM - - formerly Boyle Engineering and PBS&J - - since merged with Atkins North America) each received slightly more work with 3 assignments each. As illustrated in this chart, the number of assignments made among the panel is relatively well distributed.

MV00250872

The category of Material Testing and Geotechnical Services was the most highly utilized (by volume) among all disciplines included in the On-Call Consultant list. While all six of the listed firms were used over the past three years, assignments were the least balanced of all categories, with one firm (LOR) receiving 42% of the workload. At the other end of the spectrum, Petra Geotechnical and Kling Consultants (formerly Zeiser Kling) received 2% and 4% of assignments respectively. As discussed elsewhere in this report, the City's attempts to distribute work among contractors were sometimes hindered by various firms' inability to take on new projects. Over-reliance upon one provider (as seen in this category) is not in the City's long-term interest. Steps to ensure that all pre-qualified firms are able to undertake assignments would assist the City by enhancing assignment options and managing costs.





Surveying, for which 40 contracts were issued via the On-Call Consultants list, was performed by four of the seven qualified firms. Work was spread between four of those firms (Guida Surveying, KDM Meridian, Psomas and Rick Engineering).

Recommendation: When the existing list of pre-qualified contractors expires, the Capital Projects Division should solicit participation by key "customer" departments (such as Economic Development) which have staff members who possess sufficient background/experience to participate meaningfully in the review process. While enriching the review process, involvement of key stakeholders would also enhance the collaborative partnerships essential to the Public Works Department's overall success in collaborating with other City departments.

MV00250873

Recommendation: The Capital Projects Division should update CPD Policy 2008-01. As the rotational policy (intended to spread work more evenly among On-Call Consultants) became unworkable shortly after being initiated, the Capital Projects Division should, in concert with City Purchasing managers, create a new process which balances smaller assignments among pre-qualified firms and update CPD 2008-01 accordingly.

Recommendation: When issuing the next RFP for On-Call Consultants, the Capital Projects Division should require interested firms to demonstrate their ability to accept assignments from the City of Moreno Valley. Requiring documentation of the work volumes handled by each firm over the past 3-4 years would provide staff with a useful barometer of each firm's ability to handle varying workloads, and allow accurate evaluation of the firm's availability when considering placement on the On-Call Consultants List. By pre-qualifying firms which have the skills, experience and availability to take on assignments, the City can better ensure a broader distribution of work…which results in a broader experience base as well as competitive cost management.

Technology

The Capital Projects Division has not implemented any major technology projects in the recent past. Staff continues longstanding use of standard technologies such as Microsoft Project (for project management) and AutoCAD (for in-house design on small/simple projects).

The City's web page provides a wealth of information to local residents and businesses regarding City programs, services and issues. Near the bottom of the Capital Projects Division's page (http://www.moval.org/city_hall/departments/pub-works/capital-proj.shtml) sixteen photos can be found which feature before/after photos of several projects. At present, paving projects are featured, along with a few photos of sidewalk projects as well as Patriot Park. Providing photos of a greater number of significant projects is a great way to help communicate the City's ongoing commitment to quality of life improvements through capital investments. Enhancing display of and access to this information would build upon current processes to better update local residents.

Recommendation: The Capital Projects Division, in concert with the Information Technology staff, should expand the information currently available regarding major projects to increase the number of projects featured, broaden the types of projects featured and enhance the placement of this information via link from the City's Home Page (or, at a minimum, the Public Works Department's main page). A link from the City's main web page, such as the one which currently provides information on "New Development," would greatly speed residents' access to this important information which shows how their tax dollars are being directed to key projects.

MV00250874

Customer Feedback & Process Enhancement

The Capital Projects Division does not employ any processes to gather feedback regarding its delivery of finished products. The emphasis upon cost management has dissuaded staff from surveying customers. The Division Manager reports that it is common to receive positive verbal feedback from stakeholders once projects have been completed; these comments generally convey satisfaction over the finished product.

In advance of major projects, the Capital Projects Division may hold an Open House event (during the Environmental phase) to gather input on situations which can be mitigated in the project plan. While attendance has generally been characterized as minimal, and while the forums can provide helpful information to project planners, they do not assist with performance measurement or process improvement.

During construction phases, the Division generally uses the number of telephone calls received to gauge the effectiveness of steps to provide advance notice of impacts to residents/businesses as well as mitigation measures to provide access/egress to motorists. While a dramatic and/or prolonged spike in telephone calls would be reasonably interpreted as an indication of public irritation, the absence of such calls does not provide sufficient reassurance of public satisfaction.

While it is reasonable to expect generally positive feedback following completion of capital improvement projects, it must also be recognized that informally conveyed satisfaction (by residents, businesses and City officials) may reflect positive comparison of "before vs. after" conditions, as well as a sense of relief once construction activity ceases and public access/use is restored. These are certainly important sentiments, but they don't offer meaningful feedback regarding other elements including project design, timelines and budget management. *Without comprehensive feedback, the Department misses opportunities to undertake continuous process improvement aimed at building upon strengths and overcoming weaknesses in project delivery methods.*

Recommendation: The Capital Projects Division should institute a brief, qualitative survey process through which its customers can provide meaningful feedback regarding the Division's project delivery methods. The survey should be of sufficient scope to address all key phases of the project; the survey itself should be issued in more than one phase to obtain timely stakeholder feedback on elements to include pre-construction (e.g. public input and information dissemination), construction activities (to include steps taken to mitigate

MV00250875

inconvenience) as well as the finished product. While somewhat unconventional, a multi-stage evaluation will allow the City to gather meaningful feedback on a real-time basis, before general impressions of a finished product replace memories of resident/business experiences which could prove instructive to the Capital Projects staff. Undertaking a survey process also conveys the Division's commitment to better understanding and meeting the needs of project stakeholders.

General Management Practices

Adopted annually, the Capital Improvement Plan (CIP) guides the Capital Projects Division's efforts to fulfill the City's long-term planning objectives. By design, this document is ideally suited to direct resources toward achieving the City Council's priorities. By seeking approval of CIP amendments over the course of the year, the Public Works Department has the tools to ensure that staff activities correspond to Council direction. Aggregation of all project information also allows the City's executive managers and elected policymakers to set and monitor priority projects.

Historically, this document reflected a 10-year plan (shaped predominantly by funding availability), which logically would have constrained its strategic value to the City. In its current configuration, the CIP is more comprehensive (in scope and timing) and effectively categorizes projects with regard to the degree of funding currently available (and identifies funding sources, to include carryovers).

The Capital Improvement Plan budget is presented annually, in conjunction with the City Council's consideration of the annual operating budget. Somewhat distinct from the operating budget, however, the CIP budget is prepared by the Public Works Department based upon input from other City departments. The bifurcation of this process has evolved over many years, and is inconsistent with the City's centralized approach to fiscal planning. Re-establishing an interactive process through which Finance & Administrative Services collaborates with Public Works would better synchronize all aspects of the City's financial management activities.

A total of 5 Administrative and functional policies were provided for this review. They are currently in hard copy form, with plans underway to post them to the intranet for quick access by employees. Enacted between 2007-2010, they pertain to the following areas: Document Review Requirements, On-Call Consultants Utilization, Bid Opening & Analysis, Pavement Resurfacing Operations & Maintenance, and Archive Documents. The number and scope of Division administrative policies in place is less than expected; the majority of the documents spell out procedures rather than articulate policy provisions. While a lesser number of policies may reflect the extensive use of checklists within the

MV00250876

Division, they do not express organizational goals or assist decision makers in selecting among courses of action which best meet overarching organizational objectives.

A few comments regarding specific policies are offered for staff's consideration:

- Policies A-7 (Document Review), A-10 (Archive Documents), 2008-02 (Bid Opening) and 2008-03 (Pavement Resurfacing) do not articulate any policy rationale for procedures prescribed in each. As such the documents are procedural instructions. Most of the procedures are written in clear terms, with several instances (such as section B2 of Policy A-7) which may be confusing to staff.
- Policy 2008-02 (Bid Opening and Analysis), which pertains to an area where extreme vigilance is required to ensure compliance and legal sufficiency, includes no provision for coordination with the City Attorney in the event of other irregularities or situations where interpretative advice would be beneficial.

Recommendation: Development of the annual Capital Improvement Plan budget should be a more collaborative effort between the Public Works Department and the City's Finance & Administrative Services Department. A team approach can capture the synergy of project/fiscal expertise, provide additional analysis of capital projects funding, and ensure consistency with financial management policies established by the City Council.

Recommendation: The Capital Projects Division, with guidance from the Public Works Director, should undertake a systematic update of Administrative Policies. This effort (conducted over time) should focus on providing employees with documents which provide policy guidance to foster decision making which reflects organizational (City) objectives and values, rather than procedural checklists.

Accountability

The Capital Projects Division uses staff meetings to keep all members informed about current initiatives. Staff members also work together on consultant selection processes, visit each others' projects and cover one another's vacation absences. Administrative staff members are encouraged to visit major project sites, which enhances their understanding of their roles in the overall project delivery process.

Apparently absent from these discussions, however, is discussion of the Division's overall successes/challenges in delivering projects within fiscal and schedule contexts. While the Division Manager's observations (that project managers would find it inappropriate to comment on a colleague's success in

MV00250877

meeting objectives) are reasonable, this need not preclude meaningful discussion regarding the team's overall success.

Prior to this study being undertaken, the Capital Projects Division did not have or use data which illustrates the extent to which project managers deliver completed projects within budget and time parameters. Now that this information has been developed for projects completed over the past 3 years, the Division can maintain this information on a prospective basis…to measure Division and individual performance.

Recommendation: The Capital Projects Division should continue to track delivery of completed projects within budget and time parameters.

Recommendation: Capital Projects Division meetings should include sharing results of ongoing trend analysis of the team's successes in project delivery. This topic could be introduced through discussions of aggregate data and the trends revealed therein. Over time, addition of more specific project data would likely be welcomed and could facilitate even greater collaboration among team members focused on the Division's overall success in delivering top-quality projects, on-time and within budgets.

Recommendation: Performance evaluations of individual project managers should make specific reference to project delivery data (Budget/Time) as an element of each manager's overall performance.

Part II: Project Management

General Practices

Capital Projects staff participates in monthly and weekly meetings, led by the Deputy Director, to address project status. The monthly sessions deal primarily with project schedule issues, where participants discuss status, trends and share experiences. The Public Works Director indicates that he sometimes attends a small portion of these monthly sessions.

These 90-minute weekly meetings address more detailed aspects of projects, affording discussions of specific follow up actions which also indicate areas where the Deputy Director can play a role (such as in contact with counterparts at other agencies, such as EMWD). The meetings also allow tracking of forthcoming staff reports to appear on the City Council's agenda.

MV00250878

Weekly one-on-one meetings are also scheduled between the Public Works Director and the Deputy Director; these 20-minute sessions are designed to hit the highlights of Capital Projects Division issues. Formal sessions are augmented by real-time interaction between the Director and Deputy Director as needed.

The Capital Projects staff makes ample use of checklists to ensure that requisite steps are followed in various phases of managing capital projects. Because the checklists are primarily quantitative (to ensure that a step was completed) rather than qualitative, this process does not provide meaningful information with which to gauge factors such as completeness of the work performed. As such, the existing checklist process could not preclude the Division's recent experience with a roadway project (for example) in which the design engineer failed to provide for complete drainage. In this particular instance, it appears as though the error was also overlooked by numerous members of the project team, to include the firms hired for Constructability Review and Geotechnical Testing…as well as inspectors. This situation reveals the extent to which an over-reliance upon quantitative checklists does not preclude complications in project delivery. Since this particular situation, the Deputy Director has enhanced verbal coaching to project managers, emphasizing the need to "Trust but Verify" key work performed by contractors. Discussions at meetings have also touched upon the importance of assessing risks associated with various projects. No formal process changes, however, have been instituted at this point with regard to qualitative assessment.

Recommendation: While it may be unrealistic to expect the Public Works Director to attend each monthly project tracking meeting, he should take a more widely visible role in the process through which the Capital Projects team reviews project status. Although weekly 20-minute meetings with the Assistant Director, supplemented by as needed discussions, is helpful, it doesn't go far enough to convey (to the entire Capital Projects team) that the Department Director is thoroughly invested in their collective success.

Recommendation: Summary information from project tracking meetings would aid the Director in identifying potential problem areas in the earliest stages. The Deputy Director should assemble a very brief summary document which lists each project, along with its timeline, budget and ratio of hard/soft costs. Simple color coding on this summary document could be used to identify the status of each key component. Green, for example, could indicate that all aspects of the project are proceeding as planned, with yellow highlighting areas where variances are beginning to emerge or are anticipated. Red coding could show projects which projects are beyond budget, beyond time or where soft costs have exceeded acceptable ratios. This monthly report would flag areas for the Public Works Director and Assistant City Manager; access to more detailed documents or discussions with the Deputy Public Works Director could then be used to

MV00250879

provide valuable background and assist senior management in notifying Council members (as appropriate) and directing corrective actions.

Recommendation: The Capital Projects Division should amend its existing Checklist process to include qualitative review and risk assessments. Inclusion of specific analytical questions on that checklist can assist team members keep critical factors in mind as they simultaneously manage numerous projects in various phases of construction. Process amendments should include:

- Qualitative review to evaluate the effectiveness/thoroughness of key design/site preparation/construction steps as they are completed, rather than simply indicating that steps have been completed.
- Adding specific categories of risks to each project checklist would require Project Managers to identify specific risk factors applicable to the particular project. The Project Manager would then be required to assess the risk and document steps taken to ensure that appropriate steps have been taken in the design and construction phases to successfully mitigate the risks.

Performance Measurements

The Capital Projects Division manages and tracks its projects as distinct efforts; prior to this study, there existed no data regarding aggregate or long-term trends.

While weekly and monthly project management meetings foster cross-talk on common issues and lessons learned, there was no centralized means of tracking overall trends pertaining to timelines and costs for capital projects. While Division and Department management felt generally positive about project delivery results, there was no aggregate data with which to validate these impressions. To facilitate this study, Division Staff members were asked to compile statistics pertaining to all capital projects completed in the past three years. While this effort required extensive review of each individual project file, it was the only method of securing actual data from which trends could be identified.

The first step to compiling meaningful data was to distinguish between projects which delivered completed improvements, versus those which for which only design activities were undertaken. Of all projects undertaken by the Division since over the past three years, 71% (45 out of 63) resulted in delivery of completed improvements while 29% resulted in full or partial design.

It is not uncommon for a capital projects team to undertake design for projects which do not immediately proceed to construction. Some typical reasons for this situation include:

MV00250880

- Design (or at least preliminary design) is required to develop a cost estimate for a project which may ultimately be deemed cost prohibitive at the present time.
- Projects can be placed on hold to allow higher priority projects to move ahead.
- Projects can be placed on hold to allow phasing with other projects in the vicinity (which should be completed prior to construction of subsequent projects).
- Design is undertaken to support applications for grant funding (as seen in the federal government's recent emphasis upon directing stimulus funding to "shovel ready" projects.)
- A City Department (customer) may determine that a project is no longer needed or that a new location is required.
- Anticipated external funding becomes unavailable.

While there are clear benefits to ensuring that projects are poised for construction, it is important to ensure that excessive resources are not directed toward design efforts which do not result in construction. Ongoing coordination between City Department Heads (with direction from the City Manager's Office) will assist the Capital Projects Division in directing resources toward high priority projects while maintaining the Division's ability to remain sufficiently nimble to change direction as required.

To assemble trend data regarding the Capital Projects Division's delivery of public improvements, staff provided a list of all projects completed over the past three years along with essential data specifying estimated/actual costs, estimated/actual timelines and hard/soft cost details. The following information was analyzed:

- Comparison of projected cost (*as presented to the Council for initial project approval*) with actual cost.
- Comparison of the project schedule (*as forecasted when the project was presented to the Council for project approval*) with the actual time required to complete the project.
- The ratio of project support costs (soft costs) to construction costs (hard costs). For purposes of this analysis, Right-of-Way acquisition was not considered as such costs vary widely, and are beyond the control of project managers.
- The extent to which significant Scope Change occurred over the course of the project.

On an unweighted average basis, the following trends were identified:

- Projects were completed within 94.4% of estimated budget;
- Projects were completed in 142% of projected timelines;
- Soft Costs (without Right of Way) averaged 61.5%

MV00250881

Obtaining a more meaningful data set, however, required a project-by-project analysis to identify the number of times projects came in under or over budget/time, the extent to which soft costs were under/over a particular threshold, and how often project scopes changed in a significant manner. The results of that analysis, along with an explanation of the associated methodology (where applicable), are presented below.

Project Budgets

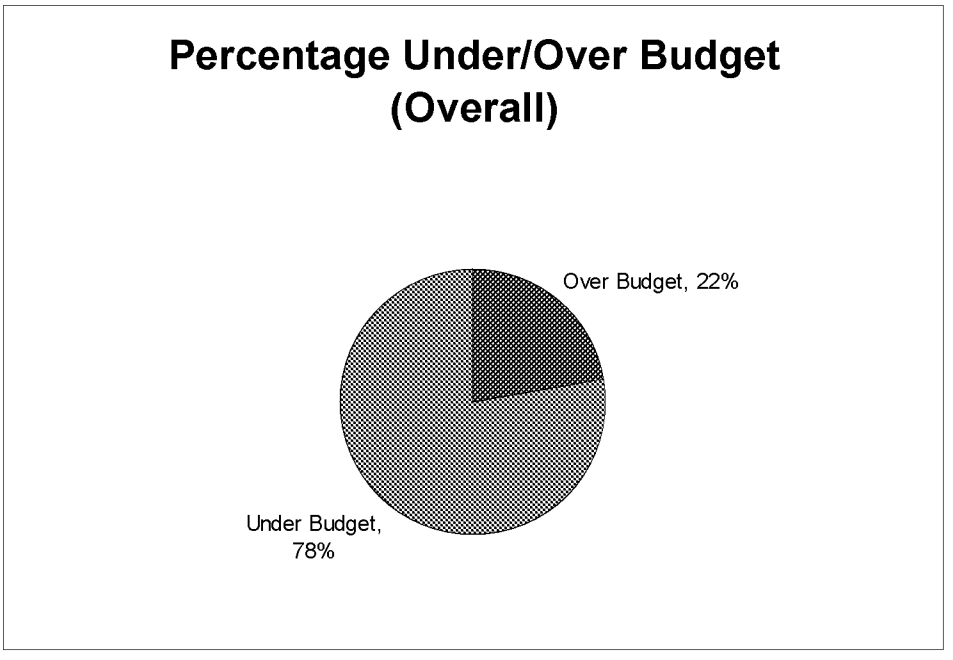
Completion of capital projects within estimated cost parameters is a critical measure of a public agency's effective stewardship of public resources.

Methodology: Information regarding budget performance of each project was reviewed in both "bottom line" and component fashions. The latter provided a more detailed view of the factors which affected budget performance. The following project elements affected fiscal performance:

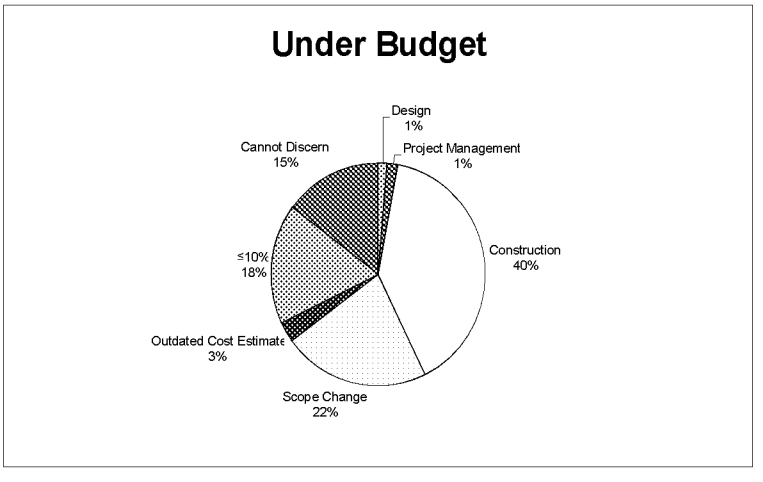
- Design
- Project management
- Construction
- Scope Change
- Unforeseen conditions
- Timeframe of cost estimates
- Minimal variation between projected/final cost (10% was the benchmark used for this study
- Instances where cost variations could not be discerned from available information

Determining how various project elements affected the ultimate cost required review/analysis of project spreadsheets developed by City staff. In situations where multiple factors affected project outcomes, this analysis apportioned each factor equally. While it may be asserted that a weighted analysis could enhance precision of a project-by-project analysis, emphasizing consistency of this approach yields a meaningful composite view.

MV00250882

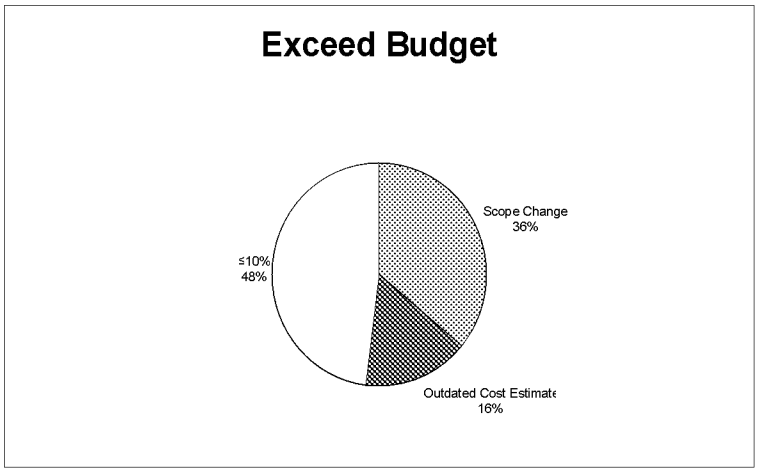


FINDINGS: The overwhelming majority of completed projects were delivered under budget, with only 22% exceeding the cost estimate provided to the City Council when projects were initially presented for approval. It is also noteworthy that some of these projects were based upon estimates developed far in advance (sometimes several years) of actual construction.



Where projects were delivered in the most cost-effective manner, savings in construction costs had the most significant influence. This factor also reflects the highly competitive bidding climate seen over the past several years. It also logically reflects the effectiveness of project managers' diligence in closely managing costs and keeping a watchful eye on change orders. Scope changes also affected financial outcomes, which could be where projects were reduced/phased so that only a portion of the initial project was constructed.

MV00250883



When completed projects exceeded initial cost estimates, the highest number of instances showed a cost variation or 10% or less. As seen in situations where costs came in below estimates, changes in scope also affected the extent to which projects exceeded initial cost estimates. Issues pertaining to scope changes are discussed subsequently in this report.

Project Timelines

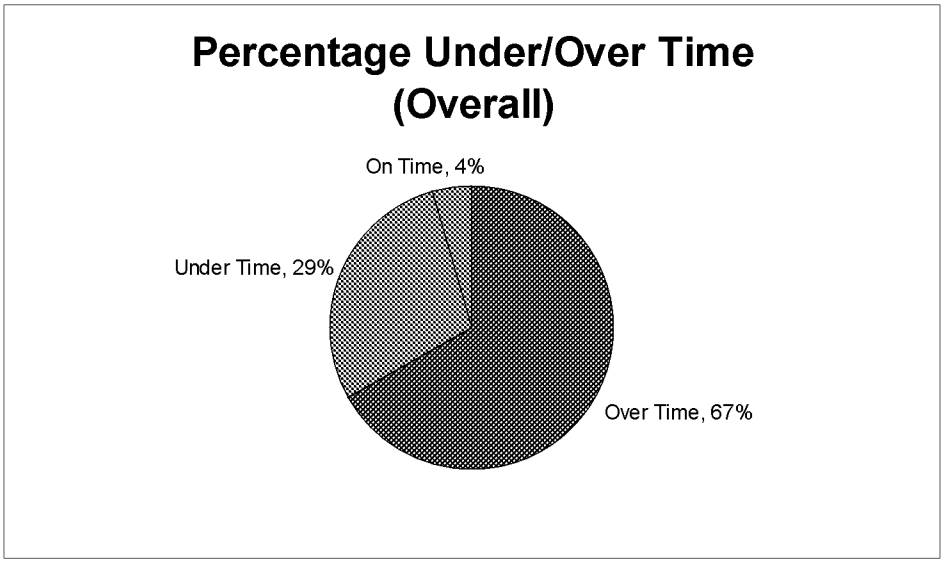
As with delivering improvements within projected funding, completion of projects within schedule forecasts is another essential measure of success.

Methodology: Information regarding timeliness of each project was reviewed in both "bottom line" and component fashions. The latter provided a more detailed view of the factors which affected completion schedules. The following project elements affected performance:

- Design
- Bidding delays
- Construction
- Environmental, Right of Way acquisition and Eminent Domain processes
- Utility work
- Scope change
- Staff support activities
- Weather
- Caltrans coordination and processes
- Minimal variation between projected/final schedule (10% was the benchmark used for this study

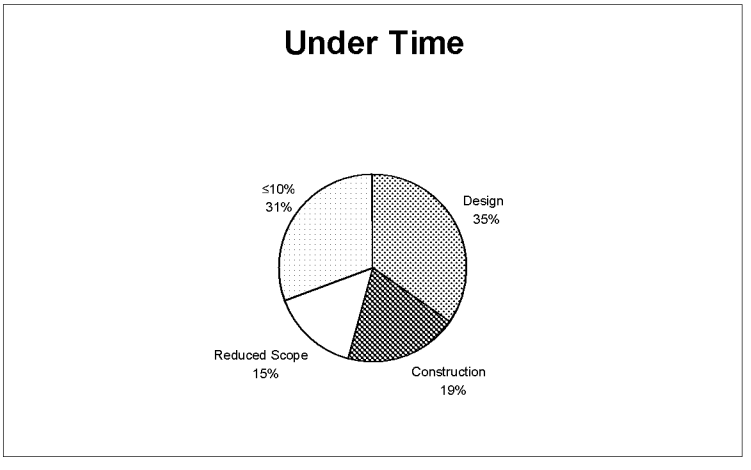
Determining how various project elements affected the ultimate schedule required review/analysis of project spreadsheets developed by City staff. In situations where multiple factors affected project outcomes, this analysis apportioned each factor equally. While it may be asserted that a weighted analysis could enhance precision of a project-by-project analysis, emphasizing consistency of this approach yields a meaningful composite view.

MV00250884

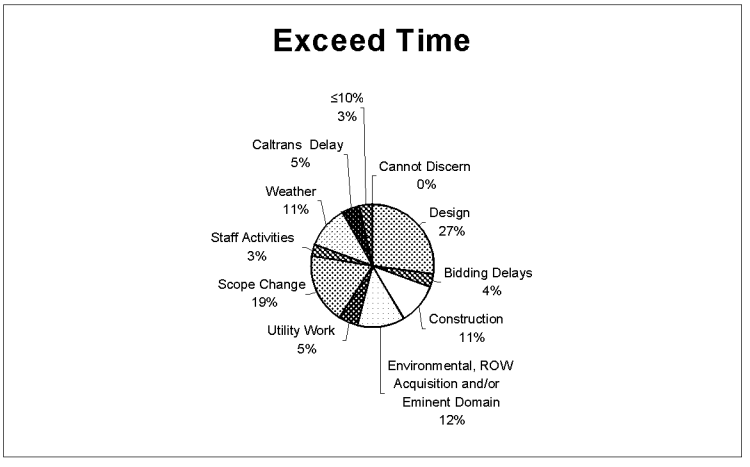


FINDINGS: The majority of projects were not completed within the time frame estimated at the time of approval. Thirty-three percent or projects were completed on-time or ahead of schedule.

Where projects were delivered in the most timely manner, the amount of time spent on design had the most significant influence. The second most prominent grouping indicated instances where time savings was 10% or less. Reduced construction periods also affected overall timeliness outcomes.



MV00250885



When project completion was found to exceed initial schedules, delays in the design phase were most often noted. Scope changes (which are addressed subsequently) were the second most influential factor, followed by time required for environmental processes, Right of Way and property acquisition.

Soft Costs

In the general vernacular of capital projects construction, the term "Soft Costs" refers to costs associated with a range of activities to include: design, construction management, survey, soils/geotechnical testing, inspection, project administration and environmental. Success in managing these costs, as a percentage of construction outlays, is another relevant measure of project management activities.

Methodology: Because projects differ in scope and complexity, *there is no simple or standard formula through which to measure all capital improvement initiatives.* Additionally, the extent to which project-related activities are charged to public infrastructure projects in some jurisdictions may differ due to policy direction regarding the level of cost recovery vs. agency participation to stimulate development. Ranges of these costs can be affected by factors such as:

- Simplicity/Complexity of design, particularly in relation to the cost of actual construction
- Project scope (larger projects typically involve a lower percentage of soft costs, while support costs for smaller projects may sometimes represent a higher percentage of construction costs).
- Participation by federal and/or state agencies
- Environmental issues
- Required qualifications of project staff (e.g. inspectors vs. licensed engineers)

MV00250886

Recognizing those factors, several general parameters represent reasonable cost ranges for key activities. Design can typically be completed within 6-15% of construction costs. Similarly, construction management costs often range between 5-15% of construction costs.

As indicated above, Right-of-Way acquisition costs can vary widely among projects; project managers are largely unable to control these costs beyond any design options which may be available. Consequently, Right-of-Way acquisition costs have *not* been included as "soft costs" for purposes of this study.

The California Department of Transportation publishes quarterly reports titled "Caltrans Performance Measures." A review of the December 2010 report reflects the Department's goal of keeping support costs at 32% or less of construction costs. Direct communication with Caltrans officials, as part of this study, confirmed that acquisition costs are *not* counted as support costs.

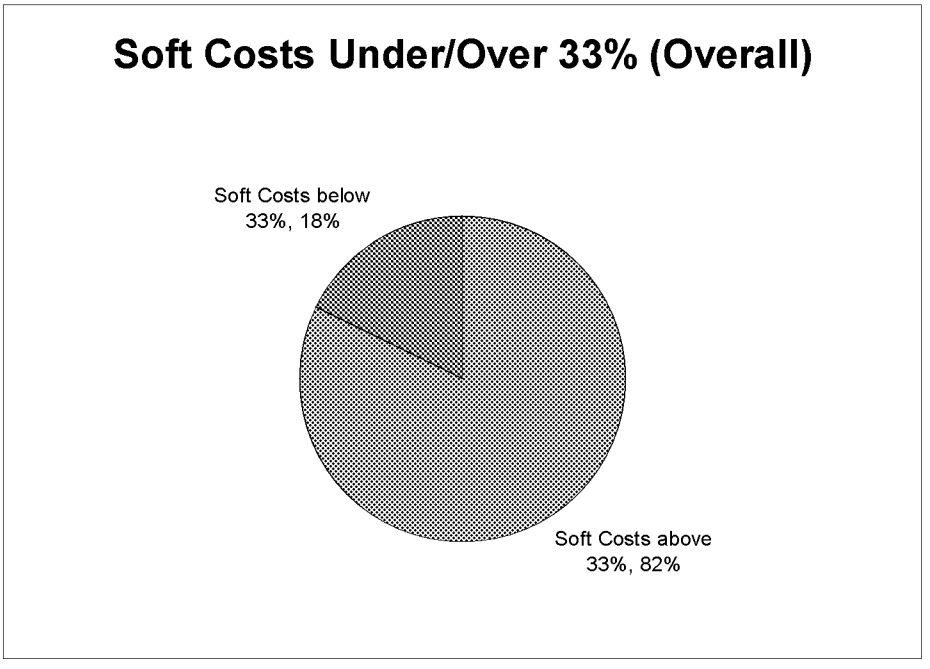
Because of the project-specific variables inherent in establishing soft costs for public projects, it is not entirely realistic to prescribe a threshold under which costs should always be maintained. Nor would it be appropriate to abandon efforts to gauge and enhance the City's effectiveness in containing these costs.

For purposes of this study, a threshold for soft/hard cost ratios has been set at 33%. What this indicates is that situations where soft costs exceed 33% merit careful examination by the Public Works Director to ensure that costs are fully justified on a specific project or to indicate where management reforms must be immediately implemented to limit costs.

Information regarding soft costs incurred in each completed project was reviewed in both "bottom line" and component fashions. The latter provided a more detailed view of the factors which affected cost ratios:

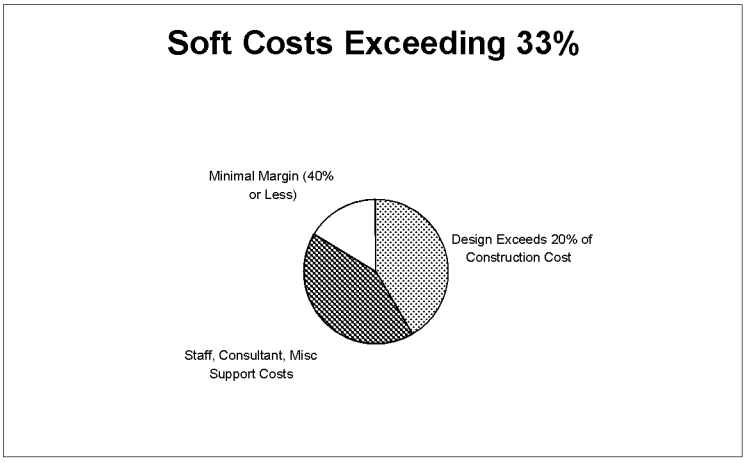
- Design costs exceeded 20% of construction costs
- Higher ratios of staff/consultant/miscellaneous support costs
- Minimal variation above the 33% threshold

MV00250887



FINDINGS: Soft costs exceeded 33% for the overwhelming majority (82%) of completed projects. Despite the absence of specific standardized measurements of hard/soft cost ratios, the prevalence of Moreno Valley's projects with support costs exceeding one-third of construction costs is noteworthy.

A closer review of this situation reveals higher-than-average costs for design and staff/consultant support in over 83% of the instances where soft costs exceed the threshold established for this study.



Scope Changes

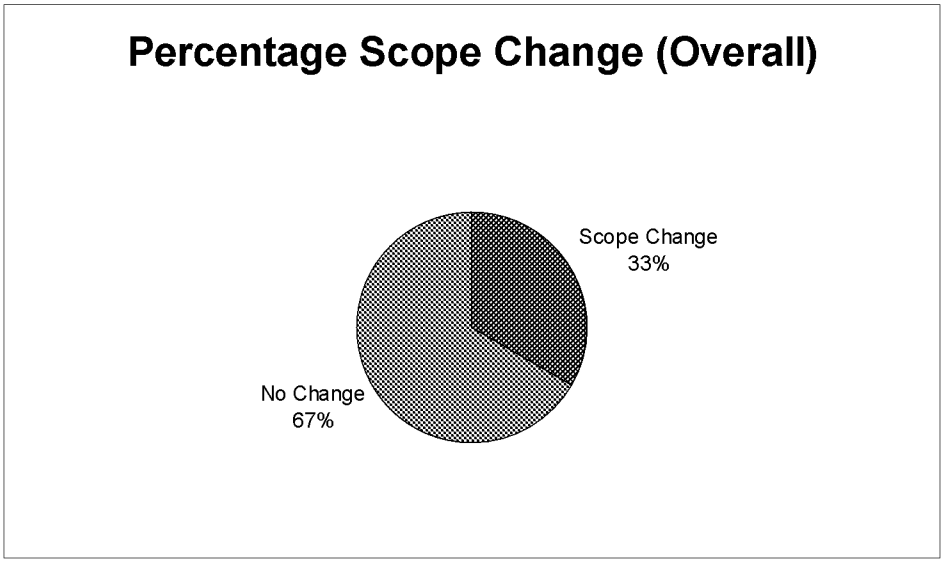
Major capital improvement projects, particularly those which are planned/designed/constructed over multi-year periods, can see significant changes from inception to completion. These revisions can reduce/increase

MV00250888

project costs, shorten/lengthen schedules, simplify/complicate project management or have minimal effect upon performance indicators.

Scope changes, often beyond the control of project managers, are commonly made to:

- Reflect priorities of elected policymakers
- Capture efficiencies and economies of scale
- Correspond with funding availability
- Adapt to unforeseen conditions
- Meet customer requests



FINDINGS: The majority of projects completed over the past three years saw no significant changes in scope. While previous sections of this report reflect the extent to which project amendments have affected budget/time performance, it is also noteworthy that the City is largely successful in limiting significant changes to the scope of capital projects.

Ongoing Projects

In addition to analyzing data regarding completed projects, this report also encompassed a review of pending projects which are currently behind schedule.

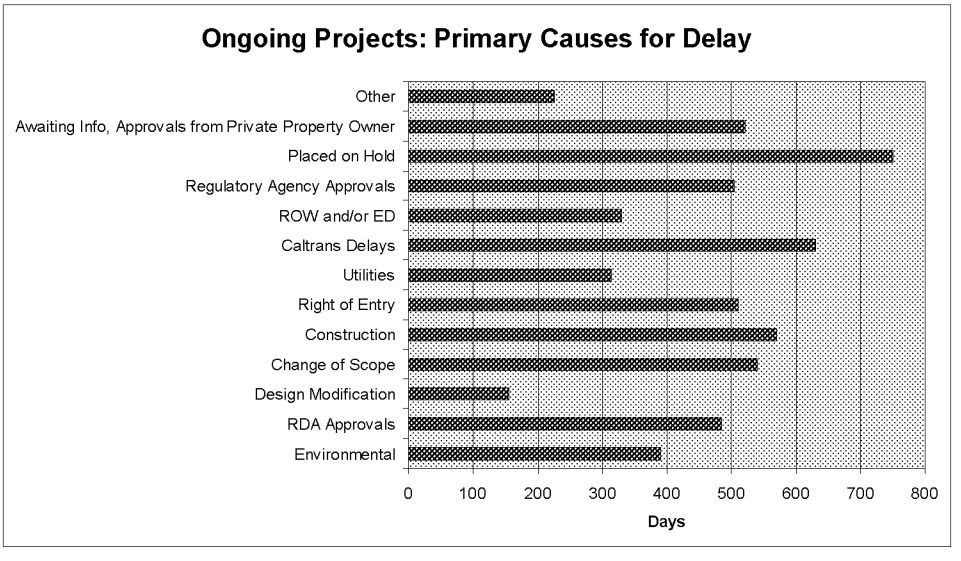
Methodology: Capital Projects Division staff members have identified 11 such projects, and provided information regarding delays to various phases of those

MV00250889

projects. A review of these narrative reports revealed a series of causative factors:

- Environmental processes
- Design modification
- Scope change
- Construction (to include weather delays)
- RDA coordination/approval
- Right of Entry
- Caltrans processes
- Right-of-Way/Eminent Domain
- Regulatory agency approvals
- Projects placed on hold
- Approvals/modifications from private property owners
- Other

Determining how various project elements are delaying the projects identified required review/analysis of project narratives developed by City staff. In situations where multiple factors affected project outcomes, this analysis apportioned each factor equally. While it may be asserted that a weighted analysis could enhance precision of a project-by-project analysis, emphasizing consistency of this approach yields a meaningful composite view.



FINDINGS: The average delay for these projects is 514 days, with the longest delay at 861 days. Rationale for these schedule deviations runs the gamut, with the following causing the highest number of days in delay: Projects placed on hold (at one or more points), and delays associated with Caltrans coordination/approval.

MV00250890

Conflicting perspectives (between Capital Projects Division staff and the Economic Development Department) regarding project delays became evident during the conduct of this study. Absent a forensic review and reconstruction of all project documents and correspondence, it is not possible to definitively determine the accuracy of varying perspectives. This noteworthy controversy does, however, suggest the strong need to ensure clear and accessible documentation regarding major issues of coordination between the Departments.

In advance of this study, the Economic Development Department prepared a list showing the status of six delayed capital improvement projects in which the Department is a stakeholder. In assembling a list of all delayed projects, the Capital Projects Division generally concurred with the lengths of delay reported by EDD (no shorter delays were reported by Capital Projects) and expanded the list to show 11 projects. What is noteworthy, however, is that the status of delayed projects had not previously been assembled in a consolidated fashion for reporting to the City Manager/Assistant City Manager.

Recommendation: As timeliness of the Design phase of each project has had the most significant effect on projects which were completed ahead or behind schedule, Division management must focus significant attention on this aspect of project delivery:

- Adherence to schedule should be charted/reviewed in detail at each project management meeting.
- Adherence to schedule should be emphasized in training provided to project managers.
- Specific adherence to schedule (as well as budget) should be considered when evaluating performance of individual project managers.
- Overall adherence to schedule (as well as budget) should be considered when evaluating performance of Public Works managers.

Recommendation: As timeliness of the Design phase of each project has had the most significant effect on projects which were completed ahead of schedule, as well as behind schedule, the Capital Projects Division should consider inserting performance clauses in all Design contracts, to serve as a disincentive for untimely completion by design contractors.

Recommendation: With solid historical information now available regarding delivery of capital projects over the past three years, the Capital Projects Division should continue to update this centralized data as each new project is undertaken. Capturing project data is significantly easier on a real-time basis, and will allow the Department and the City Manager's Office to continually track overall trends pertaining to capital project costs and schedules.

Recommendation: Brief, clear and accessible documentation should be created regarding major issues of coordination between the Departments of

MV00250891

Public Works and Economic Development. Meeting minutes, much like those typically prepared during meetings of construction teams, may add clarity to the exchanges between departmental staff and agreement upon direction and associated impacts upon capital improvement projects.

Communication/Reporting

At present, narratives are routinely submitted to highlight milestone progress of major capital projects for the City Manager's regular reports to the Council. Staff indicates that these progress reports are characteristically positive in nature, and are intended for public dissemination to keep residents apprised of major initiatives. Similarly, the Capital Projects Division provides localized, brief updates to City Council members in advance of community meetings.

Project Status Reports show progress and projections relating to key milestones (e.g. hearings, environmental, contract awards, design, construction, occupancy). While these reports may provide meaningful snapshots, they do not clearly articulate issues affecting project completion. Absent such information, City management's tracking of project status would rely upon specific inquiries…or time consuming, comparative analysis of successive reports. Current report processes do not quickly "flag" projects/issues to alert executives to emerging situations; absent this type of proactive process, managers and elected officials may instead learn about specific situations from sources outside the City.

On an informal basis, issues are raised to the attention of the Public Works Director who shares information to apprise executives/electeds or to assist them in responding to external inquiries.

Current narrative reports drafted for submission to the City Manager focus exclusively on the public benefit of projects and positive progress being made; alerts are not provided regarding project delays. Without such information, and subsequent updates, the City's executive team does not have ready access to status information of interest to the City Council. Further, the lack of this information holds the potential to erode the reputation of the Public Works staff as the absence of factual data may leave only questions and perceptions regarding the Capital Projects Division's effectiveness. This situation would be a great disservice to the City as well as the professionals associated with the Capital Projects Division. The good news is that regular reporting can ameliorate this situation.

Recommendation: The Public Works Department should create a simple, high-level report to regularly apprise the City Manager/Assistant City Manager regarding the status of key capital projects. Techniques as simple as color coding would alert Public Works and City executives to issues affecting delivery

MV00250892

of specific projects. This "early warning" system would ensure that information shared during Capital Projects Division meetings is summarized and shared in a meaningful form with decision makers. This brief status report should be formatted to capture key progress indicators (such as time and budget), and alert City executives to significant issues affecting project delivery. This report should also serve as the basis for subsequent (more detailed) information flow regarding significant issues/obstacles and the steps being undertaken to meet such challenges.

Good afternoon Dr. White. The City Council unanimously approved the resolution establishing the Mayor's Ad Hoc Committee on Increasing Graduation Rates and we are so excited about moving forward. Cindy Miller will be contacting your office to schedule a meeting with you, the Mayor, Michele Patterson and I to get started. Thank you so much for agreeing to Chair this effort, we are going to make a difference! We have already had some calls from people interested in applying to serve on the Committee. The attached resolution enumerates the procedures for selecting the Committee members; they are selected by the Mayor and the Chair and there are to be at least 5 but can be more at your discretion. If you have people in mind already they can get an application from the City Clerk's Office (413.3001) or you can provide them with the attached.

Looking forward to seeing you soon,
--Michelle Dawson

I think that you have captured this very well. Thank you. Kenn Young can provide the graduation rates for those students who have participated in AVID. I believe it is over 97% . Just for the record.

Good morning Dr. White. I met with Mayor Owings today to discuss the Mayor's Committee on increasing graduation rates and he is very excited to get this moving forward. We have the formation of this committee on the agenda for our 2/26 Council meeting. For your information I have attached our draft staff report, resolution, and committee application and cover sheet As you will see, the Mayor wants to provide you as Chair with as much flexibility and discretion as possible. Please review the attached and provide me with any comments, requested revisions, etc. I need to make any revisions to the items no later than Tuesday evening due to our agenda posting process.

Dear Mrs. Dawson,
Thank you for meeting with me on yesterday. Below is a list of additional partnership opportunities that we could develop.

1. Implementation of Student internships in business, health, city and social service careers 2. Development of high school logistics training academy 3. Development of a robust volunteer program that targets retired military, retired teachers,parents and grandparents 4. Participation in a Moreno Valley Reads 3rd grade reading recognition ceremony at the mall on Saturday, June 1 2013 5. Maximize the potential of joint use of facilities

We must develop measurable targets around these beginning steps.

THE CITY OF MORENO VALLEY
MAYOR'S AD HOC COMMITTEE ON INCREASING GRADUATION RATES

"Positive, Purposeful Work Toward Something Greater Than Ourselves"
--Mayor Tom Owings

About the Mayor's Ad Hoc Committee on Increasing Graduation Rates
The goal of the Mayor's Ad Hoc Committee on Increasing Graduation Rates is to increase graduation rates through the implementation of a focused partnership among the City of Moreno Valley, the Moreno Valley Unified School District and the business community.

The Mayor's Ad Hoc Committee on Increasing Graduation Rates is an Ad Hoc Committee established by the City of Moreno Valley to identify talented, purposeful and generous community members with a desire to make a positive impact on our youth. Established by resolution as a Four-Year Ad Hoc Committee, the committee members are tasked with mentoring students and providing them with meaningful work and life skills that will translate to higher graduation rates. The Ad Hoc Committee will terminate on June, 30, 2017 and may be extended by the City Council following a review of the Committee's achievements. Ad Hoc Committees are temporary committees established by the City Council to achieve a purported goal. Should the Mayor and City Council choose to extend the term of the Committee after June 30, 2017 it may consider establishing a standing commission or board through adoption of an ordinance.

Committee Membership
The Chairperson of the Committee shall be selected by the Mayor. Committee members are nominated by the Mayor or the Committee Chair. Membership will consist of at least 5 members including the Committee Chair appointed by the Mayor and a Vice Chair selected by the Chair. At the discretion of the Chair, one or members may be a youth representative also selected by the Mayor or the Committee Chair. Terms shall expire when the Ad Hoc Committee expires on June 30, 2017. Should the Mayor and City Council extend the Committee as a standing commission or board, the terms of the Committee Members shall be defined within an ordinance establishing the board or commission.

Meetings
The meeting locations and times shall be established by the Committee Chair.

City Staff Liaison for the Mayor's Ad Hoc Committee on Increasing Graduation Rates:
Michele Patterson, Assistant to the City Manager
(951) 413-3030
michelep@moval.org

City of Moreno Valley

MAYOR'S AD HOC COMMITTEE ON INCREASING GRADUATION RATES
Membership Application Form

For City Clerk's Use
Stamp Date and Time Received

The goal of the Mayor's Ad Hoc Committee on Increasing Graduation Rates is to increase graduation rates through the implementation of a focused partnership among the City of Moreno Valley, the Moreno Valley Unified School District and the business community. The Mayor's Ad Hoc Committee on Increasing Graduation Rates is an Ad Hoc Committee established by the City of Moreno Valley to identify talented, purposeful and generous community members with a desire to make a positive impact on our youth. Established by resolution as a Four-Year Ad Hoc Committee, the committee members are tasked with mentoring students and providing them with meaningful work and life skills that will translate to higher graduation rates.
Meeting Schedule: To Be Determined.

RESOLUTION NO. 2013-

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, ESTABLISHING A MAYOR'S AD HOC COMMITTEE ON INCREASING GRADUATION RATES

WHEREAS, earning a diploma is evidence of dedication, hard work and commitment; and

WHEREAS, high school graduates have an advantage in the job market and typically earn more money than students who did not complete their high school education; and

WHEREAS, the leadership at Moreno Valley Unified School District ("District") is dedicated to providing quality education to Moreno Valley's youth, making "Excellence on Purpose" a way of life; and

WHEREAS, schools are just one part of a larger social system that includes families and communities, which are equally responsible for the development of youth; and

WHEREAS, at their February 2, 2013 Workshop, the Mayor and City Council agreed that achieving a more respectable graduation rate and supporting a Mayor's Ad Hoc Committee on Increasing Graduation Rates are top priorities for the City; and

WHEREAS, the goal of a Mayor's Ad Hoc Committee on Increasing Graduation Rates is to increase graduation rates through the implementation of a focused partnership among the City of Moreno Valley, the Moreno Valley Unified School District and the business community; and

WHEREAS, objectives to be achieved in the attainment of that goal include 1) creating a strong, healthy and supportive community that addresses the preparation of youth for college and/or career success and 2) responding responsibly to the business community's request for a highly qualified workforce; and

WHEREAS, Section 9.0 of the City's Rules of Procedure for Council Meetings and Related Functions and Activities, as established in City of Moreno Valley Resolution No. 2011-117, states that the City Council may, by motion or resolution, appoint ad hoc committees for particular temporary purposes;

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

1. There is created a Mayor's Ad Hoc Committee on Increasing Graduation

MV00250899

Rates.

2. The Ad Hoc Committee shall consist of at least 5 members including a Committee Chair who shall be appointed by the Mayor. Additional members may be added at the discretion of the Chair. The remaining members shall be appointed by the Mayor and Chair after reviewing applications submitted to the City Clerk's office in accordance with the standards established by other City Commissions and Boards. The Chair shall select a Vice Chair from among the appointed committee members.

3. One or more members may be a youth representative, at the discretion of the Chair.

4. The Mayor's Ad Hoc Committee on Increasing Graduation Rates shall be an Ad Hoc Committee formed for the particular purpose of focusing City, School District and business community effort and resources on programs and/or services to increase the graduation rate at Moreno Valley high schools.

5. Ad Hoc Committees are temporary and, as such, by adopting this resolution the City Council agrees that this will be a temporary committee which will expire on June 30, 2017.

6. Terms for committee members will also expire on that date. Any vacancies created on the committee prior to June 30, 2017 will be filled through the appointment of the Mayor and Chair after reviewing applications submitted to the City Clerk's office in accordance with the standards established by other City Commissions and Boards.

7. Should the Mayor and City Council choose to extend the life of the Committee after June 30, 2017, it may consider establishing a standing commission or board through adoption of an ordinance.

8. Should the Mayor and City Council extend the Committee as a standing commission or board, the terms of the Committee Members shall be defined within an ordinance establishing the board or commission.

9. Residency in the City of Moreno Valley shall not be a requirement for Committee membership.

10. Members of other City of Moreno Valley boards or commissions will be considered for Committee membership.

11. Unless otherwise stated in this resolution, all relevant sections of Municipal Code 2.06 shall apply to this Committee.

12. The Mayor's Ad Hoc Committee on Increasing Graduation Rates shall have the following power and duties:

a. Develop and implement programs and/or services that will further the goal of increasing graduation rates in Moreno Valley.

b. Recruit students, businesses, and volunteers from the community to assist in this effort.

c. Solicit funds from private contributions, grants, sponsorships or participate in other fundraising opportunities.

d. Submit periodic status reports to the Mayor and City Council.

13. The Ad Hoc Committee may establish such temporary subcommittees as it may deem expedient for the performance of its duties, and the chairperson, with the consent of the committee, may fix and appoint the membership of such subcommittees. Membership on a subcommittee need not be limited to members of the committee except that the chairperson of the subcommittee shall be a member of the Ad Hoc Committee.

14. The City Manager may appoint a secretary and/or other staff for the Ad Hoc Committee and provide such reimbursement for their necessary expenses as may be authorized by the City Council in the budget and approved in advance by the City Manager.

15. The Ad Hoc Committee shall hold one or more regular meetings per month and designate the times, dates, and places therefor. All meetings of the Ad Hoc Committee and any subcommittees shall be open to the public.

16. Special meetings may be called by the Chairperson or by a majority of the Ad Hoc Committee provided that notice of such special meetings is given to each member of the Committee at least 72 hours prior to the time of the meeting.

17. Three or more members of the committee shall constitute a quorum for the conduct of business.

18. The Ad Hoc Committee shall be governed by the Brown Act and follow the Rules of Procedure for Council Meetings and Related Functions and Activities as enacted by City Resolution 2013-10, and as amended by future City Resolutions.

19. The Ad Hoc Committee shall adopt rules for the transaction of business and shall keep a public record of its action. Promptly after approval thereof by the committee, the original minutes of the committee meetings shall be filed with the City Clerk.

20. If a member of the Ad Hoc Committee is absent without cause from three successive regular meetings of the committee or from twenty-five percent (25%) of the duly scheduled meetings of the committee within any fiscal year, the committee may request the mayor and Chairperson declare a position vacant. An absence may be excused if it is due to illness or is unavoidable and the member gives notice to assigned City staff as to the reason.

APPROVED AND ADOPTED this 26th day of February, 2013.

Lora Hines' blog reported that a resident was questioning the motive of the Committee as the City trying to horn in on MVUSD grants (not one in grant in particular I don't believe, but I'll forward the link to the post). I assume that for some reason one resident apparently e-mailed or called her and Hines seems to think that's a "story."

Thank you. I know this will yield significant results. Are you aware of the concerns being posed by the community group. They are making reference to a grant. Do you know anything about it?

Good afternoon Dr. White. The City Council unanimously approved the resolution establishing the Mayor's Ad Hoc Committee on Increasing Graduation Rates and we are so excited about moving forward. Cindy Miller will be contacting your office to schedule a meeting with you, the Mayor, Michele Patterson and I to get started. Thank you so much for agreeing to Chair this effort, we are going to make a difference! We have already had some calls from people interested in applying to serve on the Committee. The attached resolution enumerates the procedures for selecting the Committee members; they are selected by the Mayor and the Chair and there are to be at least 5 but can be more at your discretion. If you have people in mind already they can get an application from the City Clerk's Office (413.3001) or you can provide them with the attached.

Looking forward to seeing you soon,

Good morning Dr. White. I met with Mayor Owings today to discuss the Mayor's Committee on increasing graduation rates and he is very excited to get this moving forward. We have the formation of this committee on the agenda for our 2/26 Council meeting. For your information I have attached our draft staff report, resolution, and committee application and cover sheet As you will see, the Mayor wants to provide you as Chair with as much flexibility and discretion as possible. Please review the attached and provide me with any comments, requested revisions, etc. I need to make any revisions to the items no later than Tuesday evening due to our agenda posting process.

Dear Mrs. Dawson,
Thank you for meeting with me on yesterday. Below is a list of additional partnership opportunities that we could develop.

1. Implementation of Student internships in business, health, city and social service careers
2. Development of high school logistics training academy 3. Development of a robust volunteer

program that targets retired military, retired teachers,parents and grandparents 4. Participation in a Moreno Valley Reads 3rd grade reading recognition ceremony at the mall on Saturday, June 1 2013 5. Maximize the potential of joint use of facilities

We must develop measurable targets around these beginning steps.

Valerie Maxwell requested to speak with you. She stated she recently met you at an event and discussed general real estate issues with you.

Ms. Maxwell is a real estate agent who is representing Emagine U at Play Child Care Center, located at 14420 Elsworth St., Suite 103 (Council District 5). Ms. Maxwell stated Emagine is having problems securing the Certificate of Occupancy for its expansion into Suite 106, where a travel agency was originally located. She stated each time her client contacts B&S, there is something new added – licensed architect site plan (the site plan for the facility has not changed), fire inspection requirements…. Ms. Maxwell stated her client is currently paying rent on an unused space and cannot go forward to secure a State license until the process has been completed with the city.

Thanks,

Cindy

To: Michelle Dawson
Subject: FW: Moreno Valley Beat & Zone Maps

Michelle,

The first map contains all our areas of responsibility. Anything marked "MM" is considered Moreno March and is JPA area. Anything marked "MC" is considered Moreno County and is unincorporated area we are responsible for. Again, we separate out time and mileage for billing purposes between MV (Moreno Valley), MC (Moreno County), and MM (Moreno March).

This is the most accurate picture of what you are looking for.

Hi,
Attached is an electronic copy of the ENCO agreement. The Rate Stabilization Fund discussion begins on page 5. If you have any questions, please let me know.

Jeannette

PROFESSIONAL SERVICES

AGREEMENT

BY AND BETWEEN

THE CITY OF MORENO VALLEY

AND

ENCO UTILITY SERVICES MORENO VALLEY, LLC

October 15, 2003

PROFESSIONAL SERVICES AGREEMENT

This Professional Services Agreement ("Agreement") is entered into, as of Oct. 7, 2003 ("Effective Date"), by and between the City of Moreno Valley, a California municipal corporation (the "City") and ENCO Utility Services Moreno Valley, LLC, a Delaware limited liability company authorized to do business in California ("ENCO"). The City and ENCO are sometimes collectively referred to as the "Parties" and individually referred to as "Party."

RECITALS

A. The City is authorized under California law to provide retail electric service to Customers in the City of Moreno Valley, California.

B. The City intends to own electric transmission, distribution and related facilities which will constitute and support an electric distribution system. This system provides the City with the means to provide the Electric Services.

C. ENCO was formed to, among other things, provide certain services to owners of electric distribution systems and has the expertise, financial resources and qualified personnel to carry out the services described herein. The City wishes to retain ENCO to provide Professional Services necessary to deliver the Electric Services to certain areas of the City.

D. The City and ENCO have previously entered into an Engineering/Design, Procurement and Construction Management Services Agreement ("EPC Agreement"), dated March 7, 2003, which agreement terminates with the execution of this Agreement.

E. The Parties desire to enter into this Agreement to provide, among other things, that (i) ENCO will provide Professional Services to design, maintain and operate, and provide construction management services, as an independent contractor of the City, an electric distribution system ("Electric System") and related infrastructure assets within the City's jurisdictional limits, and (ii) after each portion of the Electric System has been dedicated to the City, the City will distribute and sell electricity to Customers therein, and ENCO will provide Professional Services to the City, each in accordance with and subject to the terms and conditions set forth herein.

NOW, THEREFORE, the Parties agree as follows:

MV00250921

PART A. AGREEMENT

1. Professional Services.

1.1 Professional Services. Subject to the terms of this Agreement, ENCO shall provide, or cause to be provided, (i) all Engineering, Procurement and Construction Management Services ("EPC Services") (see Attachment A, "Scope of EPC Services"), (ii) Operations and Maintenance ("O&M services") Services for the Electric System (see Attachment E, "O&M Services"), (iii) Customer Account Services (see Attachment F, "Customer Account Services"), and (iv) Commodity Management Services (collectively, the "Professional Services") necessary for the City to provide Electric Services within its service area.

1.2 Conditions for Rendering Service. For all Developments located within the service area, City shall require each Developer to execute a Line Extension Agreement and comply with all requirements of the Tariff. In connection with each such Line Extension Agreement, ENCO agrees to diligently proceed with the design and construction management of the Electric System and each phase thereof in a manner consistent with this Agreement and the terms of such Line Extension Agreement. Notwithstanding the foregoing or anything else to the contrary contained herein, ENCO shall not be obligated to design and provide construction management services to those portions of the Electric System in the event and to the extent the Developers fail to perform their obligations under the Line Extension Agreements and the terms of the Tariff.

1.3 Standard of Performance. ENCO shall provide the Professional Services to the City in accordance with the terms of this Agreement, Good Utility Practice and all applicable laws. If there is a conflict between these standards, in that a provision of one precludes satisfaction of the other, ENCO shall comply first with applicable law. Nothing herein shall be construed to permit ENCO to take any action, which violates this Agreement or any applicable federal, state or local laws or regulations.

1.4 Performance Guarantees.

(a) During the entire term of the Agreement, ENCO shall maintain in full force and effect a performance bond in the amount of $2 million dollars, the proceeds of which the City shall retain in the event that ENCO is unable to meet its obligations under the Agreement.

(b) Further, SRM ENCO, LLC has executed an operating deficit agreement with ENCO, in a form mutually agreeable to the City for a term of five (5) years, which may be extended at the City's discretion, and which is attached hereto as Attachment I. Failure by ENCO to exercise its rights under the operating deficit agreement, if necessary, shall be deemed an event of default under this Agreement.

(c) ENCO and the City have executed a operating deficit agreement for an optional line of credit, which is attached hereto as Attachment J.

MV00250922

2. Access and Space.

2.1 Access. The City shall secure all easements and other access rights necessary to construct the Electric System and to enable ENCO to perform the Professional Services. City shall provide ENCO access to the portions of the Electric System owned by the City as necessary for the performance of the Professional Services.

2.2 Office and Equipment Space. The City shall provide to or secure for ENCO office and equipment space located within the City as ENCO may reasonably require to provide the Professional Services as follows:

(a) City shall provide, at no cost to ENCO, office space and counter space at City Hall for up to two (2) ENCO employees. City shall also provide, at no cost to ENCO, space at the City's Corporate Yard for up to two vehicles, until January 1, 2005.

(b) No later than January 1, 2005, ENCO shall be required to have a business office established in Moreno Valley, including space for its equipment. Such office space is necessary to provide local utility customers and city staff access to ENCO staff. By mutual agreement of the Parties, ENCO may lease space from the City.

(c) In the future, the City plans to construct a new corporation yard and it is intended that ENCO local operations will be co-located there. At that time, ENCO will be required to locate its administrative and field operations at the corporation yard, and pay independently-verifiable, fair market rates for the space needed.

3. Term of Agreement.

3.1 Initial Term. The Initial Term of the Agreement shall be until December 31, 2018 (15 years). For purposes of this Agreement, year 1 shall be 2004, and the remaining portions of 2003 shall be subject to the same contract provision as year 1.

Notwithstanding the foregoing, if eighteen (18) months prior to expiration of the Initial Term, annual total system electric power consumption is less than 282,109,000 kilowatt hours per year (kwhs/year) for the previous twelve (12) months, this contract shall be automatically extended for an additional two (2) years, until December 31, 2020.

3.2 Extension Period.

(a) In the event that the City determines that it desires a contract for a third party to continue to maintain and operate its Electric System, eighteen (18) months prior to the end of the Initial Term, and continuing for three (3) months (unless extended in writing by the City), ENCO shall have the exclusive right to negotiate a new agreement with the City for the continued operation and maintenance of the City's Electric System ("Good Faith Negotiation Period"), provided however that ENCO is not in material breach of this Agreement and remains an entity validly operating under the laws of the State of California. If ENCO wishes to initiate the Good Faith Negotiation process, ENCO shall provide written notice to the City, pursuant to

MV00250923

the terms of this Agreement, not less than thirty (30) days prior to the commencement of the Good Faith Negotiation Period.

(b) If at the end of the Good Faith Negotiation Period, the parties are unable to reach an agreement, and if the City determines to seek a contract for a third party to maintain and operate its Electric System, the City shall issue a written request for proposals ("RFP") for the operation and maintenance of its Electric System. As long as ENCO is not in material breach of this Agreement and remains an entity validly operating under the laws of the State of California, ENCO shall be automatically entitled to submit a response to the City's request for proposals and shall be automatically qualified under any request for qualification ("RFQ").

4. Rates, Tariffs, Billing and Collection of Funds.

4.1 Rates and Tariffs. The City shall establish, maintain and enforce applicable tariffs for electric service and establish rates for such service which may, from time to time, be amended. The City shall promptly notify ENCO of any proposed amendment or modification to City Tariffs so as to allow ENCO adequate time to modify the billing system and advise and train telephone center employees on the City Tariffs changes.

4.2 Billing, Reporting and Collection of Funds.

(a) ENCO shall prepare all Customer bills and shall directly bill all Customers for Electric Service pursuant to City tariffs and rate schedules. ENCO shall also process all payments received from Customers, which shall be the sole property of City, by recording such payments into ENCO's customer information system and depositing such payments into a bank account designated by the City, as provided in Attachment F, "Customer Account Services." City shall disburse payments received pursuant to the provisions of Sections 4.3 and 5.1 below.

(b) By no later than the fifteenth (15th) day of the month, pursuant to the provisions of Attachment F, "O&M Services," ENCO shall provide to the City a monthly report of bills rendered to Customers. This report shall include, at a minimum the (i) total number of kilowatt hours (kWh) billed, (ii) the total charges to Customers by Rate Schedule, (iii) total Public Purpose Program charges, (iv) Distribution Component charges, (v) Energy Component charges (vi) Special Charges (as defined in Attachment H, "Base Pro Forma Rates and Special Charges"), and a summary of Customer invoices billed by Customer Account.. Any material prepared by and received from third parties for that month shall be provided in the next monthly report.

4.3 Disbursement of Funds.

(a) By no later than the fifteenth day of the month, ENCO shall provide City with an invoice summarizing the amounts due to ENCO based on the monthly reports provided under section 4.2(b) above. Such invoice will reflect the amounts due to ENCO based on Customer payments received from the previous month, including any applicable reconciliation for the previous month's over or under payments. City shall pay such invoice to ENCO within two business days of receipt of the invoice.

MV00250924

(b) The City shall disburse revenues deposited into its account under Section 4.2(a) as follows:

(i) Public Purpose Program Charges. State mandated charges for Public Purpose Programs shall be separately identified and collected in rates for Electrical Service charged to Customers. Such funds shall be collected from Customers by ENCO pursuant to the City's Tariff, and disbursed to a separate Public Purpose Programs Account, to be administered outside the scope of this Agreement. Public Purpose Program Charges shall not be used in the computation of any Distribution Component Revenues.

(ii) Rate Stabilization Fund.

(1) Within thirty (30) days of the Effective Date of this Agreement, the City shall create a "Rate Stabilization Fund" ("RS Fund"). This fund may be drawn down by the City for the purpose of balancing and covering the costs of power and delivery of such power to the City Electrical System when costs would otherwise require setting rates that are more than those charged by the investor owned utility.

(2) The RS Fund shall be funded by contributing an amount equal to five percent (5%) of the total revenues, less contributions for Public Purpose Program Charges and Special Charges, on a monthly basis until December 31, 2013, at which time such obligation shall terminate.

(3) Contributions to the RS Fund shall come from the Distribution Component, and shall bear interest at a rate comparable to other City investments returns. By no later than January 31, 2014, City shall be obligated to reimburse ENCO fifty percent (50%) of the amount contributed to the RS Fund, plus prorated accrued interest on all finds contributed to the RS Fund from Distribution Component; provided however, that such payment shall be adjusted for any amounts paid by City to ENCO pursuant to Sections D or F below.

(4) Furthermore, it is the City's express intent to annually review its capability of using positive net energy-related revenues to reimburse ENCO for its share of contributions to the RS Fund after reconciling year-end financial statements to determine whether sufficient cash flows are available after satisfying City expense obligations and, if so, to reimburse ENCO for its annual share of contributions to the RS Fund, in whole or in part from energy-related revenues. Nothing in this section shall require City to make such payments.

(5) By written mutual agreement, the parties may reduce the percentage requirement of Distribution Component contributions made to the RS Fund, and the City reserves the right to suspend or terminate the required contribution at any time.

(6) Nothing specified above shall preclude the City from satisfying its obligation for reimbursing ENCO's share of the RS Fund, in whole or in part, from any source at any time.

MV00250925

(iii) In Lieu Fees. The City shall forward to the City General Fund, an amount equal to the amount that would have been paid by an investor-owned utility for franchise fees (1.0% of gross annual receipts) and property tax at the tax rate in effect as of the Effective Date of this Agreement.

5. Payment to ENCO for Services and Funding.

5.1 Payment for Services. In consideration of ENCO's performance of its obligations under this Agreement, ENCO shall receive compensation as set forth below:

(a) Monthly reimbursement of the amount for Special Charges and EPC Services paid by Customers, Developers and others to the City for such specific services rendered by ENCO as reported project-by-project pursuant to work order authorizations and instructions therein.

(b) The monthly payments for Professional Services shall be computed as follows: the total customer consumption in kilowatt hours, multiplied by the applicable rate schedule pro forma rate in Exhibit H (as adjusted pursuant to Section 5.3(c) below), shall result in the Distribution Component Revenue, which shall be reduced by the amount of contributions for the In Lieu Fees and any applicable contributions to the RS Fund, and paid fifty percent (50%) to ENCO.

(c) Attachment H rates for distribution service are derived from Southern California Edison Company ("SCE") rate schedules effective August 1, 2003, inclusive of all surcharges, as indicated in more detail in Attachment H. Commencing on December 1 2004, and annually on that anniversary thereafter (or at such other time as may be mutually agreed upon by the Parties), the Parties shall revise Attachment H to reflect changes to the referenced SCE rate schedules, or its successor rate schedule. Monthly compensation for the following year shall be based on the calculation in Section 5.1(b) as modified by the revised Attachment H.

(d) However, notwithstanding anything to the contrary contained herein, in the event any City Tariff and rates are set or reduced to levels below the rates set in Attachment H that would otherwise be in effect during that calendar year, and such reduction reduces the amount that would have been available for disbursement pursuant to Section 5.1(b) absent such reduction, then, notwithstanding Section 5.1(b), ENCO shall receive as a disbursement from the City all amounts that would have been available for disbursement to ENCO, absent such reduction in Tariffs, and the City shall retain all remaining Distribution revenue.

5.2 Capital Funding of Infrastructure. It is intended that the City will fund the capital infrastructure that is projected to be required during the term of this Agreement. Nothing in this section, however, shall preclude the Parties from negotiating other arrangements to fund the capital infrastructure, including the possibility that ENCO will provide such capital. All infrastructure, whether funded by City or through a subsequent agreement with ENCO, shall be solely owned by the City.

MV00250926

5.3 Uncollected Customer Charges for Electric Service:

(a) Pursuant to Attachment G, ENCO shall attempt to collect all past due amounts owed from Customers. In that regard, ENCO will notify the City if any single account has accumulated past due amounts in excess of a threshold amount of five thousand dollars($5,000), which threshold may be revised by the agreement of the Parties, or past due amounts are equal to, or in excess of, fifty percent (50%) of the Customer Deposit.

(b) The Parties shall each bear their proportional share of uncollected amounts due the City for Electric Service, except to the extent the uncollected amounts are due to an action by the City, its City Council, or City Manager, through changes to rules or Tariffs or otherwise without the consent of ENCO. In such event, the City shall bear the loss for any uncollected amounts, and shall compensate ENCO for its share of the Distribution Component association with such write-off or excused bill.

(c) In the event a past due amount is not successfully collected through Small Claims Court or other routine collection measures, and the Parties agree to pursue collection of a bad debt that requires use of counsel, the Party or Parties incurring the cost of such counsel or counsels, shall be reimbursed for their direct costs related to such use of counsel prior to the disbursement of any amounts collected from the Customer or account pursuant to the provisions of Sections 4 and 5 of Part A of this Agreement.

6. Transfer of Funds.

All payments made between the Parties pursuant to the terms of this Agreement shall be made by electronic funds transfer to an account designated by the receiving Party pursuant to the notice provisions of Section 9 of this Part A.

7. Insurance.

7.1 During the term of this Agreement, ENCO shall maintain insurance of the type and in the amounts set forth in Attachment D, "Insurance Requirements" in the amount of $10 million dollars.

7.2 The Parties shall meet annually, on the anniversary date of the calendar renewal of the affected insurance policies, to review the costs of general liability and blanket insurance. The actual costs incurred for such policies will be compared to the pro forma insurance costs presented in Attachment D. If the actual costs incurred for the previous policy year are less than the pro forma amounts, ENCO will pay the a portion of the savings equal to the percentage share of the Distribution Component to the City, pursuant to a pro forma calculation to be mutually agreed upon by the parties. The Parties agree they will take into consideration, in the savings calculation, any impact caused by the difference between the actual number of meters and the pro forma number of meters shown in Attachment D.

MV00250927

8. Industry Standard Audits.

8.1 ENCO shall provide the Professional Services to the City in accordance with the terms of this Agreement, Good Utility Practice and all applicable laws. Pursuant to that obligation, the City may elect to conduct an audit no more than every thirty-six (36) months from the date of execution of this Agreement to ensure that ENCO's performance under this Agreement in meeting or exceeding all applicable industry standards.

8.2 The standards shall be independently and objectively established from, among other sources, Edison Electric Institute (EEI or its successor) standards, the operating manuals provided by ENCO to the City, and, as to outage frequency and duration, the performance levels of Southern California Edison Company, or its successor, as filed with the California Public Utilities Commission.

8.3 Audit review issues shall include: customer service quality, construction contract administration, technology update, revisions to operating manuals, "Good Utility Practices" review, and billing procedures.

8.4 Prior to finalization, a draft report (Draft Audit Report) shall be provided to both parties for review. The parties shall have 30 days to review the draft and provide comments. A final report (Final Audit Report) shall be issued as soon as possible thereafter.

8.5 In the event the Final Audit Report finds that ENCO's performance fails in any material respect to meet one or more applicable industry standards, ENCO shall have forty-five (45) days to present the City with a corrective action plan addressing the deficiencies identified in the Final Audit Report. Thereafter, ENCO shall have sixty (60) days to implement the necessary corrective actions.

8.6 If either Party disagrees with the Audit findings found in the Final Audit Report, the matter shall be subject to the dispute resolution provisions of Section 10 of Part B of this Agreement, provided, however, that a Party must make a written request for mediation within thirty (30) days of receipt of the Final Audit Report. Following the conclusion of the mediation, the audit findings shall be considered final.

8.7 Notwithstanding the above, nothing herein shall limit the City's ability to address any potential performance deficiencies not previously identified as they arise.

9. Notices and Demands.

9.1 Except as otherwise provided under this Agreement, all notices, demands, or requests pertaining to this Agreement shall be in writing and shall be deemed to have been given (i) on the date delivered in person, or (ii) the date received when sent by special messenger or certified or registered United States Mail postage prepaid, or (iii) on the date received when given, by

Date: OCTOBER 30, 2003

MV00250930

PART B. GENERAL TERMS AND CONDITIONS

1. Securing of Permits; Compliance with Laws.

1.1 ENCO represents that it has obtained and is currently maintaining all permits, approvals and licenses required by State, Federal and local governments and regulatory agencies for the Professional Services to be performed by ENCO under this Agreement.

1.2 ENCO shall, during the term of this Agreement, secure and maintain, at its sole cost and expense, governmental permits, licenses and approvals as are necessary for the construction and operation of the Electric System and execution of Professional Services under this Agreement. City shall use reasonable efforts to assist ENCO in securing and maintaining any such permits, licenses or approvals.

1.3 City shall be responsible for securing and maintaining, at its sole cost and expense, any such permits, licenses and approvals which may be necessary for ENCO to perform its Professional Services but for which the City is the entity required to make such filing. ENCO shall assist City in the identification of necessary permits.

2. Limitations on Authority.

It is agreed that in performing the Professional Services required under this Agreement that ENCO is an independent contractor, and neither ENCO nor any person employed by or contracted with ENCO to furnish labor and/or materials under this Agreement shall be an agent or employee of City, unless specifically set forth in Attachment F, "Customer Account Services." ENCO has full rights to manage its employees subject to the requirements of the law. Unless otherwise agreed by the parties in writing, ENCO shall have no authority to:

2.1 Hire, direct the activities of, discipline, suspend, or terminate any City employee.

2.2 Require any changes to City authorities, rules or regulations, financial arrangements or Tariff.

2.3 File any report, notice or other document with any governmental authority (including the Federal Energy Regulatory Commission or the California Public Utilities Commission) or with any other entity on the City's behalf, or with respect to the Electric Systems or Electric Services, except that ENCO shall be responsible for the filing of any reports, notices or other documents where ENCO is required to do so by law or this Agreement.

2.4 It is understood that the decision to enter into any proposed power supply contract or implement any recommendation related to Commodity Management Services, rests exclusively with the City, and ENCO is the City's consultant in procuring the contracts but is not a party to the energy contracts. It is intended that ENCO will collaborate with the City in establishing policies relating to the procurement of energy and the decision-making for entering into such contracts. Nothing in this section, however, shall require the City to enter into any contract procured and proposed by ENCO and the City shall have no obligation to compensate ENCO for

MV00250931

any unrealized business opportunity that may result from the City's decision, nor shall ENCO bear any liability for City decisions in this regard.

3. Financial Audits and Right to Inspect Records.

3.1 Audits. Upon no less than twenty (20) days' prior written notice, either Party may perform an audit of records containing information bearing upon performance of its obligations under this Agreement. The notice shall contain a commencement date for the audit, the estimated duration, location, and subject matter of the audit, and the materials to be audited or examined. Each Party shall bear its own expenses in connection with the audit. The auditing Party shall conduct the audit in compliance with the audited Party's reasonable security procedures, during the audited Party's normal business hours, and without undue interference with the audited Party's business operations.

3.2 Maintenance of Records. ENCO shall maintain maps, drawings, diagrams, files and records relating to its performance of Professional Services in a manner that will (a) allow the City to inspect and audit such files and records from time to time in accordance with Section 3.1, (b) enable ENCO to respond to City inquiries and (c) comply with its obligations under this Agreement. ENCO agrees to use generally accepted accounting principles and to exercise internal controls in its recording of receipts and disbursement of funds to the City. ENCO shall allow a representative of the City to examine, during normal business hours, its files and records and make copies of material directly related to performance of Professional Services.

3.3 Ownership of Materials. All material, including information developed on computer(s), which shall include, but not be limited to, data, sketches, tracings, drawings, plans, diagrams, quantities, estimates, specifications, proposals, tests, maps, calculations, photographs, reports and other material developed, collected, prepared or caused to be prepared for the City under this Agreement shall be the property of City but ENCO may retain and use copies thereof for purposes of fulfilling its obligations under this Agreement only. City shall not be limited in any way or at any time in its use of said material. However, ENCO shall not be responsible for damages resulting from City's use of said material for work other than its Professional Services, including, but not limited to, the release of this material to third parties. Upon the termination of this Agreement, ENCO shall turn over to City all records associated with the Professional Services provided hereunder.

3.4 Record Retention: In accordance with the City's established Records Retention Policy, ENCO shall maintain all records associated with the provision of the Professional Services for the term of the Agreement or for such other term as may be mutually agreed by the Parties, or determined by Federal, State, or local law.

4. Termination of Agreement.

4.1 Termination for Breach of Agreement.

(a) Except as set forth in subsection (c) of this section, if either Party breaches any material provision of this Agreement relating to payment of money to the other Party, the non-

MV00250932

breaching Party shall give the breaching Party written notice of the breach. The breaching Party shall have ten (10) business days from the date of the notice within which to cure the breach or invoke the dispute resolution procedures set forth in Section 10 of Part B of this Agreement. If the breaching Party does not cure the breach or invoke dispute resolution procedures within the ten-day period, the non-breaching Party may, at its sole option, and without waiving any other remedies it may have, (i) terminate this Agreement, (ii) invoke the dispute resolution procedures and/or (iii) pursue all available remedies.

(b) Except as set forth in sub subsections (a) and (c) of this section, if either Party breaches any material provision of this Agreement, including failure to comply with or correct any deficiencies identified in any Final Audit Report no longer subject to further dispute resolution, the non-breaching Party shall give the breaching Party written notice of the breach. The breaching Party shall have thirty (30) calendar days from the date of the notice within which to cure the breach or invoke the dispute resolution procedures set forth in Section 10 of Part B of this Agreement, provided, however, that the breaching Party must invoke the dispute resolution procedures within ten (10) calendar days from the date of the notice. The breaching Party may have more than thirty (30) days to cure if that Party is exercising diligent efforts to effect the cure, provided that during such additional time the non-breaching Party is not materially prejudiced. If the breaching Party does not cure the breach or invoke dispute resolution procedures within such period, the non-breaching Party may, at its sole option and without an election of remedies, (i) terminate this Agreement with no further financial obligations, (ii) invoke the dispute resolution procedures and/or (iii) pursue all available remedies.

(c) In the event of a material breach that impacts the immediate operation and safety of the Electric System this Agreement may be terminated by the non-breaching Party immediately upon receipt of notice of the same.

4.2 Termination for Changes in Applicable Law or Actions by Governmental Authority.

If any governmental authority including the City, through changes to applicable law, rules, Tariff or otherwise, (i) imposes conditions upon ENCO or any Affiliate of ENCO, or the City or any Affiliate of the City, which impose additional material obligations or liabilities upon ENCO in connection with the performance of the Professional Services or the City in connection with the performance of Electric Services, (ii) determines that the material performance of the Professional Services by ENCO or the material performance of Electric Services by the City under this Agreement violates applicable law, or (iii) requires material modifications to the Agreement which are unacceptable to either Party, the Parties shall negotiate in good faith such modification to this Agreement as may be appropriate. If the Parties are unable to agree to such modifications, either Party may seek dispute resolution under Section 10 of Part B of this Agreement. If the Parties are unsuccessful in resolving this matter in dispute resolution, either Party may then terminate this Agreement in its sole discretion upon one hundred eighty (180) days' prior written notice to the other Party, unless earlier termination is required by the governmental authority.

MV00250933

4.3 Termination for Insolvency. Either Party may terminate this Agreement, with ten (10) days notice, if the other Party (a) admits insolvency, (b) makes a general assignment for the benefit of creditors, (c) is unable to pay debts as they mature, or (d) fails to provide adequate assurance of its ability to perform under the Agreement when requested by the other Party. Further, if the defaulting Party shall be subject to a Bankruptcy Proceeding, provided that if the defaulting Party or its trustee or receiver can demonstrate that the Bankruptcy Proceeding is not likely to lead to a rejection of this Agreement and the defaulting Party or its trustee or receiver can demonstrate (i) that it can still perform and (ii) that it is performing under this Agreement, then such Bankruptcy Proceeding shall not be deemed an event as to which the contract may be terminated.

4.4 Consequences of Termination.

Except as specifically provided in this Agreement, neither Party shall have an obligation after termination of this Agreement to provide services or otherwise to assist the other Party in providing services; provided however, that ENCO will cooperate with City in any necessary transition to the extent that ENCO has in its possession and control information necessary for the operation of the Electric System. In the event of a termination, ENCO shall not take any actions inconsistent with the City's interest or rights in the Electric System, nor shall it hinder transition of the operations and/or maintenance of the Electric System or the billing services for Electric Service, nor impede City's ongoing ability to operate the Electric System. ENCO shall be responsible for taking all reasonable precautions and conducting itself according to Good Utility Practices in any transition of the operations and maintenance of the Electric System upon termination of this Agreement. After termination of this Agreement, each Party shall remain liable for amounts due and payable under this Agreement with respect to Professional Services rendered prior to termination.

5. Nonsolicitation of Employees.

During the term of this Agreement, the City shall not, directly or indirectly, hire, or solicit for the purpose of hiring, any employee of ENCO, engaged in performing Professional Services, except with permission of ENCO. Thereafter, employees of ENCO are free to participate in any public solicitation for employees.

6. Representations by the Parties

6.1 Power and Authority. Each Party represents and warrants to the other Party that, as of the Effective Date: (1) each Party has the full power and authority to execute and deliver this Agreement and to perform according to its terms; (2) the execution, delivery and performance of this Agreement has been duly authorized by all necessary corporate or governmental action or by other sufficient action by such Party; and (3) this Agreement constitutes such Party's legal, valid and binding obligations, enforceable against such Party in accordance with its terms.

6.2 No Conflict. Each Party represents and warrants to the other Party that, as of the Effective Date: the execution, delivery, and performance by such Party of this Agreement does not (i) conflict with or result in a breach of any of the articles of incorporation, bylaws, or

MV00250934

operating agreement, or other charter documents of such Party; (ii) contravene any applicable law, or cause the suspension or revocation of any permit presently in effect, which affects or binds such Party; or (iii) conflict with or result in a breach of or default (with or without notice or lapse or time or both) under any material provision of any contract, agreement or instrument to which such Party is a party.

6.3 No Consent. Each Party represents and warrants to the other Party that, as of the Effective Date, the execution, delivery and performance by it of this Agreement does not require any permit from any governmental authority, or the authorization, consent or approval of any other third party, other than such permits, authorizations, consents or approvals (a) which have previously been obtained, or (b) which will be obtained as contemplated by this Agreement.

6.4 Litigation. Each Party represents and warrants to the other Party that, as of the Effective Date, there are no demands, assertions, claims, actions or proceedings, judicial, governmental or otherwise, pending or, to the best of its knowledge, threatened against it that, if successfully prosecuted would affect its ability to perform its obligations under this Agreement

6.5 Accuracy of Information. Each Party represents and warrants to the other Party that, as of the Effective Date, to the best of its knowledge, all records, accounts, data, documents and other information furnished by it to the other Party are true and correct in all material respects.

6.6 Integration and Amendment. This Agreement constitutes the entire agreement between the Parties in respect of the matters set forth herein and supercedes all prior negotiations, representations, or agreements, whether oral or written, which the parties may have in connection therewith. No modification, alteration, or amendment of this Agreement shall be binding upon either Party unless executed in writing by the Parties.

6.7 Expertise. ENCO represents and warrants to the City that, as of the Effective Date of this Agreement, it has the expertise, financial resources and qualified personnel necessary to carry out the Professional Services described herein.

6.8 No Interest in Contract. No officer or employee of City shall have any personal financial interest, direct or indirect, in this Agreement or the proceeds thereof during his or her tenure with City.

6.9 Statement of Economic Interest. If requested to do so by City, ENCO shall complete and file and shall require any other person performing services for the City under this Agreement to complete and file a "Statement of Economic Interest" with the City Clerk disclosing their financial interests.

6.10 Disclosure. City and ENCO hereby covenant and agree that to the best of their knowledge, no member of City's City Council, nor any officer, agent, representative or employee of City has any personal financial interest, whether contractual, non-contractual, direct or indirect, in this Agreement or in the business of subcontracting work required under this agreement; and that if any such interest comes to the attention of either Party at any time during the performance of this Agreement, a full and complete disclosure of such information shall be

MV00250935

made in writing to the other Party, even if such interest would not be required to be disclosed under applicable law.

6.11 No Contract Fees. ENCO hereby covenants that it has not employed or retained any person or company to solicit this Agreement; and that it has not paid or agreed to a brokerage fee, gift, or other compensation, contingent upon or resulting from the award of or the making of this Agreement. For breach or violation of this covenant, City shall have the right to annul this Agreement without liability, or in its discretion to deduct from the contract price, or otherwise recover, the full amount of such fee, commission, percentage, brokerage fee, gift, or contingent fee in addition to other remedies available to it.

6.12 Taxes. ENCO shall be solely responsible for all taxes assessed against it or its interests created under this Agreement during the performance of the Professional Services. ENCO shall also pay all reasonable internal and external costs and expenses incurred by City arising out of any audit or investigation by any governmental authority with respect to any Taxes assessed against ENCO.

City shall be solely responsible for all taxes assessed against City. City shall also pay all reasonable internal and external costs and expenses incurred by ENCO arising out of any audit or investigation by any governmental authority with respect to any Taxes assessed against City.

7. Warranty.

7.1 ENCO shall perform all Professional Services in an efficient and expeditious manner and shall work closely with and be guided by City, and shall operate as a fiduciary of the City. ENCO shall be as fully responsible to City for the acts and omissions of its subcontractors, and of persons either directly or indirectly employed by them, as ENCO is for the acts and omissions of persons directly employed by it. ENCO will perform all work in a safe manner and in accordance with all federal, state, and local operation and safety regulations. ENCO shall work with City to identify the necessary licenses or permits that City may be required to obtain related to the provision, sale and furnishing of Electric Services to its service area.

7.2 City represents and warrants that it has complied or shall comply with all applicable laws related to the provision, sale and furnishing of Electric Services to its service area.

8. Reasonable Cooperation and Coordination.

8.1 The Parties shall cooperate with each other as may reasonably be required in connection with the transactions contemplated by this Agreement, including furnishing each other with such records, accounts, data, documents and other information and providing reasonable assistance and cooperation in defending, administering or managing any third party claim related to this Agreement. The Parties shall use their best efforts to ensure that all information furnished to the other Party is true and correct in all material respects. The Parties will develop policies and procedures for maintenance, storage and mutual access to meter usage data.

MV00250936

8.2 ENCO shall perform all the Professional Services under the City's general direction, in consultation with the City's operational contact, or his designee. Further, the City shall be consulted concerning all changes in ENCO senior operations personnel, and the City's oral or written consent shall be required prior to any permanent or prolonged change to such personnel. If consent is first granted orally, it shall be followed within five (5) days by confirmation of such consent in writing. This will apply to senior operations personnel, whether employed by, consulting to or however retained by, ENCO, who may be providing Professional Services to the City. The City's consent to such change shall not be unreasonably withheld.

8.3 For as long as they are employed by ENCO Utility Services or one of its affiliates, senior operations personnel Dennis Eastman, Robert de Korné and Michael Powers will be assigned to provide the Professional Services to the City, on a non-exclusive basis.

9. Confidentiality and Publication; Survival of Obligations.

9.1 Confidential Information. The term "Confidential Information" means written, recorded, and machine-readable information, or other information provided in tangible form by one Party to the other Party relating to the subject matter of this Agreement, and which is clearly marked as "Confidential Information," and which is not a "public record" or which otherwise need not be disclosed under California law. The Parties acknowledge that the City keeps records that are "public records" under California law and thus subject to disclosure, which may include this Agreement when and in the form executed.

9.2 Nondisclosure Obligations.

(a) If a Party has designated information as Confidential Information, neither Party shall disclose it in whole or in part, including derivations thereof, to any third party without the prior written consent of the other Party unless required to do so by law, in which case, the disclosing Party shall notify the other Party as soon as practicable. The Parties acknowledge that City is subject to the California Public Records Act, and that City retains records that may be thus subject to disclosure under California law, regardless of their Confidential Information designation.

(b) A Party shall not be liable to the other Party for inadvertent or accidental disclosure of Confidential Information if the disclosing Party: (i) holds the Confidential Information in strictest confidence; (ii) limits access to the Confidential Information to its employees and agents who are involved in subject matter of the Confidential Information and informs its employees and agents who have access to the Confidential Information of the Party's duty not to disclose, provided however, that ENCO acknowledges that City representatives, including but not limited to department heads, City Council, and legal counsel may have access to any and all Confidential Information and nothing herein shall be construed as prohibiting or limiting such access; and (iii) upon discovery of inadvertent disclosure, endeavors to prevent any further disclosure.

(c) Either Party may disclose any Confidential Information when required by applicable law, order of a court, or other governmental authority, but shall promptly notify the

MV00250937

other Party before making such disclosure. Nothing in this subsection is intended to limit the rights of either Party to challenge any disclosure request or order from a court or any other governmental authority.

9.3 Survival of Obligations. The obligations set forth in this Section shall survive the termination of the Agreement.

9.4 Customer Information. ENCO shall not disclose to third parties Customer information, including, but not limited to Customer name, service address, billing address, credit history, or usage history, without the express written authorization of the Customer and in strict compliance with applicable California law and the City Tariff.

9.5 Publication. Unless agreed upon in writing, no Party shall publish or use the other Party's name, language, pictures, or symbols from which the other Party's name may be reasonably inferred or implied in any advertising, promotion, or any other publicity. Either Party may refer to this Agreement and its relationship to the other Party as a matter of fact.

10. Dispute Resolution Procedure.

10.1 Any controversies between ENCO and City regarding the construction or application of this Agreement, and claims arising out of this contract or its breach, shall be submitted to mediation within thirty (30) days of the written request thereof by either Party delivered to the other Party.

10.2 The Parties may agree on one mediator. If they cannot agree on one mediator, the Party demanding mediation shall request that the Superior Court of Riverside County appoint a mediator. The Parties shall agree, in good faith, to attempt to resolve the dispute prior to mediation.

10.3 If such matter cannot be resolved despite good faith attempts after a reasonable period of time, a mediation meeting not to exceed one day (eight (8) hours) shall be held. The Parties may agree to extend the time allowed for mediation under this Agreement. The mediator will be called upon to opine as to a resolution of such matter, which shall not be binding on the Parties and shall, in the mediator's reasonable opinion, be the most likely outcome if decided by a court of law in the appropriate jurisdiction.

10.4 Each party shall bear their own costs and expenses for the mediation, except that the cost of the mediator and the mediation facilities, if any, shall be borne by the Parties equally.

10.5 Mediation under this section is a condition precedent to filing an action in any court. In the event of litigation which arises out of any dispute related to this Agreement, the prevailing Party in such proceeding shall be entitled to its reasonable attorneys' fees, expert witness fees and non-Taxable costs to the extent incurred as a result of a dispute under this Agreement.

11. Indemnification.

MV00250938

11.1 Indemnification by ENCO. ENCO agrees to protect, indemnify, defend and hold harmless City, its Council members, officers, employees and agents, from any and all demands, claims, damages or liability of any nature, including death or injury to any person, property damage or any other loss, if and to the extent directly or indirectly caused, occasioned, or contributed to, in whole or in part, or claimed to be caused, occasioned, or contributed to in whole or in part by the acts or omissions of ENCO, its officers, agents, subcontractors, consultants or employees; or conduct for which applicable law may impose strict liability on ENCO in the performance of or failure to perform its obligations under this Agreement, except as set forth in Attachment F, "Customer Account Services."

11.2 Indemnification by the City. The City agrees to indemnify, defend and hold harmless ENCO and its officers, agents and employees from any and all liability, claims, damages or injuries to any person, including injury to employees and all claims which arise from or are connected with the negligent performance or failure to perform the services or other obligations of the City under this Agreement, or are caused or claim to be caused by the negligent or willful acts of the City, its Council, elected and appointed officials, officers, agents or employees, or its subcontractor(s) or any person the control or direction of City; provided, however, that this indemnification and hold harmless shall not include any claims arising from the sole negligence or willful misconduct of ENCO, its officers, agents, or employees.

11.3 Procedures for Seeking Indemnification. The indemnitee shall promptly upon its discovery of facts or circumstances giving rise to a claim for indemnification, including receipt by it of any third party claim, give notice thereof to the indemnitor, such notice in any event to be given within thirty (30) calendar days from the date the indemnitee obtains actual knowledge of the basis or alleged basis for the right of indemnity, or such shorter period as may be necessary to avoid material prejudice to the indemnitor, provided that the failure to give timely notice shall not excuse the indemnitor from its obligation to indemnify under this section unless it has been actually prejudiced by the delay.

12. Remedies.

12.1 In the event of a material breach of this Agreement, the non-breaching party may, at its sole discretion, pursue dispute resolution pursuant to the provisions of Section 10 of this Part B, pursue all available remedies, or elect to terminate the Agreement. Except as otherwise provided in this Agreement, all rights of termination, cancellation, or other remedies in this Agreement are cumulative.

13. Limitation of Liability.

13.1 Each Party's liability to the other for any Losses relating to or arising out of any act or omission, except for gross negligence or willful misconduct, in its performance of obligations under this Agreement shall be limited to the amount of direct damages, expenses and costs, and neither Party shall be liable to the other Party for any indirect, special, punitive or consequential damages of any kind whatsoever, or loss of revenue, income, profits, goodwill or reputation. The limitations set forth in this paragraph shall not apply to the Parties' indemnity

MV00250939

obligations set forth above, nor to acts or omissions arising out of a Party's gross negligence or willful misconduct.

13.2 Notwithstanding anything to the contrary, ENCO's cumulative liability to the City under this Agreement, whether in contract, tort, or otherwise, shall not exceed the total applicable insurance limits set forth in Attachment D, "Insurance Requirements," the proceeds of the performance bond, and operating deficit agreement limits, if applicable.

14. Assignment.

14.1 This Agreement is a contract for services. This Agreement shall be binding on City and ENCO, as well as their successors, assigns, executors and administrators. Except as otherwise set forth in this Agreement, no Party shall assign or otherwise transfer this Agreement or its right, obligations, title or interest therein or any part thereof to any person or entity, without the prior written consent of the other Party, which consent shall not be unreasonably withheld.

14.2 The Party seeking to assign its obligations, responsibilities and rights under this Agreement shall provide any and all information relevant to the assignment or the proposed successor requested by the other party in a form and substance acceptable to the other Party. Such information shall include, but not be limited to, documents that substantiate the following: (a) the identity of the proposed successor; (b) an agreement by the proposed successor to assume all obligations and responsibilities under this Agreement through the end of this Agreement's term and any applicable renewal period; (c) the proposed successor's creditworthiness and financial condition are sufficient to enable it to establish public confidence in its ability to perform the obligations it will be assigned; (d) the proposed successor is duly organized, validly existing and in good standing under the laws and jurisdiction of its formation; (e) the proposed successor is duly authorized to conduct business in California; (f) the proposed successor's ability to fulfill the assigning Party's obligations and responsibilities under this Agreement, including, but not limited to a demonstration of the qualifications and character of the key personnel that will be working with the City and the proposed successor's experience in utility business operations and management.

14.3 Notwithstanding the provisions of this Section, ENCO may use Affiliates or subcontractors to perform all or any portion of the Professional Services, provided that ENCO shall remain responsible to the City for all work performed by such Affiliates or subcontractors.

14.4 City shall be given at least sixty (60) days prior written notice of any merger or consolidation of SRM-ENCO, LLC, into or with any other corporation or any sale, lease or transfer of any material amount of the assets of SRM-ENCO, LLC to any other person or entity. City shall be given immediate notice should SRM-ENCO, LLC (a) admit insolvency, (b) makes a general assignment for the benefit of creditors, (c) be unable to pay debts as they mature, (d) fail to provide adequate assurance of its ability to perform any material obligation when requested by a party entitled thereto, or (e) is subject to a Bankruptcy Proceeding.

15. Force Majeure.

MV00250940

Neither Party shall be liable for any delay or failure in performance of any part of this Agreement (other than obligations to pay money) from any cause beyond its reasonable control, including but not limited to, failure or threat of failure of facilities, unusually severe weather, flood, fire, lightning, epidemic, quarantine restriction, war, sabotage, act of a public enemy, earthquake, insurrection, riot, civil disturbance, strike, work stoppage caused by jurisdictional and similar disputes, restraint by court order or public authority, or action or nonaction by or inability to obtain authorization or approval from any governmental authority, or any combination of these causes, which by the exercise of due diligence and foresight such Party could not reasonably have been expected to avoid and which by the exercise of due diligence is unable to overcome (a "Force Majeure Event"). If a Party is unable to perform any part of this Agreement by reason of a Force Majeure Event, the nonperforming Party shall give prompt written notice of such fact to the other Party, and shall exercise due diligence to remove such inability. Nothing contained in this Agreement shall be construed as to require either Party to settle any strike or labor dispute in which it may be involved.

16. Severability.

In the event that any one or more of the provisions of this Agreement shall for any reason be held to be unenforceable in any respect under applicable law, such unenforceability shall not affect any other provision of this Agreement, but this Agreement shall be construed as if the unenforceable provision or provisions had never been contained therein, provided, however, that such unenforceable provision must be non-material and not significantly impact the revenue components of this Agreement. In the event that the unenforceable provision does materially affect the performance of the Parties under this Agreement, the Parties shall act in good faith to renegotiate the Agreement to address such unenforceable provisions to their mutual satisfaction.

17. Third Party Beneficiaries.

This Agreement shall not be construed or deemed to be an agreement for the benefit of any third party, and no third party shall have any claim or right of action under this Agreement for any cause whatsoever.

18. Governing Law.

This Agreement shall be interpreted, governed and construed under the laws of the State of California. The Parties and their legal counsel have cooperated in the drafting of this Agreement and it shall therefore be deemed their joint work product and shall not be construed against either party by reason of its drafting.

19. Counterparts.

This Agreement may be executed in counterparts, each of which shall be deemed an original.

20. Section Headings.

MV00250941

The headings of the various sections, paragraphs and subparagraphs in this Agreement are for convenience only and shall not be considered or referred to in resolving questions of interpretation.

21. Waivers.

Both Parties agree the waiver by the other Party of any one or more of the conditions of performance, or forbearance from exercising rights or remedies under this Agreement shall not be construed as a waiver of any other condition of performance under this Agreement, or of the same provisions at any subsequent date. A provision shall be considered waived only if such waiver is made in writing by an authorized representative of the Party against whom such waiver is claimed.

22. No Offer..

Submission by ENCO of this Agreement to the City or vice versa for examination or signature does not constitute an offer by either Party for the performance of the services described therein. This Agreement will be effective only upon execution and delivery by each of ENCO and the City.

MV00250942

C. DEFINITIONS

As used in this Agreement, the singular shall include the plural and the masculine shall include the feminine and neuter, and vice versa. "Includes" or "including" shall mean "including without limitation." References to a section or attachment shall mean a section or attachment of this Agreement, as the case may be, unless the context requires otherwise, and reference to a given agreement or instrument shall be a reference to that agreement or instrument as modified, amended, supplemented or restated through the date as of which such reference is made. Unless the context otherwise requires, references to applicable laws shall be deemed references to such laws as they may be amended, replaced or restated from time to time. In addition to terms defined above and elsewhere in this Agreement, the following terms, and such other terms, when used in this Agreement or the Attachments to it shall have the meanings specified in this Attachment or where they are elsewhere defined.

Affiliate: A person, corporation, partnership or other entity is an Affiliate of another person, corporation, partnership or other entity if the former controls, is controlled by, or is under common control with, the latter. For purposes of this definition, "control" means (1) possessing, directly or indirectly, the power to vote fifty percent (50%) or more of the ownership interest of securities having ordinary voting power for the entity or (2) possessing the authority (a) to direct the conduct of the person or persons acting pursuant to or in a manner affecting this Agreement or (b) to direct the management and policies of the entity.

Applicant: Any person or entity requesting City to supply Electric Services or for a change in Electric Services.

Billing Cycle Schedule: The schedule of dates within a month when Customer accounts are processed by ENCO's billing system and Customer Account statements are produced.

City Charges: Fees and charges charged to a Customer for Electric Services, including energy costs, energy fees and Taxes established by City Tariff or applicable law.

Commodity Management Services ("CMS"): Negotiation, contract administration, market monitoring and regulatory compliance related to power supply planning and procurement for the Electric Utility.

CPI Escalation Factor: As of the anniversary of the Effective Date, the percentage increase or decrease (if any) between (a) the most recently published United States Department of Labor, Bureau of Labor Statistics "Consumer Price Index" for West-B/C prior to such date, and (b) the most recently published Consumer Price Index prior to the latter of (i) the Effective Date or (ii) the immediately preceding anniversary of the Effective Date. If such index is no longer published, or is modified from time to time, the Parties shall designate an appropriate successor or substitute index using, if available, such conversion factor, formula or table for conversion as may be published by the Bureau of Labor Statistics or by a nationally recognized publisher of similar information.

MV00250943

Customer: The person, group of persons, firm, corporation, institution, municipality, or other civic body, in whose name service is rendered, as evidenced by the signature on the application, contract, or agreement for that service or, in the absence of a signed instrument, by the receipt and payment of bills regularly issued in that name, regardless of the identity of the actual user of the service. A Customer must take final delivery of electric power, and not resell that power.

Customer Account: An account established for a Customer receiving Electric Services in ENCO's billing systems maintained for Customers of the City.

Customer Account Services: All Customer billing, account maintenance and other services, as more fully described in Attachment F, "Customer Account Services."

Developer: An owner, builder or other entity which has been granted approval by the City for the development of industrial, commercial or residential facilities located within the service area who enters into a Line Extension Agreement with the City, and who is required to deed to the City the electrical infrastructure constructed within the permitted area.

Developments: Any and all industrial, commercial or residential construction in the City's service area in which such construction has been conditioned on the City providing Electric Service or the City has otherwise agreed to provide Electric Service. ENCO shall be the City's exclusive provider of Professional Services for City Electric Service provided to such developments and the City will make all reasonable efforts to condition developments on the City providing Electric Service.

Distribution Component: The sum of all charges for Electric Services rendered on the City's Electric System, exclusive of Special Charges.

Electric Services: The provision and sale of retail electricity and all associated services related thereto to Customers as well as street and other lighting associated with residential and commercial land use.

Electric System: All electric facilities and appurtenances located within the City to be constructed and/or operated for the provision of Electric Service, as more fully described in Attachment H, "Description of Electric System," and which may be expanded from time to time.

Energy Component: The cost of power and the cost of delivering the power to the City Electric System.

EPC Services: All engineering, design, technical, planning, procurement, supervisory, consulting and construction management services provided to the City, or for others at the City's request, which are more fully described in Attachment A "Scope of EPC Services," necessary for the successful design and construction of the Electric System.

Good Utility Practice. Any of the practices, methods and acts engaged in or approved by a significant portion of the electrical utility and utility construction industry during the relevant

MV00250944

time period, or any of the practices, methods and acts which, in the exercise of reasonable judgment in light of the facts known at the time the decision was made, could have been expected to accomplish the desired result at a reasonable cost consistent with good business practices, reliability, safety and expedition. Good Utility Practice is not intended to be limited to the optimum practice, method or act to the exclusion of all others, but rather to be a spectrum of possible practices, methods or acts generally accepted in the region.

Hazardous Materials. Any chemical, material, substance, pollutant, contaminant, petroleum, petroleum product, dangerous or toxic substance, hazardous or extremely hazardous waste, liquid, industrial or other waste or agent that is regulated by a governmental agency in connection with the protection of the environment or found to pose a threat to human safety or health, and includes, without limitation, asbestos, petroleum, petroleum products, polychlorinated biphenyl, urea formaldehyde, radon gas, radioactive matter, and chemicals which may cause cancer, reproductive or developmental toxicity.

Holidays. A generally recognized or observed holiday when the City's offices are closed.

Lien: Any mortgage, lien, pledge, claim, charge, security interest or encumbrance of any kind whatsoever.

Line Extension Agreement: An agreement between the City and Developers whereby the Electric System is expanded as provided in the City's Tariff.

Material: Material, equipment, vehicles, computer hardware and supplies, including consumable supplies, spare and replacement parts, tools and office supplies.

Meters: Electrical meters used to record the Customers' consumption of electricity.

O&M Services: All operation and maintenance services for the Electric System, as more fully described in Attachment E, "O&M Services."

Professional Services: The services provided to City by ENCO, which include (i) all Engineering, Procurement and Construction Management Services ("EPC Services") (see Attachment A, "Scope of EPC Services"), (ii) Operations and Maintenance ("O&M services") Services for the Electric System (see Attachment E, "O&M Services"), (iii) Customer Account Services (see Attachment F, "Customer Account Services"), and (iv) Commodity Management Services (collectively, the "Professional Services") necessary for the City to provide Electric Services within its service area.

Rate Schedules: That portion of the Tariff consisting of one or more tariff sheet(s) setting forth the charges and conditions for a particular class or type of electric service in a given area or location. A rate schedule includes all the wording on the applicable tariff sheet(s), such as Schedule number, title, class of service, applicability, territory, rates, conditions and references to rules.

MV00250945

Street Lights: Lighting apparatus used primarily for the illumination of streets, alleys, highways, or other public ways.

Tax: All federal, state, and local sales, privilege license, use, excise, gross receipts, and other taxes and tax-like charges imposed on or with respect to City Charges or Electric Services. "Taxes" do not include income taxes imposed on ENCO or gross receipt taxes that are imposed directly on ENCO.

Tariff: The statutes, rules, rates and other charges including City Charges, rate schedules, regulations, ordinances, orders and codes of the City, as adopted by the City and which may be amended from time to time, that establish the terms and conditions under which Electric Services are provided.

Work Order Authorization. The City's authorization for ENCO to perform services, defined in Attachment A, for others at the City's direction. The Work Order Authorization form shall be substantially similar to that set forth in Attachment B, "Sample Work Order Authorization."

MV00250946

PART D. ATTACHMENTS

ATTACHMENT A

SCOPE OF EPC SERVICES FOR THIRD PARTIES

Subject to the reimbursement provisions in the Agreement and at the rates provided in Attachment C, ENCO will perform the following services for Developers or other third parties, at the City's direction pursuant to a Work Order Authorization provided in Attachment B, and as the City's agent, and in compliance with any applicable public bidding requirements..

1. **System Design Development Services.** ENCO shall provide design, engineering, and related consulting services necessary to enable City to install, operate and maintain the Electric System, including, without limitation, assistance in preparing requests for qualifications, requests for proposal, technical specifications and other bid documents for the design and construction of City's Electric System and for the procurement of all necessary equipment to be integrated into the Electric System ("Equipment"). As part of such services, ENCO will provide to City options for its preliminary operating criteria for its Electric System sufficient in detail to enable City to select, from among such options, operational criteria for its Electric System that it deems necessary for the level of Electric Service that City desires to provide to its customers. ENCO will oversee the design and engineering work necessary to establish system design criteria satisfactory to meet City's selected operating criteria.

2. **Construction Management Services.** ENCO shall provide comprehensive Construction Management Services for the construction of the City's Electric System. Such services shall be provided under separate Work Order Authorizations and shall generally consist of the following:

ENCO will plan, prepare for and supervise construction of all Electric Systems, installation of Equipment, and perform other related activities, including management of all construction activities, to be undertaken in connection with the implementation of the program.

ENCO will prepare the time schedules and a schedule control system for the implementation of Electric Services and construction of the Electric System, and shall manage the progress of all work.

ENCO will prepare a detailed initial budget and cost control system for the EPC Services, and will provide revised budgets from time to time during the course of the EPC Services, and shall monitor the cost of such services.

ENCO will promptly report to City any non-conformity or potential problems with City's objectives for quality construction, timely completion and economy, as well as compliance with the City's approved construction budget, time schedule and cost control system.

MV00250947

ENCO shall organize all construction progress meetings and control all written communications between City staff and any contractors.

ENCO shall evaluate and make recommendations to City regarding contractor change order requests, shall process all such requests, and shall make written recommendations regarding any disputes.

ENCO shall supervise, in conformance with City's acceptance criteria, the testing of the physical performance of the Electric System installed by contractors, where design and EPC Services was either performed or managed by ENCO and shall manage the performance of contractors under applicable warranties provided by such contractors.

ATTACHMENT C

FEES FOR EPC SERVICES

Subject to the reimbursement provisions set forth in Section 5.1 of this Agreement, City shall reimburse ENCO for services performed under this Agreement, at the City's direction and as its agent, for Developers and others as set forth below:

1. For performance of EPC Services using ENCO personnel, ENCO shall be compensated accordingly to the following schedule

   a. Hourly Rates for ENCO Personnel:

Principal	$195.00
Project Manager	$155.00
Distribution Engineer	$120.00
Construction Manager	$95.00
Senior Designer	$90.00
Financial Analyst	$90.00
Inspector	$75.00
Auto-CAD Drafting	$70.00
Administrative/Clerical	$45.00

   Effective January 1, 2004, hourly rates may be adjusted annually. Such annual adjustments shall not reflect a greater increase than the Los Angeles/Orange County consumer price index for that year.

   b. Reimbursable Expenses:
   Direct expenses actually incurred by ENCO in the provision of the EPC Services under this Agreement shall be reimbursed at cost, with no additional mark-up. Such reimbursable expenses include, but are not limited to, all travel expenses (with mileage at the IRS approved rate), lodging, long distance telephone and facsimile charges, photo-copying and printing costs, taxis and auto rental, postage, filing fees, word processing costs, transcript costs, secretarial overtime, notary fees and other expenses incurred on behalf of City.

2. For performance of EPC Services, exclusive of construction management services, using third party contractors, ENCO's sole compensation shall be the costs paid by ENCO to such third party contractors, plus a mark up of ten percent (10%) of such services.

3. For performance of construction management services under the Agreement using third party contractors, ENCO's sole compensation shall be the costs paid by ENCO to such third party contractors, plus a mark up on such costs of fifteen percent (15%) of the construction services and fifteen percent (15%) of supplies and materials related to such services.

MV00250950

ATTACHMENT D

INSURANCE REQUIREMENTS

All insurance shall be maintained with insurers licensed to do business in California possessing an A.M. Best Company rating of A minus (VII) or better.

Required Insurance: ENCO shall be required to procure and maintain the following insurance, in the amounts set forth below:

Professional Liability: ENCO shall procure and maintain, at its sole expense, throughout the term of this Agreement and any extension thereof, Professional Errors and Omission Insurance coverage in the form and substance and with carriers acceptable to the City. Such coverage limits shall not be less than two million dollars ($2,000,000) per claim and aggregate.

General Liability: During the entire term of this Agreement, ENCO agrees to procure and maintain General Liability Insurance in form and substance and with carriers acceptable to the City at its sole expense to protect against loss from liability imposed by law for damages on account of bodily injury, including death therefrom, suffered or alleged to be suffered by any person or persons whomever, resulting directly or indirectly from any act or activities of ENCO, its sub-consultants, subcontractors, affiliates, or any person acting for ENCO or under its control or direction, and also to protect against loss from liability imposed by law for damages to any property of any persons caused directly or indirectly by or from acts or activities of ENCO or its subconsultants, subcontractors, affiliates, or any person acting for ENCO or under its control or direction. Such Public Liability and Property Damage Insurance shall be maintained in full force and effect throughout the terms of the Agreement and any extension thereof in the minimum limits provided below:

General Liability

Bodily Injury	$1,000,000 (one million dollars) per occurrence
Property Damage	$ 500,000 (five hundred thousand dollars) per occurrence

A combined single limit policy with aggregate limits in the amount of ten million dollars ($10,000,000) will be considered equivalent to the above minimum limits.

If the operation under this Agreement results in an increased or decreased risk in the opinion of the City Manager, then ENCO agrees that the minimum limits hereinabove designated shall be changed accordingly upon request by the City Manager. Any decreases to the minimum insurance limits, must be approved, in writing, by City's City Council, or the Commission of the Moreno Valley Municipal Utility.

MV00250951

Automobile Liability: ENCO shall procure and maintain, at its sole expense, and throughout the term of this Agreement and any extension thereof, Public Liability and Property Damage Insurance coverage for owned and non-owned automotive equipment operated during the course of providing the Professional Services. Such coverage limits shall not be less than one million dollars ($1,000,000) combined single limit.

Workers' Compensation: ENCO shall procure and maintain, at its sole expense, Workers' Compensation Insurance in such amounts as will fully comply with the laws of the State of California and which shall indemnify, insure and provide legal defense for both ENCO and the City, RDA and CSD against any loss, claim, or damage arising from any injuries or occupational diseases happening to any worker employed by ENCO in the course of carrying out the Agreement.

Certificates of Insurance: A Certificate of Insurance, or an appropriate insurance binder evidencing the above insurance coverage shall be submitted to the City Clerk prior to the execution of this Agreement on behalf of the City. The Certificate of Insurance or an appropriate binder shall bear an endorsement containing the following provisions:

> "Solely as respect to services done by or on behalf of the named insured for the City of Moreno Valley, it is agreed that the City of Moreno Valley, the Moreno Valley Municipal Utility, the Community Redevelopment Agency of the City of Moreno Valley, and the Moreno Valley Community Services District, their officers, employees and agents are included as additional insured under this general liability policy and the coverage(s) provided shall be primary insurance and not contributing with any other insurance available to the City of Moreno Valley, the Moreno Valley Community Redevelopment Agency, and the Moreno Valley Community Services District, its officers, employees and agents, under any third party liability policy."

Insurance companies providing insurance hereunder shall be rated A minus (VII) or better in Best's Insurance Rating Guide (or successor publication) and shall be legally licensed and qualified to conduct insurance business in the State of California.

The terms of the insurance policy or policies issued to provide the above insurance coverage shall not be amended to reduce the above required insurance limits and coverages nor shall such policies be canceled by the carrier without thirty (30) days prior written notice by certified or registered mail of amendment or cancellation to the City, except that cancellation for non-payment of premium shall require ten (10) days prior written notice by certified or registered

MV00250952

mail. In the event the said insurance is canceled, ENCO shall, prior to the cancellation date, submit to the City Clerk new evidence of insurance in the amounts established.

ATTACHMENT E

O&M SERVICES

This Attachment is part of the Professional Services Agreement between the City and ENCO, and is subject to all of the terms and conditions therein. ENCO agrees to provide the following O&M Services for the Overhead and Underground Electric System:

SECTION 1. OPERATION AND MAINTENANCE OF THE SYSTEMS

1.1 Scope of Operation and Maintenance Services

ENCO shall perform operations and maintenance services necessary to allow the City to provide Electric Services to Customers through the Overhead and Underground Electrical System ("System") in accordance with the provisions of the Agreement. ENCO shall perform such services under the City's general direction in accordance with its standard policies and procedures and with applicable law, and in accordance with Good Utility Practice. ENCO shall deliver services to the customers of the City in the name of the City. ENCO vehicles will be identified as City electric utility vehicles. ENCO employees will carry identification identifying them to be City-approved contractors. Such services shall include, but not be limited to:

(a) Perform routine and emergency operations (on a twenty-four hour per day basis as necessary) and maintenance of the System, including routine preventive maintenance, testing, patrols, replacement and inspection of the System. ENCO shall secure any permits required for the performance of all operations and maintenance activities.

(b) Provide qualified personnel to perform or cause to be performed the O&M Services, train its employees in skills, techniques and procedures, and implement management programs, which will enable ENCO to perform the O&M Services in accordance with the standards set forth in the Agreement.

(c) In the event of any interruption in the operation of the System or any part thereof, exercise reasonable efforts to restore the System to operation as soon as is reasonably possible.

(d) Procure Material as required to perform the O&M Services. ENCO may, in performing the O&M Services, procure and employ used and/or refurbished material consistent with Good Utility Practice.

(e) Provide engineering and technical services as required to support operation and maintenance of the System, including betterment and reliability analysis, surveillance, testing, calibrations, and diagnostic analysis.

MV00250955

(f) Maintain operation and maintenance logs, as-built maps and records for the System. ENCO may, and upon request by the City shall, provide copies of such logs, maps and records to the City.

(g) Install, maintain, repair and replace Meters in accordance with City Tariff.

(h) Process turn-ons, turn-offs and switches of electrical service and other Customer orders and requests, and disconnect electrical service, in accordance with City Tariff.

(i) Develop, and provide to the City, maps and records for the design and operation of the System, and update such as needed to reflect actual System inventory, configuration and status. The City shall be responsible for maintaining copies of such maps and records.

(j) Prepare all applications necessary to interconnect the City's Electric System to the appropriate electrical grid, and negotiate on City's behalf the related interconnection agreements, subject to review and approval by City's attorneys.

(k) Prepare draft reports on behalf of the City to any governmental authority having jurisdiction over municipal utilities including the Federal Energy Regulatory Commission, where applicable.

(l) Analyze or prepare proposed changes or modifications to City Tariffs or any contract or other arrangement with a Customer with respect to Electric Services.

(m) Provide the marking of existing City owned electric utility infrastructure as requested via USA Dig Alert for all non new electric system construction related alerts.

(n) Repair any reported street lights out within five (5) working days of notification of the light being reported out.

(o) Draft and/or update the appropriate policies, procedures, tariffs and related forms, including but not limited to Line Extension Agreements, temporary service agreements, added facilities agreements and applications for service, and utility operation standards for the City's Electric Utility.

1.2 Scope of Commodity Management Services

Assist the City with the acquisition of energy required for the City to service Customer loads, securing scheduling, coordination and ancillary services and arranging for scheduling and delivery of the electrical energy to the System subject to City direction.

MV00250956

1.3 Excluded Services

Notwithstanding any other provision of this Agreement, ENCO shall not be required to perform the following services or any other service beyond those specified in Subsection 1.1 in this Attachment E, "O&M Services:"

(a) Operate or maintain any electrical energy generation facilities;

(b) Provide "behind-the-Meter" services, i.e., services on the consumer side of the Meter;

(c) Pay Taxes and other charges on behalf of the City with respect to the System or Electric Services, and file with any applicable taxing or other authorities any reports for taxes or fees and pay or remit to any applicable taxing authorities all such taxes or fees and any applicable interest, penalties, and tax or fee surcharges for taxes or fees assessed to the City;

(d) Provide any energy conservation and load management services associated with the use of Public Purpose Program Funds;

(e) Fund the replacement, maintenance or repairs for (a) any single piece of equipment, the purchased cost of which is five thousand dollars ($5,000) or more, or (b) any single piece of equipment, the installed cost of which is ten thousand dollars ($10,000) or more.

1.4 Other Services

If any service not identified herein is required to be provided by rule or order, the Parties shall negotiate who, and how such services shall be provided, and any payment to ENCO, if agreed, for providing any such service.

SECTION 2. OTHER ADMINISTRATIVE SERVICES

2.1 Administration of Certain Third Party Claims

ENCO may, at its option, administer any specific claim against third parties for any physical damage to the System and if it chooses to do so, may, at its sole cost and expense, initiate or commence any lawsuit, action or other proceeding in connection with such claims. All proceeds (including insurance proceeds) from any such proceeding shall be retained by ENCO. The City shall execute such documents and take such actions as may reasonably be required to allow ENCO to administer such claims, including assigning to ENCO any rights to such claims or insurance proceeds thereof (including any rights of subrogation).

MV00250957

2.2 Accounting

ENCO shall provide the City with a monthly accounting and other information regarding the Professional Services as the City may reasonably require in the maintenance of their own books and records. ENCO shall not be required to maintain books and records on behalf of the City or to perform any other accounting services for the City, including:

(a) Maintaining plant accounting records;

(b) Preparing, maintaining and administering internal controls and conducting or administering audits;

(c) Administering and paying Taxes and fees; and

(d) Administering and paying salaries and related Taxes for City employees.

SECTION 3. TREATMENT OF HAZARDOUS MATERIALS; PERMIT COMPLIANCE

3.1 Management of Hazardous Materials

ENCO shall be responsible for the on-site management of all hazardous substances and wastes (including waste Hazardous Materials) generated by or used in the operation or maintenance of the System. The City shall be identified to any governmental authority as the party responsible for the generation, treatment, storage and disposal of all wastes (including waste Hazardous Materials) generated by or used in the operation or maintenance of the System (and, therefore, the City shall be designated as the "generator" on all manifests relating to all such wastes). ENCO shall be solely responsible for arranging for the offsite transportation and disposal of all wastes (including Hazardous Materials) generated by the operation or maintenance of the System. ENCO shall use commercially reasonable efforts to prevent the release of any Hazardous Materials into the air, soil or groundwater at the System, but ENCO shall not be responsible under this Agreement for any Hazardous Materials released into the air, soil or groundwater at or from the System, unless such release of Hazardous Materials was caused by ENCO's negligence or willful misconduct.

3.2 Environmental Permit Compliance

Notwithstanding Section 3.1 above or any other provision of this Agreement, the City shall be the named permitee, and shall be responsible for compliance with all applicable permits and conditions therein, other than any noncompliance caused by ENCO's acts or omissions.

SECTION 4. METER READING SERVICES

4.1 General

MV00250958

ENCO shall, on a monthly basis, read, remotely or physically (or attempt to read) and validate data from Meters, and edit and estimate such data as may be necessary for ENCO to bill Customers for electrical energy pursuant to this Agreement. ENCO shall perform such Meter reading services in accordance with metering standards and requirements to be mutually developed by the Parties.

(a) ENCO shall endeavor to schedule a Customer's Meter Reads on a 27 through 33 day Read Range so that a Customer's City Charges can be included in ENCO's regularly scheduled Customer account statement. However, ENCO reserves the right to read a Customer's Meter outside such Read Range if necessitated by operational requirements. ENCO shall read Meters over a 21 business day period for each month and shall not be required to read Meters on any Holiday.

(b) ENCO shall use reasonable efforts to obtain Meter Reads on all available Meters on the Customer's Meter Read Date. ENCO shall not be liable for a Customer's reliance on an incorrect Meter Read, or for ENCO's failure to read a Meter on the Customer's Meter Read Date.

(c) ENCO shall adjust a Customer's City Charges to reflect any underbilling or overbilling resulting from an error in usage data, or for any period during which a Meter was not operating properly, and shall reflect such adjustments on the Customer's next account statement or other statement reflecting Customer's billing to date. ENCO shall use reasonable efforts to remedy any unauthorized use of electricity by a Customer, consistent with the tariff adopted by the City as it may be amended from time to time.

4.2 Data Maintenance and Storage

The Parties shall develop mutually determined policies and procedures for ENCO to maintain, store and provide the City with access to current and historical Meter and usage data for Customers.

4.3 Reasonable Assistance

The City shall provide such information, assistance and cooperation as ENCO may reasonably request in connection with ENCO's performance of the Meter reading services. Without limiting the foregoing:

(a) The City shall make reasonable arrangements for meter readers to have access to all Meters, including securing for ENCO (at no cost to ENCO) the right to use those rights of way, easements, and any additional rights of access required to access Meters.

MV00250959

(b) The City shall provide duplicate keys for all Customer Access Keys with addresses for such Customer Access Keys, and shall provide special instructions and/or maps for difficult Meter access.

(c) ENCO may change the Meter reading procedures set out above in this Section 4 with the approval of the City, which shall not be withheld unreasonably. ENCO shall give written notice to the City that includes the changed or new procedures it proposes to implement and the date on which it intends to implement them, which shall be not less than 30 days after the notice is given. If the City does not object to the proposed change within 30 days after the notice is given, City shall be deemed to have approved the change.

SECTION 5. PROPERTY RIGHTS

Once the City has acquired title to the System, all capital additions and improvements made by ENCO pursuant to this Attachment shall remain the property of the City, and the City shall bear all risk of loss associated therewith upon completion of the addition or improvement, unless caused by ENCO's acts or omissions. ENCO shall operate and maintain the System free and clear of all Liens resulting from the Professional Services, other than liens existing on or prior to the Effective Date.

SECTION 6. MISCELLANEOUS

6.1 Additional Defined Terms

In addition to the terms defined in Attachment A, "Definitions" of the Agreement, the following terms, when used in this Attachment with initial capitalization, shall have the meanings specified in this Section:

(a) Customer Access Keys - Keys needed to obtain access to Meters, including gate, lock and cabinet keys.

(b) Meter Read Date - The date on which a Customer Meter is scheduled for reading by ENCO.

(c) Meter Reader - A ENCO employee or agent who reads Meters.

(d) Meter Reads - Numbers taken or attempted to be taken from Meters which reflect electric consumption or estimated under certain circumstances.

(e) Read Range - The number of days between Meter Read Dates.

MV00250960

ATTACHMENT F

CUSTOMER ACCOUNT SERVICES

This Attachment is part of the Professional Services Agreement between the City and ENCO, and is subject to all of the terms and conditions therein. As of the Effective Date, the Customer Account Services described in this Attachment (the "Customer Account Services") relate to the retail electric service described in this Agreement. ENCO agrees to provide the following Customer Account Services for Customers receiving Electric Services, consistent with the City Tariffs adopted and as may be modified from time to time:

SECTION 1. ESTABLISHMENT AND MAINTENANCE OF ACCOUNTS

1.1 Establishment of Accounts

ENCO will establish an Account for each Customer in its billing system. ENCO will maintain records of any changes to a Customer's Account information (e.g., name, billing address or telephone number change).

1.2 City Customer Deposit Requirements

Customers will be required to establish satisfactory credit or to pay to the City a security deposit for Electric Services prior to receiving Electric Services in accordance with applicable law and credit policies and procedures described in City Tariff, Electric Rule 6 - Establishment and Reestablishment of Credit and Electric Rule 7 – Deposits. ENCO shall collect Customer Deposits for the City, and deposit such funds into a bank account designated by the City. ENCO shall notify City of the amount of any deposits received from Customers. Customers will be entitled to refunds of Customer Deposits in accordance with applicable law and credit policies and procedures described in City Tariff, Electric Rule 7 - Deposits. ENCO shall notify the City when any deposits are required to be returned or paid to a Customer. ENCO shall notify the City of any interest that may be due on such Customer Deposit is due to Customer. City shall issue checks for such Customer Deposits, which checks shall be forwarded to ENCO for distribution Customers. Deposits and interest not required to be returned to Customers upon termination of service shall become the property of the City.

1.3 Termination of Account

ENCO will terminate a Customer's Account if the Customer cancels Electric Services, or for nonpayment of City Charges (as described in Section 4of this Attachment). ENCO will not terminate a Customer's Account for any other reason without the City's approval.

MV00250961

1.4 Billing Reports

ENCO will electronically notify the City monthly of (a) the number of Accounts established and terminated, (b) the total number of accounts and aggregate amount of City Charges billed, and (c) the aggregate amount of adjustments to City Charges previously billed or collected.

SECTION 2. CUSTOMER BILLING PROCEDURES

2.1 Calculation of City Charges

ENCO will calculate City Charges for Customers receiving Electric Services based on City Tariffs and, to the extent applicable, Customers' usage data. ENCO will screen all Customer usage data for accuracy in accordance with its standard practices prior to calculating City Charges. ENCO will include City Charges in the Customer's account statement on ENCO's next scheduled billing date. In the event that ENCO does not receive the usage data or other information necessary to calculate City Charges by such date, such City Charges shall be included in the Customer's following account statement or on an interim bill so that the customer's current charges reflect usage billed to date.

2.2 Customer Account Statement

ENCO will bill a Customer for City Charges for any calendar month in accordance with the Billing Cycle Schedule for the Customer's account statement. The Parties shall mutually determine the substance, format, and Billing Cycle Schedule for all Customer account statements. The City may request that ENCO include inserts or other messages with the Customer account statement, provided that the City shall be required to pay any incremental printing and other costs associated with such insert. ENCO will deliver Customer bills by regular U.S. mail or any other medium requested by the City, provided that the City shall be required to pay any incremental delivery costs.

2.3 Adjustments to City Charges

ENCO will attempt to resolve all Customer disputes relating to City Charges in accordance with policies and procedures described in City Tariff, Electric Rule 10 – Disputed Bills. ENCO shall have no responsibility for resolving Customer disputes regarding City Tariffs, including disputes regarding the terms thereof and the application of specific rate schedules to a particular Customer, and shall refer all such disputes to the City. Any adjustments to a Customer's City Charges will appear on the Customer's next account statement or interim "billed to date" billing. Any overcharges previously paid by a Customer shall, as permitted by City Tariff, Electric Rule 14 – Adjustments of Billing Error, be credited on the Customer's next

MV00250962

account statement or interim "billed to date" billing. ENCO shall have no obligation to return or pay such amounts to Customer.

SECTION 3. CUSTOMER PAYMENTS

3.1 Processing

ENCO shall process all payments received from Customers by remitting such payments to the City. All payments received shall be deemed the property of City. Such payments received by ENCO shall not be deemed payments to ENCO hereunder.

3.2 Partial Payments; Priority

ENCO will credit all partial payments received from a Customer in the order established by the City in its Tariff.

SECTION 4. COLLECTION AND NONPAYMENT

4.1 Collection of City Charges By ENCO

ENCO, with assistance from the City, will collect City Charges in accordance with City Tariff, Electric Rule 8 – Notices, Electric Rule 9 – Rendering and Payment of Bills, and Electric Rule 11– Discontinuance and Restoration of Service, and will notify Customers of amounts overdue for City Charges in accordance with the City Tariffs. Such collection practices shall conform to all requirements of applicable law. ENCO will reconcile amounts collected against City Charges for each Customer Account and identify Customer Accounts with past due balances.

Collection of Customer Charges shall be available by mail-in, walk-in, and such other forms when it is economically feasible to establish. ENCO will establish a U.S. Post Office Box for receipt of mailed payments. Customers will also be able to pay City Charges by walking into the City Offices to make payment. All payments received will be deposited into the City's designated bank account within 24 hours of receipt.

4.2 Nonpayment of City Charges

Except as set forth in Section 4.1 immediately above, ENCO shall be responsible for collection of City Charges from Customers. ENCO will pursue collection of unpaid, overdue amounts from customers in accordance with City tariffs and collection policies including termination of the customer's electric service for nonpayment of City Charges as set forth in Electric Rule 8 – Notices, Electric Rule 9 – Rendering and Payment of Bills, and Electric Rule 11 – Discontinuance and Restoration of Service.

MV00250963

4.3 Termination of Customer's Electric Services

ENCO will terminate a Customer's Electric Services for nonpayment of City Charges in accordance with the termination policies and procedures described in City Tariff, Electric Rule 11 – Discontinuance and Restoration of Service..

4.4 Use of Collection Agency

ENCO will work with the City to identify and select a Collection Agency(s) to assist with the continued collection efforts. The Collection Agency will be used in accordance with City Tariff, Electric Rule 8 – Notices, Electric Rule 9 – Rendering and Payment of Bills, and Electric Rule 11– Discontinuance and Restoration of Service and only to collect unpaid City Charges after Customer's electric service has been terminated for nonpayment, or if the customer should request that his service be closed and such closing bill is not paid within City established timeframe.

SECTION 5. CUSTOMER INQUIRIES

5.1 Toll Free Telephone Number

ENCO will make a 8-hour, 5-day-a-week toll free telephone number available to Customers or potential Customers for inquiries related to Electric Services (including Customer inquiries regarding City Charges and other matters concerning Customer account statements, outages, usage, payments and deposits, City Tariffs and turn-ons, turn-offs and transfers of Electric Services), and will include such number on each Customer's account statement.

5.2 Responsibilities of ENCO Telephone Representatives

ENCO telephone representatives will be available to answer inquiries related to Electric Services. Certain basic Customer inquiries may be handled by interactive voice response. ENCO will provide a separate toll-free telephone number for customers to call for electric systems outages outside normal business hours. ENCO will be responsible for adequately training its personnel to answer Customer inquiries.

5.3 Responses to Customer Inquiries

ENCO shall develop policies and procedures for ENCO telephone representatives to respond to Customer inquiries, including policies and procedures, approved by the City, for processing requests for turn-ons, turn-offs and transfers of Electric Services, generating service orders and scheduling service calls based on such requests, and communicating such orders and schedules to ENCO personnel performing applicable field service work. ENCO will attempt to resolve Customer inquiries in accordance with such policies and procedures. ENCO shall have no responsibility for resolving Customer inquiries regarding City Tariffs, including disputes

MV00250964

regarding the terms thereof or the application of specific Rate Schedules to particular Customers, and shall refer all such inquiries and disputes to the City.

5.4 Records

ENCO shall maintain records of inquiries of Customers or potential Customers, including resolution of such inquiries, in accordance with its standard practices, and shall update Customer account records to reflect Customer inquiries on a regular basis.

5.5 Communications

In order to minimize Customer dissatisfaction and expedite the resolution of service and adjustment claims, ENCO and the City shall establish appropriate lines of communication to address specific non-routine situations.

SECTION 6. FEES AND SURCHARGES BILLED TO CUSTOMERS

6.1 Reports to the City.

ENCO will provide monthly reports to the City in support of any Utility Users Tax and surcharges billed to Customers for Electric Services. In addition, at the City's request, ENCO will make available to the City all existing information in ENCO's possession reasonably necessary for the City to file their Tax or energy fee reports, or comply with audits. ENCO will notify the City if any taxing or other authority advises ENCO that it intends to audit records in ENCO's possession, custody, or control with respect to Taxes or fees that the City may be required to pay or for which the City may be required to reimburse ENCO.

6.2 ENCO as Billing Agent

ENCO will not be entitled to retain or receive from the City any statutory fee or share of Taxes or fees to which the person collecting such Taxes or fees is entitled under applicable law. As a billing agent, ENCO is billing City Charges for a specific fee. ENCO will not report these billings as its own receipts for gross receipts Tax purposes or any other Tax purpose, unless otherwise required by applicable law.

SECTION 7. TAX LIABILITIES

7.1 General

The indemnities provided for in this Section 7 shall be the sole indemnification provided by either Party with respect to the Tax and fee matters covered in this Attachment. Neither the indemnification provisions nor the claim limitation provisions contained elsewhere in the Agreement shall apply to the Tax and fee matters covered in this Attachment.

MV00250965

7.2 Indemnity by the City

The City agrees to indemnify, defend, and hold harmless ENCO from and against any and all liabilities or losses resulting from any Tax, fee, interest, penalty, addition to Tax or fee, Tax or fee surcharge, or other charge or expense (including attorneys' fees and other reasonable expenses incurred in defending claims or actions for such charges) incurred by ENCO as a result of:

(a) The delay or failure of the City, for any reason, to pay any Tax or fee or file any Tax or fee report or other Tax or fee information as required by applicable law or the Agreement;

(b) ENCO complying with the Agreement or any determination or direction by or advice of the City or correctly using information provided by the City in performing any Tax or fee-related service hereunder;

7.3 Indemnity by ENCO

ENCO agrees to indemnify, defend, and hold the City harmless from any and all liabilities or losses resulting from any Tax or fee penalty or other similar charge or expense (including attorneys' fees and other reasonable expenses incurred in defending claims or actions for such charges) incurred by the City as a result of incorrect usage of Tax or fee rates provided by the City or as a result of the willful misconduct or gross negligence on the part of ENCO.

7.4 Reimbursement of ENCO

Should any taxing or other authority determine that any Taxes or fees (including interest, penalties, additions to Taxes or fees, and Tax or fee surcharges) that have not been paid by the City are payable by ENCO to the taxing or other authority as a result of ENCO's performance of any obligation under the Agreement, ENCO shall so advise the City. The City shall be liable for all such Taxes, fees, interest, penalties, additions to Taxes or fees and Tax or fee surcharges. The City shall, at its option and expense (including reimbursement or payment of any such assessment prior to final resolution of the issue), have the right to seek a ruling as to the applicability of any such Tax or fee or to protest any assessment and participate in any legal challenge to such assessment, but shall be liable for all Taxes, fees, interest, penalties, additions to Taxes or fees, and Tax or fee surcharges ultimately determined to be due. ENCO shall, when requested by the City and at the City's expense, cooperate or participate with the City in any such proceeding, protest, or legal challenge, provided that ENCO may decline to participate if ENCO determines, in its sole discretion, that such participation may result in contempt proceedings against ENCO.

MV00250966

ATTACHMENT G

DESCRIPTION OF ELECTRIC SYSTEMS

The Electric System is comprised of all materials, equipment and appurtenances necessary for the provision of Electric Services, from the transmission lines to the Customer Meters, including, but not limited to, the following components: 12kV Distribution system consisting of components such as structures, transformers, cable, switches, ducts, enclosures, services and meters, and street lights, 115kV overhead transmission line, and 115/12 kV distribution substation.

MV00250967

ATTACHMENT H

A. BASE PRO FORMA RATES AND SPECIAL CHARGES

Included in this attachment are the base pro forma rates that will be used for calculation of ENCO compensation. Provided below are the Distribution and Energy Components. The City, at all times, maintains the right to set rates and tariffs that may differ from these pro forma rates and special charges. However, notwithstanding anything to the contrary contained herein, in the event any City Tariff and rate are reduced at any time and such reduction reduces the amount that would have been available for disbursement pursuant to Section 5.1(b) absent such reduction, then, notwithstanding Section 5.1(b), ENCO shall receive as a disbursement from the City amounts that would have been available for disbursement, absent such reduction in Tariffs, and the City shall receive a disbursement equal to the remaining Distribution Component, if any.

BASE PRO FORMA RATES

The following rates are derived from the Southern California Edison (SCE) rate schedules effective August 1, 2003 as indicated below;

Tariff:	**Distribution Component[1]**		**Energy Component[2]**
Domestic Service – Schedule A	*Summer*	*Winter*	
(Derived from SCE Rate Schedule D – Domestic Service)			
Monthly Charge	***($/Day)***	***($/Day)***	
Single Family	*$0.029*	*$0.029*	
Multi Family	*$0.022*	*$0.022*	
KWh Charge	***($/kWh)***	***($/kWh)***	
Baseline	$ 0.01851	$ 0.05978	
Above Baseline	$ 0.01851	$ 0.05978	

[1] The Distribution Component is intended to include all base charges, and other charges not specifically related to energy costs, as reflected in SCE's Tariff.

[2] The Energy Component (the "Energy Revenue") is defined as the cost of power and the cost of delivering the power to the City Electric System.

MV00250968

	Summer	Winter
General Service – Schedule B		
(Derived from SCE Rate Schedule GS-1 – General Service Non-Demand)		
Monthly Charge	***($ /Day)***	***($ /Day)***
Single Phase	$0.31	$0.31
Poly Phase	$0.38	$0.38
	($ / kWh)	***($ / kWh)***
KWh Charge	$ 0.03754	$ 0.03754

	Summer	Winter
Large General Service – Schedule C		
(Derived from SCE Rate Schedule GS-2 – Demand Non-TOU Option)		
Secondary Service	***($ /Mo)***	***($ /Mo)***
Monthly Charge	$ 52.72	$ 52.72
KWh Charge	***($ / kWh)***	***($ / kWh)***
First 300 kWh per kW	$ 0.00968	$ 0.00968
Balance	$ 0.00968	$ 0.00968
Demand Charge	***($ / kW)***	***($ / kW)***
Single Phase	$6.46	$0.98
Poly Phase	$8.86	$3.38

Street Lighting Service – Schedule SL	
(Derived from SCE Rate Schedule LS-1 – Lighting – Street and Highway)	***All Year***
KWh Charge	***($ / kWh)***
All kWh	$ 0.01761
Monthly Charge	***Per Lamp / Mo***

MV00250969

9,500 Lumen HPSV	$5.68
16,000 Lumen HPSV	$5.68
22,000 Lumen HPSV	$6.08
Late Charge	0.9% of Unpaid Balance per month

DETERMINATION OF PRO FORMA RATES

The Base Pro forma Rates as shown in Section A of this Attachment are derived by taking SCE's current rates effective August 1, 2003 and preparing a table that separates these rates into their elements such as transmission, distribution, generation and others. The elements are then spread to the Distribution Component, Energy Component, and Public Purpose Programs component. The resulting Distribution Component numbers are the Base Pro forma Rates.

B. SPECIAL CHARGES

Item	Charge
Service Establishment Charge	$ 10.00
Return Check Charge	$ 20.00
48 Hour Field Notification	$ 10.00
Field Collection Charge	$ 30.00
Meter Test Deposit – (Refunded if Meter Registers Within Parameters)	
Meter Installed Without Current or Potential Transformer	$ 20.00
Meter Installed With Current or Potential Transformer	$100.00
Reconnection Charge	
Meter Panel – Next Day	$ 20.00

MV00250970

Meter Panel – Same Day During Working Hours	$ 30.00
Meter Panel – Weekends and After Hours	$ 50.00
Pole/Service Structure – Next Day	$ 60.00

ATTACHMENT I

OPERATING DEFICIT AGREEMENT

This Operating Deficit Agreement (this "Agreement") is entered into as of _____, 2003, by and between SRM-ENCO, LLC, a Delaware limited liability company authorized to do business in California ("Parent") and ENCO Utility Services Moreno Valley, LLC, a Delaware limited liability company authorized to do business in California ("ENCO"). Parent and ENCO are sometimes collectively referred to as the "Parties" and individually referred to as "Party." Capitalized terms used herein and not defined herein shall have the meanings assigned to such terms in that certain Professional Services Agreement of even date herewith between the City of Moreno Valley ("City") and ENCO ("Professional Services Agreement").

RECITALS:

A. City intends to own electric transmission, distribution and related facilities which will constitute and support City's electric distribution system.

B. City has retained ENCO to provide Professional Services in accordance with the Professional Services Agreement.

C. ENCO is a wholly-owned subsidiary of Parent.

D. As a condition to the City entering into the Professional Services Agreement, the City requires the execution of this Agreement.

E. Parent will derive direct and indirect benefit from ENCO entering into the Professional Services Agreement.

NOW, THEREFORE, the Parties agree as follows:

SECTION 1. Undertaking. Parent hereby unconditionally and irrevocably covenants and agrees with ENCO as follows:

(a) If at any time during the Term (as defined below) ENCO lacks sufficient funds to meet all of its Operating Expenses (as defined below) when due ("Operating Deficit Expenses"), then Parent shall advance ENCO all sums which are necessary for ENCO to timely pay or reimburse such Operating Deficit Expenses ("Advance"). Parent shall make the Advance not later than fifteen (15) business days following receipt of ENCO's notice requesting the Advance ("Notice of Advance"). For purposes of this Agreement, "Operating Expenses" shall

MV00250972

mean ENCO's normal monthly (i) salary, administrative and general expenses, and (ii) general operating, maintenance and customer service expenses.

(b) The Advance shall be in an amount equal to the amount set forth in the Notice of Advance.

(c) This Agreement is in no way conditioned or contingent upon any event, contingency or circumstance whatsoever other than Parent's receipt of the Notice of Advance.

(d) Parent acknowledges that it has received and reviewed a copy of the Professional Services Agreement and is familiar with the terms thereof.

SECTION 2. Obligations Unconditional. Subject to the provisions of Section 4 hereof, the covenants and agreements of Parent set forth in this Agreement shall be primary obligations of Parent and shall remain in full force and effect without regard to, and shall not be released, discharged or in any way affected by any circumstance or condition whatsoever, including, without limitation:

(a) Any amendment, modification, addition, deletion, supplement or renewal to or any other change in the Professional Services Agreement;

(b) Any failure, omission or delay on the part of ENCO to conform or comply with any term or condition of the Professional Services Agreement;

(c) Any waiver, consent, extension, indulgence, compromise, release or other action or inaction under or in respect of the Professional Services Agreement, or any exercise or non-exercise by the City of any right, remedy, power or privilege under or in respect of such agreement;

(d) Any merger or consolidation of ENCO or Parent into or with any other corporation or any sale, lease or transfer of any of the assets of ENCO or Parent to any other person; or

(e) Any change in the ownership of ENCO.

The obligations of Parent set forth herein constitute the full recourse obligations of Parent enforceable against it to the full extent of all of its assets and properties.

City shall be given at least sixty (60) days prior written notice of any merger or consolidation of Parent into or with any other corporation or any sale, lease or transfer of any material amount of the assets of Parent to any other person or entity. City shall be given

MV00250973

immediate notice should Parent (a) admit insolvency, (b) makes a general assignment for the benefit of creditors, (c) be unable to pay debts as they mature, (d) fail to provide adequate assurance of its ability to perform any material obligation when requested by a party entitled thereto, or (e) is subject to a Bankruptcy Proceeding.

SECTION 3. Waiver of Subrogation. Parent hereby irrevocably waives any claim or other rights which it may now or hereafter acquire against ENCO that arise from the existence, payment, performance or enforcement of Parent's obligations under this Agreement, including any right of subrogation, reimbursement, exoneration, or indemnification, whether or not such claim, remedy or right arises in equity, or under contract, statute or common law, including the right to take or receive from ENCO, directly or indirectly, in cash or other property or by set-off or in any manner, payment or security on account of such claim or other rights.

SECTION 4. Term of this Agreement. This Agreement and all agreements of Parent contained herein shall be discharged at the end of the fifth (5th) year of the Professional Services Agreement ("Original Term"). Notwithstanding the foregoing, provided that the City gives written notice to Parent and ENCO no later than six (6) months prior to expiration of the Original Term, the Original Term may be extended for one additional term of five (5) years, subject to all provisions of this Agreement ("Extended Term" and collectively with the Original Term, the "Term").

SECTION 5. Severability. In case any provisions of this Agreement or any application thereof shall be invalid, illegal or unenforceable, the validity, legality and enforceability of the remaining provisions and statements and any other application thereof shall not in any way be affected or impaired thereby. To the extent permitted by law, Parent hereby waives any provision of law that renders any term or provision hereof invalid or unenforceable in any respect.

SECTION 6. Further Assurances. The Parties hereby agrees to execute and deliver all such instruments and take all such actions as may be reasonably necessary from time to time to fully effectuate the purposes of this Agreement.

SECTION 7. Governing Law. This Agreement shall in all respect be governed by, and construed in accordance with, the laws of the State of California applicable to agreements made and to be performed entirely within such state, including all matters of construction, validity and performance.

SECTION 8. Binding Effect. This Agreement shall be binding upon the Parties and their successors, transferees and assigns and inure to the benefit of and be enforceable by the respective successors, transferees, and assigns of the Parties.

MV00250974

SECTION 9. Rights of the City. This Agreement is made for the benefit of, and shall be enforceable by the City as its interests may appear.

SECTION 10. Headings. The headings in this Agreement are for purposes of reference only, and shall not limit or otherwise affect the meaning hereof.

SECTION 11. Counterparts. This Agreement may be executed in any number of counterparts, including counterparts delivered by facsimile, each executed counterpart constituting an original, but all of which together shall constitute one agreement.

IN WITNESS WHEREOF, the Parties have caused this Agreement to be executed as of the date first above written.

OPERATING DEFICIT AGREEMENT

This Operating Deficit Agreement (this "Agreement") is entered into as of _____, 2003, by and between the City of Moreno Valley, a California municipal corporation (the "City") and ENCO Utility Services Moreno Valley, LLC, a Delaware limited liability company authorized to do business in California ("ENCO"). The City and ENCO are sometimes collectively referred to as the "Parties" and individually referred to as "Party." Capitalized terms used herein and not defined herein shall have the meanings assigned to such terms in that certain Professional Services Agreement of even date herewith between the City and ENCO ("Professional Services Agreement").

RECITALS:

A. City intends to own electric transmission, distribution and related facilities which will constitute and support City's electric distribution system.

B. City has retained ENCO to provide Professional Services in accordance with the Professional Services Agreement.

C. As a condition to the City entering into the Professional Services Agreement, the City requires the execution of this Agreement.

NOW, THEREFORE, the Parties agree as follows:

SECTION 1. Undertaking. ENCO hereby unconditionally and irrevocably covenants and agrees with the City as follows:

(a) If at any time during the Term (as defined below), the City's revenues from the provision of Electric Services are insufficient to meet all of the City's Operating Expenses (as defined below) in connection therewith when due ("Operating Deficit Expenses"), then ENCO shall advance the City all sums which are necessary for the City to timely pay or reimburse such Operating Deficit Expenses ("Advance"). For purposes of this Agreement, "Operating Expenses" shall mean the City's normal monthly salary, administrative and general expenses related directly to the operation of the City's Electric Utility System.

(b) ENCO shall make the Advance ("Advance Date") not later than fifteen (15) business days following receipt of the City's notice requesting the Advance ("Notice of Advance").

MV00250976

(c) The Advance shall be in an amount equal to the amount set forth in the Notice of Advance. In no event shall the total amount of Advances made or to be made by ENCO pursuant to this Agreement shall exceed One Million Dollars ($1,000,000).

(d) This Agreement is in no way conditioned or contingent upon any event, contingency or circumstance whatsoever other than ENCO's receipt of the Notice of Advance.

SECTION 2. Term of this Agreement. This Agreement and all agreements of ENCO contained herein shall be discharged at the end of the fifth (5th) year of the Professional Services Agreement ("Original Term").

SECTION 3. Payment of Interest. The City shall pay ENCO interest on the Advance at the rate equal to the authorized rate of return on equity of Southern California Edison Company in effect at the Advance Date, compounded monthly (computed on the basis of a year of 365 or 366 days, as the case may be, for the actual number of days elapsed from the Advance Date to the date of payment in full of the Advance). All payments shall first be applied to reduce or eliminate any interest owed on any Advance.

SECTION 4. Payment Date. Payment of the Advance and accrued interest thereon shall be made by the City, from any source of funds, at any time after the Advance Date, but in no event later than the fifth (5th) anniversary of the initial Advance Date.

SECTION 5. Severability. In case any provisions of this Agreement or any application thereof shall be invalid, illegal or unenforceable, the validity, legality and enforceability of the remaining provisions and statements and any other application thereof shall not in any way be affected or impaired thereby.

SECTION 6. Further Assurances. The Parties hereby agree to execute and deliver all such instruments and take all such actions as may be reasonably necessary from time to time to fully effectuate the purposes of this Agreement.

SECTION 7. Governing Law. This Agreement shall in all respect be governed by, and construed in accordance with, the laws of the State of California applicable to agreements made and to be performed entirely within such state, including all matters of construction, validity and performance.

SECTION 8. Binding Effect. This Agreement shall be binding upon the Parties and their successors, transferees and assigns and inure to the benefit of and be enforceable by the respective successors, transferees, and assigns of the Parties.

SECTION 9. Headings. The headings in this Agreement are for purposes of reference only, and shall not limit or otherwise affect the meaning hereof.

MV00250977

SECTION 10. Counterparts. This Agreement may be executed in any number of counterparts, including counterparts delivered by facsimile, each executed counterpart constituting an original, but all of which together shall constitute one agreement.

IN WITNESS WHEREOF, the Parties have caused this Agreement to be executed as of the date first above written.

Subject: Settlement Conference with State DOF

Mayor and City Council,

Suzanne Bryant and I met with department of Finance and State Attorney General representatives at 1:30 this afternoon. After an hour discussing relevant facts regarding the State's claim that the Successor Agency owed the State $3.6 million, the State reps agreed that the SA owes them nothing. We were successful in our effort to explain and win our argument on this issue.

This resolves all Housing Asset due diligence report issues and paves the way to quickly prepare a Property Management Plan and pursue a Finding of Completion from the State DOF. This is exciting news for the Successor Agency and the City.

Rick Teichert
Financial and Management Services Director

74	"Riverside County Sheriff's Department and it's contract agency (Moreno Valley) implemented a records management system mid-year 1999 and experienced technical problems with the system. Totals reported
75	for 1999 were not valid and should not be used to make comparisons. Therefore, to maintain comparability of 2000 data with 1999 data, counts are shown but not included in the subtotals or total selected
76	jurisdiction counts."
77	Note * 2: Shown above is the approximate % change for 1999 using 1998 v 2000 comparison. Per Lt. Hill at Riverside County Sheriff's Technical Services Bureau (TSB): "The Riverside County Sheriff's Department
78	implemented a new records management system in 1999 and experienced technical problems with the system. Totals reported for 1999 were not valid and should not be used to make comparisons."
79	What is shown is an average decrease in crime for 1999 by percentages using 1998 as base year and 2000 as the comparison year and then divide the year 2000 percentages by 2 to show an average
80	for each year, 1999 & 2000.
81	
82	
83	
84	
85	
86	
87	
88	
89	
90	Note: From Eric/TSB: Much like the MV01217010, case MV01212091 (Yes another 2001 case) was investigated as an accidental overdose at the time it occurred. In January 2003 a person
91	(Ruben Chavira)turned himself in, confessing to drowning the victim. Because the case was then classified as a homicide, we had to report it for January 2003. The victim was Valerie Ladelphia.
92	This case is the incident that is reflected on the Return A, Item A, and should appear as a homicide on the State's first quarter report.
93	
94	04/15/2004 Note From Eric/TSB: MVPD final 2003 Aggravated Assault total will be 468. The numbers that are posted on the DOJ website are "preliminary" numbers only which will be corrected later in the year 2004.

Subject: RE: March 19th - Study Session/Closed Session

Jane,

Please keep in close touch with the Mayor, who may wish to agendize the topic of Appointment of the City Attorney. We'll have a better idea of this within the next few days.

Thanks.

Tom

Subject: Library Staff Impacts

Tom,

Here are the final tallies of the Library staff members who would be affected by a transition to a contract Library Operation, and their respective bargaining units:

1 Division Manager (MVMA Member)
5 Professional Staff (MVMA Members)
5 FTC (MVCEA Members)
9 PTC (MVCEA Members)

Also: 3 Temps (Unrepresented)

Subject: Public Notice Publication Change - RETURN TO PE

Hello again,

I really regret to inform everyone that we must revert to posting our public / legal notices in the Press Enterprise.

Generally, in the absence of newspaper adjudication for a specific city, that city is free to use any adjudicated newspaper of general circulation in the county. However, the PE has implemented the business retention strategy of adjudicating the local editions of their paper specifically for the jurisdictions those editions target, in addition to adjudicating the entire publication throughout the County of Riverside. In other words, the PE adjudicated the Moreno Valley edition for the City. We understand that this strategy is found nowhere else in California.

As a result, until another newspaper of general circulation in Moreno Valley seeks local adjudication, the City is restricted to publishing legal notices in the Press Enterprise.

Please disregard the instructions to shift public notice publication to the Business Journal and revert to our previous process.

Thank you much and very sorry for the confusion!

Michele

Subject: Public Notice Publication Change

Hello All,

The City Manager's Office has evaluated the comparative rates for publishing Public Hearing Notices, Ordinances / Resolutions, and Bid Openings. It appears we can achieve savings by transitioning our notice publication to the Business Journal (a subsidiary of the Daily Journal of Los Angeles - a legal journal that is an adjudicated newspaper in Riverside County).

The attached Excel file documents 18 months of expenses paid to the Press Enterprise related to the City's publication of legal advertising. It provides a breakdown of amounts spent by department over the period of July 2011 through Dec 2012 (totaling $58,424 or approximately $40,000 per year). Unfortunately, we are not able to break down the expenses by notice category "Public Hearing Notices, Ordinances/Resolutions, and Bid Openings" because the nature of the notices published is not coded into the City's expense tracking management system.

Moving forward, the process for publishing public notices in the Business Journal:

1. City staff emails a .pdf of the file to be published and a description of the timeframe (date) for publication to the Business Journal at barbara_cortez@dailyjournal.com (The Business Journal can also be reached by phone at 951.784.0111).
2. Within 24 hours, the Business Journal will respond back with a price quote (calculated at $12 per column inch) and a proof of the notice layout.
3. City staff reviews / OKs the proof layout and price quote and emails the OK back to the Business Journal.
4. The Business Journal publishes the notice within 3-4 business days (note: they publish Mon. thru Fri.).
5. The Business Journal will establish an account for *each Department* and will bill publication expenses to a Cal-Card.

This transition should begin as soon as reasonably possible. If you have any questions, please feel free to call or email me.

Thanks!

Michele

Subject: Robbery arrest - Sunnymead Blvd.

Good morning,

On Tuesday 03-12-13, about 11:38 PM, officers responded to Tio's Tacos at 24195 Sunnymead Blvd. reference an armed robbery just occurred. Two suspects used a glass bottle to threaten an employee, then stole an unknown amount of currency from the business. MVPD SET officers were conducting high-visibility patrol on Sunnymead Blvd and began looking for the suspects described by the victim. Officers located both suspects at the FastTrip convenience store at the corner of Heacock and Sunnymead and detained them without incident. The suspects were later identified by the victim during an in-field line-up.

Suspect #1 was identified as Roosevelt Collins (50 years old), a transient living in the Moreno Valley area. Collins was on active parole at the time of his arrest. He was booked on charges of robbery and parole violation.

Suspect #2 was identified as Christopher Esquivel (38 years-old), a transient living in the Moreno Valley area. Esquivel is currently on Post Release Community Supervision (PRCS) thanks to AB 109. He was booked on charges of robbery, parole violation, and PRCS violation.

Subject: Staff Reductions

Honorable Mayor & Council Members,

Over the course of the day, Department Heads are notifying staff members who will be affected by the staffing reductions included in the Proposed Budget plan.

Layoffs are occurring in the following categories:

- Line staff (represented by MVCEA): 1 full-time employee, 1 part-time employee
- Management staff: 3 Division Managers, 1 Manager

This morning, we also notified Library staff members that the City is again considering options to outsource Library Services, and that the City has requested a proposal from the company that operates the Riverside County Library System.

We will continue to keep you apprised of significant developments.

Respectfully,

Tom

Hello Mayor Owings and Mayor Pro Tem Co,

As promised to Mayor Owings, I am forwarding the March JPA's staff report and resolution attachments regarding the proposed March LifeCare Community Facilities District, which is scheduled for March JPC consideration next Wednesday, March 20.

I will be reviewing the agenda, including this staff report, and preparing a summary as usual, but wanted to get the text to you as promised.

Thanks and have a nice weekend.

PUBLIC HEARING
OF THE
MARCH JOINT POWERS COMMISSION
OF THE
MARCH JOINT POWERS AUTHORITY

MJPA Public Hearing - Agenda Item No. 12b

Meeting Date: March 20, 2013

Actions: **APPROVE THE FOLLOWING ACTIONS FOR THE PROPOSED MARCH LIFECARE CAMPUS COMMUNITY FACILITIES DISTRICT: 1) ADOPT RESOLUTION #JPA 13-02 A RESOLUTION OF THE COMMISSION OF THE MARCH JOINT POWERS AUTHORITY, ADOPTING A BOUNDARY MAP SHOWING THE BOUNDARIES OF THE TERRITORY PROPOSED FOR INCLUSION WITHIN PROPOSED MARCH JOINT POWERS AUTHORITY COMMUNITY FACILITIES DISTRICT NO. 2013-01; AND 2) ADOPT RESOLUTION #JPA 13-03, A RESOLUTION OF THE COMMISSION OF THE MARCH JOINT POWERS AUTHORITY DECLARING ITS INTENTION TO ESTABLISH COMMUNITY FACILITIES DISTRICT NO. 2013-01 (MARCH LIFECARE CAMPUS) AND TO AUTHORIZE THE LEVY OF SPECIAL TAXES THEREIN TO FINANCE CERTAIN PUBLIC SERVICES. THIS COMMUNITY FACILITIES DISTRICT INVOLVES APPROXIMATELY 122 ACRES GENERALLY LOCATED SOUTHWEST OF CACTUS AVENUE AND HEACOCK STREET**

Motions:

1) Adopt Resolution #JPA 13-02, Adopting a Boundary Map showing the boundaries of the territory proposed for inclusion within proposed March Joint Powers Authority Community Facilities District No. 2013-01; and

MV00251017

2) Adopt Resolution #JPA 13-03, declaring the intention of the March Joint Powers Authority to establish Community Facilities District No. 2013-01 and to authorize the levy of special taxes therein to finance certain public services.

Background:

On September 19, 2012, by Resolution JPA#12-29, the March JPC approved goals and policies that allow for the formation of Community Facilities Districts (CFD). The attached resolutions initiate proceedings for the formation of a CFD that will provide annual funding for the servicing and maintenance of public improvements constructed by March Healthcare Development, LLC pursuant to the March LifeCare Campus Specific Plan.

The improvements to be serviced and maintained are located within public easements and rights-of-way dedicated for public use on Parcel Map 36035. These improvements include street lights, pedestrian lighting within the Public Realm easements, traffic signals, landscaping within parkways and Public Realm easements, drainage facilities (catch basins, inlets, outlets, storm drain, three bridge overcrossings, parallel drainage channel and detention basins), street sweeping, graffiti control, signage (monuments and directional kiosks) at major access points, transit shelters, seating area/trashcans, and appurtenances.

A maximum annual special tax in the amount of $4,305.20 per adjusted acre is proposed to finance servicing and maintenance of these improvements. This amount may be increased each July 1st thereafter by an amount equal to three percent (3%) of the previous Fiscal Year's annual special tax.

Following the approval of the two resolutions, the following actions are scheduled to occur:

- Record boundary map within 15 days
- Publish notice of public hearing 7 days prior to May 1, 2013
- Mail resolution of intention to County
- Registrar of voters determines number of registered voters
- Pending verification of less than 12 registered voters, obtain consent and waiver from property owner for shortening time of election
- Engineer's report finalized for presentation to the JPC on May 1, 2013
- May 1st JPC action required
  1. Open and close public hearing
  2. Adopt resolution declaring close of public hearing, forming and establishing CFD and calling for election
  3. Certification of election results
  4. Adopt resolution declaring results of election
  5. Introduce ordinance authorizing levy of special tax
- Record notice of special tax
- May 15, 2013 JPC action required to adopt ordinance authorizing levy of special tax

MV00251018

Public Hearing:

This action establishes a future public hearing and balloting process for the May 1, 2013 JPC meeting.

NOTE: Recording of Parcel Map 36035 immediately followed posting of the Joint Powers Commission agenda. Staff will provide updated Resolutions at the Commission meeting with recording information.

Attachments:

1) Resolution #JPA 13-02.
   Exhibit "A", Boundary Maps (Parcel Map 36035 Recording Information will be updated and provided at Commission Meeting)
2) Resolution #JPA 13-03.
   Exhibit "A", Description of Services and Facilities (Highlighted area to be updated with Parcel Map Recording Information at Commission Meeting)
   Exhibit "B", Rate and Method of Apportionment of Special Taxes (Highlighted area to be updated with Parcel Map Recording Information at Commission Meeting)

MV00251019

RESOLUTION #JPA 13-02

RESOLUTION OF THE COMMISSION OF THE MARCH JOINT POWERS AUTHORITY, ADOPTING A BOUNDARY MAP SHOWING THE BOUNDARIES OF THE TERRITORY PROPOSED FOR THE INCLUSION IN PROPOSED MARCH JOINT POWERS AUTHORITY COMMUNITY FACILITIES DISTRICT NO. 2013-01 (MARCH LIFECARE CAMPUS)

WHEREAS, the Commission (the "Commission") of the March Joint Powers Authority, California, (the "Authority") desires to initiate proceedings to create a community facilities district pursuant to the terms and provisions of the "Mello-Roos Community Facilities Act of 1982", being Chapter 2.5, Part 1, Division 2, Title 5 of the Government Code of the State of California (the "Act") for the purpose of financing certain public services; and

WHEREAS, this community facilities district shall hereinafter be designated as March Joint Powers Authority Community Facilities District No. 2013-01 (March LifeCare Campus) ("CFD No. 2013-01"); and,

WHEREAS, there has been submitted a map, attached hereto as Exhibit "A", showing the boundaries of the territory proposed to be included in CFD No. 2013-01 including properties and parcels of land proposed to be subject to the levy of special taxes by CFD No. 2013-01.

NOW, THEREFORE, BE IT RESOLVED, DETERMINED AND ORDERED BY THE COMMISSION OF THE MARCH JOINT POWERS AUTHORITY AS FOLLOWS:

SECTION 1. The above recitals are all true and correct.

SECTION 2. The map, attached hereto as Exhibit "A", designated as "Boundaries of Community Facilities District No. 2013-01 (March LifeCare Campus), March Joint Powers Authority, County of Riverside, State of California" showing the boundaries of the territory proposed for inclusion in CFD No. 2013-01 including properties and parcels of land proposed to be subject to the levy of special taxes by CFD No. 2013-01.

SECTION 3. A certificate shall be endorsed on the original and on at least one (1) copy of the map of CFD No. 2013-01, evidencing the date and adoption of this Resolution, and within fifteen (15) days after the adoption of the Resolution fixing the time and place of the hearing on the establishment or extent of CFD No. 2013-01, a copy of such map shall be filed with the correct and proper endorsements thereon with the County Recorder, all in the manner and form provided for in Sections 3110 and 3111 of the Streets and Highways Code of the State of California.

12b 98

MV00251020

SECTION 4. The Chairman shall sign and the Clerk of the Commission shall certify to the passage and adoption of this Resolution and thereupon the same shall take effect and be in force.

ADOPTED this 20th day of March, 2013.

_____

Daryl R. Busch, Chairman
March Joint Powers Authority Commission

MV00251021

RESOLUTION #JPA 13-03

RESOLUTION OF THE COMMISSION OF THE MARCH JOINT POWERS AUTHORITY, DECLARING ITS INTENTION TO ESTABLISH COMMUNITY FACILITIES DISTRICT NO. 2013-01 AND TO AUTHORIZE THE LEVY OF SPECIAL TAXES THEREIN TO FINANCE CERTAIN PUBLIC SERVICES

WHEREAS, the Commission ("Commission") of the March Joint Powers Authority, California (the "Authority"), at this time is desires to initiate proceedings to create a community facilities district pursuant to the terms and provisions of the "Mello-Roos Community Facilities Act of 1982", being Chapter 2.5, Part 1, Division 2, Title 5 of the Government Code of the State of California (the "Act") for the purpose of financing certain public services; and

WHEREAS, this community facilities district shall hereinafter be referred to as the March Joint Powers Authority Community Facilities District No. 2013-01 (March LifeCare Campus) ("CFD No. 2013-01"); and,

WHEREAS, the Act provides that the Commission may initiate proceedings to establish a community facilities district only if it has first considered and adopted local goals and policies concerning the use of the Act; and

WHEREAS, this Commission has adopted local goals and policies as required pursuant to the Act; and

WHIEREAS, this Commission is now required to proceed to adopt its Resolution of Intention to initiate the proceedings for the establishment of CFD No. 2013-01, to set forth the boundaries for CFD No. 2013-01, to indicate the type of public services to be financed by CFD No. 2013-01, to indicate the rate and apportionment of special taxes sufficient to finance such services, to set a time and place for a public hearing relating to the establishment of CFD No. 2013-01; and,

WHEREAS, a map of CFD No. 2013-01 (the "CFD No. 2013-01 Boundary Map") has been submitted showing the boundaries of the territory proposed for inclusion in CFD No. 2013-01 including properties and parcels of land proposed to be subject to the levy of special taxes by CFD No. 2013-01.

NOW, THEREFORE, BE IT RESOLVED, DETERMINED AND ORDERED BY THE COMMISSION OF THE MARCH JOINT POWERS AUTHORITY AS FOLLOWS:

SECTION 1. Recitals. The above recitals are all true and correct.

SECTION 2. Initiation of Proceedings. These proceedings are initiated by this Commission pursuant to the authorization of Section 53318 of the Government Code of the State of California.

MV00251025

SECTION 3. Boundaries of CFD No. 2013-01. It is the intention of this Commission to establish CFD No. 2013-01 pursuant to the provisions of the Act, and to determine the boundaries and parcels on which special taxes may be levied to finance certain types of public services. A description of the boundaries of the territory proposed for inclusion in CFD No. 2013-01 including properties and parcels of land proposed to be subject to the levy of special taxes by CFD No. 2013-01 is as follows:

> All that property as shown on the CFD No. 2013-01 Boundary Map as previously approved by this Commission, such map designated as "Boundaries of Community Facilities District No. 2013-01 (March LifeCare Campus), March Joint Powers Authority, County of Riverside, State of California," a copy of which is on file in the Office of the Clerk of the Commission and shall remain open for public inspection.

SECTION 4. Name of the Community Facilities District. The name of the proposed community facilities district to be established shall be known and designated as "March Joint Powers Authority Community Facilities District No. 2013-01 (March LifeCare Campus)."

SECTION 5. Description of Services. It is the intention of this Commission to finance certain types of public services that are in addition to those provided in or required for the territory within CFD No. 2013-01 and will not be replacing services already available. A general description of the services (collectively, the "Authorized Services"), whether provided directly by the Authority or by a third party contracting with the Authority or CFD No. 2013-01, to be financed is set forth in Exhibit "A" attached hereto and incorporated herein by this reference.

The Commission finds that the Authorized Services are necessary to meet increased demands placed upon the Authority as a result of new development occurring within the boundaries of the proposed CFD No. 2013-01.

SECTION 6. Special Taxes. It is hereby further proposed that, except where funds are otherwise available, a special tax sufficient to finance such Authorized Services (the "Special Taxes" and as defined in Exhibit B) and related incidental expenses authorized by the Act, secured by recordation of a continuing lien against all non-exempt real property in CFD No. 2013-01, will be levied annually within the boundaries of CFD No. 2013-01. For further particulars as to the rate and method of apportionment of the proposed Special Taxes, reference is made to the attached and incorporated Exhibit B, which sets forth in sufficient detail the method of apportionment to allow each landowner or resident within the proposed CFD No. 2013-01 to clearly estimate the maximum amount that such person will have to pay for such Authorized Services.

The Special Taxes herein authorized, to the extent possible, shall be collected in the same manner as *ad valorem* property taxes or in such other manner as this Commission or its designee shall determine, including direct billing of the affected property owners. Such Special Taxes shall be subject to the same penalties, procedure, sale and lien priority in any case of

MV00251026

delinquency as applicable for *ad valorem* taxes. Any Special Taxes that may not be collected on the County tax roll shall be collected through a direct billing procedure by CFD No. 2013-01.

Pursuant to Government Code Section 53340 and except as provided in Government Code Section 53317.3, properties of entities of the state, federal, and local governments shall be exempt from the levy of the Special Tax.

SECTION 7. Report. The officers of the Authority who will be responsible for providing the Authorized Services to be provided within and financed by CFD No. 2013-01, if established, shall study CFD No. 2013-01, and, at or before the time of the public hearing as described in Section 8, file a report with the Commission containing a brief description of the Authorized Services by type which will in their opinion be required to adequately meet the needs of CFD No. 2013-01, and their estimate of the fair and reasonable cost of providing such services, and the incidental expenses to be incurred in connection therewith. Such report shall be made a part of the record of the hearing to be held pursuant to Section 8 hereof.

SECTION 8. Public Hearing. NOTICE IS GIVEN THAT ON MAY 1, 2013, AT THE HOUR OF 8:30 A.M., IN THE REGULAR MEETING PLACE OF THE COMMISSION BEING THE MARCH JOINT POWERS CONFERENCE CENTER LOCATED AT 23533 MEYER DRIVE, RIVERSIDE, CALIFORNIA. A PUBLIC HEARING WILL BE HELD WHERE THIS COMMISSION WILL CONSIDER THE ESTABLISHMENT OF PROPOSED COMMUNITY FACILITIES DISTRICT NO. 2013-01, THE PROPOSED RATE AND METHOD OF APPORTIONMENT OF THE SPECIAL TAXES, AND ALL OTHER MATTERS AS SET FORTH IN THIS RESOLUTION OF INTENTION. AT THE ABOVE-MENTIONED TIME AND PLACE FOR PUBLIC HEARING ANY INTERESTED PERSONS, INCLUDING TAXPAYERS AND PROPERTY OWNERS MAY APPEAR AND BE HEARD. THE TESTIMONY OF ALL INTERESTED PERSONS FOR OR AGAINST THE ESTABLISHMENT OF THE COMMUNITY FACILITIES DISTRICT, THE EXTENT OF THE COMMUNITY FACILITIES DISTRICT, OR THE FINANCING OF AUTHORIZED SERVICES, WILL BE HEARD AND CONSIDERED. ANY PROTESTS MAY BE MADE ORALLY OR IN WRITING. HOWEVER, ANY PROTESTS PERTAINING TO THE REGULARITY OR SUFFICIENCY OF THE PROCEEDINGS SHALL BE IN WRITING AND CLEARLY SET FORTH THE IRREGULARITIES AND DEFECTS TO WHICH THE OBJECTION IS MADE. ALL WRITTEN PROTESTS SHALL BE FILED WITH THE CLERK ON OR BEFORE THE TIME FIXED FOR THE PUBLIC HEARING. WRITTEN PROTESTS MAY BE WITHDRAWN IN WRITING AT ANY TIME BEFORE THE CONCLUSION OF THE PUBLIC HEARING.

IF A WRITTEN MAJORITY PROTEST AGAINST THE ESTABLISHMENT OF THE COMMUNITY FACILITIES DISTRICT IS FILED, THE PROCEEDINGS SHALL BE ABANDONED. IF SUCH MAJORITY PROTEST IS LIMITED TO CERTAIN SERVICES OR PORTIONS OF THE SPECIAL TAXES, THOSE SERVICES OR THAT PORTION OF THE SPECIAL TAXES SHALL BE ELIMINATED BY THE COMMISSION.

SECTION 9. Election. If, following the public hearing described in the Section above, the Commission determines to establish CFD No. 2013-01 and proposes to levy the Special Taxes within CFD No. 2013-01, the Commission shall then submit the levy of the

MV00251027

Special Taxes to the qualified electors of CFD No. 2013-01. If at least twelve (12) persons, who need not necessarily be the same twelve (12) persons, have been registered to vote within CFD No. 2013-01 for each of the ninety (90) days preceding the close of the public hearing, the vote shall be by registered voters of CFD No. 2013-01, with each voter having one (1) vote. Otherwise, the vote shall be by the landowners of CFD No. 2013-01 who were the owners of record at the close of the subject hearing, with each landowner or the authorized representative thereof, having one (1) vote for each acre or portion of an acre of land owned within CFD No. 2013-01.

A successful election relating to the Special Taxes authorization shall, as applicable, also establish the appropriations limit as authorized by Article XIIIB of the California Constitution as it is applicable to this CFD No. 2013-01.

SECTION 10. NOTICE. Notice of the time and place of the public hearing shall be given by the Clerk of the Commission in the following manner:

> A Notice of Public Hearing shall be published in a legally designated newspaper of general circulation, such publication pursuant to Section 6061 of the Government Code of the State of California, with such publication to be completed at least seven (7) days prior to the date set for the public hearing.

SECTION 11. Effective Date. The Chairman shall sign and the Clerk of the Commission shall certify to the passage and adoption of this Resolution and thereupon the same shall take effect and be in force.

ADOPTED this 20th day of March, 2013.

EXHIBIT "A"

Community Facilities District No. 2013-01 (March LifeCare Campus) of March Joint Powers Authority

DESCRIPTION OF SERVICES AND FACILITIES

In response to the realignment of March Air Force Base, there was a determination by the March Joint Powers Authority (MJPA) that a plan was required to provide for areas declared surplus and available for disposal actions. The March LifeCare Campus Specific Plan (SP) was prepared, approved and amended by the MJPA as a means to mitigate the losses associated with the base realignment.

Implementation of the SP required the formation of Community Facilities District (CFD) No. 2013-01 to provide certain services and for the on-going maintenance of certain facilities. The intent of CFD No. 2013-01 is to provide funding for the annual services and continued maintenance of these facilities in perpetuity.

The public facilities to be maintained and serviced under CFD No. 2013-01 have been constructed in accordance with the SP and the Conditions of Approval for March LifeCare Campus, as amended. General descriptions of the public services to be provided and facilities to be maintained and serviced under CFD No. 2013-01 are presented in the following paragraphs. It is noted that the constructed location of these facilities may differ from these general descriptions.

Signage and Lighting Facilities

The work to be performed consists of the energy, servicing, operation, and maintenance of the directional signage at major access points and street lights installed along and within the public streets and easements. Pedestrian lighting along and within the Public Realm will also be maintained.

Traffic Signal Facilities

The work to be performed consists of the energy, servicing, operation, and maintenance of traffic signals, safety lighting, beacons, and other electrically operated traffic control or warning devices, including routine maintenance and emergency call-out service.

Routine maintenance includes an inspection of the signal system and cleaning the control cabinet every six weeks, with alternating day and night inspections. Additional servicing includes re-lamping and cleaning signal heads as required.

The traffic signals are located at the intersections of:

March LifeCare Drive and Meyer Drive
March LifeCare Drive and Riverside Medical Clinic Drive
March LifeCare Drive and "BB" Drive
Meyer Drive and "CC" Drive
Meyer Drive and Riverside Drive
Riverside Drive and Riverside Medical Clinic Drive
Riverside Drive and "BB" Drive

Certain traffic signals identified in the SP and the Supplemental Traffic Impact Analysis, appended thereto, are owned and maintained by City of Moreno Valley. Traffic signals located at the intersections of Cactus Avenue with Riverside Drive and March LifeCare

13b 106

MV00251030

Drive; and, the intersections of Heacock Street with Cactus Avenue, Meyer Drive and Delphinium Avenue are the responsibility of the City of Moreno Valley.

Landscaping Facilities

The work to be performed includes the maintenance, servicing and repair of the landscaping, multi-use trails, entry monuments at major access points, irrigation system, electrical, water, and appurtenant facilities located in public streets, rights-of-way, and the Public Realm easements (Note 19 for landscaping and pedestrian uses) set forth on Parcel Map 36035.

Parcel Map 36035 was recorded in Book of Parcel Maps, Pages ___ through ___, as Instrument Number, in the office of the Recorder-County Clerk of the County of Riverside, State of California, on the ___day of ___.

Drainage Facilities

The work to be performed includes the video inspection, maintenance, servicing and repair of the public drainage facilities and appurtenances that convey and retain the storm drain flow within the March Lifecare Campus.

These facilities include catch basins, channel inlets and outlets, box culverts, a water quality and detention basin (Lots N and O), three bridge overcrossing over the Cactus and Heacock Flood Control Channels, storm drains located in public streets and rights-of-way, Lot R, and drainage easements (Note 20) set forth on Parcel Map 36035.

The annual maintenance, servicing and repair of the landscaping, irrigation system, electrical, water, and structures appurtenant to the drainage facilities within Lots N, O and R and the drainage easements (Note 20) are included in the work to be performed. Annual activities also include general cleanup, debris removal, inspection, replacement and repairs. Weed abatement will also take place with a contact spray in the beginning of spring bloom and a residual spray after the first rain in fall.

Catch basins, inlets and outlets will be cleaned on an annual basis. Depending on that year's storm drain flow and the level of debris in the flow, a cleaning of these facilities may be required after the first rain and again during or at the end of the rainy season.

Cleaning of the storm drain pipes and box culverts, along with video inspection, is scheduled to take place every three years. Approximately every six years, the bridge overcrossings will be cleaned and repaired to assure proper storm drain flow.

Street Sweeping

The service to be performed includes the monthly sweeping of public streets and easements, with bi-monthly sweeping, as may be required, during three months of the year.

Transit Shelters

The transit shelters provide connection points for shuttle service to and from the Moreno Valley/March Field Metro-link Station, bus routes and van car-pools. Regular maintenance such as general cleanup, trash removal, steam cleaning and painting will be provided by the County of Riverside Transit Agency. Replacement and repairs above regular maintenance and due to accidents will be the responsibility of the CFD.

12b 19

MV00251031

Graffiti Removal

The work to be performed is the removal of graffiti within the public streets and public realm and drainage easements. The surface areas of the facilities may include, but not be limited to, ornamental structures, shelters, wall surfaces, signage, enclosures, and utility boxes.

The Cost Estimate which follows herein further identifies the location and extent of the improvements to be maintained, operated and serviced for the fiscal year. As future improvements are constructed, there will be a minimum of 90 days and a maximum of 365 days between the final inspection date and the date of acceptance of the improvements. Upon the completion of construction, the improvements will be shown in Atlas Maps, As-Built Maps and Specifications on file in the Office of the MJPA Public Works.

Reference is also made to the future plans and specifications for Street Improvement Plans, Mass Grading Plans, Storm Drain Plans and Landscape Plans required for the development of the March LifeCare Campus. Pending design, the improvements to be maintained, operated and serviced are as set forth in the Specific Plan for the March LifeCare Campus, as amended.

Plans and Specifications for the improvements to be maintained and/or improved for a fiscal year have been approved or are in the process of being designed for approval by the March Joint Powers Authority (MJPA). The work to be performed is under the ownership and operation of the MJPA.

MV00251032

EXHIBIT B

COMMUNITY FACILITIES DISTRICT NO. 2013-01 (March LifeCare Campus) OF THE MARCH JOINT POWERS AUTHORITY

RATE AND METHOD OF APPORTIONMENT OF SPECIAL TAXES

A Special Tax (as hereinafter defined) shall be apportioned, levied and collected on all Parcels of Taxable Property in Community Facilities District No. 2013-01 (the "CFD) of the March Joint Powers Authority (the "Authority) in each Fiscal Year in an amount determined by the Commission of the Authority, through the application of the procedures described below. All Parcels in the CFD, unless exempted by law or by the provisions hereof, shall be taxed for the purposes, to the extent and in the manner herein provided.

A. DEFINITIONS. The terms used herein have the following meanings:

"Acreage" or "Acre" means that acreage shown on the Assessor's Parcel Map for each Parcel. In the event that the Assessor's Parcel Map shows no acreage, the Acreage for any Parcel shall be that shown or computed by the District Administrator based on the applicable final map, lot line adjustment, condominium plan or other recorded parcel map.

"Act" means the Mello-Roos Community Facilities Act of 1982, as amended, being Chapter 2.5, Part 1 of Division 2 of Title 5 of the California Government Code of the State of California.

"Adjusted Acreage" or "Adjusted Acre" means the Acreage of a Parcel minus the acreage for the area within Easement Notes 18, 19 and 20 on Parcel Map 36035 and as identified by the District Administrator for purposes of Section C of this Rate and Method of Apportionment. In no event shall the Adjusted Acreage assigned to the land within Parcel Map 36035 be less than listed in Section D, Table 1.

"Administrative Expenses" means the following actual or reasonably estimated costs directly related to the administration of the CFD: contract management costs for the Maintenance and Servicing of the Facilities with an allocable share of the applicable Authority staff; costs of computing the Special Taxes and of preparing the annual Special Tax Levy (whether by Authority, or an agent thereof); the fees and costs of collecting the Special Taxes (whether by the County of Riverside, the Authority, or otherwise); and the costs associated with preparing Special Tax disclosure statements and responding to public inquiries regarding the Special Taxes. Administrative Expenses shall also include engineering and attorney fees necessary for purposes of the CFD.

"Assessor Parcel Number" means a parcel of land as designated on a map of the County Assessor of the County of Riverside and which has been assigned a specific identifying number by the County Assessor.

"District Administrator" means an official of the Authority, or an agent thereof, responsible for determining the Special Tax Requirement and providing for the levy and collection of the Special Taxes.

"Developed Property" means a Parcel in the CFD within Parcel Map 36035.

"Developer Deposit" means an amount required to fund the Administrative Expenses, Maintenance and Servicing Expenses and the Tax Roll Reserve in the Fiscal Year for which the Special Taxes are to be levied and the subsequent Fiscal Year (2 years). This amount shall be deposited with the Authority and the funds made available for the Special Tax Requirement.

12b 111

MV00251033

"Exempt Property" means all property within the CFD which is exempt from the Special Tax pursuant to Section E.

"Facilities" mean the public improvements, in whole or in part, authorized to be maintained and serviced under the CFD.

"Fiscal Year" means the period starting on July 1 and ending the following June 30.

"Maintenance and Servicing Expenses" means the actual or reasonably estimated costs directly related to the continued operation, maintenance, repair, replacement and servicing of the Facilities.

"Maximum Annual Special Tax" means the initial amount of $4,305.20 per Adjusted Acre of a Developed Parcel which shall be applicable for the first levy of the Special Tax. Following the initial year, the Maximum Annual Special Tax, shall be increased on July 1, and on each July 1 thereafter by an amount equal to three percent (3%) of the amount of such rate for the preceding Fiscal Year.

"Non-Realigned Property" means a parcel in the CFD, as shown on the boundary map, and outside of Parcel Map 36035 that is further identified as Assessor Parcel Number 294-080-005 through -008, and -011 and that property described within the Quitclaim Deed recorded in the Official Records as Instrument Number 2006-0359740 in the Office of the Assessor-County Clerk-Recorder of the County of Riverside, State of California, on May 17, 2006.

"Parcel Map 36035" means Parcel Map 36035 as recorded in Book of Parcel Maps, Pages through , as Instrument Number, in the office of the Assessor-County Clerk-Recorder of the County of Riverside, State of California, on the day of .

"Proportionately" means that the ratio of the amount of Special Tax Requirement levied per Adjusted Acre to the Maximum Annual Special Tax per Adjusted Acre is the same for all Taxable Property.

"Realigned Property" means "Non-Realigned Property" declared surplus and available for disposal actions with a development approved by the Authority as of March 1 of the Fiscal Year preceding the Fiscal Year for which the Special Taxes are being levied.

"Special Tax Requirement" means that amount, after taking into consideration available funds, required in any Fiscal Year to pay the Administrative Expenses and Maintenance and Servicing Expenses and, in addition, provides for the Tax Roll Reserve.

"Taxable Property" means all the land within the boundaries of the CFD which is not Non-Realigned Property or Exempt Property.

"Tax Roll Reserve" means an amount for the payment of Administrative Expenses and Maintenance and Servicing Expenses incurred prior to the receipt of tax collections from the County of Riverside. The fiscal year begins July 1 and the first installment from the tax roll collections is usually distributed by the County of Riverside the following January.

"Undeveloped Property" means parcels of Taxable Property that are not classified as Developed Property, Non-Realigned Property or Realigned Property.

B. CLASSIFICATION OF PROPERTY. For each Fiscal Year, the Authority shall classify all Parcels within the CFD to be Developed Property, Non-Realigned Property, Realigned Property,

196 112

MV00251034

Undeveloped Property or Exempt Property subject to the levy of the Special Taxes as determined pursuant to Sections C and D.

C. MAXIMUM ANNUAL SPECIAL TAX.

1. The Maximum Annual Special Tax for a Parcel shall be the amount derived by multiplying the Adjusted Acreage of the Parcel by the Maximum Annual Special Tax. In no event shall the Adjusted Acreage assigned to the land within Parcel Map 36035 be less than listed in Section D, Table 1.

2. For purposes of determining the Maximum Annual Special Tax for all Parcels for each Fiscal Year following the initial year, the Maximum Annual Special Tax shall be increased on July 1, and on each July 1 thereafter by an amount equal to three percent (3%) of the amounts of such rates for the preceding Fiscal Year.

D. APPORTIONMENT AND LEVY OF SPECIAL TAXES. For each Fiscal Year, the Authority shall cause the Maximum Annual Special Tax to be apportioned and levied on Taxable Property in the CFD as follows:

1. The Adjusted Acreage shall be assigned on Taxable Property within Parcel Map 36035, as specified on Table 1 shown on the following page.

2. The portion of each Parcel with Realigned Property shall be Taxable Property. The Adjusted Acreage of Realigned Property shall be computed by the District Administrator based on the applicable final map, lot line adjustment, condominium plan or other recorded parcel map.

3. The Special Tax shall be levied Proportionately on each Parcel of Taxable Property.

Table 1, Adjusted Acreage for Parcel Map 36035

Parcel, PM 36035	Acreage	Street Easement (18)	Public Realm (19)	Drainage Easement (20)	Adjusted Acreage

Totals	121.73	7.97	10.99	4.32	98.45

MV00251036

E. EXEMPT PROPERTY.

1. The portion of each Parcel with Non-Realigned Property shall be exempt from the levy of the Special Tax.
2. No Special Tax shall be levied on the acreage within Easement Notes 18, 19 and 20 and Lettered Lots within Parcel Map 36035.

F. DURATION OF THE SPECIAL TAX.

1. Commencement of the Special Tax. The Special Taxes shall not be levied until the facilities are constructed and scheduled for acceptance for Maintenance and Servicing by the Authority. The Special Taxes will be levied in the initial fiscal year to provide funding to the Authority at the time of acceptance of the facilities, in whole or in part.

2. Duration of Special Tax. Taxable Property in the CFD shall be subject to the Special Tax in perpetuity.

G. MANNER OF COLLECTION. The Special Tax shall be collected in the same manner and at the same time as ad valorem property taxes; provided however, the Authority or its designee may directly bill the Special Tax and collect the Special Tax at a different time, or in a different manner, if necessary, to meet its financial obligation.

Subject: dates for Sunnymead Blvd Clean Up mtgs

Good morning Mayor. Updated plans for the Sunnymead Boulevard Clean Up Initiative meetings:

Tuesday April 9: Comfort Inn, Mayor & Council Member Baca, 8:00 a.m. -10:00 a.m.
Thursday April 11: Holiday Inn, Mayor and Council Member Molina, 8:00 – 10:00 a.m.

We'll contact these two hotels and set up a meeting room. I know you wanted to hold one of these at the Best Western but I was thinking we could ask them to host the MV Hotel/Visitors Association mtg when we get that going very soon (?). I wanted to use the Comfort Inn since its in Baca's District, we can hold this second mtg at the Best Western if that's your preference but I thought perhaps the mtg should actually be on Sunnymead?

We'll draft up a flyer/mtg invitation for your review early next week,

Subject: Decision Letter Regarding the Successor Agency to the Moreno Valley RDA Low-Mod Income Housing Funds (LMIHF)

Dear Ms. Steel:

Thank you for your letter dated March 11, 2013 regarding the City of Moreno Valley's unencumbered Low-and-Moderate Income Housing Funds dated March 11, 2013. You may be pleased to know that on March 14, 2013, the City received a letter from the Department of Finance (DOF) rescinding the prior demand for the Successor Agency to return Low-Mod Income Housing Funds (LMIHF) to the State. As a result of our work and communication with the DOF, it has been determined that all available LMIHF's were used for legally enforceable obligations, and as a result, the Successor Agency is not required to return any funds. I have attached a copy of the March 14, 2013 determination letter for your review. If you have any questions, please feel free to contact me at (951) 413-3453, or Barry Foster, Community & Economic Development Director, at (951) 413-3443.

DEPARTMENT OF FINANCE

EDMUND G. BROWN JR. ▪ GOVERNOR

915 L STREET ■ SACRAMENTO CA ■ 95814-3706 ■ WWW.DOF.CA.GOV

March 14, 2013

Ms. Anochar Clark, Senior Financial Analyst
City of Moreno Valley
14177 Fredrick Street
Moreno Valley, CA 92552

Dear Ms. Clark:

Subject: Low and Moderate Income Housing Fund Due Diligence Review

This letter supercedes Finance's determination issued on December 15, 2012.

Pursuant to Health and Safety Code (HSC) section 34179.6 (c), the City of Moreno Valley Successor Agency (Agency) submitted an oversight board approved Low and Moderate Income Housing Fund Due Diligence Review (DDR) to the California Department of Finance (Finance) on October 15, 2012. Finance issued a LMIHF DDR determination letter on November 16, 2012. Subsequently, the Agency requested a Meet and Confer session on one or more items adjusted by Finance. The Meet and Confer Session was held on December 5, 2012. Based on a review of additional or clarifying information provided to Finance, pursuant to HSC section 34179.6 (d), Finance has completed its review of the Agency's DDR and is authorized to issue this determination.

Based on our final review, Finance made no adjustments to the Low and Moderate Income Housing Fund (LMIHF) balance available for allocation to the affected taxing entities. As a result, Finance concludes there are no unencumbered LMIHF balances available for distribution and, as a result, the Agency is not required to remit any funds.

Pursuant to HSC section 34167.5 and 34178.8, the California State Controller's Office (Controller) has the authority to claw back assets that were inappropriately transferred to the city, county, or any other public agency. Determinations outlined in this letter and Finance's Housing Assets Transfer letter dated September 7, 2012 do not in any way eliminate the Controller's authority.

Please direct inquiries to Beliz Chappuie, Supervisor or Mindy Patterson, Lead Analyst at [redacted].

Sincerely,

STEVE SZALAY
Local Government Consultant

Subject: Productivity Stats - MVPD Special Enforcement Team

Good afternoon,

I thought you might find the following information educational and interesting. These bullet point statistics represent a portion of the work conducted by the Special Enforcement Team for the months of January and February, 2013.

- 28 search warrants written and served
- 51 parole checks conducted
- 94 probation checks conducted
- 11 Gang enhancements written
- 70 Gang Field Interviews conducted
- 198 felony arrests made
- 41 misdemeanor arrests made
- 39 felony arrest warrants served
- 21 misdemeanor arrest warrants served
- 32 parole violations issued
- 35 probation violations issued
- 867.2 grams of methamphetamine seized (1.91 pounds)
- 9,594 grams of marijuana seized (21.13 pounds)
- 474 marijuana plants seized
- 20 firearms seized
- 8 other weapons seized
- 12 stolen vehicles recovered
- 8 drug endangered children rescued
- 2 presentations conducted

These statistics represent just some of what this proactive team does throughout the year to keep the community safe.

Subject: Sunnymead Blvd fraud/burglary

Good afternoon,

This morning about 10:36 AM, a suspect entered the Americas Cash Express business at 23845 Sunnymead Blvd. The suspect, identified as Eric Pontious (38 years old) is on Post Release Community Supervision via AB 109. (PRCS) Pontious attempted to cash a fraudulent stolen check at the business. Employees obtained identification from the suspect and determined he was suspected in another burglary/fraud case at an another business branch in the city of Rancho Cucamonga. Employees reported this information to Sheriff's Dispatch and officers were sent to investigate. As officers responded, they were advised by Dispatch that the suspect was wanted on a felony arrest warrant in addition to the crime he was suspected of attempting at that moment.

Officers arrived on scene and attempted to take the suspect into custody. The suspect was inside his vehicle and refused to step out. Officers attempted to force their way into the car by breaking the passenger side window to gain access. The suspect fled the area in his vehicle, driving erratically over landscaping and a planter. Officers attempted to stop the vehicle, but the suspect failed to yield. Because officers knew the suspect's identity and the crime was against property, officers correctly decided not to initiate a pursuit of the suspect vehicle. The suspect fled the area on the 60 Freeway. Allied agencies in the area were notified. Criminal charges will be filed out of custody.

Subject: FW: Contract Increases
Attachments: Big Bear.xls; ATT00001..htm

Mayor Owings: Tom DeSantis received the attached spreadsheet from San Bernardino Co. re: their Sheriff contract rate increases. The document indicates annual rate increases that average just above 5% over the past 10 years.

SB Sheriff's staff indicates that it's difficult to capture an "average" increase because levels of service also change from year to year with most cities. To respond to our inquiry, they looked at the City of Big Bear, where service levels have fluctuated less than in other contract cities over the past decade.

The enclosed spreadsheet also shows that salary & benefit costs (for deputies) have seen annual increases averaging 5% over the same time period.

Comparing the SB Co Sheriff contract rate increases for deputy costs v. the Riverside Sheriff over the past 6 years, it's about the same:

	Contract Deputy Rate Increases	
	San Bernardino Sheriff	Riverside Sheriff
2007-08	5.5%	5.03%
2008-09	1.4%	4.84%
2009-10	-2.4%	3.98%
2010-11	7.8%	2.79%
2011-12	5.3%	1.10%
2012-13	4.3%	4.69%
average	**3.7%**	**3.74%**

Hi Tom

How did you know I am working on Sunday? Just getting ready to leave and saw you message.

You'd think this would be an easy question, but the levels of service have change with so many cities, it's hard to get to the core increase. So I took my most static city and compared the last 11 years.

I also included the salary & benefit cost of a deputy for the same time period.

Hope this helps. Happy St. Patrick's Day!

Hi, Wendy.

I'm wondering if you we're able to locate any info regarding contract increases over recent years.

When we spoke by phone, I asked for info pertaining to the last 10 years. If that's going back too far, it would be very helpful to have info regarding even the past 3-5 years.

Thank you so very much!

Tom

Subject: Aldi

Follow Up Flag: Flag for follow up
Flag Status: Flagged

The Aldi team and their site selector-Raymond Walker will be here on Tuesday April 9 to discuss Aldi placing their new Western DC & regional office at WestRidge in eastern MV. The Ridge site in MV is one of two finalist sites Aldi is looking (not sure where the other location is in the Inland Region). I have know Ray Walker for awhile and the Aldi Development Director has met with MV staff three times over the past year as they have narrowed their site selection down. We have established a great working relationship with Raymond and Aldi.

On Tuesday 4/9 Dennis Rice and his development team will meet with Aldi from 8 am until 11:30 am at the Mission Inn in Downtown Riverside. At 11:45 am, I would like to have Mayor Owings, Henry Garcia and myself join Dennis Rice and the Aldi team for lunch at the Mission Inn. After lunch we'll drive back to Moreno Valley for a 1:45 to 3:30 pm meeting with the Moreno Valley Development Services staff that will include Barry Foster, Denise Bagley John Terell, Mark Sambito, Randy Metz & Jeannette Olko.

Please let me know if you can block out from 11 am until 1:30 pm for the lunch. You're also welcome to join the afternoon Development Services meeting if you like.

Thanks

Barry Foster

Good afternoon Mr. Wasserman. We are looking forward to meeting with you on April 10th regarding policing options for the City of Moreno Valley. In advance of our meeting we wanted to share some information with you. Attached are the following:

- Draft study for in-house police services: the City has investigated the cost to have our own police department several times. Attached is the most recent study which was completed in 2011. This information was presented to the City Council's Public Safety Subcommittee but was never formally presented to the full Council (however they each received a copy).
- Attachment "A" to our contract with the Riverside Co. Sheriff's Department which summarizes our current level of service.
- The crime stats illustrating Moreno Valley's UCR Part I crimes from 1991-2012

Additionally, last week the City Council received a study session report on the history and projected costs of our public safety contracts with the County and Cal Fire. The staff report and PowerPoint for that item are attached as well.

Please don't hesitate to contact me if you have questions regarding any of the information provided.

EXECUTIVE SUMMARY

Moreno Valley enjoys a good public safety and traffic safety record, verified by State and Federal crime and traffic safety audits. Most recently, Moreno Valley was ranked 3rd in the Nation for traffic safety and Moreno Valley has seen a decline in crime over the last three years. Policing services are currently delivered to the City through a contract with the Riverside County Sheriff's Department. The purpose of this study is to examine the feasibility, possible structure, and cost if the City were to create and maintain a City operated police department.

For Fiscal Year 2011/2012 the City has budgeted $41,261,770 for police services which includes 181 sworn positions and 52.5 non-sworn positions from the Sheriff's Department. This cost represents the direct cost of the police contract and other budgeted items, but does not include any City overhead costs such as contract management and financial administration. The City operated police department described in this study would have an estimated first year cost of $49,250,353 with a staff of 199 sworn positions and 106.5 non-sworn positions. Additionally, the City would need to increase staff in other City departments, such as Human Resources, in order to sufficiently support a City operated police department. The cost for the additional City staff, including overtime pay, holiday pay, and standby pay is $1,365,916 with another 17 non sworn positions added to the various City departments. ***This brings the total cost for a City operated police department to $50,616,269.***

As this study will explain, there are certain first year costs that can not be estimated at this time. For instance, the City does not require the full time services of an emergency services team (more commonly known as a special weapons and tactics team, SWAT), however, the City would need to consider either contracting for this service with another jurisdiction or consider training its own police officers to act in this capacity on a part time basis. Furthermore, there is the expense of purchasing specialized equipment for this team as well as the cost for the additional training for the members of the team. Another expense that can not be estimated is the cost of a City operated criminal laboratory. As these costs can not be predicted they have been excluded from the budget, however, the City could expect to see the budget increase $350,000 to $750,000 for just these two items.

As is explained in the "Police Staffing" section, the staff numbers for a City police department are higher since a City police department would need to have sufficient staff to cover absences that are now covered under the constant staffing provided in the contract with the Riverside County Sheriff's Department. Rather than contract for a particular number of people, the City contracts for a particular number of hours of service with the County. Consequently, if a deputy assigned to Moreno Valley is absent, another deputy will fill his place.

The City operated police department budget also includes the cost of a City operated police communications/dispatch center. Of the $50,616,269 total budget for a City operated police department, $2,630,388 is for personnel costs associated with operating a communications center. This amount includes overtime, shift differential, holiday pay, and standby pay. The cost does not include workman's compensation, training costs, internal service fees, and other budgetary costs associated with operating a communications center.

Minimally the City should expect to spend $34,144,562 in start up costs to establish its own police department. Major components would include vehicles and vehicle equipment; communications, dispatch and computer aided dispatch systems; records management and information technology; a telephone system; and transition costs. Of these start up costs, the most expensive component are the items required to effectively establish a communications and

MV00251071

dispatch center, which totals $10,416,050 and includes the cost for telecommunication towers. It should be noted that $10.4 million is considered a minimum cost for dispatch and communications. The cost for dispatch and communications could increase to over $17 million dollars depending on final quotes for purchasing equipment, purchasing land, constructing the radio towers, and other expenses. These start up costs are outlined in Table 7 on page 19; however, *not included in these start up costs is the expense of expanding the Public Safety Building to accommodate evidence and property storage, vehicle impoundment for criminal investigations, a dispatch center, and a criminal laboratory as well as the expansion of City Yard for the maintenance of police vehicles.*

The City recently completed a master plan for the incremental growth of the Public Safety Building. In that incremental plan the evidence, property and logistics expansion is included in Phase 3 along with a parking structure. The cost for that phase was estimated at $27.9 million dollars with a total cost of the expansion $104.4 million. To some extent, the City would need to revisit this master plan and potentially reprioritize the phases in order to add space to the building to accommodate a larger police force, criminal laboratory, evidence storage, property storage, vehicle impoundment, and a dispatch center. The costs mentioned here are not included in the start up costs but do need to be considered in the overall strategy for implementing a City operated police department should that be the desire of City Council.

This study will begin with an examination of patrol staffing and the number of officers needed for calls for service response and self initiated police work. It describes the number of officers needed for special units such as traffic, problem oriented policing, and special enforcement teams which provide a vital supplement to patrol.

Additional sections will describe investigative support, administrative support, and other components that are required for a City operated police department. There will then be a brief overview of the facility and equipment as well as communications and information technology. Based on the information in those sections, City staff will then outline a first year operating budget. Finally, there will be a brief discussion on the start up costs involved for creating a City operated police department.

POLICE STAFFING

In order to determine the number of police officers required to staff a City operated police department it is necessary to understand that there are two primary workload indicators for patrol operations, which are calls for services and self initiated activity.

Calls for service occur when someone contacts the police department and requests assistance. They can contact the police department by calling 9-1-1, calling the non-emergency phone number for the police department, walking into the police station, or by stopping a police officer on the street. Calls for service can be managed to some extent by separating urgent, life threatening calls from non-life threatening calls, however, the number of calls for service cannot be directly controlled by the police department.

Self initiated activity occurs at an individual officer's discretion whereby they initiate a traffic stop due to a vehicle code violation, check on parked vehicle due to suspicious circumstances, stop a pedestrian, check on a building, or perform other tasks. Self initiated work is generally started by the police officer and is not in response to a citizen request. Self initiated work can be deferred by the police officer to when the calls for service workload is lighter,

MV00251072

however, this type of activity does depend on legitimate opportunities being available which can coincide with peak times for calls for service.

To determine the number of patrol officers needed to respond for calls for service as well as to perform self-initiated work, City staff examined 12 months of data supplied by the Riverside County Sheriff's Department from their data warehousing system (April 1, 2010 - March 31, 2011). The data warehousing system utilizes information from the computer aided dispatch (CAD) system to generate information on each dispatch event. The resulting data was composed of 129,255 useable calls for service and 27,466 self initiated records for that time period.

Data obtained from the Riverside County Sheriff's Department only contains information for the primary unit that responded to a call for service or performed a self initiated activity; however, the total time consumed by an event includes not only the primary unit assigned but also the time spent on the call for service by the backup units. The amount of time spent on a call by backup units will typically be less than that of the primary unit. Backup units tend to be dispatched after the primary unit is assigned and will oftentimes clear the scene sooner than the primary unit. In order to account for the backup unit's time consumed by an event, City staff increased the average total time consumed by calls for service by 40%, which is the number MAXIMUS used in their 2004 police feasibility study.

MEASURING CALLS FOR SERVICE WORKLOAD

In order to determine how many patrol officers are needed to meet the demand for police services in the community City staff measured how much time needs to be devoted to call responses by hour of the day and day of the week. The amount of time spent on a call was measured from the time the officer was dispatched to the call to when the call for service was closed out by the officer.

Each record was broken into the time spent on the call for service by the hour of day and the appropriate day of the week. For example, a call that began at 11:45 p.m. on a Tuesday night and concluded at 1:00 a.m. on Wednesday morning was broken into 15 minutes for the 11:00 p.m. to 12:00 a.m. block of time on Tuesday with the remaining 60 minutes placed in the Wednesday 12:01 a.m. to 1:00 a.m. block.

Utilizing staff from the City's Technology Services Division, all calls for service were broken up into their appropriate day of the week and hour of day. This time was then increased by 40% to account for the time back up units may have spent on the activity and then converted from minutes to hours. The total number of hours for the day of the week and the hour of day was then averaged for the year to produce the number of hours per day of week and per hour of day that the City could expect the patrol division of the police department to spend responding to calls for service. The information in the table below reflects this information.

Hour	Mon	Tues	Wed	Thurs	Fri	Sat	Sun		Totals

Table 1: Time Spent on Call for Service by Patrol Units in Moreno Valley April 2009 to March 31, 2010 (includes 40% assumption of time spent by back up units)

Moreno Valley experiences its highest call volume on weekdays from 1800 hours to 2000 hours. The single busiest period is from 1500 hours through 2300 hours on Fridays. Given that Moreno Valley is a suburban community, this is to be expected.

Each block of time in Table 1 can be interpreted as the amount of personnel hours needed to handle calls for service only during that time on that day. For example the 12.80 figure on Friday night from 2300 hours until midnight means that at least 13 officers are needed on average to handle the calls for service generated by citizens. However, staffing cannot be only for calls for service. Having sufficient time available for self initiated activity is important if the department wants to work proactively to solve crime, violence, and disorder problems through community policing. The best self initiated work involves not only vehicle stops and pedestrian checks but also time for officers to work with residents and business to solve the problems of underlying crime, violence, and disorder. Time spent in these endeavors can reduce calls for service as the conditions causing the problems improve.

Staff could not locate a universally accepted standard for how much patrol time should be consumed by calls for service. A common assumption, prior to the establishment of community oriented policing, was that a third of an officer's time should be spent on calls for service, a third of their time on self initiated activity, and a third of the time on uncommitted patrol activities.

MV00251074

Departments have a varying degree of time spent on patrol ranging from 30% to 65% of an officers time.

The percent of time an officer should spend responding to calls for service is a policy decision based on how the department and the community would like to see an officer spend their patrol hours. Having a large amount of time consumed by calls for service may increase response time as officers will frequently be busy on other calls. It will also reduce the time available to spend on problem solving and community policing by police officers. The department can counteract a portion of this by assigning officers, on a rotating basis, to special assignments such as problem oriented policing, burglary task force, special enforcement teams, etc.

When determining patrol staffing levels it is important to consider that in a police department, as with any other City department or organization, the number of personnel available and actually working will vary daily. Not everyone comes to work every day. Patrol officers are absent from work for a variety reasons including training, vacation, illness, court time, and special assignments. Over time, schedules may vary due to transfers, promotions, long-term injury leave and general vacancies within the police department.

For an agency the size of Moreno Valley, the City can expect to see a show up rate between 75% to 85% for patrol officers. Variables affecting sick leave usage include: the seniority of employees since more senior employees typically accrue more leave than those who are newly hired; department sick leave policies; other available leave such as compensation time in lieu of paid overtime; and work schedules. The later factor, work schedules, has an impact on the show-up rate in that if an officer perceives that they can never have a "favorable" day off then sick leave abuse may occur. There are various models of scheduling that can be reviewed to provide a greater variety of favorable shifts, however, the final shift schedule should be determined by the initial Chief of Police hired by the City should the City elect to form its own police department.

DETERMINING THE NUMBER OF OFFICERS FOR CALLS FOR SERVICE RESPONSE

Table 1 accounts for an average of 1,412 hours per week that the Moreno Valley Police Department will spend on calls for service regardless of whether the City continues to contract with the Riverside County Sheriff's Department or if the City decides to operate its own police department. Table 2 below shows the number of patrol officers needed given the current hours spent on calls for service, for dedicating 35% of a patrol officers time to calls for service, 50% of their time to calls for service and 65% of their time handling calls for service. The table also estimates the show-up rate for officers at 85%, which equates to 34 hours per week per officer based on a 40 hour work week, or of the 2,080 hours an officer is scheduled to work, he/she will attend work 1,780 hours in a given year.

Hours Per Week Spent on Calls for Service	Percent Time Spent Handling Calls For Service	Officers Needed for an 85% Show Up Rate
1,412	35%	119
1,412	50%	83
1,412	65%	64

Table 2: Number of Officers Needed to Respond to Calls for Service

MV00251075

For the remainder of this study the mid-range of percent time spent handling calls for service will be used for determining costs and other factors for establishing a City operated police department resulting in a requirement of 83 patrol officers to handle calls for service throughout a typical week. To match the changes in workload over the course of a day, the staffing levels for the police department should vary to allow for more officers to be on duty when the calls for service from City residents is highest. The Sheriff's Department currently has officers working 10 hour shifts with 4 shifts per day to allow for greater flexibility in covering those times of day when there are higher calls for service. Those shifts currently are:

- Watch 1: 2200 hours to 0800 hours
- Watch 2: 0600 hours to 1600 hours
- Watch 3: 1300 hours to 2100 hours
- Watch 4: 1700 hours to 0300 hours

At this time, the Riverside County Sheriff's Department has 82 deputies, including two K-9 Officers, assigned to the patrol division with ten sergeants and two lieutenants for supervision, giving a ratio of 8.2 deputies per sergeant (Note, due to the Deficit Elimination Plan, the number of patrol officers was reduced from 87 to 82. The City has not received the 4th amendment for the Contract to verify this, however, this is the change that is expected to occur). The ratio of sergeants to patrol officers does vary amongst other police departments and ranges from one sergeant per six officers to one sergeant per ten officers. The 2004 Maximus study suggested that since the City's own police department would most likely be lesser experienced that a patrol officer to sergeant ratio closer to one sergeant per six officers would provide for better supervision in the field. The Maximus study final allocation for patrol had 1 sergeant per 5.4 deputies as they allocated on additional sergeant to the 1:6 ratio for covering vacation, illness, or training. While staff is not suggesting that the City operated department be quite that aggressive in providing supervision for a lesser experienced workforce, it may be in the City's best interest to consider increasing the number of sergeants assigned to patrol in the first few years from the current level of 1:8.2 officers to 1:7 officers. However, for the purposes of generating a first year budget, City staff has kept the current number of sergeants as listed in the contract with the Riverside County Sheriff's Department.

The Riverside County Sheriff's Department provides two lieutenants to oversee patrol functions. These two lieutenants typically work Monday – Friday, however, they do adjust their schedules for special assignments, warrant sweeps, special holidays that adversely affect patrol such as New Years Eve, and are on call should an event arise requiring their expertise. Numerous police departments provide one lieutenant per patrol shift with one Captain overseeing the patrol division. This was the recommendation of the Maximus study that was performed in 2004 for the City. As the City is satisfied with the current level of staffing at the police department, this report will reflect only two lieutenants with patrol being placed under one captain in charge of the Field Operations Division.

SUPPLEMENTING PATROL

Currently the Riverside County Sheriff's Department supplements patrol services with traffic enforcement, problem oriented policing, community services, special enforcement team,

MV00251076

burglary suppression team, robbery suppression team, and a gang task force. The number of personnel assigned to these teams does vary depending on what is occurring within the City and is provided for within the hours contracted for with the Sherriff's Department. Additionally, the City specifically contracts for dedicated positions above the contract hours which includes:

- the captain (Police Chief)
- one lieutenant
- two sergeants
- ten motorcycle trained deputy sheriffs
- two K-9 deputy sheriffs
- three crime prevention officers
- one gang task force deputy
- one graffiti prevention officer
- one school resource officer

As of the third amendment for law enforcement services entered into by the City and the County on November 10, 2010 the additional personnel needed to supplement patrol were broken out as follows:

Traffic Unit: one lieutenant, two sergeants, 18 deputies, five community service officers, and one Management Analyst (City employee)

Problem Oriented Policing Team: two sergeants, nine deputies and two community service officers

Special Enforcement Team (SET): one lieutenant, two sergeants, one K-9 officer, and 14 deputies

Burglary Suppression Team: four deputies

Robbery Suppression Team: two deputies

Towngate Mall: two deputies (Note the Moreno Valley Mall pays the fully supported rate of 70 hours a week to have a deputy at the Mall 10 hours each day. These deputies work a combined 10 hours a week on patrol that is paid for by the City.)

Police Grant C-CAT: two deputies and one Sheriff's Service Officer II (all positions are currently 100% funded through a grant) who are in addition to the staffing listed for SET.

Overall, the City is satisfied with the performance of these teams at their current staffing levels. Due to this, the study has incorporated these positions in their entirety into the final staffing report.

In order to transport prisoners to the Riverside County Jail it is recommended that a City operated police department continue to primarily utilize Community Service Officers to fulfill this role so that sworn personnel can continue to handle calls for service in a timely manner. In addition to transporting prisoners, the Community Service Officers would be assigned calls for service where there is no suspect information available, such as a runaway juvenile or a burglary

DRAFT

MV00251077

where the resident does not know who may have committed the crime. This would allow for the patrol officers to handle call for service where crimes are in progress, take reports where there is suspect information as they may contact the suspect, or to perform proactive activities such as traffic stops.

Finally, Moreno Valley would lose access to a special weapons and tactics team (known as the emergency services team (EST) in the Sheriff's Department), hazardous device team (HDT, commonly referred to as the bomb squad), and assistance from the Riverside County Sheriff's Department helicopter as these services are provided as part of the contract with the County.

Currently, Moreno Valley does not have the frequency of calls for service that requires these specialized teams/units full time. Part-time emergency services teams, where officers have collateral duties, could be something for the City to consider as well contracting with either the Riverside County Sheriff's Department or the City of Riverside for EST services. Ideally, the City operated police department would deploy staff to stabilize the scene and hold a perimeter until such a specialized unit could be assembled and arrive on scene. This service, along with the Hazardous Device Team (HDT) and helicopter services, are currently provided to the City through the contract as part of the deputy hourly rate. Without entering into negotiations with either the County of Riverside, City of Riverside, or another local jurisdiction, it is difficult to estimate what contract costs might be for access to EST, HDT, or helicopter services.

City staff highly recommends that the City minimally contracts for helicopter services as the Riverside County Sheriff's helicopter does spend a considerable amount time patrolling the City during peak demand times for police services by the public. Again, without entering into negotiations with the County, it is difficult for City staff to determine an exact cost for helicopter services. However, in order to provide an idea of what a contract might cost the City, staff examined the aviation program costs for the City of Riverside and the City of Ontario.

The City of Riverside's Aviation program cost $1,886,899 in FY 10/11 operate, whereas in Ontario their aviation program cost $2,522,383. For the purposes of developing an estimated first year budget for a City operated police department, City staff assumed that the City could expect to pay approximately 20% of the costs associated with the City of Riverside's program which would be $377,380 per year. *Cost estimates for EST and HDT can not be accurately estimated at this time and therefore are not included in the budget.*

INVESTIGATIONS

The Riverside County Sheriff's Department, in their contract rate for a deputy sheriff, allocates one detective per 7.33 deputies paid for by a contract city. This has created a detective bureau at the Moreno Valley Police Department that is currently staffed with one lieutenant, two sergeants, 17 detectives, two deputies for burglary suppression, two forensic technicians, and one sheriff's service officer II. The Investigations Bureau also has three support staff consisting of one clerical position and two crime analysts, one of which is a City employee. As the homicides that occur in the City are handled by the Riverside County Sheriff's Department Criminal Homicide Unit, the City would need to consider adding two to three additional officers at the detective rank to address not only homicides but also the more violent crimes that occur in the City due to the length of time it takes to perform an in depth investigation. For the purposes of this study, City staff has allocated three additional officers to the Riverside County Sheriff's

MV00251078

Department current staffing level in order to ensure violent crimes are properly investigated in a timely manner.

City staff is proposing to eliminate the detective rank and assign patrol officers to conduct criminal investigations for prosecution by the District Attorney. Patrol officers assigned to the detective bureau would receive an additional pay incentive to work in this special assignment while allowing the City operated police department greater flexibility in transferring staff around to patrol, special operations, and other assignments without losing rank. This will further allow the department the ability to establish a rotation policy amongst patrol, problem oriented policing, special enforcement team, and the investigations bureau in order to provide for greater career development and job enrichment to the employee without creating entitled positions.

Since it is traditional in many Riverside and San Bernardino County police agencies to have an investigator rank the City may need to consider granting bonuses or supplemental pay to lateral transfers that have investigative experience in order to create a competent detective bureau in the beginning stages of the City operated police department. *The cost for granting these bonuses has not been included in the proposed first year budget or in the start up costs section.*

Another consideration, for operational reasons, would be locate the forensic unit within the Investigation Bureau for ease of communication between those that collect the criminal evidence and those that are pursuing criminal cases. The City already contracts specifically for two forensic technicians. This unit would need to be expanded to include hiring additional forensic technicians and supervisors who have the experience of handling major crime scenes as the current forensic technicians the City contracts for are specifically assigned to handle burglaries and vandalisms.

As previously noted, all homicides are handled by the Riverside Sheriff's Department Criminal Homicide Unit as well as their technicians, so additional forensic technicians are necessary to provide forensic support for the more complex crimes such as armed robberies, assaults with a deadly weapon, and homicides. Forensic support is needed 24 hours a day so on call pay would need to be a consideration during employee negotiations. This unit would consist of four forensic technicians, one senior forensic technician, and one forensic supervisor.

Finally, the City needs to consider adding additional officers to the Investigations Bureau to conduct internal affairs investigations. Presently, all personnel investigations that are not criminal in nature, and do not involve officer involved shootings are handled at the station level. As part of the City's contract with the Riverside County Sheriff's Department, personnel investigations that are more serious in nature are referred to the Administrative Investigations Department within the Sheriff's Department. After consulting with the Sheriff's Department, City staff is recommending that an additional two officers be added to the Investigations Bureau for the purposes of conducting the more serious personnel investigations

ADMINISTRATION AND SUPPORT

In order for a police department to operate effectively it needs administrative support and community programs. The Administrative Support Division would be overseen by one Captain who would oversee the Community and Administrative Services Division, Fiscal Administration, and Communication Center. The Community and Administrative Services Section would be overseen by a lieutenant and would consist of:

MV00251079

- Logistics Unit: Six Community Service Officers would be required to manage issues related to the building, fleet, weapons maintenance, and the issuance of radios and equipment. The unit would be responsible for tracking all equipment and uniform issuance. Additionally, a Police Fleet Maintenance Coordinator would need to be hired in order to coordinate all fleet maintenance issues with the City's Maintenance and Operations Division.
- Community Services Unit: would consist of two sergeants, five deputies, and three community service officers to keep staffing level equivalent to what the City contracts for with the County.
- Training Unit: would ensure that all training records for employees are accurate and would be in charge of scheduling employees for training. This unit would consist of a sergeant, one officer, and one office assistant.
- Records and Data Processing Unit: would process all police reports, input information into the records management system, and provide front office clerical support. The Riverside County Sheriff's Department currently has one supervising office assistant II, one supervising office assistant I, two office assistant III's, and fourteen office assistant II's who provide this support. While the Riverside County Sherriff's Department does most of the records management tasks at the Moreno Valley Police Station, records management does involve offsite Riverside County Sheriff personnel. The costs for those personnel are recovered through the deputy hourly rate that the County charges the City. As such, the City would need to consider additional staffing which should include a Police Administrative Services Supervisor, two Senior Administrative Assistants, and three more office assistants.

The Fiscal Administration Section would consist of a senior management analyst to monitor the various police department budgets and oversee the grants administered throughout the police department, one senior accountant, one accounting technician, and 2.5 accounting assistant II's to continue to provide the same level of accounting services that the police department currently has.

The Communications Center would consist of the City's Dispatch Center. Issues regarding the telephone system, computer aided dispatch system, and the radio system would be reported to, and handled by, the City's Technology Services Division. Additional staffing for Technology Services is accounted for in Table 5 on page 14. Through a review of other cities who staff their own police dispatch centers, and in consultation with the Moreno Valley Police Department's Administrative Lieutenant, it was determined that a total of 31 personnel would be required to effectively run a communication center. Personnel would consist of:

- One Public Safety Communications Manager
- Four Public Safety Communications Supervisors
- Two Senior Public Safety Communications Dispatchers
- 24 Public Safety Communication Dispatchers

OFFICE OF THE CHIEF

The Office of the Chief would include the Chief of Police, Executive Assistant, and an Administrative Sergeant. Some of the responsibilities of the Administrative Sergeant would

MV00251080

include acting as the public information officer for the police department, overseeing the reserve deputy program, and coordination of facility maintenance with Community Services.

ORGANIZATION CHART

The person hired by the City to act as the first Police Chief and establish a new police department will most likely change the organization chart presented here to fit their needs and the goals they have for the department, however, in order to give City Council, City staff, and the public an idea of how the police department might be organized, a chart was prepared and can be seen below.

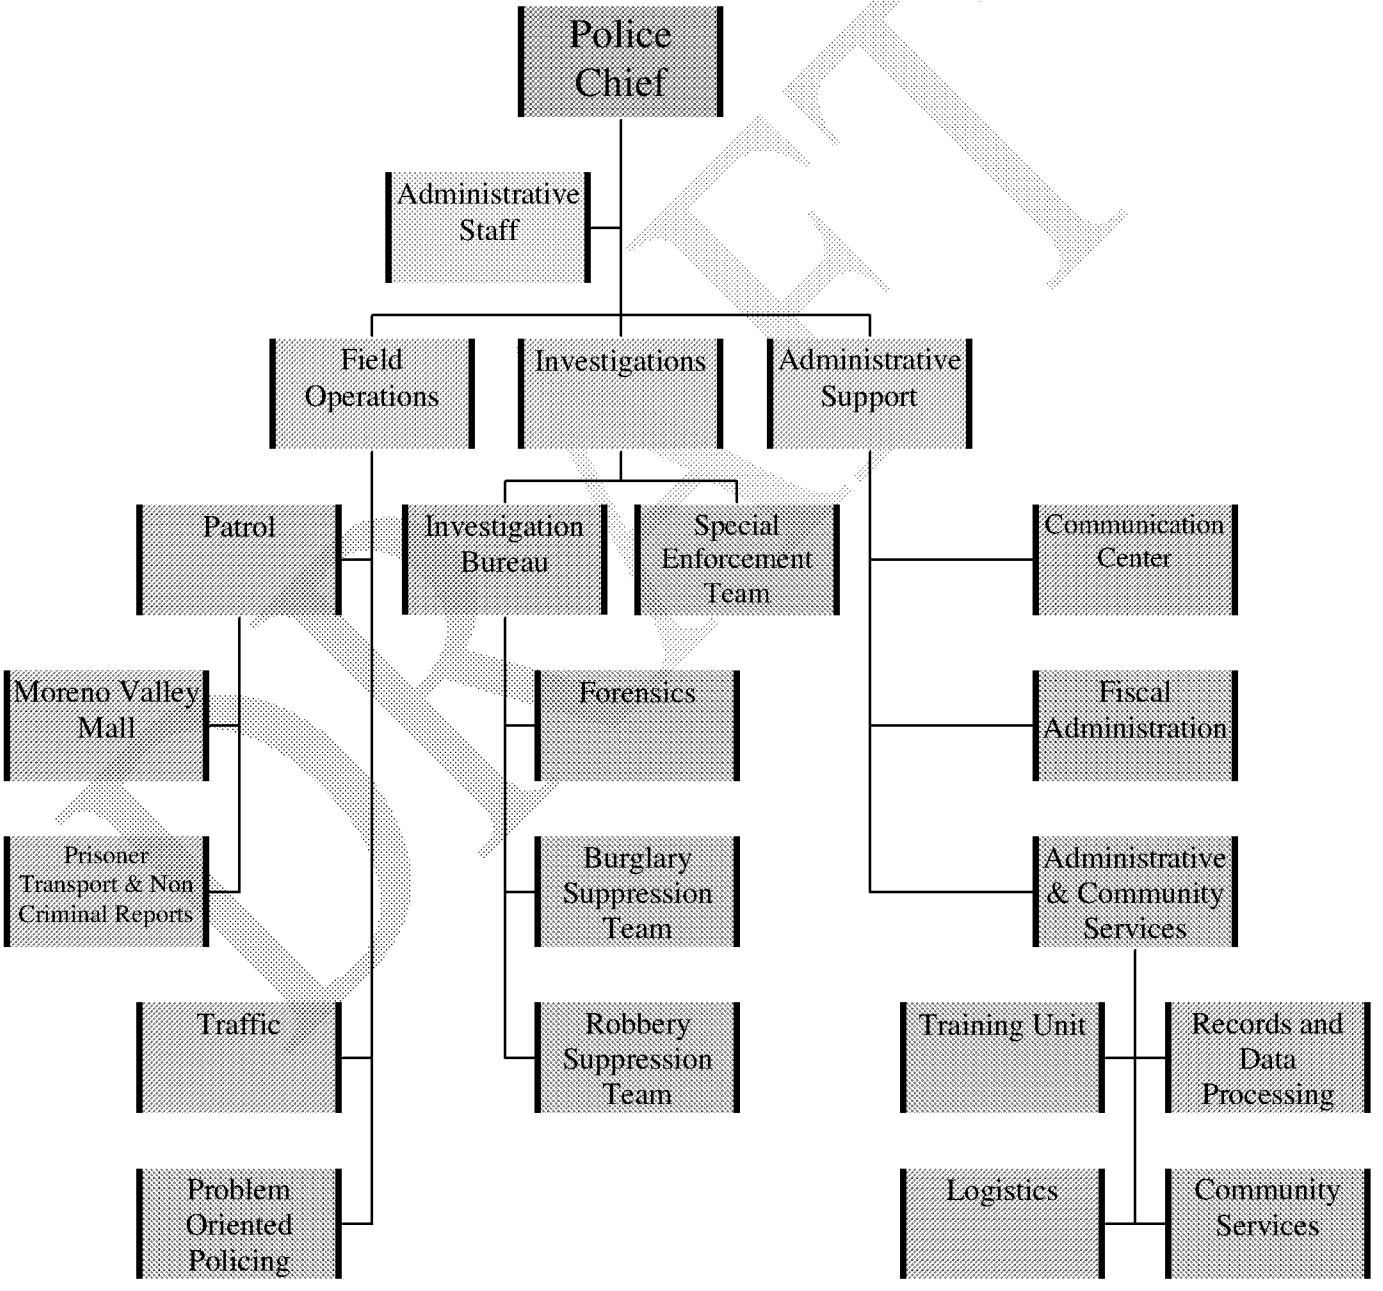

Chart 1: Proposed Organization Chart for a City Operated Police Department

MV00251081

SUMMARY OF STAFFING FOR MORENO VALLEY POLICE DEPARTMENT

A summary of staffing within each organizational unit of the organization chart above is shown below.

Title	Number Personnel
Office of the Chief	
Chief of Police	1
Executive Assistant	1
Administrative Sergeant	1
Field Operations	
Captain	1
Lieutenants – 2 Patrol, 1 Traffic	3
Sergeants	16
Officers - includes 2 K-9's, 2 Mall Officers, and 2 grant Officers	113
Community Service Officers – 16 Patrol, 5 Traffic, 2 POP	23
Management Analyst - Traffic	1
Investigations	
Captain	1
Lieutenant – 1 Investigations, 1 SET	2
Sergeants	4
Officers - includes Investigator Rank and K-9	46
Crime Analyst	2
Community Service Officer - Property	2
Office Assistant	1
Forensic Supervisor	1
Senior Forensic Technician	1
Forensic Technician	4
Administrative Support	
Captain	1
Lieutenants	1
Sergeants	3
Officers	6
Community Service Officers	9
Police Fleet Maintenance Coordinator	1
Public Safety Communications Manager	1
Public Safety Communications Supervisor	4
Senior Public Safety Communications Officer	2
Public Safety Communications Officer	24
Senior Management Analyst	1
Accounting Assistant II	2.5
Senior Accountant	1
Accountant Technician	1
Police Administrative Services Supervisor	1
Senior Administration Assistant	2
Office Assistant	22

Table 3: Staffing Summary Chart by Organizational Unit

MV00251082

The next table shows the number of employees for each position as well as salary, and benefits for personnel costs for a City of Moreno Valley Police Department. It excludes overtime, holiday pay, shift differential, and standby pay as well as additional City Hall staff.

Position Description	Number of Positions	Salary	Benefits	Total Personnel Costs
Police Chief	1	$193,042	$86,869	$279,911
Police Captain	3	$138,686	$62,409	$603,284
Police Lieutenant	6	$103,878	$46,745	$903,739
Police Sergeant	24	$85,849	$38,632	$2,987,545
Police Officer - Lateral	132	$73,410	$33,035	$14,050,674
Police Officer - Entry*	33	$72,494	$32,622	$3,468,838
Total Sworn =	**199**			**$22,293,991**
Accountant II	2.5	$63,410	$22,194	$214,009
Accounting Technician	1	$45,064	$15,773	$60,837
Community Service Officer I	13	$37,112	$12,989	$651,316
Community Service Officer II	17	$42,496	$14,874	$975,283
Executive Assistant II	1	$54,776	$19,172	$73,948
Forensic Supervisor	1	$68,049	$23,817	$91,866
Forensic Technician	4	$49,749	$17,412	$268,645
Management Analyst (Crime Analyst)	3	$63,410	$22,194	$256,811
Office Assistant	22	$33,628	$11,770	$998,739
Police Administrative Services Supervisor	1	$81,411	$28,494	$109,905
Police Fleet Maintenance Coordinator	1	$66,945	$23,431	$90,376
Public Safety Communications Manager	1	$84,391	$29,537	$113,928
Public Safety Communications Dispatcher I	6	$46,499	$16,275	$376,642
Public Safety Communications Dispatcher II	18	$53,293	$18,653	$1,295,020
Public Safety Communications Supervisor	4	$65,717	$23,001	$354,872
Senior Accountant	1	$66,581	$23,303	$89,884
Senior Administrative Assistant	2	$45,064	$15,773	$121,674
Senior Community Service Officer	4	$47,168	$16,509	$254,707
Senior Forensic Technician	1	$58,748	$20,562	$79,310
Senior Management Analyst	1	$73,405	$25,692	$99,097
Senior Public Safety Communications Dispatcher	2	$54,082	$18,929	$146,021
Non Sworn	**106.5**			**$6,722,888**
Total Positions & Costs=	**305.5**			**$29,016,878**

Table 4: Summary of First Year Salary and Benefit Cost for the Police Department Excluding Additional City Hall Staff

The information in Table 4 excludes costs for overtime, shift differential, holiday pay, and special duty pay. Those amounts are included in a simulated first year operating budget in Table 6 on page 16. Additionally, City personnel that will need to be hired as a result of creating the City's own police department can be found in Table 5 on the next page.

MV00251083

For positions that the City does not currently have in its salary schedule a salary survey was completed utilizing information from the current salaries paid by the Riverside County Sheriff's Department, the City of Riverside, and several other local agencies. A median of the minimum and maximum salaries for those jurisdictions was utilized to determine a midrange salary that the City could expect to pay experienced law enforcement personnel for both sworn and non sworn positions. The figures used to project salary costs overall pays 1.6% higher than the County, however, the figures are approximately 9% lower than the average salary for the City of Riverside.

The new Moreno Valley Police Department would need to hire both experienced and inexperience police employees. It would be preferable if at least 85% of the city operated police department's personnel had previous law enforcement experience. The City would need to pay salaries and benefits that reflect this accumulated knowledge, skill and abilities of a predominately veteran staff. The salaries reflected in the table above reflect a mid range for all positions in order to estimate the cost of hiring an experienced work force.

A fringe benefit rate of 35% was utilized for non sworn personnel while a 45% fringe benefit rate was used for sworn personnel due to the fact the City would be offering all sworn personnel 3% at 55 for their retirement, known as PERS (California Public Employee Retirement System). Workman's Compensation has not been calculated into the benefit rate and is accounted for separately in the first year budget (Table 6).

ADDITIONAL CITY STAFF

In order to support a City operated police department, it is imperative that the City recognizes the need to expand staffing in other City Departments and Divisions for services that were previously covered by the County as well as the demand for services that the additional 305.5 positions will create for other departments such as Human Resources and Finance. Below is a table listing the names and number of positions needed as well as a cost estimate for the salary and benefits of these positions.

Position Description	Number of Positions	Salary	Benefits	Total Personnel Costs
Deputy City Attorney I	1	$89,224	$31,229	$120,453
Human Resource Analyst	1	$63,410	$22,194	$85,604
Human Resource Technician	1	$45,064	$15,773	$60,837
Information Technology Technician	1	$52,168	$18,259	$70,426
Legal Secretary	1	$49,684	$17,389	$67,073
Network Administrator	1	$89,224	$31,229	$120,453
Payroll Technician	1.5	$45,064	$15,773	$91,256
Risk Management Analyst	1	$63,410	$22,194	$85,604
Senior Application Analyst	1	$73,405	$25,692	$99,097
Telecommunications Technician	2	$52,168	$18,259	$140,853
Vehicle Equipment Technician	5.5	$45,064	$15,773	$334,604
Subtotal	**17**			**$1,276,257**
Overtime				$45,000

MV00251084

Standby & Holiday Pay				$44,659
Total Personnel Costs				**$1,365,916**

Table 5: Summary of First Year Salary and Benefit Cost for Additional City Hall Staff to Support Police Department

FACILITY AND EQUIPMENT

The Moreno Valley Police Department would occupy the current City owned facility used by the Riverside County Sheriff's Department. The Public Safety Building (PSB) is owned by the City and was built specifically to be the headquarters for both the Police and Fire Departments. The City and Riverside County would need to jointly conduct a complete inventory of the building to determine what is owned by the City and what is owned by the County. Start up costs, which are listed on page 19, contain estimates for equipment the City might have to acquire to replace County owned equipment and/or purchase new equipment for the dispatch center.

While the City had initially allocated space for a dispatch center to be located in the PSB when it was constructed, that space had been temporarily converted into an emergency operations center (EOC) following the terrorist attacks in September 11, 2001 in New York. With the City's new EOC opening in September of 2010, this space became available for the reconfiguration of the PSB to accommodate a police department that has been outgrowing the current facility. Funding for that space to be converted into an area to accommodate the traffic division was approved in the Fiscal Year 2011/2012 Capital Project Budget and the conversion of this space is expected to be completed in Fiscal Year 2012/2013.

A master plan for the reconfiguration of the PSB was completed in 2010 however, while it included building an area for the secure storage of property and evidence as well as a vehicle impound area, it excluded building a criminal laboratory area for forensic technicians to utilize in order to process photographs, fingerprints, and other crime scene evidence as well as an area for a communications/dispatch center. This master plan would need to be updated and the City would need to be prepared to expand the PSB immediately in order to accommodate a dispatch center, a criminal laboratory for the forensic technicians to use, and an area for evidence and property storage as well as an area for vehicle impoundment. Currently, all of the property and evidence seized by deputies assigned to Moreno Valley is stored at the Riverside County Sheriff's Department Perris Station due to the lack of space at the PSB. Of the 4,400 square feet of evidence and property storage at the Perris Station, Moreno Valley occupies approximately 80% of that space. Due to these factors the City should consider moving forward on the PSB expansion as soon as possible should the City Council elect to start up a City operated police department.

Unfortunately, it is too difficult to estimate at this time what the cost for expanding the PSB to accommodate these new areas would cost. In the incremental growth plan completed for the City by Roesling Nakamura Terada Architects, the PSB is expanded over three phases for a total cost of $104.4 million dollars. The evidence, logistics, and property area, which included a parking structure of 871 stalls, was listed in Phase 3 of this plan at a cost of $27.9 million dollars. Again, this expansion excluded the addition of a criminal laboratory and a dispatch center.

Finally, the City would also need to ensure that there is adequate locker room space for the expanded size of the police department and the City would need to reexamine whether or not there was adequate space in the building for the sworn and non-sworn staff to utilize in the performance of their duties.

COMMUNICATIONS, INFORMATION TECHNOLOGY, AND DISPATCH

MV00251085

While the City can definitely consider contracting for dispatch services, ideally a City operated police department would want control over its own dispatching and information technology operations in order to ensure local priorities are being met. While it is not unheard of for a City to have its own police department and yet contract for police dispatch services (the City of Pacifica on June 27, 2011 decided to contract dispatch services with South San Francisco), it is highly unusual. Some of the concerns the need to be considered when examining whether or not to contract police dispatch services while maintaining a local police department includes: loss of local control, conflict resolution between police officers and dispatchers, and the ability to have immediate access to 9-1-1 tapes and radio transmissions. For the purposes of this study, City staff has assumed that the City will operate its own dispatch and communications center.

Personnel costs for a communications center is estimated at $2,630,388 for the first year of operation. Other costs that have been considered for a first year operating budget for a City police department include office supplies, training, recruitment costs, and internal service fund transfers to cover technology and facility maintenance costs. An additional budget item to consider for the future would be uniforms for dispatchers as several jurisdictions do provide uniforms for dispatchers to create a more professional environment and reinforce the idea that they are working for a paramilitary department.

FIRST YEAR OPERATING BUDGET

A potential first year operating budget for the first year for a City operated police department is shown on the next page. Of note, *there are no costs listed for either contracting emergency services team (EST) services and hazardous device team (HDT) services or providing equipment, training, and supplemental pay to City police officers to provide this service.* Additionally, it is difficult to determine the costs associated with operating a criminal laboratory and therefore *no cost estimate has been made for supplies for a criminal laboratory*. Included in the first year operating budget below is the costs for outside legal services, general liability, workmen's compensation, property damage insurance, and employment practices insurance.

Description	Cost
Salaries and Benefits	
Salaries - Sworn (199)	$15,375,166
Benefits - Sworn	$6,918,825
Salaries & Benefit Cost Sworn	**$22,293,991**
Overtime - Sworn	$2,121,420

ISF - Subtotal	$6,975,343
Annual Costs	**$49,250,353**

Table 6: Proposed First Year Operating Budget Excluding Additional City Staff

In addition to the first year operating costs listed above, the City would need to augment other City departments with staff to support to the Police Department at a cost of $1,365,916 (from Table 5) in order to support a police department that operates seven days a week, 24 hours a day. *This would bring the total first year costs associated with a City operated police department to $50,616,269.*

City staff created the first year budget based on what the City allocated to the police department for Fiscal Year 2011/2012 and then supplemented the budget with additional funding for items such as contracting out helicopter services, additional funding for outside legal expenditures to address lawsuits, funding for replacing uniforms, and other such costs that are not currently in a separate line item budget for the police department and are currently provided as part of the contract with the Riverside County Sheriff's Department.

This first year budget is experimental to some extent as some costs can not be accurately predicted until a few budget cycles have passed, such as the cost for recruitment, replacement uniforms, and training. Items that are easier to predict, such as salary and benefits, are reliable as these are set costs that increase or decrease based on contracts with the various City unions.

The City, in FY 11/12, has budgeted $41,261,770 for 181 sworn positions and 52.5 non sworn positions. The proposed City operated police department would have 199 sworn positions with 106.5 non sworn positions for a cost of $49,250,353 plus an additional $1,365,916 to cover the costs of 17 new City positions for a total first year operating budget of $50,616,269. This is an increase of $8,969,529 or 22.7% for the City to operate its own police department.

START UP COSTS

The start up costs for a City operated police department include patrol cars, uniforms, background checks, dispatch equipment, information technology equipment, initial reserve fund money for general liability and workman's compensation, and capital outlay for radio towers and fueling station. The start up costs provided below is for items minimally required to begin

MV00251088

operating a City police department. As mentioned previously, it is quite possible that the start up costs listed for the communications/dispatch center could cost an additional $7 million dollars, bringing the total cost for communications and dispatch to over $17 million dollars.

Excluded from these start up costs is the expense to expand City Yard in order to provide routine service to police vehicles. While the City of Corona was able to expand their current City Yard as a cost of $1.5 million dollars to accommodate performing maintenance on police vehicles with their staff, it is quite possible that such an expansion could run $4 million to $6 million dollars should the City need to purchase land to build a police vehicle only facility that could be expanded to accommodate fire engines and fire trucks in the future.

Also not included in the start up costs is the cost to expand the Public Safety Building (PSB). As previously discussed, the incremental grown plan for the PSB would need to be reexamined to ensure there is adequate space for the proposed City operated police department as well as enough space for property and evidence storage, vehicle impoundment, a dispatch center, and a criminal laboratory. The project was last estimated in 2010 to have a total cost of $104.4 million dollars, with the phase 3 expansion that includes adequate space for property, evidence, and vehicle impoundment at a cost of $27.9 million dollars.

Finally, the City currently owns a few vehicles utilized by the Riverside County Sheriff's Department, such as the motorcycles for traffic enforcement, the traffic reconstruction truck, and the forensic technician's vehicle. These items have been excluded from the start up costs listed below.

Description	Cost	Units	Total Cost
Patrol Cars			
Patrol - Black and White - Crown Victoria	$26,000	122	$3,172,000
Patrol - K9 - Crown Victoria	$26,000	3	$78,000
Unmarked - Make/Model Varies	$20,000	45	$900,000
Transport Van	$30,000	2	$60,000
Subtotal Vehicle Cost =			**$4,210,000**
Vehicle Equipment			
Equipment for Patrol Vehicle (includes K-9)	$32,920	125	$4,115,000
Equipment for Detective Vehicle	$23,920	45	$1,076,400
Subtotal Vehicle Equipment =			**$5,191,400**

Contingency at 20%			$5,648,774
Total Costs =			**$33,892,642**

Table 7: Start Up Costs – Excludes the Cost to Expand the Public Safety Building and City Yard.

The City would require at least two years to build the communications infrastructure required to support its own police department. A large part of this two year process is the length of time it would take to work with the Federal Communications Commission to obtain radio frequencies, hiring project managers to ensure the project is completed in a timely manner, and the purchasing of land in order to build radio towers as well as the construction of those towers. As the Riverside County Sheriff's Department requires 12 months notice from the City in order to terminate the contract, this process would need to start one year prior to notifying the County that the City intends to operate its own police department.

New police officers, as opposed to lateral transfers from other jurisdictions, will require training at a Peace Officer Standards and Training (POST) certified academy which would be a cost incurred by the City as well as the salary and benefits paid to the employee during their training period. The cost at the Ben Clark Training Center for a basic POST certificate for law enforcement is minimally $5,579.62. *As it is difficult to determine how many new officers the City can expect to hire, the cost for an employee to attend the police academy, has been excluded*

MV00251090

from the start up costs. City staff can provide a rough estimate of the cost, which would assume 75% of the sworn staff hired would have previous law enforcement experience. Therefore, of the 199 sworn staff, 50 of the personnel hired by the City would require a basic POST certified academy, increasing the start up costs by $278,981. However, this amount could be much higher or lower, based on who is hired.

All employees within the police department would need to undergo an in depth background check and polygraph test. Additionally, all sworn staff would be required to pass a psychological evaluation. Based on information provided by other jurisdictions, the City can expect to spend $445 per officer for a psychological evaluation, $500 per person for a polygraph test, and approximately $3,250 per background investigation (estimated at $65.00 per hour at 50 hours per investigation). The line item was then increased by 40% to account for those individuals who will not pass their background check. As a side note, this could be extremely conservative as some jurisdictions see a failure rate higher than 40% when completing background investigations on police officers.

Finally, City staff has included overlap coverage between the Riverside County Sheriff's Department and a City operated police department. For example, the Police Chief would need to be hired six to nine month in advance of the desired start date for the police department. The Chief would then begin the process of hiring personnel, establish policy and procedures, and coordinating a smooth transition with the Sheriff's Department. There will also be a period of overlap between the deputies from the Sheriff's Department patrolling Moreno Valley and the officers from the City operated police department patrolling the City to give the new officers time to learn the City and meet key community members. These costs have been accounted for in the transition costs.

CONCLUSION

The City, in FY 2011/2012, has budgeted $41,261,770 for 181 sworn positions and 52.5 non sworn positions. The proposed City operated police department would have 199 sworn positions with 106.5 non sworn positions for a cost of $49,250,353 plus an additional $1,365,916 to cover the costs of 17 new City positions for a total first year operating budget of $50,616,269. This is an increase of $9,354,499 or 22.7% for the City to operate its own police department.

When comparing this to the Maximus study of 2004, the City had budgeted $23,030,031 for police services in Fiscal Year 2003/2004 which included 144 sworn positions and 43.5 non-sworn positions. The police department described by Maximus in that study would have had a first year operating cost of $28,756,493 with a staff of 166 sworn positions and 90.5 non-sworn positions. Maximus' proposed first year budget was a 24.9% increase over what the City had budgeted for police services.

City staff did expect to see a slight decrease in the percentage between what a City operated police department would cost compared to contracting with the Riverside County Sheriff's Department due to budget reductions to the police department's budget over the last few years. It is therefore not surprising to see a slight difference between the Maximus study and the City's own in house feasibility study.

The Maximus study in 2004 had an estimated start up cost of $19 million compared to the $33,892,642 of this study. In looking at their study it appears they may have underestimated the costs for communications in dispatch. They also allocated funding for 119 vehicles, both new and used, whereas this study assumes the City will need to buy all new vehicles as there is no

MV00251091

guarantee that there will be any serviceable used police vehicle that would fit the City's needs. The Maximus study also under allocated funding for background investigations and vehicle equipment.

Determining the exact size and cost of a City operated police department will depend on providing a satisfactory level of service to the residents of Moreno Valley. The size and cost recommendations made in this report are a low to mid range mix of personnel and functions designed to provide at least equivalent services to those currently being provided under contract. Adjustments can be made, based on policy preferences, by City Council or the City Manager. However, without a substantial decrease in personnel, the annual cost of providing police services that are equivalent to what the City is currently receiving will remain in the vicinity of $50,616,269, which includes the additional City staff needed in other departments to support a City operated police department.

DRAFT

MV00251092

ORIGINAL

FOURTH AMENDMENT TO AGREEMENT FOR LAW ENFORCEMENT SERVICES BETWEEN COUNTY OF RIVERSIDE AND CITY OF MORENO VALLEY

IT IS MUTUALLY AGREED that the Agreement for Law Enforcement Services between the County of Riverside, a political subdivision of the State of California, on behalf of its Sheriff's Department, and the City of Moreno Valley, a General Law City, approved by the Board of Supervisors on December 16, 2008, for services effective July 1, 2008 through June 30, 2013, as amended on December 1, 2009, November 2, 2010 and November 30, 2010, is hereby amended in the following respects, and all other terms and conditions of the Agreement remain in full force and effect:

1. Attachment A-1 is amended to read as follows:

ATTACHMENT A-1
CITY OF MORENO VALLEY

74	"Riverside County Sheriff's Department and it's contract agency (Moreno Valley) implemented a records management system mid-year 1999 and experienced technical problems with the system. Totals reported
75	for 1999 were not valid and should not be used to make comparisons. Therefore, to maintain comparability of 2000 data with 1999 data, counts are shown but not included in the subtotals or total selected
76	jurisdiction counts."
77	Note * 2: Shown above is the approximate % change for 1999 using 1998 v 2000 comparison. Per Lt. Hill at Riverside County Sheriff's Technical Services Bureau (TSB): "The Riverside County Sheriff's Department
78	implemented a new records management system in 1999 and experienced technical problems with the system. Totals reported for 1999 were not valid and should not be used to make comparisons."
79	What is shown is an average decrease in crime for 1999 by percentages using 1998 as base year and 2000 as the comparison year and then divide the year 2000 percentages by 2 to show an average
80	for each year, 1999 & 2000.

87	
88	
89	
90	Note: From Eric/TSB: Much like the MV01217010, case MV01212091 (Yes another 2001 case) was investigated as an accidental overdose at the time it occurred. In January 2003 a person
91	(Ruben Chavira)turned himself in, confessing to drowning the victim. Because the case was then classified as a homicide, we had to report it for January 2003. The victim was Valerie Ladelphia.
92	This case is the incident that is reflected on the Return A, Item A, and should appear as a homicide on the State's first quarter report.
93	
94	04/15/2004 Note From Eric/TSB: MVPD final 2003 Aggravated Assault total will be 468. The numbers that are posted on the DOJ website are "preliminary" numbers only which will be corrected later in the year 2004.

MEMORANDUM

To: Mayor and City Council

From: Rick Teichert, Financial & Management Services Director

Date: March 19, 2013

Subject: CITY COUNCIL STUDY SESSION OF MARCH 19, 2013, ITEM 1 – PRESENTATION OF LONG TERM FINANCIAL CHALLENGES – ANNUAL INCREASES IN PUBLIC SAFETY CONTRACTS

Attached is a PowerPoint presentation that provides additional data and further context to the staff report addressing the challenge of increased public safety contract costs. This attachment was not available at the time the agenda was posted. Hard copies will also be made available for the public via the City Clerk's counter copies and at the meeting.

c: Henry Garcia, City Manager
Michelle Dawson, Assistant City Manager
Suzanne Bryant, Acting City Attorney

CITY OF MORENO VALLEY

LONG TERM FINANCIAL CHALLENGES:

ANNUAL INCREASES IN PUBLIC SAFETY COSTS

March 19, 2013

MV00251108

Long Term Financial Challenges

March 5, 2013	Slow Growth in Major General Fund Revenue Sources
March 19, 2013	Annual Increases in Public Safety Contracts
April 2, 2013	Unfunded Liabilities – Public Employees Retirement System and Retiree Medical
June 4, 2013	Increased Demands on General Fund Reserves
June 18, 2013	Unfunded Liabilities – Compensated Absences and Others

MV00251109

Slow Growth in Major General Fund Revenue Sources

- City's historically low tax base
- Overview of the Major General Fund Revenue Sources
- Revenues declined steeply during the Great Recession
- Revenues are growing very slowly during the economic recovery

MV00251110

Public Safety Costs during the Recession and Recovery

	FY 2007/08	FY 2008/09	FY 2009/10	FY 2010/11	FY 2011/12	FY 2012/13	FY 2013/14	FY 2014/15
GF Tax Base:								
TAX BASE TOTAL	71,371,338	66,854,823	57,039,844	58,621,062	61,333,646	62,853,500	64,266,100	65,896,900

MV00251111

What Drives Public Safety Costs Higher?

- Demand for Service Remains High
  - Calls for service remain high
  - Preventative action regarding crime and fire prevention is paramount to public safety
- City Requested Service Levels Increase or are Unchanged
- Contract Rates continue to rise

MV00251112

History of Fire Service "Rates"

	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	FY 12-13	FY 13-14	FY 14-15
HISTORY OF FIRE CONTRACT RATES	Estimate	Estimate	Estimate	Estimate	Estimate	Estimate	Estimate	Estimate
Fire Rate Exhibit A	13,678,745	14,417,477	13,971,396	13,535,639	12,667,575	13,917,615	14,681,953	15,122,412
Change - Dollars		738,732	-446,081	-435,757	-868,064	1,250,040	764,338	440,459
Change - Percent		5.40%	-3.09%	-3.12%	-6.41%	9.87%	5.49%	3.00%

- Fire Contract Exhibit A – cost of service quote updated annually – no separate "rate"
- Total costs declined in FY 2009-10 and 2010-11
- Declined with cut of Truck 58 in FY 2011-12
- Increased with opening of Station 99 in FY 2012-13

MV00251121

Actions to Address the Structural Imbalance

- To maintain General Fund reserve levels, staff recommends balancing the budget in FY 2013-14
  - Requires a reduction equivalent to eliminating 25 sworn officers from the current 181 (a 14% reduction in staffing)
  - Requires closure of one Fire Station in FY 2014-15 (reduces 6 firefighters)
- County Staff indicates that 5% Police Rate Increases are Expected through FY 2014-15

MV00251122

Actions to Address the Structural Imbalance

- Fire Service Contract Costs are Estimated to Increase at 3% Annually
- Public Safety Service reductions are not sustainable based on number of calls experienced and risk of long term operations at significantly reduced levels
- Primary Solution - a Ballot Measure to fund the needed service levels As Soon As Possible to maintain public safety for Moreno Valley Residents

MV00251123

Actions to Address the Structural Imbalance

- Long Term Concepts to Control/Impact Public Safety Cost Increases

  - ☑ Negotiate changes to the Police Services Contract with the County to include some input regarding major cost factors affecting the contract rates

  - ☑ Review a possible change in service structure
    - In-house Police Service
    - Regional Joint Powers Authority for provision of Police Service

Report to City Council

TO: Mayor and City Council

FROM: Rick Teichert, Financial and Management Services Director

AGENDA DATE: March 19, 2013

TITLE: PRESENTATION OF LONG TERM FINANCIAL CHALLENGES – ANNUAL INCREASES IN PUBLIC SAFETY CONTRACTS

RECOMMENDED ACTION

Recommendation: That the City Council:

1. Review and discuss the report addressing the challenge of increased public safety contract costs.

BACKGROUND

City Council has requested a series of discussion topics related to long term financial issues impacting the City's General Fund. The topics have been scheduled to occur at City Council Study Sessions over the next several months. The intent is to review and discuss details and related impacts for each issue. Information presented on these topics will be posted on the City's web site following each presentation at Study Session.

March 5, 2013	Slow Growth in Major General Fund Revenue Sources (presented)
March 19, 2013	Annual Increases in Public Safety Contracts
April 2, 2013	Unfunded Liabilities – Public Employees Retirement System and Retiree Medical
April 16, 2013	Employee Compensation Issues
June 4, 2013	Increased Demands on General Fund Reserves
June 18, 2013	Unfunded Liabilities – Compensated Absences and Others

DISCUSSION

The City of Moreno Valley is party to three agreements over which it does not control the contract rates. Two of these agreements are with the County of Riverside for the provision of police and fire services and these contracts are the subject of this report. The third agreement is with CalPERS for funding and management of employee retirement benefits. Discussion of the ongoing impact of the PERS rates is scheduled for the April 2 Study Session.

The police and fire service provided to the City and our residents is of the highest quality. This fact can be illustrated in numerous ways, including the most recent Uniform Crime Rate statistics indicating that Moreno Valley has one of the lowest Part I crime rates in the City's history. However, the statistics are on the upswing. There are many benefits to contracting for public safety services. While the City does not control the rate for the contracts, the dynamic of contracting for services provides for the City Council to control overall cost through service levels requested from the contracting partner. The City Council has no control over the demand for police and fire services; however they do bear the responsibility of responding to that demand.

Revenue Decline and Slow Recovery

The City's tax revenues decreased dramatically during the 3-year period from FY 2007-08 through FY 2010-11. During this relatively short period, total General Fund revenues decreased a total of $18 million or 20%.

As reported during the Study Session on March 5, 2013, the City's General Fund tax revenue growth is slow and gradual with no swift revenue recovery projected. Staff anticipates overall revenue growth of approximately 2.0% - 2.5% annually for the General Fund, with the most rapid growth occurring in Sales Tax revenues (7-8% growth is projected). Property Taxes are expected to reflect very slow growth and recovery in the real estate market and housing process. These revenue projections should result in an increase in the overall General Fund from $74.1 million in the current fiscal year to $76.4 million in FY 2013-14, a 3.2% growth rate; and to $78.2 in FY 2014-15, a rate of growth of 2.2%.

		(6,337,506)	(6,429,061)	(5,306,082)	1,990,717	210,865	2,343,167	1,689,200
		-7.0%	-7.7%	-6.9%	2.8%	0.3%	3.2%	2.2%

Increasing Police Services Rates/Costs

Police service contract rates continued to increase every year during the recent recession, and the increases have been more rapid in the post-recession period. While the City's

revenues were declining by about 7% per year from FY 2008-09 to FY 2010-11, the police service contract continued to increase by about 3% or more each year. County approved multi-year labor agreements contributed to the contract rate increases; however, in FY 2011-12, the County Board of Supervisors imposed a 10% reduction on their largest public safety labor union; which was made permanent the following year when they agreed to pay the employee share of retirement funding. This 10% reduction resulted in a 1.10% increase in the contract rate in FY 2011-12 (the lowest contract rate increase experienced). A recent three-year labor agreement has resulted in contract cost increases that are having a significant impact for the City in the foreseeable planning horizon. The current year contract rate increased 4.69%. The County Sheriff's administrative staff has advised the City to anticipate 5% rate increases during each of the next two budget years. The following table reflects the historical growth and changes in the Police Service contract rates:

	FY 07-08 Actual	FY 08-09 Actual	FY 09-10 Actual	FY 10-11 Actual	FY 11-12 Actual	FY 12-13 Est. Actual	FY 13-14 Budget	FY 14-15 Budget
HISTORY OF POLICE CONTRACT RATES								
Police Contract Rate	111.88	117.3	121.97	125.37	126.74	132.69	139.32	146.29
Change - Dollars	5.36	5.42	4.67	3.40	1.37	5.95	6.63	6.97
Change - Percent	5.03%	4.84%	3.98%	2.79%	1.10%	4.69%	5.00%	5.00%

At current levels of service, costs will grow to over $46 million per year by FY 2014-15. This is an increase of $10.6 million over the 7-year period, or an average increase of $1.5 million each year. This represents an average increase of 4.05% each year over the 8 year period. Putting this $10 million cost increase into context, during that same period the City's General Fund revenues saw a $11 million decrease. Although this appears to be a large swing in the costs of a single public service, it actually represents a gradual increase to recover the cost of providing service that the City has requested. Also of note is that the major factor in this "swing" is the decline in economically volatile General Fund revenues.

	FY 07-08 Actual	FY 08-09 Actual	FY 09-10 Actual	FY 10-11 Actual	FY 11-12 Actual	FY 12-13 Est. Actual	FY 13-14 Budget	FY 14-15 Budget
HISTORY OF POLICE SERVICE COSTS								
Police Contract Costs	32,400,997	34,807,852	35,288,448	35,743,686	35,227,060	37,050,972	39,878,973	42,031,213
Total Police Costs	35,581,734	38,370,806	38,726,541	39,157,265	39,099,718	41,171,615	43,984,194	46,255,845
		2,789,072	355,734	430,724	(57,547)	2,071,897	2,812,579	2,271,651
		8.6%	1.0%	1.2%	-0.2%	5.9%	7.6%	5.7%

Increasing Fire Services Rates/Costs

Although the fire service contract rates experienced a brief period of reductions, the total contract rates have increased and are projected to continue to increase in the future. The following table reflects the historical growth and changes in the Fire Service contract rates:

	FY 07-08 Estimate	FY 08-09 Estimate	FY 09-10 Estimate	FY 10-11 Estimate	FY 11-12 Estimate	FY 12-13 Estimate	FY 13-14 Estimate	FY 14-15 Estimate
HISTORY OF FIRE CONTRACT RATES								
Fire Rate Exhibit A	13,678,745	14,417,477	13,971,396	13,535,639	12,667,575	13,917,615	14,681,953	15,122,412
Change - Dollars		738,732	-446,081	-435,757	-868,064	1,250,040	764,338	440,459
Change - Percent		5.40%	-3.09%	-3.12%	-6.41%	9.87%	5.49%	3.00%

At the current levels of service, contract costs will grow to about $15.2 million per year by FY 2014-15. This is an increase of $2.7 million over the 7-year period, or an average increase of $380,000 each year. This represents an average increase of 3.1% each year. It is important to note that the contract cost increases include requests in increased service levels. In addition, the calls for service during this 8 year period have increased significantly. The largest contract cost increase has been the opening of the Morrison Park Fire Station in October 2012. Discounting this added cost, the average contract cost increase is 1.7% per year. Additionally, the City requested the upgrade to paramedic fire trucks in the most recent contract period and absorbed the hazard abatement service in FY 2008/09. Also of importance is the recognition that fire safety staff have only had one pay increase in the past 7 years, and now pay the employee share of CalPERS costs during this period.

	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	FY 12-13	FY 13-14	FY 14-15

Fire Contract Costs	12,513,741	12,535,469	12,940,527	12,822,977	11,606,535	13,849,349	14,789,341	15,233,021
		21,728	405,058	(117,550)	(1,216,442)	2,242,814	939,992	443,680
		0.2%	3.2%	-0.9%	-9.5%	19.3%	6.8%	3.0%

Summary of Public Safety Costs as a percent of General Fund

The impact of the combination of the two public safety service contracts has been dramatic. Total police and fire services expenditures were $51.5 million in FY 2007-08, which required 57.3% of the General Fund revenues to support the service levels. The projected costs of the two services in FY 2014-15 is $64.9 million. As the cost of services increased during a recessionary period, these services now consume 83% of the General Fund revenues projected for FY 2014-15.

	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	FY 12-13	FY 13-14	FY 14-15
	Actual	Actual	Actual	Actual	Actual	Est. Actual	Budget	Budget
TOTAL REVENUE AND TAXES	89,989,297	83,651,791	77,222,730	71,916,648	73,907,365	74,118,230	76,461,397	78,150,597
Total Police Costs	35,581,734	38,370,806	38,726,541	39,157,265	39,099,718	41,171,615	43,984,194	46,255,845

Percent of General Fund Revenues	57.3%	64.7%	70.6%	75.9%	73.4%	78.6%	81.4%	83.1%

Conclusion

During the past two years, as part of the Council-approved Deficit Elimination Plan (DEP), the Police and Fire Departments have made efforts to assist the City to reduce the draw on General Fund reserves. For Fiscal Year 2011-12 these contributions included a police service reduction of $1,000,000 and the elimination of a truck company for fire service

along with other cuts to staffing and operations. Although these cuts were impactful, the City's General Fund continues to operate at a deficit.

The City Council has directed the City Manager to develop a plan to balance the General Fund budget in FY 2013-14 to eliminate the draw on General Fund reserves that has occurred over the past five years. The Council-approved DEP identifies cuts that will further impact City services, and still does not close the projected deficit of $6.3 million for FY 2013-14. As a last resort, the City Council must look to public safety service level reductions, or the creation of a new source of revenue, to balance the General Fund. The reductions to both police and fire services will have to be significant because there are no alternatives left to reduce or eliminate costs.

The problem is two-fold. One is the rising rate of contract cost recovery charged by our contract service partners. The second is the low tax base of the City, aggravated by the economic volatility of the tax revenues themselves and losses of revenues due to the State eliminating Redevelopment and Vehicle License Fee revenues. The low per capita tax base will be solved over time, as the City continues to build-out and builds its commercial/retail base, and focuses on bringing jobs into the City. Until that goal is achieved, the City MUST consider a new revenue source, such as a revenue measure to be placed before the voters. This will provide the resources needed to meet the demand for public safety services, until longer term solutions may be realized.

Specific expenditure reductions in public safety will be discussed within the context and the process of the upcoming scheduled budget meetings, where City Council will review and discuss the City Manager's plan to balance the General Fund revenue and expenditure budget in one year.

The presentation and discussion on Tuesday, March 19, 2013, will include a PowerPoint presentation that will provide additional data and further context to this issue.

Police Contract Rate	111.88	117.3	121.97	125.37	126.74	132.69	139.32	146.29
Change - Dollars	5.36	5.42	4.67	3.40	1.37	5.95	6.63	6.97
Change - Percent	5.03%	4.84%	3.98%	2.79%	1.10%	4.69%	5.00%	5.00%

At current levels of service, costs will grow to over $46 million per year by FY 2014-15. This is an increase of $10.6 million over the 7-year period, or an average increase of $1.5 million each year. This represents an average increase of 4.05% each year over the 8 year period. Putting this $10 million cost increase into context, during that same period the City's General Fund revenues saw a $11 million decrease. Although this appears to be a large swing in the costs of a single public service, it actually represents a gradual increase to recover the cost of providing service that the City has requested. Also of note is that the major factor in this "swing" is the decline in economically volatile General Fund revenues.

Increasing Fire Services Rates/Costs

Although the fire service contract rates experienced a brief period of reductions, the total contract rates have increased and are projected to continue to increase in the future. The following table reflects the historical growth and changes in the Fire Service contract rates:

	FY 07-08 Estimate	FY 08-09 Estimate	FY 09-10 Estimate	FY 10-11 Estimate	FY 11-12 Estimate	FY 12-13 Estimate	FY 13-14 Estimate	FY 14-15 Estimate
HISTORY OF FIRE CONTRACT RATES								
Fire Rate Exhibit A	13,678,745	14,417,477	13,971,396	13,535,639	12,667,575	13,917,615	14,681,953	15,122,412
Change - Dollars		738,732	-446,081	-435,757	-868,064	1,250,040	764,338	440,459
Change - Percent		5.40%	-3.09%	-3.12%	-6.41%	9.87%	5.49%	3.00%

At the current levels of service, contract costs will grow to about $15.2 million per year by FY 2014-15. This is an increase of $2.7 million over the 7-year period, or an average increase of $380,000 each year. This represents an average increase of 3.1% each year. It is important to note that the contract cost increases include requests in increased service levels. In addition, the calls for service during this 8 year period have increased significantly. The largest contract cost increase has been the opening of the Morrison Park Fire Station in October 2012. Discounting this added cost, the average contract cost increase is 1.7% per year. Additionally, the City requested the upgrade to paramedic fire trucks in the most recent contract period and absorbed the hazard abatement service in FY 2008/09. Also of importance is the recognition that fire safety staff have only had one pay increase in the past 7 years, and now pay the employee share of CalPERS costs during this period.

Summary of Public Safety Costs as a percent of General Fund

The impact of the combination of the two public safety service contracts has been dramatic. Total police and fire services expenditures were $51.5 million in FY 2007-08, which required 57.3% of the General Fund revenues to support the service levels. The projected costs of the two services in FY 2014-15 is $64.9 million. As the cost of services increased during a recessionary period, these services now consume 83% of the General Fund revenues projected for FY 2014-15.

	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	FY 12-13	FY 13-14	FY 14-15

Conclusion

During the past two years, as part of the Council-approved Deficit Elimination Plan (DEP), the Police and Fire Departments have made efforts to assist the City to reduce the draw on General Fund reserves. For Fiscal Year 2011-12 these contributions included a police service reduction of $1,000,000 and the elimination of a truck company for fire service

along with other cuts to staffing and operations. Although these cuts were impactful, the City's General Fund continues to operate at a deficit.

The City Council has directed the City Manager to develop a plan to balance the General Fund budget in FY 2013-14 to eliminate the draw on General Fund reserves that has occurred over the past five years. The Council-approved DEP identifies cuts that will further impact City services, and still does not close the projected deficit of $6.3 million for FY 2013-14. As a last resort, the City Council must look to public safety service level reductions, or the creation of a new source of revenue, to balance the General Fund. The reductions to both police and fire services will have to be significant because there are no alternatives left to reduce or eliminate costs.

The problem is two-fold. One is the rising rate of contract cost recovery charged by our contract service partners. The second is the low tax base of the City, aggravated by the economic volatility of the tax revenues themselves and losses of revenues due to the State eliminating Redevelopment and Vehicle License Fee revenues. The low per capita tax base will be solved over time, as the City continues to build-out and builds its commercial/retail base, and focuses on bringing jobs into the City. Until that goal is achieved, the City MUST consider a new revenue source, such as a revenue measure to be placed before the voters. This will provide the resources needed to meet the demand for public safety services, until longer term solutions may be realized.

Specific expenditure reductions in public safety will be discussed within the context and the process of the upcoming scheduled budget meetings, where City Council will review and discuss the City Manager's plan to balance the General Fund revenue and expenditure budget in one year.

The presentation and discussion on Tuesday, March 19, 2013, will include a PowerPoint presentation that will provide additional data and further context to this issue.

Subject: FW: Fun Express Benefit Program Update, Your Employee Access Code (EAC) is 11-14116

Good Morning,

Just a reminder to continue using our Fun Express Employee Benefit Program to SAVE time and money for yourself and your family! Fun Express provides discount tickets to southern California theme parks, dinner theatres, water parks, movie theatres and many other fun attractions locally and throughout Southern CA. Many tickets are now available as InstaPrint eTickets, which can be ordered 24/7/365 and delivered instantly by email.… Just print them out at home.

If you haven't already tried using this service, it's very simple! Instructions are included below.

How do I shop on FunEx.com or how do I visit to see what is available?
Simply go to www.FunEx.com, Click "Shop", "Attractions A to Z"

How do I place my first order on Funex.com?
The below steps take only a few minutes to complete

- Go to www.FunEx.com
- Click “Register” at the top of the homepage
- Click “Employee Registration”
- Click “Click Here to Register as an Employee”
- Click “Yes” when it asks “Do you have a company provided EAC”
- Click “Continue”
- Enter your Employee Access Code (11-14116)
- Click "Submit"

Follow the prompts and enter your information which includes creating your own personal password. When your registration is complete, you are already logged in and may place your order immediately. For future orders, simply visit Funex.com, and login with the password you created during registration.

What other ways can I order tickets?

You may call Fun Express Monday-Friday (excluding holidays) 8:30-5:00 at (949)367-1900 or you may visit Express during the above days and time at the following address:

Fun Express
26141 Marguerite Pkwy, Suite B
Mission Viejo, CA 92692

Subject: 2012 Volunteer of the Year Award

Expires: Saturday, July 06, 2013 12:00 AM

Volunteer Services is proud to announce the selection of Shor Denny, Safe Routes to School Program Coordinator, as the Volunteer of the Year for 2012. Ms. Denny was selected based on extraordinary dedication and tenacity in accomplishing a successful grassroots effort that encourages students to walk to school at least once a week. Many attributes contributed to Ms. Denny's selection and it gives us great pleasure to recognize her as the City's Volunteer of the Year for 2012.

This email is approved by the City Manager's Office.

Sent: Friday, March 22, 2013 4:04 PM
To: Michelle Dawson
Cc: Tom Krippaehne; Perez Nathan; Alfred F. Ayuyao
Subject: Proposal for Public Infrastructure Financing Report and Meetings

Michelle - Attached per your request is a proposal under which David Taussig and Associates would prepare a Public Infrastructure Financing Report to the City. The purpose of the report would be to review the major public infrastructure required by the City to successfully pursue its current Economic Development efforts, and present a series of financing programs that could potentially be utilized to fund this infrastructure. These funding programs will range from the more conventional types of financing, such as revenue bonds and Community Facilities District financing, to alternative forms of financing with private infrastructure funds (with whom we are currently working) and hybrid financing instruments that combine financing programs to provide appropriate credits for bond buyers both prior to development and after development.

Regarding the benchmarking and government efficiencies components of your request, Tom Krippaehne of Moss Adams and I spoke this afternoon, and have decided that it might be appropriate to deliver a "Work Plan" to you outlining the type of work our firms would perform to meet the City's goals, as we are not sure of the level of specificity the City will want, and whether our analysis will consider all of the City departments, or just a select one to three departments so the City better understands the process and the types of results that we can deliver. Tom, along with Nate Perez of my staff, will provide you with such a Work Plan by the end of next week, and we will all be available to discuss it with you, the Mayor, and other members of your staff the following week, prior to preparing a more streamlined proposal for the initial work we are to perform.

If you have any questions, I am in the office on Monday, or you could call Tom directly at 206-310-3341 any time next week. Otherwise, I look forward to talking (and possibly meeting) with you and other City representatives during early April. Thanks, and hope you have a great weekend! David

Subject: Meeting in Moreno Valley

Michelle - It was great speaking with you, Rick and Mayor Owings by phone today. I just wanted to let you know that I was just scheduled for a meeting with a cast of thousands in San Francisco next Tuesday, so I will be moving my Riverside meeting to Wednesday or Thursday of next week. If you would let me if any times work for you, the Mayor and anyone else who you would like to attend on either next Wednesday morning or anytime nextThursday, I can move my Riverside meeting to complement my meeting with you. Just let me know which times, if any, work for you. Thanks, and I look forward to meeting with you in the near future. David

EXHIBIT A - SCOPE OF WORK

Public Infrastructure Financing Report

City of Moreno Valley

The City of Moreno Valley (the "City") is currently pursuing economic development activities related to attracting health care and logistics facilities and other industries to generate new jobs, increased property values and greater revenues to the City. One major issue facing the City is the need for additional infrastructure to attract and encourage private investment in the City to further its economic development efforts. The lack of adequate financing to build such infrastructure puts the City at a disadvantage when competing with the surrounding communities, many of which already provide such infrastructure and enjoy jobs/housing balance ratios that are significantly higher than those in Moreno Valley.

David Taussig and Associates, Inc. ("DTA") is being engaged by the City to prepare and present a Public Infrastructure Financing Report (the "Report") to familiarize City staff and the City Council with conventional and alternative financing options available to fund the major regional infrastructure improvements necessary to support economic development. In addition, the Report will include specific recommendations regarding which of these financing mechanisms would be most practicable to the City in terms of the likelihood of their being successfully implemented.

The preparation of this Report will require DTA to undertake the following four tasks:

TASK NO. 1 - HOLD KICKOFF MEETING

This task involves holding a kickoff meeting with City staff to discuss the parameters of this engagement, some of the financing alternatives that will be included in the Report, and the City's objectives in terms of what they hope to gain from the completion of this Report. City staff shall discuss major infrastructure needs, as well as phasing and location of such infrastructure

TASK NO. 2 - DETERMINE FACILITY/ CAPITAL NEEDS TO PROMOTE ECONOMIC DEVELOPMENT IN THE CITY

This task entails a review of the City's most significant facility and capital needs related to promoting future economic development within its jurisdiction. DTA will use existing City Master Plans and other materials (and any relevant developer's facilities reports) as base documents, as well as information derived during the Kickoff Meeting, and focus its effort on summarizing this information within the Report.

In order for this analysis to be comprehensive in scope, it will be necessary for DTA to coordinate with all major City departments. DTA shall utilize phone contacts, emails and other forms of communication to survey/interview key County staff to determine the facilities that are most crucial to promoting economic development within the City. Based upon the results of its plan reviews, surveys and interviews, DTA shall prepare a list of the new or expanded public facilities that will need to be funded if the City is to be successful in its efforts to attract new jobs and businesses. Facilities in need of funding may include roads, water, sewer and storm drainage improvements, law enforcement and fire suppression facilities, and other facilities for which a City shortage currently exists.

TASK NO. 3 - IDENTIFY FUNDING ALTERNATIVES FOR INFRASTRUCTURE IMPROVEMENTS

This task involves the preparation of an additional component of the written Report summarizing the various financing programs available to fund the facilities listed under Task No. 1. The programs presented in the report shall include public debt financing mechanisms and special districts, fee programs, State and federal grants, loans and bond programs, private sector infrastructure funds and developer financing. The specific improvements determined under Task No. 2 that are eligible for funding under each of these programs shall also be discussed. The report shall include an analysis of innovative approaches to these financing programs that could be incorporated by the City to facilitate economic development.

TASK NO. 4 - MAKE PRESENTATION TO CITY REVIEWING FUNDING OPPORTUNITIES

This task involves the preparation of a Powerpoint presentation reviewing the key facilities to be funded, as determined under Task No. 2, and the financing programs identified under Task 3 that are available to fund each of the selected facilities. DTA shall distribute the Report prepared under Task No. 3 prior to making the presentation to City staff and other interested parties. Both the report and the presentation shall recommend the next steps that could be taken by the City to accelerate its economic development efforts.

MV00251158

EXHIBIT B – FEE SCHEDULE

Public Infrastructure Financing Report

City of Moreno Valley

DTA shall be remunerated for consulting services related to the preparation of a Public Infrastructure Financing Program on an hourly basis according to the hourly rates set forth in Table 1 below, with invoices being submitted to Client on a monthly basis. DTA shall perform tasks listed under the Scope of Work, as requested by Client, until fees equal **$10,000** (including out-of-pocket expenses). This maximum fee shall be subject to the limitations listed below.

Table 1
DTA Hourly Rates

David Taussig & Associates, Inc. Calendar Year 2013 Fee Schedule	
President	$285/Hour
Vice President	$230/Hour
Manager	$200/Hour
Associate	$160/Hour
Analyst	$130/Hour
Research Assistant	$105/Hour

On or about the first two weeks of each month during which consulting services are rendered hereunder, DTA shall present to the Client an invoice covering the current consulting services performed and the reimbursable expenses incurred pursuant to the agreement and exhibits thereto. Such invoices shall be paid by the client within thirty (30) days of the date of each invoice. A 1.2% monthly charge may be imposed against accounts which are not paid within thirty (30) days of the date of each invoice. The consultant shall stop all work on the project if payment is not received within forty-five (45) days of submittal of an invoice.

All hourly rates for services apply through January 1, 2014 and are subject to a cost-of-living increase at that time. Any additional tasks assigned by the Client if the total fee listed above has been exceeded shall be charged at the hourly rates listed above.

Limitations

The $10,000 budget covers only work related to Tasks 1 through 4 as outlined in the Scope of Work. Additional consulting services beyond those included in these three tasks ("Additional Work") may require additional fees if they cause total hourly fees and out-of-pocket expenses to exceed $10,000. For example, the following would be considered Additional Work:

- Research performed by DTA to determine needed infrastructure improvements in Moreno Valley (information to be provided by the City)

MV00251159

- Work associated with the quantitative analysis of proposed funding alternatives
- Any work related to funding public services or operation and maintenance of facilities
- Any written analyses or reports other than the Public Infrastructure Finance Report
- Actual implementation of funding alternatives, formation of financing districts, etc.
- Attendance at more than two meetings

Subject: Re: Noise Disturbance

Good morning Mr. Morrissey,

The last third of your message (prior to the abstract) was garbled and I am unable to read it. Did you last night, or have you in the past called Police Dispatch to report the noise disturbance?

If not, I encourage you to call when the violation is occurring. Noise disturbances are a problem we can resolve without involving you directly in most cases.

One thing I would like you to know is that we handle all calls based on a priority system. Call types are assigned a priority number from 1 to 4. A priority 1 call involves an immediate threat to life. A priority 4 call may be a barking dog or other noise disturbance. Although we respond to all calls for service, response times to priority 4 calls are considerably longer than priority 1 and 2 call response times.

I'd be happy to read your message again if you care to resend it.

Thanks and happy Easter to you and yours.

Joel Ontiveros
Chief of Police

Subject: Noise Disturbance

Dear Mayor Owings and Chief of Police Ontiveros,
My husband and I live at 26200 Kalmia Ave in Moreno Valley. We purchased our home back in 2000 and now consider ourselves "long time residents" of Moreno Valley. I am a college professor in Los Angeles and My husband is a retired university instructor from UCR. We care about the city we live in and are active members of the community. Recently I was a commissioner on the Moreno Valley Arts Council and Marc is a long time church musician. We do what we can to make a positive contribution to our city.

Our neighborhood has been devastated by the recent real estate crisis with numerous foreclosures. We have seen cherished neighbors loose their homes and have to move away. One of the results of this real estate problem has been home rentals. The house directly across the street from us—26191 Kalmia Avenue, the South East Corner of Steeplechase and Kalmia—has become a rental property and the current renter/occupant has violated Ord. 740 § 1.2, 2007 by repeatedly playing loud music outside the home he rents, at late hours. Most recently Easter Eve—Last night— from 9:00 PM to 11:30 PM. The individual in question has a Sub Woofer in their vehicle, parks the vehicle in the driveway and cranks up the volume. The sound is so disturbing it literally shakes the windows in our home.

Due to the repeated violation of the sound ordinance by the occupant of the rented home it is my belief that the occupant's intention is malicious and that they intend to disturb the peace. After repeated calls to the Non Emergency dispatch for the Moreno Valley Police there has been no relief. One evening after calling the non emergency dispatch. The officer arrived and had to search for the house and while the cruiser was headed north on

Steeplechase the renter was able to back their car into their garage and turn out the lights. All witnessed from our home which is many feet above the grade of the street level.

Please help restore our neighborhood to a peacful place that realizes public health, safety, welfare and quality of life for the inhabitants of this city.

Sincerely,
Kevin L Morrissey
26200 Kalmia Ave.
Moreno Valley , CA 92555
[redacted]

Specific concerns and health problems about low frequency sound can be read below and in the following link:

Abstract

Low frequency noise (20-200 Hz) is emitted by numerous sources in the society. As low frequencies propagate with little attenuation through walls and windows, many people may be exposed to low frequency noise in their dwellings. Sleep disturbance, especially with regard to time to fall asleep and tiredness in the morning, are commonly reported in case studies on low frequency noise. However, the number of studies where sleep disturbance is investigated in relation to the low frequencies in the noise is limited. Based on findings from available epidemiological and experimental studies, the review gives indications that sleep disturbance due to low frequency noise warrants further concern.

Several case studies indicate that low frequency noise affects sleep quality, particularly with reference to the time taken to fall asleep and tiredness in the morning (see Berglund *et al.,* 1996, for a review)

Subject: Re: Noise Disturbance

Dear Police Chief Ontiveros,

Thanks for your quick response to my email especially considering the holiday.

Here is a resend on the original message. I had quoted a medical study on noise which I cut and pasted again below the word Abstract. Hopefully this message will arrive in tact. In response to your question we have called the dispatch number several times as well as some of our neighbors

Thanks and Happy Easter to you as well.

Regards, Kevin

Abstract:

Low frequency noise (20-200 Hz) is emitted by numerous sources in the society. As low frequencies propagate with little attenuation through walls and windows, many people may be exposed to low frequency noise in their dwellings. Sleep disturbance, especially with regard to time to fall asleep and tiredness in the morning, are commonly reported in case studies on low frequency noise. However, the number of studies where sleep disturbance is investigated in relation to the low frequencies in the noise is limited. Based on findings from available epidemiological and experimental studies, the review gives indications that sleep disturbance due to low frequency noise warrants further concern.

Several case studies indicate that low frequency noise affects sleep quality, particularly with

reference to the time taken to fall asleep and tiredness in the morning (see Berglund *et al.,* 1996, for a review)

Dear Mayor Owings and Chief of Police Ontiveros,
My husband and I live at 26200 Kalmia Ave in Moreno Valley. We purchased our home back in 2000 and now consider ourselves "long time residents" of Moreno Valley. I am a college professor in Los Angeles and My husband is a retired university instructor from UCR. We care about the city we live in and are active members of the community. Recently I was a commissioner on the Moreno Valley Arts Council and Marc is a long time church musician. We do what we can to make a positive contribution to our city.

Our neighborhood has been devastated by the recent real estate crisis with numerous foreclosures. We have seen cherished neighbors loose their homes and have to move away. One of the results of this real estate problem has been home rentals. The house directly across the street from us—26191 Kalmia Avenue, the South East Corner of Steeplechase and Kalmia—has become a rental property and the current renter/occupant has violated Ord. 740 § 1.2, 2007 by repeatedly playing loud music outside the home he rents, at late hours. Most recently Easter Eve—Last night— from 9:00 PM to 11:30 PM. The individual in question has a Sub Woofer in their vehicle, parks the vehicle in the driveway and cranks up the volume. The sound is so disturbing it literally shakes the windows in our home.

Due to the repeated violation of the sound ordinance by the occupant of the rented home it is my belief that the occupant's intention is malicious and that they intend to disturb the peace. After repeated calls to the Non Emergency dispatch for the Moreno Valley Police there has been no relief. One evening after calling the non emergency dispatch. The officer arrived and had to search for the house and while the cruiser was headed north on Steeplechase the renter was able to back their car into their garage and turn out the lights. All witnessed from our home which is many feet above the grade of the street level.

Please help restore our neighborhood to a peacful place that realizes public health, safety, welfare and quality of life for the inhabitants of this city.

Sincerely,
Kevin L Morrissey
26200 Kalmia Ave.

Subject: Re: Noise Disturbance

Good morning Mr. Morrissey,

The last third of your message (prior to the abstract) was garbled and I am unable to read it. Did you last night, or have you in the past called Police Dispatch to report the noise disturbance?

If not, I encourage you to call when the violation is occurring. Noise disturbances are a problem we can resolve without involving you directly in most cases.

One thing I would like you to know is that we handle all calls based on a priority system. Call types are assigned a priority number from 1 to 4. A priority 1 call involves an immediate threat to life. A priority 4 call may be a barking dog or other

noise disturbance. Although we respond to all calls for service, response times to priority 4 calls are considerably longer than priority 1 and 2 call response times.

I'd be happy to read your message again if you care to resend it.

Thanks and happy Easter to you and yours.

Good afternoon,

On 3-29-13, MVPD SET and POP Team members conducted directed enforcement in the area of Sunnymead Liquor store at 24121 Sunnymead Blvd between the hours of 6:00 PM and 10:00 PM. Officers made the following arrests in that 4-hour window:

Felony arrests:

- Chad Mcclory (43) Federal arrest warrant for unlawful sexual intercourse with a minor
- Antonio Psahnoudis-Zepeda (23) Violation of probation and resisting, delaying, obstructing a peace officer
- Edmond Acosta (31) Warrant for possession of methamphetamine
- Gary Younger (42) Warrant for domestic violence; 3 misdemeanor traffic warrants
- Jimmy Esqueda (41) Parolee at Large warrant

Misdemeanor arrests:

- Raymond Gordon (18) Drunk in public
- Dwayne Brown (32) Warrant for failing to appear in court
- James McCombs (27) Two traffic warrants
- Kasa Hernandez (22) Three traffic warrants

In addition to the above listed arrests, officers located and recovered a missing at-risk 15 year-old boy who was in the company of his father, Chad Mcclory. The boy was reported missing from the state of Montana.

Finally, officers completed three field interviews with pedestrians claiming membership in criminal street gangs.

Tom,

Mr. Goltry resides at 13575 Bethany Road. Mr. Goltry stated there are nine parolees living in tents with no facilities at Moreno Beach and Cottonwood. He stated he called the police and was informed by Deputy Rose they are in the process of relocating them. He stated he lives in a rural area and he is looking at the parolees and their tents out his front window. Mr. Goltry stated his concern is will the Parole Department continue to place parolees out there. I will place this in a CRM.

Cindy,

I called Ms. Bryant, and she wasn't very cooperative regarding what she wanted to speak to the Mayor about. She did state it was regarding issues on the southeast end of town.

Juliene

Alessandro Traffic:

Response from Eric Lewis, City Traffic Engineer – Ms. Bryant has requested staff to address speeding vehicles on Alessandro Boulevard in front of her residence. Specifically, she requested an all-way stop at Alessandro Boulevard and Merwin Street, speed humps, or a reduced speed limit of 25 mph. Additionally, Ms. Bryant is concerned with the pavement condition within the roadway.

Staff has conducted a field review of the area and gathered traffic data. The segment of Alessandro Boulevard, from Moreno Beach Drive to Merwin is a two lane road with an existing 40 mph speed limit. This speed limit has a valid Engineering and Traffic Survey and is enforceable with the use of radar. The existing signing and striping for the segment is in good working order and is functioning as intended.

Alessandro/Redlands Market:

On August 15, 2011, John Terell, Planning Official, provided the following information: The property is in final plan check for site grading. The Planning application for a neighborhood market at this location was approved on January 28, 2010, by the Planning Commission after review of public comment and Commissioner deliberation. The approved project includes a tower/steeple and wood siding to connect with the rural and historic nature of the area. During the hearing

several people spoke to raise concerns about the project, stating there was not a need for another market or requesting a park at this location. While the existence of potentially historic trees was not raised by any public speakers, Commissioner Richard Dozier (also President of the Moreno Valley Historical Society) spoke of the historical significance of the site as the center of the original townsite of Moreno and his wish that in the future, the historic aspect of the area be included into the project. A condition requesting a historic plaque or something of that nature was discussed but not placed on the project by the Commission. The applicant had agreed to speak with the Historical Society and try to include some historical features possibly photographs inside the market. No historical trees are designated at this location. Any mature trees removed must be replaced on site at a three to one ratio with 24-inch box trees.

Barry Foster referred Mr. Bowman to you. Please advise if you would like to meet w/Mr. Bowman.

Our Streetlight Solutions program gives municipalities control and ownership of their LS-1 streetlight pole infrastructure and immediately generates net cash savings of 10 to 15% versus current SCE tariffs at no net cost to your city. Our program had been pre-approved by, and acquisition costs are 100% funded through, the California Municipal Finance Authority (CMFA). Only upon owning your streetlight infrastructure can you benefit from deploying new cost saving energy and operational technologies. I have attached a brochure that briefly outlines the Muni-Fed Streetlight Solutions program and some of its benefits.

Over the past two years, my company, Muni-Fed Energy (www.munifedenergy.com), has worked closely with the staff at Moreno Valley Utilities (MVU), Southern California Edison (SCE) and the California Public Utility Commission (CPUC) to develop a program allowing Moreno Valley to purchase their LS-1 streetlights (excluding those on distribution poles) from SCE. Our experience with MVU to date has been excellent, especially with Jeannette Olko and Ahmad Ansari.

At your convenience, I would very much enjoy the opportunity to meet with you to discuss our program further. Please let me know a date that works for you.

Thank you for your consideration. – Phil Bowman

EMPLOYMENT AGREEMENT
FOR THE POSITION OF
CITY ATTORNEY

This Employment Agreement (hereafter referred to herein as "Agreement") is made and entered into this _____ day of _____, 2013, by and between the City of Moreno Valley, California (hereafter referred to herein as "CITY"), a California municipal corporation and general law city, and Suzanne M. Bryant (hereafter referred to herein as "BRYANT"), an individual, on the following terms and conditions:

RECITALS

A. CITY, by and through the City Council, desires to employ the services of BRYANT as City Attorney of CITY; and

B. BRYANT desires to accept employment as City Attorney in consideration of and subject to the terms and conditions set forth in this Agreement.

OPERATIVE PROVISIONS

In consideration of the promises and covenants contained herein, the parties agree as follows:

1. Position, Term and Duties.

1.1 Position. BRYANTrelinquishes her prior position as Deputy City Attorney and accepts employment with CITY as its City Attorney and shall perform all functions, duties and services set forth in Section 1.4 [Duties] of this Agreement and consistent with Government Code §41801 et seq.BRYANT shall provide services at the direction and under the supervision of the City Council of CITY. It is the intent of the parties that the City Attorney shall keep the City Council fully apprised of all significant legal issues of the CITY. Toward that end, BRYANT shall report directly to the City Council and will periodically, or as may be specifically requested by the City Council, provide status reports to the City Council on her activities and those of CITY.

1.2 Term. The term of this Agreement shall commence on July 9, 2013 (Commencement Date), upon being executed by BRYANT and approved by the City Council. This Agreement shall remain in effect until such time as this Agreement is terminated pursuant to Section 4, below.

1.3 At-Will Employment. BRYANT acknowledges that she is an at-will employee of CITY who shall serve at the pleasure of the City Council at all times during the period of her service under this Agreement. The terms and provisions of CITY's personnel rules, policies, procedures, ordinances and resolutions shall apply to BRYANT, and she shall be entitled to all benefits and rights afforded to other Executive Management (as defined in the City's Personnel Rules) of CITY, except to the extent provided by this Agreement, and, in the case of any conflict between this Agreement, and the Personnel Rules, policies, procedures, ordinances and resolution, the terms of this Agreement shall prevail. Notwithstanding the application of the City's Personnel Rules to this Agreement, and without limitation, BRYANT shall have no rights under sections 9, 10, 11 and 12 of the Personnel Rules. Nothing in this Agreement is intended to, or does, confer upon BRYANT any right to any property interest in continued employment, or any due process right to a hearing before or after a decision by the City Council to terminate her employment, except as is expressly provided in Section 4 [Termination] of this Agreement. Nothing contained in this Agreement shall in any way prevent, limit or otherwise interfere with the right of

CITY to terminate the services of BRYANT as provided in Section 4 [Termination]. Nothing in this Agreement shall prevent, limit or otherwise interfere with the right of BRYANT to resign at any time from this position with CITY, subject only to the provisions set forth in Section 4 [Termination] of this Agreement. This at-will employment Agreement shall be expressly subject to the rights and obligations of CITY and BRYANT, as set forth in Section 4 [Termination] herein.

1.4 Duties. BRYANT shall serve as the City Attorney and shall be vested with the powers, duties and responsibilities of the City Attorney as set forth in the City's applicable ordinances and resolutions, and in the City of Moreno Valley Municipal Code, as may be amended from time to time, the terms of which are incorporated herein by reference. It is the intent of the City Council for the City Attorney to function as the chief legal counsel of CITY's organization. Without additional compensation, BRYANT shall provide such other services as are customary and appropriate to the position of City Attorney, including serving as legal counsel for the Moreno Valley Housing Authority and the Moreno Valley Community Services District, together with such additional services assigned from time to time by the City Council as may be consistent with California law and the City of Moreno Valley Municipal Code. BRYANT shall devote her best efforts and full-time attention to the performance of these duties.

1.5 Hours of Work. BRYANT shall devote the time necessary to adequately perform her duties as City Attorney. The work schedule shall be the same as the schedule in place for all other Executive Managers of CITY, provided the schedule of such hours provides adequate availability to the City Council, City Staff, and members of the community during normal business hours and for the performance of her duties in conducting CITY business. The position of City Attorney shall be deemed an exempt position under applicable wage and hour law. BRYANT hereby acknowledges that she shall not be entitled to any compensation for overtime.

1.6 Professional Activity. The City Council desires BRYANT to be reasonably active in national, statewide, regional and professional organizations that will contribute to City Attorney's professional development and standing and that will contribute to the advancement ofthe CITY's interests and standing. Toward that end, BRYANT may, upon advance notice to the City Council, undertake such activities as are directly related to her professional development and that advance the interests and standing of the CITY. These activities may include, without limitation, participation in the California League of Cities, California state and local bar associations, or other similar national, statewide, regional or professional organizations, provided that such activities do not in any way interfere with or adversely affect her employment as City Attorney or the performance of her duties as provided herein. CITY agrees to budget and pay for the reasonable dues and subscriptions of the City Attorney necessary for her participation in such organizations. CITY agrees to reimburse BRYANT's reasonable and necessary travel, business and subsistence expenses for her activities as provided for in the City's Administrative Policies.

1.7 Other Activity. In accordance with Government Code Section 1126, during the period of her employment, BRYANT shall not accept, without the express prior written consent of the City Council, any other employment or engage, directly or indirectly, in any other business, commercial, or professional activity (except as permitted under Section 1.6 [Professional Activity], regardless of whether for pecuniary advantage, that is or may be competitive with the CITY, that might cause a conflict-of-interest with the CITY, or that otherwise might interfere with the business or operation of the CITY or the satisfactory performance of BRYANT's duties as City Attorney.

2. Compensation.

2.1 Salary. For all services performed by BRYANT as the City Attorney under this Agreement,

CITY shall pay BRYANT compensation in accordance with the adopted salary schedule for the position, plus all other compensation benefits afforded by CITY to other full time Executive Management employees. BRYANT shall be entitled to all cost of living and other salary and benefit adjustments implemented by the CITY as applicable to other full time Executive Management employees, to include City's employee furlough program and eligibility for Merit Increases (Section 3.3). The starting salary shall be fifteen thousand four hundred seventeen dollars ($15,417) per month, paid bi-weekly according to the payroll schedule in place for CITY employees. All compensation and leave policies applicable to Executive Management employees as contained in CITY'S Personnel Rules and Regulations shall apply.

2.2 Annual Leave. All compensation and leave policies applicable to Executive Management as contained in the City's Personnel Rules and Regulations, Sections 7 and 14, shall apply. BRYANT shall annually accrue 376 hours of Annual Leave, allocated at a rate of 14.46 hours per pay period. Annual Leave shall be subject to CITY's Personnel Rules and Regulations as they apply to other Executive Management employees.

2.3 Automobile Allowance. BRYANT shall be entitled to an automobileallowance as compensation for the use of personal automobile(s) for CITY business asprovided for in CITY policies. This monthly allowance shall equal the amount provided to other Executive Management employees, and is currently five hundred dollars ($500.00) per month. In addition, BRYANT shall be entitledto excess mileage reimbursement according to adopted CITY policies for any qualifying tripin the course and scope of employment.

2.4 Deferred Compensation. Within 30 days of the effective date of this Agreement, City shall make a one-time deposit of $10,000into BRYANT's individual Deferred Compensation account. BRYANT shall provide CITY with specific instructions to facilitate this one-time deposit.

3. Performance Evaluation.

3.1 The City Council shall review and evaluate BRYANT's performance at least once annually. Said review and evaluation shall be in accordance with specific criteria developed jointly between BRYANT and the City Council. Said criteria may be added to or deleted from as the City Council may determine from time to time in consultation with BRYANT. Further, the Mayor shall provide BRYANT with a summary written statement of the findings of the City Council and provide an adequate opportunity for BRYANT to discuss said evaluation with the entire City Council.

3.2 Annually, the City Council shall define such goals and performance objectives which they determine necessary for the proper function of the City Attorney's Office and in the attainment of City Council goals and objectives, and shall further establish a relative priority among the various goals and objectives, said goals and objectives to be reduced to writing. Any such goals or objectives shall generally be attainable within the time limitations as specified and within City Attorney Department budgets.

3.3 CITY agrees to consider an increase to BRYANT's Salary [Section 2.1] during said Performance Evaluation; however, any increase to Salary [Section 2.1] shall be at the sole discretion of the City Council.

4. Termination.

4.1The City Council may terminate BRYANT'S employment, and this Agreement "for cause" at any time upon written notice. "For cause" is defined as any of the following:
(i) an act in bad faith and to the detriment of the City; (ii) refusal or failure to act in accordance with any specific lawful direction or order of the City Council that is not in conflict with the Rules of Professional Conduct and/or the Legal Canon of Ethics for attorneys in the State of California; (iii) unfitness or unavailability for service that exceeds thirty (30) consecutive calendar days and is not the result of any excused illness or medical condition; (iv) unsatisfactory performance; (v) commission of an act involving moral turpitude or other acts which harm the reputation of or interests of the City; (vi) habitual neglect of responsibilities, or incompetence; (vii) a conviction of a felony or other crime punishable by jailor imprisonment in the jurisdiction involved (or entry of a plea of guilty or *nolo contendere* with respect to any such crime); (viii) possession of, use of, or working while under the influence of alcoholic beverages or other non-prescribed controlled substances or abuse/misuse of lawfully prescribed controlled substances during working hours; (ix) engaging in an actual conflict of interest; (x) commission of acts of theft, embezzlement, or fraud; (xi) acceptance of bribes or extortion; (xii) imposition of professional discipline by the State Bar of California resulting in suspension or disbarment; or (xiii) material breach of this Agreement by BRYANT. If this Agreement is terminated by the City Council "for cause," BRYANT's employment shall be deemed immediately terminated and BRYANT shall surrender all CITY keys, computer passwords, and other CITY property entrusted to BRYANT for the purposes of the discharge of her duties. Upon termination for cause, BRYANT shall have no recourse under this AGREEMENT or any administrative procedure for purposes of challenging the termination action.

4.2In the event BRYANT is terminated "without cause" or asked to resign during such time that BRYANT is willing and able to perform the Duties [Section 1.4] under this Agreement, then CITY agrees, upon receipt of a Comprehensive General Release and Settlement Agreement in the standard form signed by BRYANT, to pay BRYANT a lump sum cash payment equal to 12 months of Salary and benefits[Section 2.1] as severance pay.

4.3BRYANT shall receive a lump sum payout of any unpaid accruals of Annual Leave [Section 2.2] and Sick Leave upon termination of employment for any reason pursuant to CITY policies.

4.4BRYANT shall not be entitled to any increases in Salary [Section 2.1], or benefits afforded by CITY to other Executive Management employees following the date of termination.

4.5This Agreement may be terminated by BRYANT at any time upon 45 days written notice to the City Council. If such written notice is given, the City has the option to ask BRYANT to leave her position sooner than the expiration of 45 days, but, if it does so, the City will continue to honor its obligations under this Agreement until expiration of the 45-day period.

4.6BRYANT'S employment and this Agreement shall terminate automatically upon BRYANT'S death. In this event, the City shall pay the beneficiary designated by BRYANT in writing, or in the absence of such designation, BRYANT'S estate, her accrued and unpaid compensation, and all accrued but unused benefits, if any, through the date of BRYANT'S death.

4.7 If BRYANT becomes disabled and requires accommodation to permit her to perform the essential functions of the position, the City shall provide reasonable accommodation if possible and unless doing so creates undue hardship for the City.

5. Proprietary Information.

"Proprietary Information" is all information and any idea pertaining to any economic development engaged in or contemplated by the City(or any CITY affiliate), including marketing plans and development projects. Proprietary Information shall include, without limitation, trade secrets (as further defined inUniform Trade Secrets Act, Civil Code §3426 et seq.), ideas, inventions, processes, formulae, data, know-how, software and other computer programs, copyrightable material, marketing plans, strategies, sales, financial reports, and forecasts. During her employment by CITY, BRYANT shall only use Proprietary Information for the benefit of CITY and as is or may be necessary to perform her job responsibilities under this Agreement. Following termination, BRYANT shall not use or disclose any Proprietary Information for the benefit of herself or any third party, except with the express written consent of CITY. BRYANT's obligations under this Section shall survive the termination of her employment and the termination of this Agreement.

6. Conflict Of Interest.

BRYANT represents and warrants to CITY that she presently has no interest, and represents that she will not acquire any interest, direct or indirect, financial or otherwise, which would conflict in any manner or interfere in any way with performance of her services under this Agreement.

7. General Provisions.

7.1 Vehicle Operation. BRYANT shall operate any vehicle used in connection with the performance of her duties as City Attorney in a safe manner and otherwise in observance of all established traffic safety laws and ordinances and shall maintain a valid California automobile's driver's license during the period of employment. In addition, BRYANT shall maintain in full force and effect during the Term of this Agreement, valid automobile liability insurance providing coverage for collision, personal injury and medical reimbursement, in accordance with the City's Administrative Policy.

7.2 Notices. All notices, requests, demands and other communications under this Agreement shall be in writing and shall be effective upon delivery by hand or three (3) business days after deposit in the United States mail, postage prepaid, certified or registered, and addressed to CITY at the address below, and at the last known address maintained in BRYANT's personnel file. BRYANT agrees to notify CITY in writing of any change in her address during her employment with CITY. Notice ofchange ofaddress shall be effective only when accomplished in accordance with this Section.

City's Notice Address: City of Moreno Valley c/o City Manager
P.O. Box 88005 14177 Frederick Street Moreno Valley, California 92552-0805

City Attorney's Address: [Deliver to last updated address in personnel file]

7.3 Indemnification. Subject to, in accordance with, and to the extent provided by the California Tort Claims Act [Government Code Section 810 *et* seq.] the CITY will indemnify, defend, and hold BRYANT harmless from and against any action, demand, suit, monetary judgment or other legal or administrative proceeding, and any liability, injury, loss or other damages, arising out of any act or omission associated with BRYANT's performance of functions, duties and services set forth in this Agreement.

7.4 Bonding. The CITY shall bear the full cost of any fidelity or other bonds required of the City Attorney under any law or ordinance.

7.5 Integration. This Agreement is intended to be the final, complete, and exclusive statement of the terms of BRYANT's employment by CITY. This Agreement supersedes all other prior and contemporaneous agreements and statements, whether written or oral, express or implied, pertaining in

any manner to the employment of BRYANT, and it may not be contradicted by evidence of any prior or contemporaneous statements or agreements. To the extent that the practices, policies, or procedures of CITY, now or in the future, apply to BRYANT and are inconsistent with the terms of this Agreement, the provisions of this Agreement shall control.

7.6 Amendments. This Agreement may not be amended, altered or modified, except in a written document signed by BRYANT, approved by the City Council and signed by the Mayor.

7.7 Waiver. Failure to exercise any right under this Agreement shall not constitute a waiver of such right.

7.8 Assignment. BRYANT shall not assign any rights or obligations under this Agreement. CITY may, upon prior written notice to BRYANT, assign its rights and obligations hereunder.

7.9 Severability. If a court holds any provision of this Agreement to be invalid, unenforceable, or void, the remainder of this Agreement shall remain in full force and effect.

7.10 Governing Law. This Agreement shall be governed by and construed in accordance with the laws of the State of California, with venue proper only in Riverside County, State of California.

7.11 Interpretation. This Agreement shall be construed as a whole, according to its fair meaning, and not in favor of or against any party. By way of example and not in limitation, this Agreement shall not be construed in favor of the party receiving a benefit or against the party responsible for any particular language in this Agreement. Captions are used for reference purposes only and should be ignored in the interpretation of the Agreement.

7.12 Acknowledgment.BRYANT acknowledges that she has had the opportunity to consult legal counsel in regard to this Agreement, that she has read and understands this Agreement, that she is fully aware of its legal effect, and that she has entered into it freely and voluntarily and based on her own judgment and not on any representations or promises other than those contained in this Agreement.

IN WITNESS WHEREOF, the CITY has caused this Agreement to be signed and executed on its behalf by its Mayor and duly attested to by its City Clerk, and BRYANT has signed and executed this Agreement, as of the date first indicated above.

Good morning Mayor. Terry Bromley, one of the gentlemen that we met with at the new McDonalds on Sunnymead Boulevard, e-mailed me yesterday with concerns about the City project under construction on Sunnymead. Ahmad and his team provided "same day response" and I wanted to share Terry's reply with you. Our Public Works team is the best.

Subject: RE: Work on Alessandro in front of McDonalds

Ahmad,

I called Mr. Bromley back around 3 pm and talked to him about the project. Apparently he might have talked to a worker out there, probably concrete a sub-contractor who did not know about other landscape/irrigation work part of project. So probably the worker told him that he would not do the landscape/irrigation restoration work, and Mr. Bromley thought that we will leave a mess out there and will not fix his irrigation.

I told Mr. Bromley that the contractor is required to restore the landscape and irrigation to the original conditions as part of the contract. He understood and was happy about the improvements we are doing for the businesses over there.

Quang

Hello Michelle,
It was nice meeting with you at my new site on Sunnymead blvd. I had a question and didn't know where to start so I thought I would ask you. There is construction going on in front of McDonalds and I was told by My management that they would not be fixing the irrigation lines that they have cut do to construction. Also this project seems to be taking way to long and there is never any one there when I go by.
Could you point me in the right direction of who I could contact about my concerns.

Thanks in advance for your help.

Mr. Mitchell resides at 10399 Crossing Green (District 2). Mr. Mitchell stated it's very difficult for his neighborhood with Albertson's closing and now Ralph's. He stated there is nowhere close for his neighborhood to shop for groceries. He stated the store closings also affect the small businesses in the shopping centers where the grocery stores were the anchors. He stated he hopes you can get other grocery stores to come into the closed stores.

SUMMARY OF ACTIONS April 9, 2013

The motion for the Consent Calendars will be presented at the conclusion of the Consent Calendars.

A. CONSENT CALENDAR-CITY COUNCIL

A.1 ORDINANCES - READING BY TITLE ONLY
Recommendation: Waive reading of all Ordinances.

A.2 MINUTES - REGULAR MEETING OF MARCH 26, 2013 (Report of: City Clerk's Department)

A.3 CITY COUNCIL REPORTS ON REIMBURSABLE ACTIVITIES (Report of: City Clerk's Department)

A.4 APPROVAL OF THE 2013/2014 FISCAL YEAR STORM WATER PROTECTION PROGRAM BUDGET FOR COUNTY SERVICE AREA (CSA) 152
(Report of: Community & Economic Development Department)

A.5 PA04-0108 (TR 32515) – OFFSITE & ONSITE IMPROVEMENTS – ACCEPT SUBSTITUTION AGREEMENTS AND SECURITIES FOR PUBLIC IMPROVEMENTS
(Report of: Community & Economic Development Department)

A.6 APPROVE AND EXECUTE AGREEMENT FOR CONVEYANCE OF REAL PROPERTY FOR ACQUISITION OF APN 473-220-072 FOR THE NORTHEAST FIRE STATION, PROJECT NO. 803 0018 70 77
(Report of: Public Works Department)

Failed by a vote of 2-3, Mayor Pro Tem Marcelo Co, Council Member Victoria Baca, Council Member Jesse L. Molina opposed.

A.7 PA12-0048 (PM 36511) – APPROVE PARCEL MAP (CONTINUED FROM MARCH 26, 2013, BY A 5-0 VOTE)
(Report of: Community & Economic Development Department)

Item A.7 continued to date uncertain. Approved by a vote of 5-0.

B. CONSENT CALENDAR-COMMUNITY SERVICES DISTRICT

B.1 ORDINANCES - READING BY TITLE ONLY
Recommendation: Waive reading of all Ordinances.

B.2 MINUTES - REGULAR MEETING OF MARCH 26, 2013 (Report of: City Clerk's Department)

C. CONSENT CALENDAR - HOUSING AUTHORITY

C.1 ORDINANCES - READING BY TITLE ONLY
Recommendation: Waive reading of all Ordinances.

C.2 MINUTES - REGULAR MEETING OF MARCH 26, 2013 (Report of: City Clerk's Department)

D. CONSENT CALENDAR - BOARD OF LIBRARY TRUSTEES

D.1 ORDINANCES - READING BY TITLE ONLY
Recommendation: Waive reading of all Ordinances.

D.2 MINUTES - REGULAR MEETING OF MARCH 26, 2013 (Report of: City Clerk's Department)

Joint Consent Calendar Items A.1 through D.2, except Item A.6 (pulled for separate actions) and A.7 (continued to date uncertain) Approved by a vote of 5-0.

E. PUBLIC HEARINGS - NONE

F. ITEMS REMOVED FROM CONSENT CALENDARS FOR DISCUSSION OR SEPARATE ACTION

Item A.6 removed from Consent Calendars for discussion and separate action.

Failed by a vote of 2-3, Mayor Pro Tem Marcelo Co, Council Member Victoria Baca, Council Member Jesse L. Molina opposed.

G. REPORTS

G.1 CITY MANAGER'S REPORT (Informational Oral Presentation - not for Council action)

G.2 CITY ATTORNEY'S REPORT (Informational Oral Presentation - not for Council action)

H. LEGISLATIVE ACTIONS

H.1 ORDINANCES - 1ST READING AND INTRODUCTION - NONE

H.2 ORDINANCES - 2ND READING AND ADOPTION

H.2.1 AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, AMENDING SUB-SECTION 9.14.130(A) OF TITLE 9 0F THE CITY OF MORENO VALLEY MUNICIPAL CODE RELATING TO REQUIREMENTS FOR THE UNDERGROUNDING OF OVERHEAD UTILITIES (RECEIVED FIRST READING AND INTRODUCTION ON MARCH 26, 2013 BY A 5-0 VOTE) (Report of: Community & Economic Development

Department)

Approved by a vote of 5-0.

H.2.2 AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, ADDING CHAPTER 2.25 TO THE CITY OF MORENO VALLEY MUNICIPAL CODE ESTABLISHING A UTILITIES COMMISSION (RECEIVED FIRST READING AND INTRODUCTION ON MARCH 26, 2013 BY A 5-0 VOTE) (Report of: Public Works Department)

Approved by a vote of 5-0.

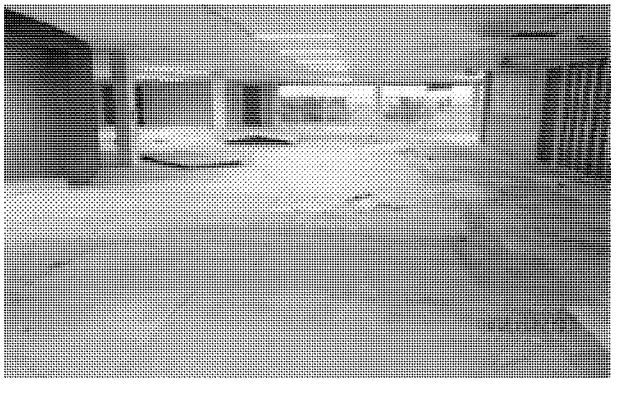
To: City Hall Staff
Subject: City Hall 2nd Level Floor Rehab update

Follow Up Flag: Flag for follow up
Flag Status: Flagged

Hello City Hall,

Many thanks to Public Works / Capital Projects staff for providing the following update on the City Hall 2nd Level Floor Rehabilitation Project:

> The project is well under way. The contractor started work on April 2, with removing the old carpet. As of today, the carpet has been removed and as can be seen from the attached pictures, the plywood between the carpet and concrete is now being removed. This week, the contractor will also be saw cutting to remove the plywood adjacent to the walls, creating a high pitch sound for a short time, along with other normal construction noises.
>
> As this project continues, some construction activities may create noises that maybe bothersome to some. If any of the construction activities are at a level that you feel disrupts your working environment, please contact Guy Pegan [redacted] We want to make sure that staff retains a reasonably comfortable working environment during the construction phases.



The City Manager's Office has approved this message for distribution.

Thanks!

Michele

Subject: Nason property disposition.

Hi Michelle –

Henry asked for a bullet point outline of today's meeting. These are the salient points as I saw them. Please feel free to share this with others as you deem appropriate.

- The Nason property, consisting of two parcels totaling 59.22 acres approximately, is currently zoned "P" for public use. Both parcels were declared "excess" property in 2005 by resolution of the City Council and the Moreno Public Facilities Financing Corporation (the title holder of one of the parcels at the time).
- The City received an unsolicited offer letter from CV Communities which describes their desire to purchase the Nason Property for $3,258,000 (based on the acreage) contingent upon the approval of a tentative map, change of zone to Residential, and various other conditions .
- It was agreed that the City should hire an independent real estate appraiser to determine the fair market value of the Nason Property zoned for residential development before taking the offer letter to the City Council in closed session for consideration.
- The goal is to complete the appraisal within 30 days. Prior to the completion of the appraisal, the City Attorney will review the Resolutions and other records associated with the property to make certain that the "excess" designation remains valid.
- John Strickler will contact Jerry Stephens and inform him of the proposed appraisal process.
- John Strickler will contact Kevin Donahue, MAI with Overland, Pacific, and Cutler to coordinate the appraisal based on residential zoning. However, future direction could include the preparation of an analysis of value based on different uses for the property.

I spoke to Jerry Stephens this afternoon and explained that we would be hiring an appraiser to determine the fair market value of the property. He said he understood and I promised to keep him informed of our progress. I also put in a call to Kevin Donahue and await a return call. I will let you know about the appraisal after I have spoken with Kevin.

Additionally, I will research the right-of-way remainder parcels we discussed after the meeting and get something back to you next week.

Thanks –

John S.

Subject: Re: FW: PDFs - Assets

Ric, et. al. - Thanks for the quick turnaround on the City's asset/surplus information, and thanks to all for this morning's meeting. It's amazing how much you can get done when the phones aren't ringing and the meeting's participants don't all need to leave within 1/2 of an hour to attend their next pressing meeting!

I did talk to Iddo after our meeting, and we discussed the need to move incrementally with the financing, with much of the City's contribution coming after there has been some initial development of the World Logistics Center or other development in that part of town. As a result, Iddo is going to sit down with Brian Hixson to split out a first increment of development on his project, as well as the infrastructure he needs to move ahead with that first increment. I will then forward that information to Ahmad and the rest of the team to vet Iddo's list and costs and review any discrepancies with Iddo, so we have a set of costs upon which we can both agree. We can then start to apply individual financing programs, using TUMF, power or any other applicable existing revenue streams, grants, development fees, tax credit programs and any other funding sources that we can

cobble together. Hopefully we can find sufficient funding to allow the first increment of Iddo's development to move ahead, after which time additional sources of revenue will open up.

At the same time, my staff will be creating a funding program "map" which lists the various programs that are available to fund all types of infrastructure, as well as those programs limited to a specific type or types of infrastructure. Our goal is to schedule a meeting for the week of May 20th to review both the map and the short list of infrastructure, and begin to assign specific programs to the necessary infrastructure. Obviously, there will still be question marks (e.g., will we really be awarded a Prop 84 flood control grant, can we sell bonds secured by 11-years of TUMF fees and some as yet undefined secondary source of revenues for the last 14 years of the bond issue), but we will also come up with a "Plan B" in case our favored funding sources do not materialize.

Please let me know what date works best for the week of May 20th (I'm busy on the 20th, but any other day works for me). Thanks again, and I hope you all have a great weekend! David

City of Moreno Valley
Transportation Uniform Mitigation Fee (TUMF) Program
2013 Network Analysis
March 2013

Overview

The City of Moreno Valley periodically evaluates its roadway network and mitigation programs to ensure adequate capacity is available to serve existing and future traffic generated from local and regional sources. The City serves a broad range of land uses including residential, industrial, commercial, health and education. In order to keep pace with continual refinements to the network and scarce City financial resources, traffic mitigation programs are often relied upon to address timely investment in the overall system. As a result, the City relies upon a combination of local and regional impact fees, land secured financing, public grants and other sources. The discussion that follows is intended to lay the groundwork to adjust the Transportation Uniform Mitigation Fee (TUMF) program.

Mitigation Fee Programs

The City of Moreno Valley uses two formal mitigation fee programs to address growth-based traffic capacity issues. The TUMF program is administered by Western Riverside Council of Governments (WRCOG) and addresses local and regional transportation needs through western Riverside County based upon a Nexus Study created in 2003 and most recently updated in 2009.

The TUMF program includes a variety of arterials and arterial/freeway interchanges intended to meet the needs of the region through 2035 and supports future growth generated by land development. The Nexus roadway network emphasizes multijurisdictional corridors with localized traffic (secondary network) and regional facilities (backbone network). For the purposes of this report, the City reviewed Nexus Network facilities most relevant to the City with a total Maximum TUMF Share of $296,628,000.

The Development Impact Fee (DIF) program focuses primarily on local the arterial network. The DIF covers most General Plan roadways within the City.

TUMF Network Revisions - Reconciliation Process

The TUMF Network and Nexus Study are evaluated by WRCOG and its member agencies periodically to ensure the program is functioning as intended and that the planned network addresses level of service needs. WRCOG has previously directed local agencies to evaluate the network and consider adjustments with a neutral budgetary impact on the adopted program. As a result, facilities that are proposed to be added to the TUMF Network generally must meet technical criteria (including projected level of service, average daily traffic, etc.) with the proposed cost offset by program savings and/or deletions within the jurisdiction's boundaries.

The City of Moreno Valley has reviewed circulation needs based upon the adopted General Plan and anticipated near term amendments. Based upon adjustments, deletions and additions to the TUMF Network, the total Maximum TUMF share, if approved, would have a new overall cost of $293,465,000 resulting in a net program ***reduction*** of $3,162,500.

The proposed updated network is represented in six exhibits as follows:

- Exhibit A: Moreno Valley Network Funding Balance Sheet
- Exhibit B: Moreno Valley TUMF Facilities Map - Current
- Exhibit C: Moreno Valley TUMF Facilities Map - Proposed
- Exhibit D: Explanation of Network Changes Requested
- Exhibit E: Existing TUMF Network List for Moreno Valley
- Exhibit F: Moreno Valley Study Area Network – Color-Coded Changes

The resulting recommended changes included a review of segment length, % complete, local funding obligations, anticipated program savings and new facilities needed to ensure coordination between local and regional funding sources/needs. Several corridor segments are proposed to be further bifurcated to address more precisely status and program participation. These facilities include portions of Alessandro Boulevard, Ironwood Avenue, Nason Street, and Redlands Boulevard.

The most significant revisions to the TUMF Network are the addition of the SR-60/Theodore interchange, Theodore Street and Cactus Avenue to address growth in the eastern part of the City and facilitate improved circulation accessing SR-60, I-215 and local/regional activity centers. Theodore Street has daily volumes projected in excess of 34,000 vehicles per day. The facility was previously considered as part of the 2009 Nexus Update but projected traffic from existing land uses fell below the technical screening criteria used by the program.

In order to keep the TUMF Network budget neutral, the City is considering aggressive cost assignment reconciliation between the local DIF and regional TUMF programs. As a result, the DIF will assume a greater share of planned arterial improvement costs by removing budget from the TUMF program. In this way the two programs are leveraged in a more deliberate and function-based approach. The TUMF will assume primary cost for all arterial-to-freeway interchanges (with DIF covering a portion of Theodore/SR-60) and better balance of arterial improvements between the two programs.

Conformance to Performance Criteria

The TUMF Nexus Study and companion Administrative Plan provide network and performance guidelines to be considered for consideration of roadways in the program. Key criteria include the number of lanes, connectivity, minimum projected daily traffic, level of service, capability to serve regional transit, and access to major activity centers.

The City's network adjustment requests carefully consider the screening criteria, combined with overall network system performance opportunities. The resulting adjustments and related

justification for major new segments are described below. Additions to the network are offset by a series of completed improvements, recognition of leveraged state/federal grants, and assumption of local program responsibility which collectively result in a net savings of $3.16 million.

Theodore Street Corridor and SR-60 Interchange

- Provides additional connection to SR-60 with potential relief to adjacent freeway interchanges at Redlands and Gilman Springs
- Provides the City's east side residential and planned industrial complex access to SR-60 and east-west roadways such as Cactus, Alessandro, Eucalyptus, and Ironwood
- Serves current residential and planned industrial/business park uses
- Planned six-lane facility with a four-lane segment north of SR-60 at build-out
- 2035 projected traffic with planned development exceeds 34,000 ADT
- Connects to existing TUMF Network facilities including Alessandro, Cactus and Ironwood
- Serves multiple jurisdictions

Cactus Avenue Corridor

- Extends an existing TUMF facility (I-215 to Heacock) for program participation to improve access to I-215 and SR-60 for area residents, business and visitors
- Portions of proposed facility extension have been completed
- Serves current residential/commercial and planned industrial/business park uses
- Provides improved access to the Moreno Valley's east side
- Planned four-lane facility at build-out
- Connects TUMF Network facilities including Perris, Lasselle, Nason, Redlands, and Theodore

Eucalyptus Avenue Corridor

- Parallel roadway supporting mainline freeway relief and access
- Funding through a combination of DIF and TUMF
- Serves current commercial and planned industrial/business park uses
- Planned four-lane facility at build-out
- Connects existing TUMF Network facilities including Nason, Redlands, and Theodore

Day Street at SR-60 Westbound Ramps

- Improved access to SR-60 and I-215 for residential, commercial and jobs centers
- Provides relief to adjacent interchanges at Box Springs Road and Frederick Street
- Serves current and planned commercial and residential land uses
- Planned four-lane facility at build-out
- 2006 volume exceeded 21,000 ADT
- Connects to Ironwood Avenue (existing TUMF facility)
- Serves City of Moreno Valley and Riverside

A complete listing of proposed network changes is shown on the Exhibits.

Proposed**	293,465,500

*Includes retained segments with and without funding

**Retained plus added segments (includes retained segments with reduced/removed budget)

All costs summaries include ROW, planning, engineering and contingencies

Considerations

[1]Ironwood Junction (Box Springs) Interchange has full funding obligated from other sources

[2]Nason Interchange has partial funds obligated from other sources. Retained dollars of $14,100,000 consist of $13,069,951 allocated in TIP funds, other related costs plus $1,000,000 TUMF fee reduction deficit makeup

[3]Day Street reflects actual anticipated cost for SB arterial to WB ramp

Subject: City of Moreno Valley
TUMF Network Adjustment Request

Dear Ms. ~~Taylor~~-Berger: Ruthanne

As anticipated, the City has prepared adjustments to the Transportation Uniform Mitigation Fee (TUMF) network of regional highways and arterials within the City's jurisdiction. The network within Moreno Valley has not been carefully analyzed since 2003. Therefore, the primary purpose is to update and correct the network. We also need to keep pace with current and anticipated future growth, and demand for transportation infrastructure. Our request is for WRCOG to make the adjustments in advance of, or during, the Nexus Study update, in accordance with your process and timeline.

To meet WRCOG's objective of being revenue-neutral (or cost-saving) to the network, our adjustment request proposes a cost-saving of $3,162,500 to the City's current network value of $296,628,000.

The summary of the major adjustments needed are as follows:

- Add State Route 60/Theodore Interchange
- Add Theodore Street corridor
- Add the Cactus Avenue corridor
- Add Eucalyptus Avenue
- Add the State Route 60/Day Street Westbound On-Ramp
- Adjust facilities that are complete and/or received funds from other sources, such as the State Route 60/Nason Interchange
- Remove a small portion of Lasselle Street
- Maintain portions of Ironwood, Nason, and Alessandro on the network for connectivity, but reduce maximum TUMF dollars

The City intends to update, if needed, and submit the final network adjustment request to WRCOG by June 30, 2013. Attached for your review are the supporting documents related to our request.

We look forward to working with you and your staff to discuss our request and implement the revisions. If you have any questions or comments at this time, please feel free to call me at (951) 413-3100.

Sincerely,

Ahmad R. Ansari, P.E.
Public Works Director/City Engineer

Attachments: Sunnymead Boulevard Meetings 0423_242013.pdf; Sunnymead Blvd Clean Up Initiative Meeting Agenda- District 1.pdf

Follow Up Flag: Flag for follow up
Flag Status: Flagged

Mayor, Mayor Pro Tem and Members of the City Council: The following community meetings have been scheduled and we wanted to make sure all of you are aware. The meetings that involve you have been included on your calendars by Cindy.

Sunnymead Boulevard Clean Up Initiative (Owings, Baca and Molina):

All of the businesses on Sunnymead Boulevard between Frederick and Perris have been invited to attend a meeting with Mayor Owings and Council Members Baca (for the Sunnymead Blvd businesses in District 5) and Molina (for those businesses in District 1) to receive information regarding an initiative to improve and enhance the business climate along Sunnymead Boulevard. Chief Ontiveros will discuss crime and provide an update on the camera program, Barry Foster will discuss Code issues and the City's intent to focus on helping businesses gain compliance, and a representative from Riverside County will share information with the businesses about resources for the homeless. These meetings are scheduled as follows; a sample agenda and the notification are attached for your information:

District 5	District 1
Tuesday, April 23	Wednesday, April 24
Miller Jones Mortuary	Holiday Inn Express
23618 Sunnymead Blvd	24630 Sunnymead Blvd.

Meetings will be held from 8:00 a.m. to 10:00 a.m.

Council District Neighborhood Budget Meetings:

Per the direction provided at the February Council Workshop, one neighborhood budget meeting has been scheduled in each Council District. Cindy has placed these meetings on your calendars and City staff will be in attendance to present budget information and answer residents' questions related to the City's financial situation. Finance staff is finalizing the locations for the following Council District budget meetings:

District 1	6:30 p.m., Mon, 5/13
District 2	6:30 p.m., Wed, 5/15
District 3	6:30 p.m., Thurs, 5/16
District 4	6:30 p.m., Fri, 5/17
District 5	9 a.m., Sat, 5/18

Moreno Valley to hold meetings with Sunnymead Boulevard Businesses

The City of Moreno Valley has embarked on an initiative to improve and enhance the business climate along Sunnymead Boulevard. Mayor Tom Owings, respective district Council Members Victoria Baca (District 5) and Jesse L. Molina (District 1), and key City staff invite business and property owners / managers to discuss plans to improve the Sunnymead Boulevard business corridor by addressing issues such as crime, code compliance, homelessness, and aesthetics.

Meetings will be held from 8:00 a.m. to 10:00 a.m. as follows:

District 5
Tuesday, April 23
Miller Jones Mortuary
23618 Sunnymead Blvd

District 1
Wednesday, April 24
Holiday Inn Express
24630 Sunnymead Blvd.

For more information, please contact the Shanna Palau in the City Manager's Office at 951.413.3037 or by email at shannap@moval.org.

	Resolution Information
	Chief Ontiveros responded on 4/10/13. Everything contained in this CRM and the letter that it is based on is rumor and innuendo. The anonymous author indicates he or she “has heard” or “has been told” or “it is rumored” or “a neighbor claims” that certain things have occurred. Anonymous allegations do not constitute actionable information. If the reporting party or another reporting party tells us they have been victimized in some way, or witnessed this citizen commit a crime, we will be happy to investigate that allegation. Owning guns (if he does), drinking in bars (if he does), and bragging about things he has allegedly done is not against the law. As for the allegation that this citizen is somehow protected or untouchable, I can only tell you that I know of no such person. We will conduct a computer inquiry into the named subject to see if there is anything that warrants further investigation. Absent specific information indicating something criminal is afoot, we will need to await actionable information to take this inquiry any deeper. I am available to discuss this if the Mayor so desires.

4/23/2013 10:24:44 AM

Issue:	**Other**
Council District:	3
Issue Description:	Please investigate Citizen X's concerns on behalf of Mayor Tom Owings, and advise Mayor Owings of the outcome. ***** Citizen X sent a letter to Mayor Owings and Council Member Stewart stating Carol Neal Armour, 26675 Ironwood, has bragged he has several weapons. Citizen X stated he has bragged he pointed his guns at his son and shot him in the garage and almost shot his wife to show them he was boss. Citizen X stated Mr. Armour stated he is retired military and Reserves, and he is untouchable as some of the police officers and judges who drink with him are all in the Reserves. Citizen X stated he has been told Mr. Armour molested his teenage daughter, and Citizen X is concerned for his/her daughters having to walk by Mr. Armour's residence. Citizen X asked if anything can be done concerning this person. The entire letter is in the Notes section.

	Resolution Information
	On 04/11/2013, Mark Sambito, Engineering Division Manager, wrote the following: Construction Inspector Gabe Gonzalez went out to the site at approximately 9:30 a.m. the morning of April 10. The first thing he indicated he noticed was the small pile of wood and construction debris in front of the residence. It was about two to three feet (2' – 3') tall and well-organized, partially blocked by the existing palm trees. The inspector walked along Willis Lane to investigate the pile of dirt. It turns out the resident might have added 12 to 18 inches of soil along the side of the house in preparation for construction of a small planter area. The amount of dirt is far less than the fifty yards that require a permit. Code Compliance Officer Patty Pose arrived and stated she would handle the debris complaint. I received a number of photos (see attached) from Inspector Gonzalez and noted nothing of concern with the residence or work area.

City of Moreno Valley

Council Summary

4/23/2013 11:27:15 AM

Issue Description:	Please investigate Council Member Molina's concerns, and advise him of the outcome. Council Member Molina requested the issue with the dirt pile and dust be taken care of immediately. There will be two CRMs created. ***** Council Member Molina stated there is a pile of dirt from this property running into Willis Lane and blowing dust all around. He stated the neighbors have complained to him they have to drive around the dirt pile, and there are dirt tornados. He also stated there is construction debris on the property facing Indian Street.

Form **W-9**
(Rev. January 2011)
Department of the Treasury
Internal Revenue Service

Request for Taxpayer Identification Number and Certification

Give Form to the requester. Do not send to the IRS.

Print or type See **Specific Instructions** on page 2.

Name (as shown on your income tax return)

Business name/disregarded entity name, if different from above

Check appropriate box for federal tax classification (required): ☐ Individual/sole proprietor ☐ C Corporation ☐ S Corporation ☐ Partnership ☐ Trust/estate

☐ Limited liability company. Enter the tax classification (C=C corporation, S=S corporation, P=partnership) ▶

☑ Other (see instructions) ▶

☑ Exempt payee

Address (number, street, and apt. or suite no.)

Requester's name and address (optional)

City, state, and ZIP code

List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on the "Name" line to avoid backup withholding. For individuals, this is your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the Part I instructions on page 3. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN* on page 3.

Note. If the account is in more than one name, see the chart on page 4 for guidelines on whose number to enter.

Social security number

			–		–				

Employer identification number

		–							

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me), and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding, and
3. I am a U.S. citizen or other U.S. person (defined below).

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions on page 4.

Sign Here **Signature of U.S. person** ▶ **Date** ▶

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Purpose of Form

A person who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) to report, for example, income paid to you, real estate transactions, mortgage interest you paid, acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA.

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN to the person requesting it (the requester) and, when applicable, to:

1. Certify that the TIN you are giving is correct (or you are waiting for a number to be issued),
2. Certify that you are not subject to backup withholding, or
3. Claim exemption from backup withholding if you are a U.S. exempt payee. If applicable, you are also certifying that as a U.S. person, your allocable share of any partnership income from a U.S. trade or business is not subject to the withholding tax on foreign partners' share of effectively connected income.

Note. If a requester gives you a form other than Form W-9 to request your TIN, you must use the requester's form if it is substantially similar to this Form W-9.

Definition of a U.S. person. For federal tax purposes, you are considered a U.S. person if you are:

- An individual who is a U.S. citizen or U.S. resident alien,
- A partnership, corporation, company, or association created or organized in the United States or under the laws of the United States,
- An estate (other than a foreign estate), or
- A domestic trust (as defined in Regulations section 301.7701-7).

Special rules for partnerships. Partnerships that conduct a trade or business in the United States are generally required to pay a withholding tax on any foreign partners' share of income from such business. Further, in certain cases where a Form W-9 has not been received, a partnership is required to presume that a partner is a foreign person, and pay the withholding tax. Therefore, if you are a U.S. person that is a partner in a partnership conducting a trade or business in the United States, provide Form W-9 to the partnership to establish your U.S. status and avoid withholding on your share of partnership income.

MV00251258

The person who gives Form W-9 to the partnership for purposes of establishing its U.S. status and avoiding withholding on its allocable share of net income from the partnership conducting a trade or business in the United States is in the following cases:

- The U.S. owner of a disregarded entity and not the entity,
- The U.S. grantor or other owner of a grantor trust and not the trust, and
- The U.S. trust (other than a grantor trust) and not the beneficiaries of the trust.

Foreign person. If you are a foreign person, do not use Form W-9. Instead, use the appropriate Form W-8 (see Publication 515, Withholding of Tax on Nonresident Aliens and Foreign Entities).

Nonresident alien who becomes a resident alien. Generally, only a nonresident alien individual may use the terms of a tax treaty to reduce or eliminate U.S. tax on certain types of income. However, most tax treaties contain a provision known as a "saving clause." Exceptions specified in the saving clause may permit an exemption from tax to continue for certain types of income even after the payee has otherwise become a U.S. resident alien for tax purposes.

If you are a U.S. resident alien who is relying on an exception contained in the saving clause of a tax treaty to claim an exemption from U.S. tax on certain types of income, you must attach a statement to Form W-9 that specifies the following five items:

1. The treaty country. Generally, this must be the same treaty under which you claimed exemption from tax as a nonresident alien.

2. The treaty article addressing the income.

3. The article number (or location) in the tax treaty that contains the saving clause and its exceptions.

4. The type and amount of income that qualifies for the exemption from tax.

5. Sufficient facts to justify the exemption from tax under the terms of the treaty article.

Example. Article 20 of the U.S.-China income tax treaty allows an exemption from tax for scholarship income received by a Chinese student temporarily present in the United States. Under U.S. law, this student will become a resident alien for tax purposes if his or her stay in the United States exceeds 5 calendar years. However, paragraph 2 of the first Protocol to the U.S.-China treaty (dated April 30, 1984) allows the provisions of Article 20 to continue to apply even after the Chinese student becomes a resident alien of the United States. A Chinese student who qualifies for this exception (under paragraph 2 of the first protocol) and is relying on this exception to claim an exemption from tax on his or her scholarship or fellowship income would attach to Form W-9 a statement that includes the information described above to support that exemption.

If you are a nonresident alien or a foreign entity not subject to backup withholding, give the requester the appropriate completed Form W-8.

What is backup withholding? Persons making certain payments to you must under certain conditions withhold and pay to the IRS a percentage of such payments. This is called "backup withholding." Payments that may be subject to backup withholding include interest, tax-exempt interest, dividends, broker and barter exchange transactions, rents, royalties, nonemployee pay, and certain payments from fishing boat operators. Real estate transactions are not subject to backup withholding.

You will not be subject to backup withholding on payments you receive if you give the requester your correct TIN, make the proper certifications, and report all your taxable interest and dividends on your tax return.

Payments you receive will be subject to backup withholding if:

1. You do not furnish your TIN to the requester,

2. You do not certify your TIN when required (see the Part II instructions on page 3 for details),

3. The IRS tells the requester that you furnished an incorrect TIN,

4. The IRS tells you that you are subject to backup withholding because you did not report all your interest and dividends on your tax return (for reportable interest and dividends only), or

5. You do not certify to the requester that you are not subject to backup withholding under 4 above (for reportable interest and dividend accounts opened after 1983 only).

Certain payees and payments are exempt from backup withholding. See the instructions below and the separate Instructions for the Requester of Form W-9.

Also see *Special rules for partnerships* on page 1.

Updating Your Information

You must provide updated information to any person to whom you claimed to be an exempt payee if you are no longer an exempt payee and anticipate receiving reportable payments in the future from this person. For example, you may need to provide updated information if you are a C corporation that elects to be an S corporation, or if you no longer are tax exempt. In addition, you must furnish a new Form W-9 if the name or TIN changes for the account, for example, if the grantor of a grantor trust dies.

Penalties

Failure to furnish TIN. If you fail to furnish your correct TIN to a requester, you are subject to a penalty of $50 for each such failure unless your failure is due to reasonable cause and not to willful neglect.

Civil penalty for false information with respect to withholding. If you make a false statement with no reasonable basis that results in no backup withholding, you are subject to a $500 penalty.

Criminal penalty for falsifying information. Willfully falsifying certifications or affirmations may subject you to criminal penalties including fines and/or imprisonment.

Misuse of TINs. If the requester discloses or uses TINs in violation of federal law, the requester may be subject to civil and criminal penalties.

Specific Instructions

Name

If you are an individual, you must generally enter the name shown on your income tax return. However, if you have changed your last name, for instance, due to marriage without informing the Social Security Administration of the name change, enter your first name, the last name shown on your social security card, and your new last name.

If the account is in joint names, list first, and then circle, the name of the person or entity whose number you entered in Part I of the form.

Sole proprietor. Enter your individual name as shown on your income tax return on the "Name" line. You may enter your business, trade, or "doing business as (DBA)" name on the "Business name/disregarded entity name" line.

Partnership, C Corporation, or S Corporation. Enter the entity's name on the "Name" line and any business, trade, or "doing business as (DBA) name" on the "Business name/disregarded entity name" line.

Disregarded entity. Enter the owner's name on the "Name" line. The name of the entity entered on the "Name" line should never be a disregarded entity. The name on the "Name" line must be the name shown on the income tax return on which the income will be reported. For example, if a foreign LLC that is treated as a disregarded entity for U.S. federal tax purposes has a domestic owner, the domestic owner's name is required to be provided on the "Name" line. If the direct owner of the entity is also a disregarded entity, enter the first owner that is not disregarded for federal tax purposes. Enter the disregarded entity's name on the "Business name/disregarded entity name" line. If the owner of the disregarded entity is a foreign person, you must complete an appropriate Form W-8.

Note. Check the appropriate box for the federal tax classification of the person whose name is entered on the "Name" line (Individual/sole proprietor, Partnership, C Corporation, S Corporation, Trust/estate).

Limited Liability Company (LLC). If the person identified on the "Name" line is an LLC, check the "Limited liability company" box only and enter the appropriate code for the tax classification in the space provided. If you are an LLC that is treated as a partnership for federal tax purposes, enter "P" for partnership. If you are an LLC that has filed a Form 8832 or a Form 2553 to be taxed as a corporation, enter "C" for C corporation or "S" for S corporation. If you are an LLC that is disregarded as an entity separate from its owner under Regulation section 301.7701-3 (except for employment and excise tax), do not check the LLC box unless the owner of the LLC (required to be identified on the "Name" line) is another LLC that is not disregarded for federal tax purposes. If the LLC is disregarded as an entity separate from its owner, enter the appropriate tax classification of the owner identified on the "Name" line.

Other entities. Enter your business name as shown on required federal tax documents on the "Name" line. This name should match the name shown on the charter or other legal document creating the entity. You may enter any business, trade, or DBA name on the "Business name/ disregarded entity name" line.

Exempt Payee

If you are exempt from backup withholding, enter your name as described above and check the appropriate box for your status, then check the "Exempt payee" box in the line following the "Business name/ disregarded entity name," sign and date the form.

Generally, individuals (including sole proprietors) are not exempt from backup withholding. Corporations are exempt from backup withholding for certain payments, such as interest and dividends.

Note. If you are exempt from backup withholding, you should still complete this form to avoid possible erroneous backup withholding.

The following payees are exempt from backup withholding:

1. An organization exempt from tax under section 501(a), any IRA, or a custodial account under section 403(b)(7) if the account satisfies the requirements of section 401(f)(2),

2. The United States or any of its agencies or instrumentalities,

3. A state, the District of Columbia, a possession of the United States, or any of their political subdivisions or instrumentalities,

4. A foreign government or any of its political subdivisions, agencies, or instrumentalities, or

5. An international organization or any of its agencies or instrumentalities.

Other payees that may be exempt from backup withholding include:

6. A corporation,

7. A foreign central bank of issue,

8. A dealer in securities or commodities required to register in the United States, the District of Columbia, or a possession of the United States,

9. A futures commission merchant registered with the Commodity Futures Trading Commission,

10. A real estate investment trust,

11. An entity registered at all times during the tax year under the Investment Company Act of 1940,

12. A common trust fund operated by a bank under section 584(a),

13. A financial institution,

14. A middleman known in the investment community as a nominee or custodian, or

15. A trust exempt from tax under section 664 or described in section 4947.

The following chart shows types of payments that may be exempt from backup withholding. The chart applies to the exempt payees listed above, 1 through 15.

IF the payment is for . . .	THEN the payment is exempt for . . .
Interest and dividend payments	All exempt payees except for 9
Broker transactions	Exempt payees 1 through 5 and 7 through 13. Also, C corporations.
Barter exchange transactions and patronage dividends	Exempt payees 1 through 5
Payments over $600 required to be reported and direct sales over $5,000 [1]	Generally, exempt payees 1 through 7 [2]

[1] See Form 1099-MISC, Miscellaneous Income, and its instructions.

[2] However, the following payments made to a corporation and reportable on Form 1099-MISC are not exempt from backup withholding: medical and health care payments, attorneys' fees, gross proceeds paid to an attorney, and payments for services paid by a federal executive agency.

Part I. Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. If you are a resident alien and you do not have and are not eligible to get an SSN, your TIN is your IRS individual taxpayer identification number (ITIN). Enter it in the social security number box. If you do not have an ITIN, see *How to get a TIN* below.

If you are a sole proprietor and you have an EIN, you may enter either your SSN or EIN. However, the IRS prefers that you use your SSN.

If you are a single-member LLC that is disregarded as an entity separate from its owner (see *Limited Liability Company (LLC)* on page 2), enter the owner's SSN (or EIN, if the owner has one). Do not enter the disregarded entity's EIN. If the LLC is classified as a corporation or partnership, enter the entity's EIN.

Note. See the chart on page 4 for further clarification of name and TIN combinations.

How to get a TIN. If you do not have a TIN, apply for one immediately. To apply for an SSN, get Form SS-5, Application for a Social Security Card, from your local Social Security Administration office or get this form online at *www.ssa.gov*. You may also get this form by calling 1-800-772-1213. Use Form W-7, Application for IRS Individual Taxpayer Identification Number, to apply for an ITIN, or Form SS-4, Application for Employer Identification Number, to apply for an EIN. You can apply for an EIN online by accessing the IRS website at *www.irs.gov/businesses* and clicking on Employer Identification Number (EIN) under Starting a Business. You can get Forms W-7 and SS-4 from the IRS by visiting IRS.gov or by calling 1-800-TAX-FORM (1-800-829-3676).

If you are asked to complete Form W-9 but do not have a TIN, write "Applied For" in the space for the TIN, sign and date the form, and give it to the requester. For interest and dividend payments, and certain payments made with respect to readily tradable instruments, generally you will have 60 days to get a TIN and give it to the requester before you are subject to backup withholding on payments. The 60-day rule does not apply to other types of payments. You will be subject to backup withholding on all such payments until you provide your TIN to the requester.

Note. Entering "Applied For" means that you have already applied for a TIN or that you intend to apply for one soon.

Caution: *A disregarded domestic entity that has a foreign owner must use the appropriate Form W-8.*

Part II. Certification

To establish to the withholding agent that you are a U.S. person, or resident alien, sign Form W-9. You may be requested to sign by the withholding agent even if item 1, below, and items 4 and 5 on page 4 indicate otherwise.

For a joint account, only the person whose TIN is shown in Part I should sign (when required). In the case of a disregarded entity, the person identified on the "Name" line must sign. Exempt payees, see *Exempt Payee* on page 3.

Signature requirements. Complete the certification as indicated in items 1 through 3, below, and items 4 and 5 on page 4.

1. Interest, dividend, and barter exchange accounts opened before 1984 and broker accounts considered active during 1983. You must give your correct TIN, but you do not have to sign the certification.

2. Interest, dividend, broker, and barter exchange accounts opened after 1983 and broker accounts considered inactive during 1983. You must sign the certification or backup withholding will apply. If you are subject to backup withholding and you are merely providing your correct TIN to the requester, you must cross out item 2 in the certification before signing the form.

3. Real estate transactions. You must sign the certification. You may cross out item 2 of the certification.

4. Other payments. You must give your correct TIN, but you do not have to sign the certification unless you have been notified that you have previously given an incorrect TIN. "Other payments" include payments made in the course of the requester's trade or business for rents, royalties, goods (other than bills for merchandise), medical and health care services (including payments to corporations), payments to a nonemployee for services, payments to certain fishing boat crew members and fishermen, and gross proceeds paid to attorneys (including payments to corporations).

5. Mortgage interest paid by you, acquisition or abandonment of secured property, cancellation of debt, qualified tuition program payments (under section 529), IRA, Coverdell ESA, Archer MSA or HSA contributions or distributions, and pension distributions. You must give your correct TIN, but you do not have to sign the certification.

What Name and Number To Give the Requester

For this type of account:	Give name and SSN of:
1. Individual	The individual
2. Two or more individuals (joint account)	The actual owner of the account or, if combined funds, the first individual on the account [1]
3. Custodian account of a minor (Uniform Gift to Minors Act)	The minor [2]
4. a. The usual revocable savings trust (grantor is also trustee)	The grantor-trustee [1]
b. So-called trust account that is not a legal or valid trust under state law	The actual owner [1]
5. Sole proprietorship or disregarded entity owned by an individual	The owner [3]
6. Grantor trust filing under Optional Form 1099 Filing Method 1 (see Regulation section 1.671-4(b)(2)(i)(A))	The grantor*
For this type of account:	**Give name and EIN of:**
7. Disregarded entity not owned by an individual	The owner
8. A valid trust, estate, or pension trust	Legal entity [4]
9. Corporation or LLC electing corporate status on Form 8832 or Form 2553	The corporation
10. Association, club, religious, charitable, educational, or other tax-exempt organization	The organization
11. Partnership or multi-member LLC	The partnership
12. A broker or registered nominee	The broker or nominee
13. Account with the Department of Agriculture in the name of a public entity (such as a state or local government, school district, or prison) that receives agricultural program payments	The public entity
14. Grantor trust filing under the Form 1041 Filing Method or the Optional Form 1099 Filing Method 2 (see Regulation section 1.671-4(b)(2)(i)(B))	The trust

[1] List first and circle the name of the person whose number you furnish. If only one person on a joint account has an SSN, that person's number must be furnished.

[2] Circle the minor's name and furnish the minor's SSN.

[3] You must show your individual name and you may also enter your business or "DBA" name on the "Business name/disregarded entity" name line. You may use either your SSN or EIN (if you have one), but the IRS encourages you to use your SSN.

[4] List first and circle the name of the trust, estate, or pension trust. (Do not furnish the TIN of the personal representative or trustee unless the legal entity itself is not designated in the account title.) Also see *Special rules for partnerships* on page 1.

***Note.** Grantor also must provide a Form W-9 to trustee of trust.

Note. If no name is circled when more than one name is listed, the number will be considered to be that of the first name listed.

Secure Your Tax Records from Identity Theft

Identity theft occurs when someone uses your personal information such as your name, social security number (SSN), or other identifying information, without your permission, to commit fraud or other crimes. An identity thief may use your SSN to get a job or may file a tax return using your SSN to receive a refund.

To reduce your risk:

- Protect your SSN,
- Ensure your employer is protecting your SSN, and
- Be careful when choosing a tax preparer.

If your tax records are affected by identity theft and you receive a notice from the IRS, respond right away to the name and phone number printed on the IRS notice or letter.

If your tax records are not currently affected by identity theft but you think you are at risk due to a lost or stolen purse or wallet, questionable credit card activity or credit report, contact the IRS Identity Theft Hotline at 1-800-908-4490 or submit Form 14039.

For more information, see Publication 4535, Identity Theft Prevention and Victim Assistance.

Victims of identity theft who are experiencing economic harm or a system problem, or are seeking help in resolving tax problems that have not been resolved through normal channels, may be eligible for Taxpayer Advocate Service (TAS) assistance. You can reach TAS by calling the TAS toll-free case intake line at 1-877-777-4778 or TTY/TDD 1-800-829-4059.

Protect yourself from suspicious emails or phishing schemes. Phishing is the creation and use of email and websites designed to mimic legitimate business emails and websites. The most common act is sending an email to a user falsely claiming to be an established legitimate enterprise in an attempt to scam the user into surrendering private information that will be used for identity theft.

The IRS does not initiate contacts with taxpayers via emails. Also, the IRS does not request personal detailed information through email or ask taxpayers for the PIN numbers, passwords, or similar secret access information for their credit card, bank, or other financial accounts.

If you receive an unsolicited email claiming to be from the IRS, forward this message to *phishing@irs.gov*. You may also report misuse of the IRS name, logo, or other IRS property to the Treasury Inspector General for Tax Administration at 1-800-366-4484. You can forward suspicious emails to the Federal Trade Commission at: *spam@uce.gov* or contact them at *www.ftc.gov/idtheft* or 1-877-IDTHEFT (1-877-438-4338).

Visit IRS.gov to learn more about identity theft and how to reduce your risk.

Privacy Act Notice

Section 6109 of the Internal Revenue Code requires you to provide your correct TIN to persons (including federal agencies) who are required to file information returns with the IRS to report interest, dividends, or certain other income paid to you; mortgage interest you paid; the acquisition or abandonment of secured property; the cancellation of debt; or contributions you made to an IRA, Archer MSA, or HSA. The person collecting this form uses the information on the form to file information returns with the IRS, reporting the above information. Routine uses of this information include giving it to the Department of Justice for civil and criminal litigation and to cities, states, the District of Columbia, and U.S. possessions for use in administering their laws. The information also may be disclosed to other countries under a treaty, to federal and state agencies to enforce civil and criminal laws, or to federal law enforcement and intelligence agencies to combat terrorism. You must provide your TIN whether or not you are required to file a tax return. Under section 3406, payers must generally withhold a percentage of taxable interest, dividend, and certain other payments to a payee who does not give a TIN to the payer. Certain penalties may also apply for providing false or fraudulent information.

BIOGRAPHICAL PROFILE OF Mayor TOM OWINGS

Tom Owings was elected to the Moreno Valley City Council in 2012 to represent Council District 3. He was selected as Mayor in his first year.

Education is a priority for Mayor Owings, and when he returned home from the army, he attended the University of Southern Oregon and graduated in 1976. Following college he went to work for a local car dealership.

During the early 1980s Mayor Owings moved his family to Southern California where for over 15 years he served as Vice President of Raceway Ford, and he owned Raceway Nissan until its sale in 2007.

Over the years Mayor Owings has been involved in Moreno Valley community affairs including the Moreno Valley Chamber of Commerce, the Hispanic Chamber of Commerce, and he has supported youth athletic programs. He served on the Planning Commission from 2010 to 2012.

Mayor Owings currently serves on the March Joint Powers Commission (MJPC), Riverside County Transportation Commission (RCTC), Western Riverside Council of Governments (WRCOG), Economic Development Subcommittee, Finance Subcommittee, Public Safety Subcommittee, Charter Exploratory Ad Hoc Subcommittee, and Mayor's Ad Hoc Committee on Increasing Graduation Rates.

Mayor Owings enjoys being of service to the community, and he believes his 35 years of business experience has given him the skills to be an effective City Council Member.

Mayor Owings and his wife, Susan, have three children, 14 grandchildren, and a beautiful Golden Retriever named Shiloh, a trained service aid dog.

❖ ❖ ❖

About Moreno Valley: *Incorporated on December 3, 1984, the City of Moreno Valley is 50 square miles, located in western Riverside County. Its current population is 193,365, representing a rich diversity of cultures and generations. The City has a Council/City Manager form of government. The Council appoints the City Manager, who oversees the daily operations of the City. The policy-making City Council consists of five members, elected by district.*

Subject: RE: Noise Disturbance

Good morning Kevin,

As I understand it, you and/or Marc spoke with Officer White last night. I hope he was able to provide some answers for you. I encourage you to continue calling when the violation is occurring. As we've discussed before, an officer will respond as soon as one is available. The POP Team has also been made aware of this problem. They will proactively work to resolve the problem using a variety of conventional and unconventional methods.

I definitely understand how frustrating this can be. My family and I experienced similar circumstances when living in our previous home. Unfortunately, the city I lived in did not have an enforceable noise ordinance and the only way I could seek resolution was to sign a private persons arrest or confront the offenders. That was not something I was willing to do since my family had to live in the neighborhood with the offenders.

If we are able to get an officer there while the offense is taking place, and if it meets the criteria of the ordinance, we can issue an administrative citation without a private persons arrest from you or Marc. The fine for subsequent violations increases and often is a big enough deterrent to permanently end the problem. I suspect it is more likely the POP Team will be able resolve this issue. Either way, we will work to get the problem solved.

Please don't hesitate to contact me if you have additional comments or concerns.

Thanks,

Joel Ontiveros, Chief of Police
Moreno Valley Police Department

Importance: High

Dear Police Chief Ontiveros
After repeated calls to the Moreno Valley non-emergency dispatch the neighbor continues to play loud music and music at a substantially low frequency. What will be done to prevent this person from disturbing the peace? This sound rattles the windows in my home.

I arrived home tonight after two weeks away from home working to discover this loud and offensive noise. This is unacceptable and must be controlled.

My husband Marc called dispatch just moments ago and we hope to have a conversation with an office once they respond the the complaint.

Sincerely, Kevin Morrissey

Dear Police Chief Ontiveros,

Thanks for your quick response to my email especially considering the holiday.

Here is a resend on the original message. I had quoted a medical study on noise which I cut and pasted again below the word Abstract. Hopefully this message will arrive in tact. In response to your question we have called the dispatch number several times as well as some of our neighbors.

Thanks and Happy Easter to you as well.

Regards, Kevin

Abstract:
Low frequency noise (20-200 Hz) is emitted by numerous sources in the society. As low frequencies propagate with little attenuation through walls and windows, many people may be exposed to low frequency noise in their dwellings. Sleep disturbance, especially with regard to time to fall asleep and tiredness in the morning, are commonly reported in case studies on low frequency noise. However, the number of studies where sleep disturbance is investigated in relation to the low frequencies in the noise is limited. Based on findings from available epidemiological and experimental studies, the review gives indications that sleep disturbance due to low frequency noise warrants further concern.

Several case studies indicate that low frequency noise affects sleep quality, particularly with reference to the time taken to fall asleep and tiredness in the morning (see Berglund *et al.,* 1996, for a review)

Dear Mayor Owings and Chief of Police Ontiveros,

My husband and I live at 26200 Kalmia Ave in Moreno Valley. We purchased our home back in 2000 and now consider ourselves "long time residents" of Moreno Valley. I am a college professor in Los Angeles and My husband is a retired university instructor from UCR. We care about the city we live in and are active members of the community. Recently I was a commissioner on the Moreno Valley Arts Council and Marc is a long time church musician. We do what we can to make a positive contribution to our city.

Our neighborhood has been devastated by the recent real estate crisis with numerous foreclosures. We have seen cherished neighbors loose their homes and have to move away. One of the results of this real estate problem has been home rentals. The house directly across the street from us—26191 Kalmia Avenue, the South East Corner of Steeplechase and Kalmia—has become a rental property and the current renter/occupant has violated Ord. 740 § 1.2, 2007 by repeatedly playing loud music outside the home he rents, at late hours. Most recently Easter Eve—Last night— from 9:00 PM to 11:30 PM. The individual in question has a Sub Woofer in their vehicle, parks the vehicle in the driveway and cranks up the volume. The sound is so disturbing it literally shakes the windows in our home.

Due to the repeated violation of the sound ordinance by the occupant of the rented home it is my belief that the occupant's intention is malicious and that they intend to disturb the peace. After repeated calls to the Non Emergency dispatch for the Moreno Valley Police there has been no relief. One evening after calling the non emergency dispatch. The officer arrived and had to search for the house and while the cruiser was headed north on Steeplechase the renter was able to back their car into their garage and turn out the lights. All witnessed from our home which is many feet above the grade of the street level.

Please help restore our neighborhood to a peacful place that realizes public health, safety, welfare and quality of life for the inhabitants of this city.

Sincerely,
Kevin L Morrissey
26200 Kalmia Ave.
Moreno Valley , CA 92555

Subject: Re: Noise Disturbance

Good morning Mr. Morrissey,

The last third of your message (prior to the abstract) was garbled and I am unable to read it. Did you last night, or have you in the past called Police Dispatch to report the noise disturbance?

If not, I encourage you to call when the violation is occurring. Noise disturbances are a problem we can resolve without involving you directly in most cases.

One thing I would like you to know is that we handle all calls based on a priority system. Call types are assigned a priority number from 1 to 4. A priority 1 call involves an immediate threat to life. A priority 4 call may be a barking dog or other noise disturbance. Although we respond to all calls for service, response times to priority 4 calls are considerably longer than priority 1 and 2 call response times.

I'd be happy to read your message again if you care to resend it.

Thanks and happy Easter to you and yours.

Joel Ontiveros
Chief of Police

Subject: DRAFT Proposal

Hi Bob. The proposal for Phase 1 of the public safety JPA looks good and we would like to move forward. Can the scope of work include the drafting of a letter that the Mayor can use to advise the surrounding jurisdictions of the data collection and our intent to hold the retreat referenced in the proposal?

We have a standard agreement which I will have our staff forward to you on Monday.

Thanks so much, we look forward to working with you further.

Good afternoon Mayor. Attached is the final proposal from Bob Wasserman. At our request he added the drafting of the letter to the other jurisdictions about the JPA exploration, data collection, and the invitation to attend the next meeting. Per Henry's direction we have given Mr. Wasserman the green light on this and expect to have the draft letter for your review/signature next week.

Strategic Policy Partnership, LLC

Box 577
West Tisbury, MA 02575

April 26 2013

Henry Garcia
City Manager
City of Moreno Valley
14177 Frederick St.
Moreno Valley, CA 92553

Dear Mr. Garcia:

This letter presents a proposal for Phase 1 of a process that will lead to development of a Joint Powers Agreement for the provision of police services to Moreno Valley and those adjacent communities who desire to join in the undertaking. The work described in this proposal is a first step toward preparing for the development of that proposal. We propose to undertake this work in partnership with the Bratton Group, LLC.

As we noted in the discussion last week, we recommended that the work of developing the Joint Powers Agreement should process through two phases. Phase 1, which is the subject of this proposal, focuses on identifying interested partners (communities) in the effort, data collection from those communities agencies related to current services provided for policing, whether by their own police agency or under contract services). The partner identification would follow the hosting of a retreat attended by representatives of the participating agencies as well as representatives of the Riverside County Sheriff's Office.

Following this retreat and identification of the actual partners, Phase II of the work would involve preparation of the policing model under the Joint Powers Agreement that would best provide cost-effective services to these communities, and the cost basis for provision of those services. Phase II work will be somewhat dependent upon the results of the work in Phase I, particularly the information collected for that Phase.

The Overall Strategy

Creating a police force to serve a geographic area broader than just a single city is not a new approach; it has been done in many places around the country. With California having authorized Joint Powers Agreements, that process in California has been made easier. Such an entity serving a larger set of jurisdictions should bring benefits in cost, as back office functions would be shared by all participating agencies served by the new agency.

The challenge in creating a new police agency under a Joint Powers Agreement

is to ensure that policing operations serve the needs of each participating jurisdiction, as each often has its own culture, priorities and local problems that come to the attention of the police agency. Each jurisdiction will expect to have a senior commander who ensures the officers assigned to that jurisdiction are responsive to local expectations. The senior command needs to have flexibility in determining policing strategies and tactics, under general guidelines set forth by the larger agency. Officers need to have stability of assignment so they remain in the jurisdiction to which they are assigned for some time, as they will be expected to become familiar with local residents, businesses and issues of concern.

In designing the new police force under the Joint Powers Agreement, it is important to start with a "blank sheet," not being constrained by what exists presently. Over time, police agencies tend to create specialties that take on a life of their own. If a careful look is taken of the policing needs of the region, an organization can be created that reflects local priorities without the baggage that older agencies carry with them. From this approach, there can be significant cost savings. In some areas, civilians can be used rather than police officers. Some services for the agency can be contracted out. A greater number of officers can be assigned to field policing. There are numerous advantages to developing the new organization from scratch, with the advice and counsel of a team of exerts, as we propose to do in this proposal.

The Proposed Activities

For Phase 1 of the work, we proposed the following activities, starting with data collection on existing structures and costs for police services.

- Draft an invitation letter to surrounding jurisdictions requesting assistance in data collection and announcing a discussion retreat, for the Mayor's signature.

We will draft an invitation letter that can be sent to surrounding jurisdictions requesting their assistance on data collection and announcing the upcoming retreat. The letter will set out the issues we have been exploring and the objectives of the data collection and retreat and potential outcomes. The letter will be drafted for the Mayor's signature and finalized following discussion with the city.

- Collect information from potential partners on their current police services structures (either locally provided as a part of the City Government or provided through contract services.)

We will have Moreno Valley staff provide us with a list of the potential partners,

advising them of the purpose of this data collection effort. The data collected will be placed in a matrix that will allow comparison of each community's structure and related costs for each community's police services.

- Collect information on police service demand in each of the potential partner agencies, to include crime levels, call for service demand and other activity.

This data will provide a picture of he variance in demand among the agencies and permit an analysis of the disparity in demand among the communities. The data will be added ti the matrix described above, thus providing a comprehensive picture of the current state of police demand and police services provided throughout the region. It will identify special functions operating in each of the jurisdictions (such as specialized units for investigations, school resource officers, major crime units, SWAT units, administrative units, etc. This information will be useful in determining the structure to eventually be proposed for the new policing entity to be formed under the Joint Powers Agreement. As a pat of this data collection process, we will interview key management personnel in each of the potential city partners to understand their current perception of the Joint Powers Agreement initiative under consideration.

- Identify current models for join policing arrangements across the country that might serve as models for the projected agency under the Joint Powers Agreement.

There are several jurisdictions in California currently considering Joint Powers Agreements for police service to a variety of jurisdictions. There are also examples from other parts of the country where area law enforcement agencies have been established to provide police service to a number of jurisdictions. We will collect information on those initiatives as examples of initiatives that might provide insight into the best design for Moreno Valley and surrounding Cities.

- Convene the retreat for representatives from interested participating partners to discuss the data and scope out the general framework for a police agency under the Joint Powers Agreement.

Bringing together representatives from these cities for a day's discussion will provide the opportunity to review the findings of the data collection, the priorities set forth by individual city managers, current service demand and levels and areas in which he current overall structure provides duplication that could be eliminated by a joint police department. Members attending would discuss local priorities, perception of shared services, arrangements that could provide accountable leadership for policing in each City and general cost issues. Our team would facilitate the retreat, and provide the City with a proposed agenda

for the retreat well in advance of the session.

- Draft a report reflecting the issues discussed t the retreat and the consensus of the group regarding the basic design of the Joint Powers Agreement.

At the conclusion of the retreat, we will produce a report that reviews the issues discussed and the consensus reached. We would hope to have identified the cities that wish to join in the development of the Joint Powers Agreement, as well as the basic structure of the police service agency to be created, aimed at meting the requirements set forth by the participants at the retreat.

Based upon this report, the City and its partners can consider moving to Part II, the actual development of the Joint Powers Agreement.

The Cost. For all elements above, the cost for fees would be $21,085 plus expenses for travel, lodging, per diem and miscellaneous costs for staff; travel and lodging expenses for traveling to Moreno Valley. It is expected that those fees will not exceed $4,500.

The Timetable for Phase 1

We project that this work can be completed within 35 days from the date a contract is signed with the Strategic Policy Partnership.

The Project Team

Robert Wasserman is the Chairman of the Strategic Policy Partnership, a group that assists police and government agencies with policing strategy development, performance improvement, personnel selection, and utilization of technology and policy development. He serves as Associate Director of the Senior Management Training Program for the Indian Police Service conducted by the United Kingdom's Cambridge University and is a consultant for the Department of Homeland Security on Federal, state and local training initiatives related to combatting violent extremism.

He previously served as a Senior Advisor on International Law Enforcement for the Bureau of International Narcotics and Law Enforcement at the U. S. Department of State where among other initiatives, developed and oversaw implementation of the State Department's International Law Enforcement Academies in Bangkok and Roswell, NM.

He has served as a senior executive in several large American police agencies (Boston, Houston, Dayton) and as Chief of Staff of the White House Office of

National Drug Control Policy, from which he went to Bosnia following the war, serving as both Deputy Commissioner/Operations and Commissioner of the United Nations International Police Task Force where he oversaw the restructuring of that country's police. He has prepared transitions, audits and management studies of numerous American police agencies, most recently for Cincinnati, Ohio and Oakland, California. He has done transitions for a number of police agencies, including the New York City Police Department, the San Francisco Police Department, the Los Angeles Police Department and he Milwaukee, Wisconsin Police Department.

He is the author of "Building Communities of Trust" published by the U. S. Department of Justice Office of Community-Oriented Policing and has developed numerous state of the art practices in American policing, including the recruit training year, the Kansas City Preventive Patrol Study, Beat Profiling, Investigative Solvability Factors and Problem-solving CompStat. He was a convener of the. Executive Sessions on Policing held at the Kennedy School of Government at Harvard University, which created the initial concept of Community Policing.

William J. Bratton is the Principal of The Bratton Group, LLC who has established an international reputation for re-engineering police departments and fighting crime in the 1990s. As Chief of the New York City Transit Police, Boston Police Commissioner, then New York City Police Commissioner, he revitalized morale and cut crime in all three posts, achieving the largest crime declines in New York City's history. At the NYPD, he revitalized and refocused a 35,000-person organization. He led the development of CompStat, the internationally acclaimed command accountability system now in use by police departments nationwide. CompStat revolutionized U.S. policing, employing accurate, real-time intelligence, rapid deployment of resources, innovative tactics, and relentless follow-up to focus the work of commanders, patrol officer, and investigators on stopping crimes before they happen.

From 2002-2009, Mr. Bratton served as Chief of the Los Angeles Police Department. In a city known for its entrenched gang culture and youth violence, he brought crime to historically low levels, with serious crimes down 33 percent and homicides down 41 percent. Using a combination of community outreach, innovative youth programs, and crime fighting driven by CompStat, Mr. Bratton achieved significant success in Los Angeles where gang and youth crime problems had been perceived to by unsolvable. He is the only person to have led the two largest police forces in the United States -the LAPD and the NYPD.

Mr. Bratton is a frequent lecturer, writer, and commentator in the fields of security, counterterrorism, law enforcement and rule of law justice systems. Among numerous awards, Mr. Bratton was named by Security Magazine as one of 2010's most influential people in the security industry was honored by

Governing Magazine as the 2007 Public Official of the Year and was conferred the honorary title of Commander of the Most Excellent Order of the British Empire by Queen Elizabeth II in 2009.

Bernard Melekian has nearly forty years of experience in local law enforcement, including 13 years as the Chief of Police in Pasadena California. He served with the Santa Monica Police Department for 23 years and the Santa Barbara County Sheriff's Office for 1 year. While serving as the Chief of Police in Pasadena, he served six months as the acting Fire Chief and nine months as the acting City Manager. During his career he was awarded the Medal of Valor in 1978 and the Medal of Courage in 1980.

In 2009 Dr. Melekian was selected by Attorney General Eric Holder as the 4th Director of the Office of Community Oriented Policing Services (COPS), US Department of Justice. During that time he received national recognition for his work in focusing federal grant making on the solving of local problems.

Dr. Melekian holds a Bachelor's Degree in American History and a Master's Degree in Public Administration, both from California State University, Northridge. In 2012 he was awarded a Doctorate in Policy, Planning and Development from the University of Southern California for his work on Law Enforcement discipline systems. He is a graduate of the 150th session of the National Academy and Class 20 of the California Command College. He is currently a member of the ongoing Harvard University Executive Session on Policing.

Dr. Melekian served for 3 years in the United States Army and and 25 years in the US Coast Guard reserve. His service with the Coast Guard included two active duty deployments including service in Jubail, Saudi Arabia during Operation Desert Storm in 1991.

He currently resides with his wife Nancy in Santa Barbara California.

The Strategic Policy Partnership, LLC is a Massachusetts-based firm providing managerial assistance to Federal, state and local governments, with a particular emphasis on policing strategy and operations. The firm provides a wide range of services, including agency audits, performance management systems design, executive recruitment and selection, resource allocation analyses, policy development, strategic planning and organizational design, management training and transition coordination. Much of the firm's work focuses on providing assistance to communities and their governments (and police agencies) in addressing challenging situations.

In the area of performance management, the firm has developed CompStat processes in a number of major police agencies, basing each system on the particular characteristics of the community and its police agency. Often these

MV00251285

activities involve business process reviews, identifying ways that organizational objectives can be achieved at less cost and greater impact and efficiency. The firm has also served as a coordinator of the Executive Session on 311 held at Harvard University's Kennedy School of Government, which led to development of performance standards across government for citizen service requests. The firm's Chairman was one of the originators of the 311 concept in American policing and government.

The firm has assisted various government agencies in the recruitment and selection of executives for specialized situations, identifying persons who best fit the agency and its community needs. Most of the firm's recruitment and selection assistance activities are to communities having a particular need to find police executive leadership that can address environments of complexity. The firm does not normally run national recruitment advertising, instead relying on its extensive professional and government contacts to identify those executives who have a demonstrated track record of success in situations similar to those faced by the requesting government, then recruiting suitable candidates who can best meet the community's expectations and requirements. Recent police chief searches have included Hartford, CT, East Haven, CT and South Bend, IN.

Resource allocation and staffing analyses are undertaken for major Town police agencies, with the firm being at the forefront of designing policing work areas reflecting natural community boundaries. In its resource allocation work, the firm involves the police agency but other government agencies, political bodies and the community to ensure that resources are allocated in a manner that provides for equal access to police service by all segments of a community.

Policy development assistance is provided to police agencies on complex issues, such as use of force, racial profiling, police pursuit and policing values. Policy and procedures manuals are developed, often linked to assistance being provided to agencies seeking accreditation, both at the national and state level. The firm is committed to values-based directives, aimed at ensuring police actions and strategies reflect high standards of integrity, community responsiveness, protection of civil liberties and bias-free actions.

Strategic planning and organizational design services include development of plans of action and strategic plans setting forth the organizational mission, values, and strategy for improvement. The firm develops organizational structures for police organizations that best meet the service goals of the agency. The firm also provides services to city school systems in strengthening school security, sometimes by transferring responsibility for school security from schools to police, reflecting a commitment to supporting sound educational policy and constructive intervention into school crime and disorder problems.

Summary. This work is an exciting opportunity for Moreno Valley and its partner cities to develop a cost effective policing model that not only best meets the policing needs and challenges of each community but leverages he potential from a carefully constructed police agency.

We look forward to having the opportunity to with with the City on this important undertaking.

Sincerely,

Robert Wasserman

Subject: FW: Fatal traffic collision with significant road closures - UPDATE

Good morning,

The road closures at Moreno Beach and Bay were lifted this morning about 3:30 AM. It took about 6 hours to process the scene. Alcohol was not a factor in this crash. At this preliminary stage, it appears the driver of the Mercedes did not see the motorcyclist and turned left in front of him, causing the collision.

Subject: Fatal traffic collision with significant road closures

Good evening,

We are working a fatal traffic collision involving three vehicles on Moreno Beach and Bay Avenue. About 9:10 PM, an SUV, a Mercedes, and a motorcycle collided. The 24-year-old male motorcyclist from Moreno Valley sustained major injuries and was transported to RCRMC. A short time later, he succumbed to his injuries. The driver of the Mercedes had a complaint of pain and was also transported to the hospital. It is unknown at this time if any of the drivers was under the influence of alcohol or any other substance.

All lanes of Moreno Beach are closed between Alessandro and Cottonwood while the Traffic Accident Reconstruction Team conducts its investigation. Also, a 200 foot section of Bay Avenue is closed to traffic for the same purpose. The roadway will remain closed for the duration of the investigation. Traffic Recon officers are sensitive to the need to restore traffic flow and will do so as soon as possible. I will update you tomorrow if any new information becomes available.

Joel

> Mr. Owings:
>
> My wife and I recently had a chance to review the DEIR for the WLC. We know that the city needs money badly and that you are looking for funding sources. We wanted to see if we could support the WLC project as a way of finding money. As a way of introduction, we are both long time residents of Moreno Valley and are now retired. We are both trained physicists and have spent our careers in technical and management areas in various industries. We feel that our background allowed us to make an objective and unbiased review of the document. We were trained to think out of the box.
>
> The DEIR is a good document, very well organized and written. The traffic analysis was very detailed. We were especially impressed by the fact that the trip generation rate was peer reviewed in Appendix T.
>
> The WLC will have high cube warehouses; yet to date, there is very little data available for such facilities. They tend to be efficient, require less employees, and may require fewer truck trips per KSF than smaller warehouses. Because there is very little data yet available on high cube warehouses, the DEIR makes some big conclusions on small data samples, contradictory data, or even erroneous data. For example, the trip generation rate of 1.68 was used in the DEIR (ITE edition 9). I agree with the argument in Appendix T that the 2011 NAIOP study makes a good case for the use of the smaller number 0.99 for traffic analysis. The use of the 0.99 number would greatly reduce the estimate of truck trips which would reduce the estimate for the impact of the WLC on traffic density. However, what number should be used for air quality? Because the trucks used in the WLC are primary large diesel trucks, it appears to us that no proper engineering estimate can be made at this time, by anyone, on the impact on air quality for the large number of high cubes at the WLC.

We also reviewed the fiscal and economic analysis in the DEIR. We were unable to duplicate various important parameters in this section of the document, including the number of employees for the WLC, the wage information, and the sales tax revenue received. A detailed review by us indicates that the presented information is suspect and at times is based on wrong source data. (In scientific and engineering circles, data that cannot be verified is suspect).

In addition, the document assumes 100% occupancy from day one and gives the reader the impression that the city income will be $5 million dollars by 2022. Our analysis shows that 100% occupancy by 2022 is very unlikely, even in a positive economic cycle.

The discussion on construction is a self contradictory. For example, the label in Figure 3.19 in the DEIR, seems to indicate that 20 MSF of warehouses will be built by 2017, and another 20 MSF will be built by 2022. The document elsewhere states that an average of 1700 FTEs will be employed to accomplish phases 1 and 2. These two data points give the impression that all 40 MSF will be completed by 2022. However, other sections of the document indicate that the buildings will be customized, i.e. need to have a tenant before they will be built. There appears to be no probable and realistic schedule for building completion and building occupancy. So, when will the warehouses really be built? When will the city benefit fully from the promised construction income?

What is actually built, and when, pertains directly to the construction income to the city and fiscal responsibilities that come to the city when those buildings are completed. These statements may cause civic leaders to assume income from the WLC at an earlier date then can be reasonably expected, without having a clear understanding of the timeline for the city's future responsibilities, such as police protection, and electric utility bills.

There is not enough data for anyone to prepare a realistic cost/benefit analysis of the WLC. More data is needed.

I propose that if you decide to proceed with the WLC, you only modify the General Plan as needed to accommodate Phase 1; that you, as a condition to proceed with phase 1, collect traffic, air quality, economic, and social data during implementation of phase 1; that you obtain and review another EIR before the city agrees to modify the General Plan for Phase 2.

I believe that our findings and conclusions in some of these areas are of definite interest to you before you decide on how to proceed with the WLC and how to modify the General Plan. We would appreciate the chance to meet with you to discuss some of these findings. I have a couple of suggestions that we feel you may be interested in. I want our city to have income to meet our needs, but I question the need to allow Phase 2 to proceed at this time.

Thank you for considering my request.

Sincerely , Hans and Barbara Wolterbeek

Cindy,
Here is the link to the County's CoC page. The Mayor seemed very interested in this type of information. There is a 10 year plan to end homelessness …not sure when it was adopted.

Subject: IMMIGRATION REFORM RESOLUTION PROPOSAL

WHEREAS, *City of MORENO VALLEY* is one of the most diverse communities in America, with recent immigrants from more than 120 countries and foreign-born individuals comprising over (70?) percent of the local population; and

WHEREAS, the diversity of both THE City of MORENO VALLEY and the United States keeps us strong and vibrant, and in an increasingly interconnected world, the diversity of our nation is a powerful advantage in global competition; and

WHEREAS, our broken national immigration system undermines our core national and local interests; and

WHEREAS, our laws should create an unburden some and quick fair pathway for legal status that is fair, effective, and reflective of our values; and

WHEREAS, a Pathway to Citizenship for members of the military, college graduates and other law-abiding immigrants, recognizes that reform is essential to protecting all workers; and

WHEREAS, individuals who entered the United Sates as minor children did not knowingly violate any immigration laws and will have a separate "Path to Citizenship;" and

WHEREAS, other jurisdictions have adopted anti-immigrant policies that create distrust and divisiveness and divert scarce public resources, thus hindering government's delivery of essential services and the performance of its core functions, and

WHEREAS, developing a comprehensive, functioning immigration system is essential to ensuring America's future economic prosperity.

NOW, THEREFORE, BE IT RESOLVED, *by* the City Council of the City of MORENO VALLEY, California, as follows:

We call upon our federal representatives to support comprehensive and non-discriminatory immigration reform in Congress.

We call upon President Obama to follow through on his commitment to grant New Americans a clear pathway to earn citizenship free of unnecessary or burdensome roadblocks and free of "temporary" or "guest" designations.

Subject: FW: Press Adjudication for Moreno Valley

Good afternoon Mayor. Forwarding an update on the newspaper adjudication process from One L.....
--2LLs

From: Michele Patterson
Sent: Wednesday, May 01, 2013 2:34 PM
To: Henry T. Garcia; Michelle Dawson
Subject: Press Adjudication for Moreno Valley

Hi, Providing an update about alternatives to public noticing in the Press Enterprise:

Back in early April, I spoke with Jerry Bluestein of the L.A. Times (their Advertising-Standards Coordinator), who indicated that they are adjudicated in LA City and County. He said they are not working on any new adjudications, citing the extensive time and expense involved.

I also spoke with Margie Miller, the publisher of the Moreno Valley City News, regarding their interest in becoming adjudicated in Moreno Valley. She responded enthusiastically. We've talked a couple times briefly about the process, but she claimed workload to her eyeballs, so I've waited to harass her again. I just scheduled a meeting with her here for next Thursday at 10:30, to talk about promoting Moreno Valley events in their community calendar and she said she'd like to meet Henry and explain adjudication to us both – she said she needs about 5 minutes.

Cathy indicates Henry is available so far – pending confirmation from you.

Cc: Jane Halstead; Juliene Clay; Ewa Lopez
Subject: Spencer Davenport - 909.997.0087 cell or 951.208.4497 home

Mr. Davenport requesting to speak with his Council Member (Mayor Owings). He resides at 17136 Cleveland Bay Way in District 3. He stated that he needs assistance in trying to get his daughter's request for an "inter-district" transfer approved, which was denied. He stated his 11 year-old daughter is a 4.0 student and resides closer to the Lakeside Middle School, which is where she requests to go when she is in 7th grade next year. She currently attends Sierra Vista and would be put in Val Verde. Mr. Davenport is a disabled combat veteran and seeks the help of his Council Member.

I explained to Mr. Davenport that I would send a message to the Council staff, but that he would most likely need to speak to someone at the school district regarding this issue.

Please advise if there is anything he could do or if there is anything the Mayor could do to help assist with this matter.

Thank you,

Office of the Mayor

News Release

Contact: Mayor Tom Owings
951.413.3003

Release date: Immediately

Moreno Valley Mayor to Hold Media Availability on May 8th

Mayor to address media on steps of the Federal Court Building (Riverside) at 9 a.m.

I campaigned for City Council as a reformer, as indicated by the literature I distributed and the public statements I made. After just 146 days in office, and 129 days into my work as Mayor to reform Moreno Valley city government, a search warrant was served at my home as part of a wide ranging investigation by federal enforcement agencies. I welcome this probe, and pledge my full support.

It is my understanding that the Grand Jury will convene on Wednesday, May 8th to begin accepting testimony on this investigation. Although I find it unusual that the Grand Jury has not yet asked for my testimony as Mayor, it is my intent to appear on Wednesday morning to request that they immediately commence their interview with me. I will appear voluntarily, because I am anxious to respond to any and all questions, and to assist the Grand Jury in its important work.

I have not retained a criminal attorney, and do not foresee a time when I'll need one.

Following my testimony, I will promptly make public all information at my disposal, to the full extent permitted by the Grand Jury.

Prompt, thorough disclosure of all information is the only way to move swiftly forward and dedicate my full energies toward addressing the needs of the community...including resolution of critical fiscal challenges, reducing crime and increasing high school graduation rates.

I welcome this opportunity to fight for my City's reputation, and to restore our residents' trust in their City government.

Office of the Mayor

News Release

Contact: Mayor Tom Owings
951.413.3003

Release date: Immediately

Moreno Valley Mayor to Hold Media Availability on May 8th

Mayor to address media on steps of the Federal Court Building (Riverside) at 9 a.m.

I campaigned for City Council as a reformer, as indicated by the literature I distributed and the public statements I made. After just 146 days in office, and 129 days into my work as Mayor to reform Moreno Valley city government, a search warrant was served at my home as part of a wide ranging investigation by federal enforcement agencies. I welcome this probe, and pledge my full support.

It is my understanding that the Grand Jury will convene on Wednesday, May 8th to begin accepting testimony on this investigation. Although I find it unusual that the Grand Jury has not yet asked for my testimony as Mayor, it is my intent to appear on Wednesday morning to request that they immediately commence their interview with me. I will appear voluntarily, because I am anxious to respond to any and all questions, and to assist the Grand Jury in its important work.

I have not retained a criminal attorney, and do not foresee a time when I'll need one.

Following my testimony, I will promptly make public all information at my disposal, to the full extent permitted by the Grand Jury.

Prompt, thorough disclosure of all information is the only way to move swiftly forward and dedicate my full energies toward addressing the needs of the community, including resolution of critical fiscal challenges, reducing crime and increasing high school graduation rates.

I welcome this opportunity to fight for my City's reputation, and to restore our residents' trust in their City government.

Subject: Pastor Lawana Hampton [redacted]

Tom,

Chelsea Pate called on behalf of Lawana Hampton and stated their church, Church of the Heart, would like to be involved with Pastor Mark and the Peace March. She stated their church will be doing something similar in September. She stated their walk will be from Perris and Hemlock to Perris and Krameria. She stated they plan to walk the whole city and have people sign their coalition to respect their neighbors, etc. Ms. Pate stated she will email me their information, and I gave her Pastor Mark's phone number so their church can participate in their Peace March. I will email you Ms. Pate's information once I receive it.

Subject: Henri Rahmon [redacted]

Tom,

Mr. Rahmon resides at 333 West Orange Heights Lane, Corona. Mr. Rahmon stated he has property on Willow, and the APN is 478171010. He stated every year he gets a bill for $1,000 for weed abatement, but he doesn't receive the letters stating he has to abate. In addition, he stated he gets charged for not trimming a tree, but it is actually his neighbor's tree. I will place these issues in two CRMs.

Subject: Invitation - "I Love My City" Peace March 3
Attachments: image.jpeg; I Love My City Peace March 3 LTR.pdf

Dear Pastors:

It is with anticipation that we send this letter to invite you and your congregation to participate in the city-wide *I Love My City Peace March 3* on Saturday, June 8, 2013, that will commence at 12 p.m., on Sunnymead Boulevard at Heacock Street, and will end at Sunnymead Park located on Perris Boulevard and Fir Avenue.

We are asking you to join us in this collaborative effort to promote peace, hope, and unity in our city. Faith-based leaders, such as you, make Moreno Valley a better place for our children and families. *I Love My City Peace March 3* is an occasion to show mutual concern for our city, and it is of utmost importance to have the participation of our churches in this unified effort.

As the plans are underway to make *I Love My City Peace March 3* a memorable event, we encourage you to make every effort to support this worthy cause that will benefit our residents and community. Clearly this is a win-win opportunity to network and present your church to the various organizations, businesses, and people that will be in attendance.

For additional information, please contact Pastor Mark Orellana, Victory Outreach Church of Moreno Valley, at [redacted]

Sincerely,

Tom Owings
Mayor

Subject: Hafsa Ahmed [redacted]

Ms. Ahmed called to ask the Mayor's assistance in securing an immigration visa for a family member that has taken several months. She stated she was told that a letter of support from the Mayor may help to speed up the process.

I spoke with Ignacio Ramirez in Congressman Takano's office, who advised, depending on the country that it generally takes years, not months, to secure a visa; visas are processed by lottery; and a person can check the status of their request on the State Department's website.

I provided Ms. Ahmed with Mr. Ramirez' contact info. As a follow-up, she stated that Mr. Ramirez assisted her with the process.

Thanks,

Cindy

Address:	12931 Cobblestone Ln
Cross Street Info:	
Parcel # (if available):	488122024
	Resolution Information

Jeannette Olko, Electric Utility Division Manager responded on 5/2/2013:

Mr. Black opened an account in September 2009, and was required to pay a deposit of $235.00 at the time the account was established. Mr. Black has been late 7 times in the last 12 months, and has had a 24 hour notice 13 times since the account was opened.

The bill for electric service used from 2/1/13 - 3/1/13 was mailed to Mr. Black on 3/6/13, in the amount of $60.80. Payment was due on 3/22/13. A new bill was mailed to Mr. Black on 4/10/13 for electric service used from 3/1/13 to 4/3/13 in the amount of $66.60 plus arrears of $60.80. The bill mailed on 4/10/13 included an urgent notice advising the customer that the amount of $60.80 must be paid by 4/22/13 to avoid disconnection. An overdue letter was mailed to Mr. Black on 4/12/13 advising that payment of $60.80 must be paid by 5 pm on 4/22/13, the final payment date. The letter also advises "Payments must be received no later than 5:00 pm on the final payment date. Payments after 5:00 pm may not prevent disconnection or the assessment of additional deposit or notification/reconnection charges." Payment was not received by 4/22/13. On 4/23/13 a 24 hour notice was left at the residence advising electric service would be disconnected if payment was not received by 5:00 pm on 4/24/13. Mr. Black called at 7:20 pm on 4/24/13 to make a payment. He was advised he would have to pay the full amount plus an additional deposit. He paid the arrears of $60.80, plus current bill of $66.60, plus a disconnection charge of $30.00, reconnection charge of $30.00, $10.00 for the cost of leaving the 24 hour notice, and an additional deposit of $50.00 for a total of $247.40.

Mr. Black was contacted on 5/2/13, and advised the disconnection and reconnection fees that total $60.00 were waived. He requested an email be sent to him to remind him to pay his bill. He was advised an email notification program is currently being developed. He agreed to create reminders on his calendars around the 15th of each month to pay his bill. He was asked if he would be interested in the 20% discount program that is based on household income. He indicated he would not qualify for the program.

Issue: **Utility Bill**

Council District: 3

City of Moreno Valley

Council Summary

Issue Description: Please investigate on behalf of Mayor Owings, contact Mr. Black, and advise the outcome.

_____

4/24/13 Mr. Black emailed Mayor Owings:

I am Nicholas Black, my address is 12931 Cobblestone lane, Moreno Valley 92555. I am writing you in hopes that you may be able to answer my questions in good faith and honesty. Unfortunately I am under duress due to the Moreno Valley Utility Company. I came to Moreno Valley in hopes it would be a promising place to raise my children, all in all I do not have much complaints about the area i live in, that being said the Moreno Valley Utility Company are horrendous to deal with, to the point I have been considering putting my house up for a "short sale" to get away from it all. I have 4 children and I am the only support my family has, the Moreno Valley Utility Company took a 235.00 deposit from me to begin business.

The problem I have is their latest increase in penalties. If you were late on your bill, the customer would get a $10.00 fine for a door knocker and a $50.00 reconnect fee if not paid in a timely matter. My problem is now the add a $50.00 dollar deposit and raised the door knocker fee to $30.00 dollars and on top of that added another $50.00 reconnect fee for a total of $130.00 added to bill if late. I hope you see where this is going. If a family has a hard time paying the bill how is adding an additional $130.00 to the total going to help? Customer service for the Utility Company says, "it is to defend the cost of service if you are to up and leave",

I have a mortgage for 24 more years and should not be a risk of flight, i can understand if I was renting. I bring this up to you in hopes you may be able to rectify the practices of the Moreno Valley utility company. I do not have a perfect record of paying my bills on time unfortunately, I recently have been in the hospital, due to the fact my wife was having complications with her pregnancy, when I returned home I noticed the dreaded door knocker and meant to pay it before 5:00 p.m. their DEADline. I ended up having to pay $247.40 of which $130.00 was fines. I hope you understand why I see this as piracy! I asked for them to drop the deposit and the reconnect fee, since my service was never disconnected to begin with, which fell upon deaf ears.

I do not have issues with any other utility company and pay my property taxes on time every year. If you are powerless to change the additional fee hikes, i ask if at all possible to have the Moreno Valley Utility Company to issue courtesy calls to there patrons if they are late before the hang the door knockers to avoid punishment. After all if i save some money i spend it in my community which is beneficial for business and Moreno Valley. Please do not make me regret moving to this city, and help make the lives of Moreno Valley citizens more prosperous thank you for your time and I look forward to your response,

Release date: Immediately

Moreno Valley Mayor to Resume Testimony on Wednesday

On Wednesday, May 8th, I appeared voluntarily at the Grand Jury and they graciously accepted my request to be interviewed. My desire to appear was the result of a search warrant which was served at my home as part of a wide ranging investigation by federal enforcement agencies. As I have previously stated, I welcome this probe, and pledge my full support.

I will resume my testimony before the Grand Jury on Wednesday, May 15th at 2:00 P.M. (note corrected time) and, as always, stand ready to respond to any and all questions, and to assist the Grand Jury in its important work.

CITY MANAGER	

Report to City Council

TO: Mayor and City Council

FROM: Barry A. Foster, Community & Economic Development Director

AGENDA DATE: May 22, 2012

TITLE: Public Hearing regarding the expansion of the applications for a General Plan Amendment (PA12-0010), Change of Zone (PA12-0012) and Specific Plan (PA12-013) for the World Logistics Center Project and a recommendation from the City council to include properties not owned by or participating with the Project applicant, Highland Fairview Properties.

RECOMMENDED ACTION

Staff recommends that the City Council conduct the Public Hearing and thereafter direct staff to apply one of the alternatives set forth below pertaining to properties not owned by or participating with Highland Fairview Properties in their applications for a general plan amendment, change of zone and specific plan for the World Logistics Center Project.

BACKGROUND

In April 2011, the City Council adopted a comprehensive Economic Development Action Plan (EDAP) that identified the Moreno Highlands area, generally located east of Redlands Boulevard and south of the Moreno Valley Freeway (Highway 60), as an "area of opportunity for logistics development". The Plan also identified logistics as a prime area of focus and opportunity for the City in an effort to increase employment and revenue to benefit residents and local businesses and support the provision of public services.

On March 19, 2012, Highland Fairview Properties (HFP) submitted General Plan Amendment, Change of Zone and Specific Plan applications to the Planning Division for the proposed World Logistics Center (WLC) Project. The WLC Project is the type of project envisioned by the adopted City Council EDAP and could further the implementation of the EDAP.

The WLC Project applications include land owned or participating with HFP in the WLC Project and a number of properties not owned by or participating with HFP in the WLC Project or the applications. HFP has also submitted Tentative Parcel Map, Annexation and Development Agreement applications for the same project. All land in the last three applications is owned by or participating with HFP. The General Plan Amendment, Change of Zone, Specific Plan and Tentative Parcel Map were deemed to be complete for processing on April 18, 2012.

The proposed World Logistics Center Specific Plan is a master plan for the development of up to 41.6 million square feet of modern high-cube logistics warehouse distribution facilities on approximately 2,665 acres of land located generally east of Redlands Boulevard, south of the Moreno Valley Freeway (Highway 60) and west of Gilman Springs Road. The General Plan Amendment and Change of Zone, which cover approximately 3,820 acres, also include 1,136 acres of open space and 19 acres of existing public utility facilities located south of the Specific Plan area and north of the City limits. The majority of the Project area is currently covered by the Moreno Highlands Specific Plan, a 3,038 acre master plan approved in 1992 with a mixture of residential, commercial, business park and public/recreation uses.

DISCUSSION

The Municipal Code authorizes an amendment to the General Plan to be initiated by any one of three actions: (1) recommendation of the Planning Commission and City Council concurrence; (2) recommendation of the City Council; or (3) a privately filed application for a specific property or properties submitted by the property owner or owner's authorized agent (MC Section 9.02.040). The Municipal Code similarly authorizes an amendment for a change of zone to be initiated by one of three actions: (1) recommendation of staff or the Planning Commission; (2) recommendation of the City Council; or (3) a privately filed application from a property owner or the owner's authorized agent relating to the owner's property (MC Sections 9.02.050). The Municipal Code does not have explicit provisions to include properties not providing authorization for a Specific Plan or similar type of project (MC Section 9.02.190). For such projects, the practice has been to include only properties providing authorization. Therefore, staff is requesting City Council direction as set forth below.

The majority of Specific Plan area is owned by HFP affiliated companies. Authorization has also been provided by the second largest owner in the Specific Plan area, the Henrietta Lee Trust. In addition, a group of owners in the southwest portion of the Specific Plan area and one owner on Theodore Street have provided authorization for the Project.

The approximate 1,155 acres located outside of the Specific Plan area but within the General Plan Amendment and Change of Zone applications are owned by the California Department of Fish and Game, San Diego Gas& Electric and the Southern California

Gas Company. None of these entities have provided authorization for the Project. Attachment 1 provides a map of the ownership and location of the properties identified above in this paragraph.

Approval of the WLC Project would require the elimination of the Moreno Highlands Specific Plan (MoHi) that covers most of the Project area, including all of the area outside of the proposed WLC Specific Plan. The MoHi plan has been covered by a 20-year development agreement negotiated by the original master developer, that until this year precluded action by the City or any single landowner to revise the area's land use or zoning. To eliminate the MoHi plan, the utility and open space outside the proposed WLC Specific Plan need to be included in the General Plan Amendment and Change of Zone applications to provide alternative land use designations compatible with the current use of the property for utility facilities and open space.

Within the Specific Plan area, there are 18 owners (total of 21 parcels) that have not provided authorization for the Project. The largest landowner of these parcels is the Metropolitan Water District of Southern California (MWD) which owns 132 acres, but only uses 18 acres of the property for its Inland Feeder water transmission system. The remaining 114 acres has been determined as surplus by MWD. These parcels total approximately 294 acres or 11% of the Specific Plan area. The majority of the other parcels (13 total parcels) are located northeast of Theodore Street and Dracaea Avenue; three parcels are northeast of Redlands Boulevard and Dracaea Avenue; three parcels are northwest of Theodore Street and Alessandro Boulevard; and two are northeast of Cactus Avenue and Merwin Street. All of these properties are located outside of the MoHi plan area. Some of the parcels are developed with single family homes and accessory structures. Others have agricultural activities or are vacant. Only seven existing residential units are located within the boundaries of the proposed WLC Specific Plan, with four being owner-occupied and three rental properties.

The non-participating parcels identified in the above paragraph are either located adjacent to the primary truck access route for the proposed WLC Specific Plan (Theodore Street) or are surrounded on three or more sides by participating properties. All but three of the properties are currently zoned for residential uses, which would be incompatible in close proximity or surrounded by the proposed development of logistics uses. Therefore, it would further advance a consistent and comprehensive planning strategy to include these parcels in the General Plan Amendment and Change of Zone applications in order to identify new more appropriate land use designations for consideration in conjunction with the overall WLC Project. Inclusion in the Specific Plan application will allow for greater design consistency in property development and simplify the development review process should properties in and out of the Specific Plan be combined. Any existing structures or uses would become non-conforming with approval of any land use changes and would be allowed to remain in place unless abandoned for an extended period of time (currently one year per the City Municipal Code).

The initial draft of the Specific Plan includes two land use categories – Logistics and Light Logistics as well as more stringent non-conforming standards. The former category is generally limited to large logistics facilities. The latter category is intended to include properties that are too small to accommodate large logistics facilities. Staff has worked with the applicant to expand the list of permitted uses in the Light Logistics category to include thirteen possible uses for warehouse, storage and similar activities (see attached Exhibit 3). Most of these uses are consistent with the permitted uses in the Moreno Valley Industrial Area Specific Plan in the south part of the City.

ALTERNATIVES

Staff is seeking direction from the City Council as to which of the following options should be followed in processing the WLC Project applications:

1. Include all properties not providing authorization in all three applications. This action is a recommendation by the City Council to include all properties not providing authorization to be included in all three applications. This action would provide for the development of consistent land uses and development regulations for the area east of Redlands Boulevard. If adopted, such land uses and regulations would change and make most existing property improvements non-conforming.
2. Include all properties not providing authorization in the General Plan and Change of Zone applications, but not the Specific Plan application. This action would be a recommendation by the City Council to include all properties not providing authorization to be included in the applications for a General Plan Amendment and Change of Zone. This action would provide for the development of consistent land uses for the area east of Redlands Boulevard, but would allow for non-participating parcels to default to existing City zoning classifications that provide a greater variety of uses which may be incompatible with the logistics focus proposed for the area. If adopted, such land uses and regulations would change property owners and make most existing property improvements non-conforming.
3. Include some of the properties in one or more of the applications. This action is a recommendation by the City council to include certain of the properties not providing authorization to be included in one or more of the applications. This action would not provide for the development of consistent land uses for the area east of Redlands Boulevard. If the Specific Plan is adopted, such inconsistent land uses would affect the current property rights and expectations of non-participating property owners by increasing the level of review and regulation to provide consistency, but would not make existing property improvements non-conforming. This action would also increase the level of review and regulation to provide consistency for development within the Specific Plan.

FISCAL IMPACT

All direct costs associated with the processing of the WLC Project applications shall be borne by HFP.

NOTIFICATION

Notice of this Public Hearing was sent to all property owners within the WLC Project area and tracts and properties adjacent to the Project area. Notice of the Hearing was also published in the Press Enterprise on April 27, 2012, and posted in proximity to properties located within the Project area that did not provide authorization for the WLC Project applications.

Executive Summary

This report lays out the economic impact that the development and operation of the World Logistics Center (WLC) will have on Moreno Valley and the broader Riverside County area. Because the facility is designed to include more than 41 million square feet of advanced logistics space, the construction and equipping of the WTC will generate a sizable impact on the economy during the development phase. However, the city and county will also experience an ongoing economic impact due to the operations housed within this facility once development has been completed. Overall, this project will add significant economic value to the region.

\textbf{\underline{Construction, Tenant Improvements, and Equipment}}

- \item Constructing and equipping the WLC will generate between 46,138 and 59,018 jobs in Moreno Valley.
- \item This activity will stimulate between \$2.2 and \$2.9 billion in additional earnings within Moreno Valley.
- \item Overall economic output will increase between \$5.8 and \$7.8 billion as a result of construction and equipping the WLC.

\textbf{\underline{Ongoing Operations}}

- \item Ongoing operations at the WLC are expected to support between 22,645 and 32,201 positions each year.
- \item Associated annual earnings will reach between \$1.2 and \$1.3 billion per year.
- \item Annual economic output is expected to increase by \$2.3 to \$2.4 billion per year.

World Logistics Center Summary of Total Economic Impact

Overall, both the development and the subsequent ongoing operation of the World Logistics Center in Moreno Valley are expected to have a very strong economic impact on the city's economy. In addition to assessing the regional economic impact, Beacon Economics has analyzed the basic profile of logistics workers in California and in Inland Southern California. Overall, the quality and quantity of logistics jobs are improving. The World Logistics Center will help to create opportunity for workers in the region, offering a variety of well-paying jobs\textemdash many of which (roughly 48\%) will involve non-logistics occupations in the business and financial side of the operation, providing solid wages and opportunities for future growth. In addition, the creation of local jobs will enable Moreno Valley to take advantage of the significant skill sets of residents in the region who currently have to commute to the coastal areas for work each day.

Report and Project Overview

In this report, Beacon Economics estimates the potential economic impact of the development and eventual operation of the World Logistics Center (WLC) on the City of Moreno Valley and the broader region of Riverside County. According to the World Logistics Center Specific Plan, the WLC is a master-planned industrial development in Rancho Belago\textemdash the eastern portion of Moreno Valley.

This 41.6-million-square-foot facility will cover roughly 2,710 acres and is designed to attract large international companies and domestic corporations. In addition, a key tenet of the proposed development is that it be developed in an environmentally responsible way that conforms to California's CALGreen regulations, which will ensure the conservation of natural resources and the reduction of greenhouse gases, energy consumption, and water use. In fact, the WLC will go even further than this in its environmental efforts, drawing on a variety of other sustainable measures, including maximizing the efficiency of landscape irrigation, using solar equipment, and supporting alternative fuels like natural gas.

To put the scale of this proposed project into context, consider that Moreno Valley is currently home to the Sketchers distribution facility. This 1.82-million-square-foot facility was recently certified as the nation's largest LEED Gold-certified building by the U.S. Green Building Council.\footnote{BusinessWire.Com, "SKECHERS Distribution Center Certified as Largest LEED Gold Building in the United States," February 19, 2013.} As large as this facility is, it pales in comparison to the proposed World Logistics Center, which will be more than 22 times larger, at 41.6 million square feet.

Artist's Rendering of the World Logistics Center

To estimate the economic impact of the World Logistics Center on Moreno Valley and on Riverside County overall, Beacon Economics used Version 3 of the IMPLAN modeling system. This is an input-output model that can be used to estimate the short-run impact of changes in the economy through the use of multiplier analysis.

Impact studies operate under the basic assumption that any increase in spending has three effects: First, there is a direct effect on that industry itself, resulting from the additional output of goods or services. In the case of the WLC, this represents the direct purchase of goods and services associated with building and fitting the space for operation. Once construction is completed, the direct effects consist of the workers who will be hired to work at WLC and the direct operations by WLC's tenants.

Second, there is a chain of indirect effects on all the industries whose outputs are used by the logistics industry and the impacts generated by a business's supply chain. For example, in order to build the facility, the construction teams will need to purchase building materials and supplies, such as steel, timber, and concrete, as well as specialized design and engineering services. From an operational standpoint, tenants of WLC will need to purchase housekeeping and maintenance services, accounting/payroll services, and other inputs to the production process, such as utilities and supplies. These indirect impacts boost output and employment at the companies in the local economy who provide these inputs to the production process.

Third, there are induced effects that arise when employment increases and household spending patterns are expanded. These effects follow from the additional income that is earned in the course of producing this output, both by employees at WLC and in those companies supplying inputs to WLC. For example, the maintenance crew for WLC will need to bring on additional workers to service the center. These workers will earn wages for this effort and, to the extent that they reside within the local or regional economy, they will spend this income on goods and services, like rent, automobiles, clothes, and dining out, among others. This creates additional demand and employment opportunities within Moreno Valley and Riverside County as a result of the earnings associated with the WLC.

It is important to note that capital investments made on different types of projects can lead to different multipliers. Why? A sector can have a large multiplier effect if it induces economic activity in industries whose employees have a high propensity to spend from take-home pay. Also, if the sector does not import many materials from abroad or from out of state, then its multiplier effect on the local economy will be high. In essence, some of the spending in the local economy may “leak out” into other counties and states. If raw materials are imported, then a change in a local sector's level of production will result in a commensurate change in economic activity outside the study area.

Our analysis uses input-output accounts and is based on three important assumptions. First, there are constant returns to scale. This means that a 10\% cut in spending will be ten times as severe\textemdash across every sector in the economy\textemdash as a 1\% cut. Second, there are no supply constraints. This means that any marginal increase in output can be produced without having to worry about bottlenecks in labor markets, commodity markets, or necessary imports. This assumption is quite realistic in a free-market economy like California's where there is some unemployment. It is even more reasonable in times of high unemployment, such as the present economic environment, because there are many under- and un-utilized resources that can be activated without detracting from other industries or businesses. Third, the flow of commodities between industries is fixed. This means that it is not possible to substitute in the short-run the many different inputs that go into the target industry.

Thus, our analysis here covers the four main areas of economic impact that will accrue on a local and regional level due to the development, equipping, and operation of the World Logistics Center in Moreno Valley. We estimate the direct employment, output, and value-added effects after accounting for leakage out of the region. Second, we estimate the indirect effects on all the industries whose outputs are used by the proposed investments and the induced effects arising when employment increases and household spending patterns are expanded.

Economic Impact of Construction

Beacon Economics has modeled the economic impact of the World Logistics Center on Moreno Valley and Riverside County by breaking down the effects into three distinct categories: construction, tenant improvements and equipment purchases, and the ongoing operations of the facility once the development is completed.

In order to provide estimates of the economic impact of the construction of the World Logistics Center, Beacon Economics relied upon data from the developer, Highland Fairview, on the construction costs of other logistics centers it has built within the region. Because this project is still in the planning stages, final construction and improvement budgets have yet to be finalized. Thus, Beacon Economics presents two scenarios for the total economic impact of construction.

Blueprint_Glasses.jpg

One scenario assumes that the WLC will be a highly automated, capital-intensive facility; that is, it will be one of the next-generation logistics centers, similar to the recently developed Sketchers facility. These types of operations use fewer workers for each square foot of space relative to traditional logistics centers, relying more heavily on industrial machinery, computers, and other technology products to deliver services more efficiently. In our second scenario, we assume a more traditional mode of operation\textemdash one that is more labor-intensive than its high-technology counterpart.

By presenting a range of potential effects, Beacon Economics hopes to present a more realistic picture of the economic impact of the construction of the WLC on the local and regional economy. The realization of the WLC will likely fall somewhere in between these two scenarios, as the facility will likely contain a mix of both high-tech and traditional logistics operations.

Table 1: WLC Construction Cost Estimates

Our analysis shows that similar recently constructed logistics centers within the local economy have incurred an average expenditure of \$70 to \$85 per square foot of completed space. The range in cost varies according to how advanced the proposed operations and uses of the facility are and how many "green" features the center has, in addition to depending on a number of other characteristics that potentially raise the cost of construction from a base level of \$70 per square foot. Using these estimates for the upper and lower bounds of construction costs, Beacon Economics estimates that the construction of the WLC in Moreno Valley will cost between \$2.91 and \$3.54 billion, based upon 41.6 million square feet of completed logistics space.

These costs represent the direct impact of the construction of WLC on the local and regional economy. However, as noted, the total economic impact is much larger than this due to the ripple effects (the indirect and induced impacts) that will accrue to Moreno Valley and the broader region as a result of this construction spending. These results, which are detailed herein, are dependent on whether a high-tech or traditional manufacturing operation is put into place.

\textbf{\underline{High-Tech Logistics Operation}}

Under a high-tech scenario, the development itself is expected to create more than 36,000 construction jobs during the building phase. However, due to increased demand for inputs, as well as additional earnings by construction workers and the staff of suppliers, the Moreno Valley economy will enjoy an additional 9,600 jobs created through the indirect and induced effects of the construction spending. In total, the construction phase of the project is expected to create nearly 46,000 jobs within the city throughout the life of construction. In addition, our analysis shows that the economic impact will extend to firms and individuals in the broader region, with the county benefiting from an additional 6,000 jobs that will be stimulated outside the Moreno Valley city limits but within Riverside County. Thus, the region as a whole can expect roughly 52,000 jobs as a result of the construction and development of the World Logistics Center.

It is important to point out that although the increase in employment is a significant benefit of this project, other local benefits are sizable as well. For example, Beacon Economics estimates that the City of Moreno Valley will experience a \$1.2 billion increase in overall economic output (the value of all goods and services produced within the local economy) above and beyond the \$3.54 billion in direct construction costs. This represents a significant increase in demand for goods and services throughout the local economy, and it will provide a big boost to the city's businesses. Moreover, an additional \$800 million in output will be stimulated throughout the rest of Riverside County, bringing the total increase in output attributable to the construction of the WLC to \$5.54 billion\textemdash a very large number for the local economy relative to the overall economic base.

Table 2: WLC Construction Impact: High-Tech Scenario

Much of these increases in output are driven by indirect and induced effects that occur due to increased incomes within the city and county. In fact, Beacon Economics estimates that household income will increase by more than \$2.2 billion within Moreno Valley as a result of construction, with an additional \$231 million being paid out to Riverside County residents who don't live in Moreno Valley specifically. Finally, due to this spending, the state and local economies will enjoy a fiscal bump to the tune of more than \$242 million from a variety of tax sources, including payroll, business, sales, and corporate taxes.

\textbf{\underline{Traditional Logistics Operation}}

Even under the assumption that the WLC will more closely resemble a traditional logistics operation, the economic impact is very large. Although the effects are smaller than under the high-tech scenario, the development of the WLC is expected to create more than 29,000 construction jobs during the life of the building phase. The Moreno Valley economy will enjoy an additional 7,900 jobs created through the indirect and induced effects of the construction spending. In total, the construction phase of the project is expected to create nearly 38,000 jobs within the city throughout the life of construction. As in the high-tech scenario, our analysis shows that the economic impact will extend to the broader region, which will benefit from an additional 5,000 jobs created outside the Moreno Valley city limits but within Riverside County. Thus, the region as a whole can expect roughly 42,700 jobs as a result of the construction and development of the World Logistics Center, even if it is developed as a less high-tech and more traditional building.

Beacon Economics estimates that the City of Moreno Valley will experience a \$970 million increase in overall economic output above and beyond the \$2.91 billion in direct construction costs. An additional \$677 million in output will be stimulated throughout the rest of Riverside County, bringing the total increase in output attributable to the construction of the WLC to \$4.56 billion if the facility is developed as a traditional logistics operation rather than a high-tech logistics center. Beacon Economics estimates that household income will increase by more than \$1.8 billion within Moreno Valley as a result of construction, with an additional \$190 million being paid out to Riverside County residents who don't live in Moreno Valley specifically. Due to this spending, state and local economies will enjoy a fiscal bump of roughly \$199 million from a variety of tax sources, including payroll, business, sales, and corporate taxes.

Table 3: WLC Construction Impact: Traditional Logistics Scenario

Under either scenario, the construction and development of the World Logistics Center in Moreno Valley will provide a significant economic boost for the City of Moreno Valley and for Riverside County. Not only will this project provide some much-needed construction jobs (one of the hardest hit sectors during the recent Great Recession), but it will also boost local incomes, provide substantial demand for goods and services throughout the local economy, and help to sustain state and local government budgets by generating additional tax revenue. Even if the WLC is developed as a less-sophisticated operation (a scenario that is unlikely given the demand considerations and the trends toward automation in the logistics industry), Moreno Valley will still enjoy significant benefits as a result of the construction of the World Logistics Center.

Economic Impact of Improvements and Equipment

Inside a High-Tech Logistics Facility

Table 4: WLC Tenant Improvement and Equipment Cost Estimates

Building the World Logistics Center will lead to a one-time boost to the local economy during the construction phase, but Moreno Valley and the County of Riverside will also experience a sizable boost in the local economy due to specific tenant improvements (TI) and equipment purchases. Relying again on data from previous logistics centers built by the developer in the regional economy, Beacon Economics estimates that the cost of these improvements and equipment purchases will range from \$35 to \$55 per square foot, depending on the level of technology and the specific equipment purchased. For the purposes of this analysis, Beacon Economics uses a figure of \$55 per square foot for the cost of tenant improvements and equipment purchases under the high-tech scenario, and a figure of \$35 per square foot for the cost of improvements and purchases in a more traditional logistics operation. Based upon a completed space that will occupy 41.6 million square feet, the total cost of these improvements and equipment purchases will range from \$2.29 to \$1.46 billion.

These costs represent the direct impact of the tenant improvements and equipment purchases at WLC on the local and regional economy. The total economic impact is again much larger than this due to the ripple effects that will accrue to Moreno Valley and the broader Riverside County region as a result of

these expenditures. These results, which are detailed below, are dependent on whether a high-tech or traditional manufacturing operation is put into place.

\textbf{\underline{High-Tech Logistics Operation}}

Under a high-tech scenario, the cost of tenant improvements and equipment purchases are expected to create more than 7,600 jobs. However, due to increased demand for inputs, as well as additional earnings per worker, the Moreno Valley economy will enjoy an additional 5,500 jobs created through the indirect and induced effects of the tenant improvements and equipment purchases. In total, these additional expenditures are expected to create nearly 13,100 jobs within the city. In addition, our analysis shows that the economic impact will extend throughout the region\textemdash the county will benefit from an additional 2,750 jobs that will be created outside the Moreno Valley city limits, accruing to firms and individuals within Riverside County. Thus, the region as a whole can expect to see almost 16,000 jobs as a result of the construction and development of the World Logistics Center.

In addition to an increase in the number of jobs, the other local benefits will be sizable as well. Beacon Economics estimates that the City of Moreno Valley will experience a \$760 million increase in overall economic output above and beyond the \$2.29 billion in direct costs for TI and equipment. This represents a significant increase in demand for goods and services throughout the local economy and will provide a boost to the city's businesses. Moreover, an additional \$455 million in output will be stimulated throughout the rest of Riverside County, bringing the total increase in output attributable to the purchase of equipment and costs of TI at WLC to \$3.50 billion\textemdash a very large number for the local economy relative to the overall economic base.

Table 5: WLC TI and Equipment Impact: High-Tech Scenario

Much of these increases in output are driven by the indirect and induced effects that occur due to increased incomes within the city and county. In fact, Beacon Economics estimates that household income will increase by more than \$660 million within Moreno Valley as a result of tenant improvements and equipment purchases, with an additional \$114 million being paid out to Riverside County residents who don't live in Moreno Valley specifically. Finally, because of this spending, the state and local economies will enjoy a fiscal bump to the tune of more than \$117 million, coming from a variety of tax sources, including payroll, business, sales, and corporate taxes.

\textbf{\underline{Traditional Logistics Operation}}

Even under the assumption that the World Logistics Center will more closely resemble a traditional logistics operation, the economic impact of tenant improvements and equipment purchases is very large. Although the effects will be smaller than under the high-tech scenario, these expenditures at WLC are expected to create more than 4,800 jobs during the life of the building phase. The Moreno Valley economy will enjoy an additional 3,500 jobs created through indirect and induced effects of these tenant improvements and equipment purchases. In total, these expenditures are expected to create nearly 8,400 jobs within the city. As in the high-tech scenario, our analysis shows that the economic impact will extend to the broader region, with the county benefiting from an additional 1,750 jobs that

will be created outside the Moreno Valley city limits but within Riverside County. Thus, the region as a whole can expect to see roughly 10,150 jobs as a result of tenant improvements and equipment purchases at the World Logistics Center\textemdash even from tenants with a more traditional mode of logistics operation than their more automated peers.

Beacon Economics estimates that the City of Moreno Valley will experience a \$480 million increase in overall economic output above and beyond the \$1.46 billion in direct tenant improvement and equipment costs. An additional \$289 million in output will be stimulated throughout the rest of Riverside County, bringing the total increase in output attributable to tenant improvements and equipment purchases at WLC to \$2.23 billion if the facility is developed as a traditional logistics operation rather than a high-tech logistics center. Beacon Economics estimates that household income will increase by more than \$493 million within Moreno Valley in connection with these expenditures, with an additional \$73 million being paid out to Riverside County residents who don't live in Moreno Valley specifically. Due to this spending, state and local economies will enjoy a fiscal bump of roughly \$75 million from a variety of tax sources, including payroll, business, sales, and corporate taxes.

Table 6: WLC TI and Equipment Impact: Traditional Logistics Scenario

Under either scenario, the cost of tenant improvements and equipment purchases at the WLC in Moreno Valley will provide a significant economic boost for the city and for Riverside County. This spending will provide substantial demand for goods and services throughout the local economy, boosting local incomes and helping to sustain state and local government budgets by generating additional tax revenue. Even if the WLC is developed as a less-sophisticated operation, Moreno Valley will still enjoy significant benefits as a result of tenant improvements and equipment purchases at the World Logistics Center. Importantly, these impacts are in addition to the sizable one-time benefits accruing to the city as a result of the construction of the WLC, thereby compounding the economic impact even further.

Economic Impact of Ongoing Operations

In addition to benefiting from the large, one-time bumps in economic activity associated with the construction and outfitting of the World Logistics Center, both Moreno Valley and the broader Riverside County region can expect to enjoy an ongoing economic impact as the facility comes online and is occupied by future tenants. For this portion of the economic analysis, Beacon Economics created both a high-tech scenario and a traditional logistics center scenario for the purposes of generating a range of likely economic effects.

Artist's Rendering of the World Logistics Center Interior

In order to generate these scenarios, Beacon Economics relied upon information regarding the size and employment levels of a variety of logistics centers around the Inland Southern California region. Based upon this analysis, Beacon Economics has concluded that higher-tech operations, which rely much more heavily on automation, industrial equipment, and computers for their operations, are much less space-intensive. In other words, these high-tech logistics operations actually employ fewer workers for each

square foot of space relative to their traditional counterparts. For example, some of the newer, more sophisticated operations average roughly 2,600 square feet for each employed worker. In contrast, more traditional logistics centers are much more labor intensive: employing one worker for every 1,635 square feet of available space.

Using these respective estimates for high-tech and traditional operations, Beacon Economics has determined that the completed WLC facility will house between 16,000 and 25,448 workers once it reaches full occupancy. Armed with this information, we can determine the cost of operation under both scenarios.

According to California's Employment Development Department, employees in the Transportation/Warehousing sector in Inland Southern California earn roughly \$42,000 per worker, on average. Given that the high-technology operation will be much more capital intensive, and thus require more skilled labor, we have assumed an annual average wage for a high-tech operation to equal roughly \$60,000 per worker. In contrast, a more traditional operation, which relies less heavily on skilled labor, is expected to pay an average wage of \$40,000 per year\textemdash closer to the industry-wide average observed across the region.

In addition to labor costs, tenants of the WLC will incur various other operational expenses. Using information from the U.S. Bureau of Economic Analysis, Beacon Economics derived estimates of the external (non-labor) costs associated with the logistics industry on a per worker basis. Here, we utilized several pieces of information. First, gross domestic product (GDP) for the logistics industry was obtained. This figure reflects the value of all services provided by this sector between 1990 and 2011. From this, we subtracted the value added (the value of production less the cost of intermediate inputs and other costs) attributable to logistics. The net result of this figure represents the sum-total of external costs associated with the logistics industry. Finally, by dividing the total external costs by the number of logistics workers in each year, we arrived at an external cost per worker.

Table 7: WLC Annual Operating Cost Estimates

In 2011, the average external expenditure per employee in the logistics industry equaled roughly \$29,800 per year. In our high-tech scenario, this figure was adjusted upward to \$39,800 to reflect the purchase of additional external equipment, supplies, and services above and beyond labor due to the capital-intensive nature of their production process. For a more traditional logistics operation, Beacon Economics has assumed that the operational costs will be similar to cost structures in the logistics space prior to the influx of high-tech processes after adjusting for inflation. In 1990, the logistics industry spent roughly \$11,200 per worker on external expenditures. In 2011 terms, that equates to roughly \$19,275 per worker\textemdash slightly below the industry-wide average and reflecting a less sophisticated operation overall.

Combining both the labor costs and external costs under each scenario yields the annual direct impact of operations on the City of Moreno Valley. Based upon a 41.6-million-square-foot facility, total operational costs will reach nearly \$1.6 billion per year at a high-tech incarnation of WLC, while annual operations will total roughly \$1.5 billion at a more traditional type of logistics facility.

Based on these estimates, Beacon Economics has calculated the economic impact of the operation of the World Logistics Center once it reaches full capacity. As with our estimates for construction and TI/equipment purchases, we have presented a range of likely economic effects accruing to the City of Moreno Valley and to Riverside County, depending on whether the WLC is fully realized as a high-tech logistics center or whether it resembles a more traditional logistics operation.

\textbf{\underline{High-Tech Logistics Operation}}

Under a high-tech scenario, the ongoing operations of tenants at WLC are expected to support more than 16,000 jobs. However, due to increased demand for inputs, as well as additional earnings per worker, the Moreno Valley economy will enjoy an additional 6,650 jobs both created and supported annually through the indirect and induced effects of the ongoing operations. In total, these operational expenditures are expected to support 22,645 jobs within the city each year. In addition, our analysis shows that the economic impact will extend throughout Riverside County, with the broader region benefiting from an additional 2,750 jobs that will be supported outside the Moreno Valley city limits. Thus, the region as a whole can expect over 25,000 jobs to be supported each year as a result of the annual operations of the World Logistics Center.

In addition to the increase in the number of jobs, the increases in other local benefits will be sizable. Beacon Economics estimates that the City of Moreno Valley will experience an almost \$775 million increase in overall economic output above and beyond the \$1.6 billion in direct operational costs. This represents a significant increase in demand for goods and services throughout the local economy and will provide a boost to the city's businesses. Moreover, an additional \$360 million in output will be stimulated throughout the rest of Riverside County, bringing the total output attributable to the ongoing operations at WLC to \$2.73 billion\textemdash a very large number for the local economy relative to the overall economic base.

Table 8: WLC Annual Operating Impact: High-Tech Scenario

Again, much of these increases in output will be driven by the indirect and induced effects that will occur due to increased incomes within the city and county. In fact, Beacon Economics estimates that household income will increase by more than \$1.2 billion within Moreno Valley as a result of the ongoing operations at WLC, with an additional \$100 million being paid out to Riverside County residents who don't live in Moreno Valley specifically. Finally, the state and local economies will enjoy a fiscal bump due to this spending to the tune of more than \$140 million, stemming from a variety of tax sources, including payroll, business, sales, and corporate taxes.

\textbf{\underline{Traditional Logistics Operation}}

If one assumes that the WLC will more closely resemble a traditional logistics operation, the economic impact of the ongoing operations remains substantial. Given that the operation will be much more labor intensive than under a high-tech scenario, the operational expenditures at the WLC under this scenario are expected to sustain more than 25,500 jobs each year, as more workers are required to do the work if the center is using more limited automation technology. Under this scenario, the Moreno Valley

economy will enjoy an additional 6,700 jobs, owing to the indirect and induced effects of ongoing operations. In total, these expenditures are expected to create nearly 32,200 jobs within the city\textemdash a sizable increase over the high-tech scenario due to the larger number of direct jobs employed at WLC in the low-tech scenario. As in the high-tech scenario, our analysis shows that the economic impact will extend to the broader region, which will benefit from an additional 2,775 jobs created outside the Moreno Valley city limits but within Riverside County. Thus, the region as a whole can expect to support almost 35,000 jobs each year as a result of ongoing operations at the World Logistics Center\textemdash even under the assumption that a traditional form of logistics will dominate the facility.

Beacon Economics estimates that the City of Moreno Valley will experience a \$785 million increase in overall economic output above and beyond the \$1.52 billion in direct operational costs. An additional \$368 million in output will be stimulated throughout the rest of Riverside County, bringing the total increase in output attributable to ongoing operations at the World Logistics Center to \$2.7 billion if the facility is developed as a traditional logistics operation rather than a high-tech logistics center. Beacon Economics estimates that household income will increase by more than \$1.27 billion within Moreno Valley in connection with these expenditures, with an additional \$102 million being paid out to Riverside County residents who don't live in Moreno Valley specifically. As a result of this spending, state and local economies will enjoy a fiscal bump of roughly \$143 million, received from a variety of tax sources, including payroll, business, sales, and corporate taxes.

Table 9: WLC Annual Operating Impact: Traditional Logistics Scenario

Under either scenario, the ongoing operations at WLC in Moreno Valley will provide a significant economic boost for the city and for Riverside County. Like the spending on equipment, this ongoing spending will provide substantial demand for goods and services throughout the local economy, boosting local incomes and helping to sustain state and local government budgets through additional tax revenue. Even if the WLC is developed as a less sophisticated operation, Moreno Valley will still enjoy significant benefits each year as a result of ongoing operations at the World Logistics Center. These are impacts that will be sustained into the foreseeable future, which is an important point given that the effects presented up to this point have largely consisted of one-time surges in economic activity.

Total Economic Impacts

Overall, through both the construction and outfitting of the World Logistics Center, as well as through the ongoing operations of the facility, the City of Moreno Valley stands to benefit substantially from this project. As noted herein, the WLC will be more than 22 times larger than the largest comparable property in the region, with more than 41 million square feet of logistics space. Beacon Economics has conducted an economic impact analysis and has found that there will be a significant one-time boost to the local economy as the facility is constructed and fitted with industrial equipment. In addition, the local economy will enjoy ongoing effects as a result of the routine operations of the World Logistics Center, with benefits continuing into the foreseeable future.

If the WLC is built as a high-tech logistics center, such as those recently constructed within the region, the facility itself will rely on fewer direct jobs than a facility housing a more traditional operation. However, the high-tech facility will generate more economic output in the region due in large part to the fact that the quality of the jobs in this scenario (as measured by wages) is expected to be significantly higher than the quality of jobs at a more labor-intensive facility. In addition, the high-tech facility will help to stimulate the local and regional economies through a greater volume of expenditures on advanced industrial equipment, computers, and other technology products. The overall economic impact of the high-tech version of the WLC is presented in Table 10.

Table 10: WLC Total Economic Impact: High-Tech Scenario

Assuming that the World Logistics Center takes on a more conventional form once completed, the overall economic impact of the construction process, the TI/equipment purchases, and the ongoing operations is expected to be smaller than under a high-tech scenario. However, the economic impact on the City of Moreno Valley remains significant, as shown in Table 11. There will be a larger number of direct jobs created because the operations at WLC will require more labor as a result of a lower-tech process. However, employment, output, earnings, and tax revenues are expected to be substantial in either scenario. Ultimately, this project will have a large positive impact on the City of Moreno Valley and the broader area of Riverside County. Initially, this will consist of a significant upfront investment, followed by a continued boost from ongoing operations at what will be the largest advanced logistics facility of its kind.

Table 11: WLC Total Economic Impact: Traditional Logistics Scenario

Logistics Workers: Employment and Demographics

BEA1.pdf

BEA2.pdf

BLS1.pdf

The logistics industry has undergone significant changes over the past few decades. In the past, the logistics industry consisted of primarily labor-intensive operations. Since the advent of the modern computer, the advancements in software and robotics, and the increase in the sophistication of industrial equipment, logistics has become increasingly capital-intensive with automated operations. And, while the new logistics centers, such as the one envisioned here, may not provide the same quantity of direct-jobs for every square foot of occupied space as they did in the past, the quality of those jobs (as reflected by productivity, wages, and levels of educational attainment) has increased significantly.

First, we will consider productivity, which measures the value of all goods and/or services produced by each individual worker within an industry. By 2010 (the most recent metropolitan real GDP figures available), the value of all output produced by the Warehousing/Storage sector within the Inland

Southern California region was more than three times larger than it was even a decade ago after adjusting for inflation. Unsurprisingly, this surge in output has also led to a large increase in employment within the region. Specifically, warehousing and storage operations have grown from roughly 6,000 positions in 2001 to more than 17,500 jobs in 2010, according to estimates from the Quarterly Census of Employment and Wages (QCEW). And, with growth at the Ports of Los Angeles and Long Beach playing a key role in the region's economic recovery, employment in this sector has expanded by even more over the past two years.

In fact, data through the second quarter of 2012 show that employment in this sector within the Inland Southern California region has expanded even further, to nearly 20,400 jobs. More important, not only is the number of jobs increasing but so too is the share of this industry within the overall economy. For example, in 1990 warehousing and storage facilities represented just 0.2\% of private-sector employment within the region. By 2012, that share had increased to over 2\% of all private-sector jobs, thanks in large part to an explosion of this industry during the middle part of the last decade. Thus, not only is the level of employment within this industry growing, but this sector is also becoming increasingly concentrated within the regional economy.

Still, despite this surge in employment, real productivity has continued to rise\textemdash meaning that workers continue to become more productive. On average, each logistics worker in the Inland Southern California region generated roughly \$53,000 of real (inflation-adjusted) output back in 2001. By 2010, the average output per logistics worker had increased to almost \$62,000\textemdash a 16.9\% increase. Indeed, with the exception of the Great Recession, when global exports and port traffic dropped significantly, this sector has averaged roughly 4\% growth in worker productivity each year since 2001.

ACS1.pdf

ACS2.pdf

Overall, the quality of the jobs being offered by logistics companies is being affected by the trend toward increased labor efficiency and productivity. This is evidenced by the basic profiles of workers in the industry, who have in general become more skilled and more highly paid over the past few years alone. For example, even as recently as 2006, the level of educational attainment for workers in the logistics industry was fairly evenly distributed, with 49.4\% of workers having a high-school diploma or less, and with 50.6\% of workers having some form of post-secondary training (community college, vocational training, or college degree). However, the share of higher-skilled workers has increased consistently over the past few years; in 2011, nearly 54\% of all workers in this sector possessed some form of post-secondary training.

Indeed, drilling down to specific levels of educational attainment underscores the trend toward higher-skilled workers, even for workers making under \$50,000 per year. Logistics workers without a high school diploma have fallen to a share of 16\% of all workers, compared with a peak of almost 17\% of all workers. Similarly, workers with only a high school diploma represented roughly 30\% of total logistics employment in 2011, down from nearly 34\% in 2007. At the same time, the proportion of workers with

some college or vocational training has increased, from just over 35\% of all jobs in the industry in 2006 to 38.5\% by 2011. The share of workers with a bachelor's degree has also increased marginally, while the proportion of workers with graduate degrees has remained relatively flat.

Thus, not only has the number of jobs increased dramatically since the turn of the century, but increasingly, those jobs are being filled by workers with a higher degree of skills and educational training than in the past. This highlights the increasing quality of the jobs provided by the logistics industry despite the fact that the operations in question have become less labor-intensive in terms of the amount of labor required per square foot. And it is important to keep in mind that the sector overall has been growing\textemdash both in terms of output as well as employment. So even though each operation is more capital-intensive, there are more of these operations out there offering a larger quantity of jobs overall at a higher quality of employment.

Indeed, we see these trends in increasing productivity and skill requirements spilling over into higher wages for logistics workers. Overall, the share of logistics workers in California earning \$50,000 per year or less has fallen from almost 73\% of all logistics jobs in 2005 to just 68\% by 2011, according to the 2011 American Community Survey. Stated another way, the percentage of logistics workers earning at least \$50,000 per year has grown from 27\% to 32\% of employment within the sector. If we look at the data in more granular detail, we see that the percentages of workers earning \$10,000 or less, \$20,000 to \$30,000, \$30,000 to \$40,000, and \$40,000 to \$50,000 have all fallen, while each of the higher income categories have seen their share of total employment increase.

ACS3.pdf

BLS2.pdf

Annual average wages for warehousing/storage workers are on the rise as well\textemdash they have nearly doubled since 1990. Indeed, the annual average wage of a warehousing/storage worker has increased from just \$23,400 in 1990 to \$41,400 in 2011. This 77\% increase in wages over the 21-year period equates to roughly 2.7\% growth in pay per year. This reflects both the increases in productivity and the shift in the share of workers with higher-skilled, higher-income jobs. Thus, in sum, this report finds that the number of jobs is increasing despite rising automation and increases in worker productivity. Logistics is becoming increasingly concentrated within the local economy. Moreover the quality of those jobs, as measured by training, shares of workers in higher income brackets, and rising wages, has increased significantly over the last 20 or so years.

Finally, it is important to point out that although logistics is primarily focused on the movement of goods and services, there is significant diversity in the types of jobs being offered in the industry. Roughly 52\% of the workers in this sector are classified as having transportation and material moving occupations. These are the logistics worker that one typically associates with the industry, but nearly 48\% of all logistics workers perform some other job function outside of moving goods and materials. For example, office and administrative workers represent 26.5\% of all jobs within the industry. Other higher-wage jobs include management (6.7\% of all workers), installation/maintenance/repair (4.6\%), business/financial/sales occupations (3.3\%), and architects/engineers/computer/mathematical

occupations (1\%). Thus, while this sector does offer a significant number of jobs in the moving and handling of freight and goods, the mix of jobs within the logistics industry, including opportunities for high-wage employment, is significantly more diverse than one might expect. This helps to explain the rising educational training and skill requirements as well as the rising wages and incomes of Inland Southern California residents who work in logistics.

Table 12: California Transportation/Warehousing Employment by Occupation, and Inland Southern California Outbound Commute Characteristics

Overall, the quality and quantity of logistics jobs are improving. With the expansion of the local industrial base as envisioned in the World Logistics Center, there is the opportunity for a variety of well-paying jobs within the region. Many of these jobs (roughly 48\%) will involve non-logistics occupations in the business and financial side of the operation, providing solid wages and opportunities for future growth as demonstrated by historical trends. In addition, this project could help to harness some of the assets currently present within the region that have yet to be tapped into.

Inland Southern California is often thought of as a bedroom community\textemdash a significant portion of local residents commute outside the region for work each day. Indeed, according to the 2011 American Community Survey, roughly 75.7\% of residents work within Inland Southern California, while 24.3\% are outbound commuters. The large number of outbound commuters represents a missed opportunity for the region to capture these skills by keeping employment local. Employing more residents within the region would cut down on road congestion and commute times, thereby helping to improve the quality of life for local residents and the community as a whole. Indeed, many of the outbound commuters are relatively high-skilled. The share of outbound commuters in high-paying occupations, such as architecture, engineering, computer science, and mathematical operations, reaches almost 40\% of all residents\textemdash much higher than the economy-wide average for these occupations. By bringing the WLC project online, Moreno Valley will help to take advantage of the significant skill sets of residents in the region who currently have to commute to the coastal areas for work each day. Hence, this project will not only create a significant number of jobs but will also enable the broader Inland Southern California region to make better use of its existing assets\textemdash namely, its people.

Summary

Beacon Economics has performed an economic impact study of the effects of developing and operating a 41.6-million-square-foot logistics facility in the City of Moreno Valley. Overall, we find that both the city and Riverside County as a whole will enjoy significant benefits from the proposed project.

Table 13: WLC Summary of Total Economic Impact

Our analysis includes two hypothetical scenarios: (1) the World Logistics Center will be a highly-automated and capital-intensive logistics center, and (2) the World Logistics Center will be built as a traditional logistics facility that relies more heavily on labor as inputs to its operations. Under either scenario, the city and the county will enjoy significant economic benefits. Initially, they will benefit from

the one-time costs associated with outfitting the facility and equipping it for operations. Thereafter, the City of Moreno Valley and Riverside County will enjoy ongoing benefits from the continued operation of the facility once it reaches full occupancy.

Importantly, the quality and quantity of logistics jobs are improving, and this project provides the opportunity for a variety of well-paying jobs within the region. Many of these jobs involve non-logistics occupations that provide solid wages and opportunities for future growth. In addition, this project could help to harness some of the local assets in the region that have yet to be tapped into. By bringing the WLC project online, Moreno Valley will be able to take advantage of the significant skill sets of residents in the region who currently have to commute to the coastal areas for work each day. This project will create a significant number of high-quality jobs and will also enable the broader Inland Southern California region to make better use of its existing assets\textemdash namely, its people.

Finally, this project will introduce many knock-on benefits that will ripple through the rest of the local and regional economy. These benefits include an increased demand for goods and services throughout the economy, increased household earnings for workers at WLC and its suppliers, and increased state and local tax revenues. Ultimately, Beacon Economics concludes that the construction, development, and operations of the World Logistics Center in Moreno Valley will contribute very significantly to the local and regional economies.

Executive Summary

This report lays out the economic impact that the development and operation of the World Logistics Center (WLC) will have on Moreno Valley and the broader Riverside County area. Because the facility is designed to include more than 41 million square feet of advanced logistics space, the construction and equipping of the WTC will generate a sizable impact on the economy during the development phase. However, the city and county will also experience an ongoing economic impact due to the operations housed within this facility once development has been completed. Overall, this project will add significant economic value to the region.

Construction, Tenant Improvements, and Equipment

1. Constructing and equipping the WLC will generate between 46,138 and 59,018 jobs in Moreno Valley.
2. This activity will stimulate between $2.2 and $2.9 billion in additional earnings within Moreno Valley.
3. Overall economic output will increase between $5.8 and $7.8 billion as a result of construction and equipping the WLC.

Ongoing Operations

1. Ongoing operations at the WLC are expected to support between 22,645 and 32,201 positions each year.
2. Associated annual earnings will reach between $1.2 and $1.3 billion per year.
3. Annual economic output is expected to increase by $2.3 to $2.4 billion per year.

Overall, both the development and the subsequent ongoing operation of the World Logistics Center in Moreno Valley are expected to have a very strong economic impact on the city's economy. In addition to assessing the regional economic impact, Beacon Economics has analyzed the basic profile of logistics workers in California and in Inland Southern California. Overall, the quality and quantity of logistics jobs are improving. The World Logistics Center will help to create opportunity for workers in the region, offering a variety of well-paying jobs—many of which (roughly 48%) will involve non-logistics occupations in the business and financial side of the operation, providing solid wages and opportunities for future growth. In addition, the creation of local jobs will enable Moreno Valley to take advantage of the significant skill sets of residents in the region who currently have to commute to the coastal areas for work each day.

World Logistics Center Summary of Total Economic Impact

Impact Type	High-Tech Scenario		Traditional Logistics	
	One-Time	Ongoing	One-Time	Ongoing
Employment				
Direct	43,895	16,000	34,713	25,488
Total	59,018	22,645	46,138	32,201
Earnings				
Direct ($ Mill.)	2,306.5	968.5	1,816.4	1,033.0
Total ($ Mill.)	2,871.2	1,205.7	2,240.7	1,272.5
Output				
Direct ($ Mill.)	5,824.0	1,596.9	4,368.0	1,515.4
Total ($ Mill.)	7,762.1	2,370.9	5,822.1	2,300.8

Report and Project Overview

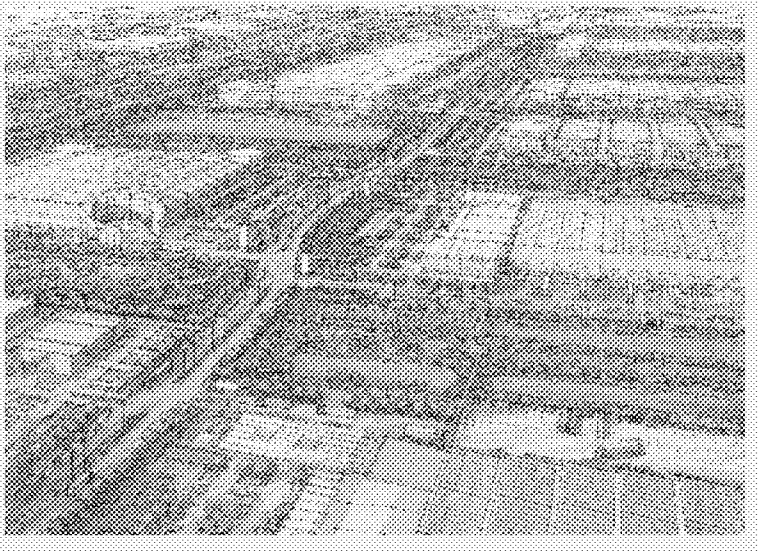
In this report, Beacon Economics estimates the potential economic impact of the development and eventual operation of the World Logistics Center (WLC) on the City of Moreno Valley and the broader region of Riverside County. According to the World Logistics Center Specific Plan, the WLC is a master-planned industrial development in Rancho Belago—the eastern portion of Moreno Valley.

This 41.6-million-square-foot facility will cover roughly 2,710 acres and is designed to attract large international companies and domestic corporations. In addition, a key tenet of the proposed development is that it be developed in an environmentally responsible way that conforms to California's CALGreen regulations, which will ensure the conservation of natural resources and the reduction of greenhouse gases, energy consumption, and water use. In fact, the WLC will go even further than this in its environmental efforts, drawing on a variety of other sustainable measures, including maximizing the efficiency of landscape irrigation, using solar equipment, and supporting alternative fuels like natural gas.

To put the scale of this proposed project into context, consider that Moreno Valley is currently home to the Sketchers distribution facility. This 1.82-million-square-foot facility was recently certified as the nation's largest LEED Gold-certified building by the U.S. Green Building Council.[1] As large as this facility is, it pales in comparison to the proposed World Logistics Center, which will be more than 22 times larger, at 41.6 million square feet.

To estimate the economic impact of the World Logistics Center on Moreno Valley and on Riverside County overall, Beacon Economics used Version 3 of the IMPLAN modeling system. This is an input-output model that can be used to estimate the short-run impact of changes in the economy through the use of multiplier analysis.

Artist's Rendering of the World Logistics Center



Source: Lockard Creative

Impact studies operate under the basic assumption that any increase in spending has three effects: First, there is a direct effect on that industry itself, resulting from the additional output of goods or services. In the case of the WLC, this represents the direct purchase of goods and services associated with building and fitting the space for operation. Once construction is completed, the direct effects consist of the workers who will be hired to work at WLC and the direct operations by WLC's tenants.

Second, there is a chain of indirect effects on all the industries whose outputs are used by the logistics industry and the impacts generated by a business's supply chain. For example, in order to build the facility, the construction teams

[1] BusinessWire.Com, "SKECHERS Distribution Center Certified as Largest LEED Gold Building in the United States," February 19, 2013.

MV00251382

will need to purchase building materials and supplies, such as steel, timber, and concrete, as well as specialized design and engineering services. From an operational standpoint, tenants of WLC will need to purchase housekeeping and maintenance services, accounting/payroll services, and other inputs to the production process, such as utilities and supplies. These indirect impacts boost output and employment at the companies in the local economy who provide these inputs to the production process.

Third, there are induced effects that arise when employment increases and household spending patterns are expanded. These effects follow from the additional income that is earned in the course of producing this output, both by employees at WLC and in those companies supplying inputs to WLC. For example, the maintenance crew for WLC will need to bring on additional workers to service the center. These workers will earn wages for this effort and, to the extent that they reside within the local or regional economy, they will spend this income on goods and services, like rent, automobiles, clothes, and dining out, among others. This creates additional demand and employment opportunities within Moreno Valley and Riverside County as a result of the earnings associated with the WLC.

It is important to note that capital investments made on different types of projects can lead to different multipliers. Why? A sector can have a large multiplier effect if it induces economic activity in industries whose employees have a high propensity to spend from take-home pay. Also, if the sector does not import many materials from abroad or from out of state, then its multiplier effect on the local economy will be high. In essence, some of the spending in the local economy may "leak out" into other counties and states. If raw materials are imported, then a change in a local sector's level of production will result in a commensurate change in economic activity outside the study area. Our analysis uses input-output accounts and is based on three important assumptions. First, there are constant returns to scale. This means that a 10% cut in spending will be ten times as severe—across every sector in the economy—as a 1% cut. Second, there are no supply constraints. This means that any marginal increase in output can be produced without having to worry about bottlenecks in labor markets, commodity markets, or necessary imports. This assumption is quite realistic in a free-market economy like California's where there is some unemployment. It is even more reasonable in times of high unemployment, such as the present economic environment, because there are many under- and un-utilized resources that can be activated without detracting from other industries or businesses. Third, the flow of commodities between industries is fixed. This means that it is not possible to substitute in the short-run the many different inputs that go into the target industry.

Thus, our analysis here covers the four main areas of economic impact that will accrue on a local and regional level due to the development, equipping, and operation of the World Logistics Center in Moreno Valley. We estimate the direct employment, output, and value-added effects after accounting for leakage out of the region. Second, we estimate the indirect effects on all the industries whose outputs are used by the proposed investments and the induced effects arising when employment increases and household spending patterns are expanded.

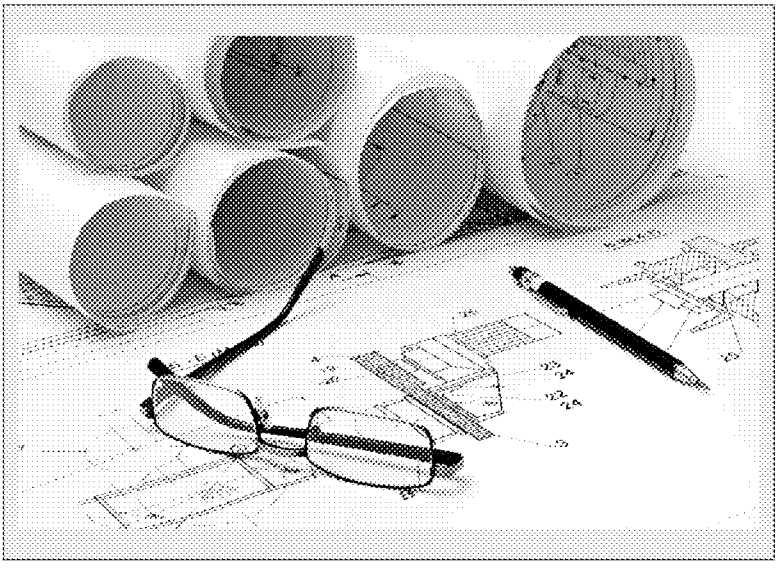
MV00251383

Economic Impact of Construction

Beacon Economics has modeled the economic impact of the World Logistics Center on Moreno Valley and Riverside County by breaking down the effects into three distinct categories: construction, tenant improvements and equipment purchases, and the ongoing operations of the facility once the development is completed.

In order to provide estimates of the economic impact of the construction of the World Logistics Center, Beacon Economics relied upon data from the developer, Highland Fairview, on the construction costs of other logistics centers it has built within the region. Because this project is still in the planning stages, final construction and improvement budgets have yet to be finalized. Thus, Beacon Economics presents two scenarios for the total economic impact of construction.

One scenario assumes that the WLC will be a highly automated, capital-intensive facility; that is, it will be one of the next-generation logistics centers, similar to the recently developed Sketchers facility. These types of operations use fewer workers for each square foot of space relative to traditional logistics centers, relying more heavily on industrial machinery, computers, and other technology products to deliver services more efficiently. In our second scenario, we assume a more traditional mode of operation—one that is more labor-intensive than its high-technology counterpart.



By presenting a range of potential effects, Beacon Economics hopes to present a more realistic picture of the economic impact of the construction of the WLC on the local and regional economy. The realization of the WLC will likely fall somewhere in between these two scenarios, as the facility will likely contain a mix of both high-tech and traditional logistics operations.

Our analysis shows that similar recently constructed logistics centers within the local economy have incurred an average expenditure of $70 to $85 per square foot of completed space. The range in cost varies according to how advanced the proposed operations and uses of the facility are and how many "green" features the center has, in addition to depending on a number of other characteristics that potentially raise the cost of construction from a base level of $70 per square foot. Using these estimates

Table 1. WLC Construction Cost Estimates

	High-Tech Logistics	Traditional Operation
Square Footage (Mill.)	41.6	41.6
Construction Costs per Sq. Ft.	$85	$70
Total Construction Costs ($ Bill.)	$3.54	$2.91

Source: Estimates by Beacon Economics

MV00251384

for the upper and lower bounds of construction costs, Beacon Economics estimates that the construction of the WLC in Moreno Valley will cost between $2.91 and $3.54 billion, based upon 41.6 million square feet of completed logistics space.

These costs represent the direct impact of the construction of WLC on the local and regional economy. However, as noted, the total economic impact is much larger than this due to the ripple effects (the indirect and induced impacts) that will accrue to Moreno Valley and the broader region as a result of this construction spending. These results, which are detailed herein, are dependent on whether a high-tech or traditional manufacturing operation is put into place.

High-Tech Logistics Operation

Under a high-tech scenario, the development itself is expected to create more than 36,000 construction jobs during the building phase. However, due to increased demand for inputs, as well as additional earnings by construction workers and the staff of suppliers, the Moreno Valley economy will enjoy an additional 9,600 jobs created through the indirect and induced effects of the construction spending. In total, the construction phase of the project is expected to create nearly 46,000 jobs within the city throughout the life of construction. In addition, our analysis shows that the economic impact will extend to firms and individuals in the broader region, with the county benefiting from an additional 6,000 jobs that will be stimulated outside the Moreno Valley city limits but within Riverside County. Thus, the region as a whole can expect roughly 52,000 jobs as a result of the construction and development of the World Logistics Center.

It is important to point out that although the increase in employment is a significant benefit of this project, other local benefits are sizable as well. For example, Beacon Economics estimates that the City of Moreno Valley will experience a $1.2 billion increase in overall economic output (the value of all goods and services produced within the local economy) above and beyond the $3.54 billion in direct construction costs. This represents a significant increase in demand for goods and services throughout the local economy, and it will provide a big boost to the city's businesses. Moreover, an additional $800 million in output will be stimulated throughout the rest of Riverside County, bringing the total increase in output attributable to the construction of the WLC to $5.54 billion—a very large number for the local economy relative to the overall economic base.

Table 2. WLC Construction Impact: High-Tech Scenario

Impact Type	Employment (000s)	Earnings ($ Mill)	Output ($ Mill)
Direct Effect	36.2	1,862.6	3,536.0
Indirect Effect	2.5	95.9	290.9
Induced Effect	7.1	251.0	887.5
Total City Impact	45.8	2,209.5	4,714.4
Additional County Impact	6.0	231.1	821.6
Total Regional Impact	51.9	2,440.6	5,536.0

Source: IMPLAN and Beacon Economics

MV00251385

Much of these increases in output are driven by indirect and induced effects that occur due to increased incomes within the city and county. In fact, Beacon Economics estimates that household income will increase by more than $2.2 billion within Moreno Valley as a result of construction, with an additional $231 million being paid out to Riverside County residents who don't live in Moreno Valley specifically. Finally, due to this spending, the state and local economies will enjoy a fiscal bump to the tune of more than $242 million from a variety of tax sources, including payroll, business, sales, and corporate taxes.

Traditional Logistics Operation

Even under the assumption that the WLC will more closely resemble a traditional logistics operation, the economic impact is very large. Although the effects are smaller than under the high-tech scenario, the development of the WLC is expected to create more than 29,000 construction jobs during the life of the building phase. The Moreno Valley economy will enjoy an additional 7,900 jobs created through the indirect and induced effects of the construction spending. In total, the construction phase of the project is expected to create nearly 38,000 jobs within the city throughout the life of construction. As in the high-tech scenario, our analysis shows that the economic impact will extend to the broader region, which will benefit from an additional 5,000 jobs created outside the Moreno Valley city limits but within Riverside County. Thus, the region as a whole can expect roughly 42,700 jobs as a result of the construction and development of the World Logistics Center, even if it is developed as a less high-tech and more traditional building.

Beacon Economics estimates that the City of Moreno Valley will experience a $970 million increase in overall economic output above and beyond the $2.91 billion in direct construction costs. An additional $677 million in output will be stimulated throughout the rest of Riverside County, bringing the total increase in output attributable to the construction of the WLC to $4.56 billion if the facility is developed as a traditional logistics operation rather than a high-tech logistics center. Beacon Economics estimates that household income will increase by more than $1.8 billion within Moreno Valley as a result of construction, with an additional $190 million being paid out to Riverside County residents who don't live in Moreno Valley specifically. Due to this spending, state and local economies will enjoy a fiscal bump of roughly $199 million from a variety of tax sources, including payroll, business, sales, and corporate taxes.

Table 3. WLC Construction Impact: Traditional Logistics Scenario

Impact Type	Employment (000s)	Earnings ($ Mill)	Output ($ Mill)
Direct Effect	29.8	1,533.9	2,912.0
Indirect Effect	2.1	79.0	239.6
Induced Effect	5.8	206.7	730.9
Total City Impact	37.8	1,819.6	3,882.5
Additional County Impact	5.0	190.3	676.6
Total Regional Impact	42.7	2,009.9	4,559.1

Source: IMPLAN and Beacon Economics

MV00251386

Under either scenario, the construction and development of the World Logistics Center in Moreno Valley will provide a significant economic boost for the City of Moreno Valley and for Riverside County. Not only will this project provide some much-needed construction jobs (one of the hardest hit sectors during the recent Great Recession), but it will also boost local incomes, provide substantial demand for goods and services throughout the local economy, and help to sustain state and local government budgets by generating additional tax revenue. Even if the WLC is developed as a less-sophisticated operation (a scenario that is unlikely given the demand considerations and the trends toward automation in the logistics industry), Moreno Valley will still enjoy significant benefits as a result of the construction of the World Logistics Center.

Economic Impact of Improvements and Equipment

Building the World Logistics Center will lead to a one-time boost to the local economy during the construction phase, but Moreno Valley and the County of Riverside will also experience a sizable boost in the local economy due to specific tenant improvements (TI) and equipment purchases. Relying again on data from previous logistics centers built by the developer in the regional economy , Beacon Economics estimates that the cost of these improvements and equipment purchases will range from $35 to $55 per square foot, depending on the level of technology and the specific equipment purchased. For the purposes of this analysis, Beacon Economics uses a figure of $55 per square foot for the cost of tenant improvements and equipment purchases under the high-tech scenario, and a figure of $35 per square foot for the cost of improvements and purchases in a more traditional logistics operation. Based upon a completed space that will occupy 41.6 million square feet, the total cost of these improvements and equipment purchases will range from $2.29 to $1.46 billion.

Inside a High-Tech Logistics Facility

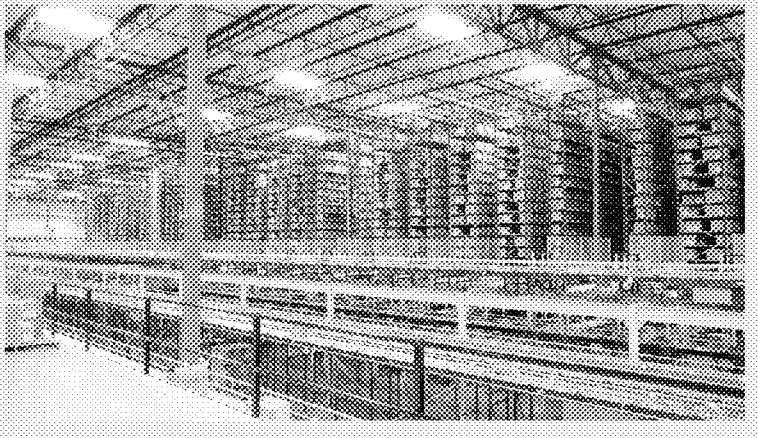


Table 4. WLC Tenant Improvement and Equipment Cost Estimates

	High-Tech Logistics	Traditional Operation
Square Footage (Mill.)	41.6	41.6
TI/Equipment Costs per Sq. Ft.	$55	$35
Total TI/Equipment Costs ($ Bill.)	$2.29	$1.46

Source: Estimates by Beacon Economics

These costs represent the direct impact of the tenant improvements and equipment purchases at WLC on the local and regional economy. The total economic impact is again much larger than this due to the ripple effects that will accrue to Moreno Valley and the broader Riverside County region as a result of these expenditures. These results, which are detailed below, are dependent on whether a high-tech or traditional manufacturing operation is put into place.

MV00251387

High-Tech Logistics Operation

Under a high-tech scenario, the cost of tenant improvements and equipment purchases are expected to create more than 7,600 jobs. However, due to increased demand for inputs, as well as additional earnings per worker, the Moreno Valley economy will enjoy an additional 5,500 jobs created through the indirect and induced effects of the tenant improvements and equipment purchases. In total, these additional expenditures are expected to create nearly 13,100 jobs within the city. In addition, our analysis shows that the economic impact will extend throughout the region—the county will benefit from an additional 2,750 jobs that will be created outside the Moreno Valley city limits, accruing to firms and individuals within Riverside County. Thus, the region as a whole can expect to see almost 16,000 jobs as a result of the construction and development of the World Logistics Center.

In addition to an increase in the number of jobs, the other local benefits will be sizable as well. Beacon Economics estimates that the City of Moreno Valley will experience a $760 million increase in overall economic output above and beyond the $2.29 billion in direct costs for TI and equipment. This represents a significant increase in demand for goods and services throughout the local economy and will provide a boost to the city's businesses. Moreover, an additional $455 million in output will be stimulated throughout the rest of Riverside County, bringing the total increase in output attributable to the purchase of equipment and costs of TI at WLC to $3.50 billion—a very large number for the local economy relative to the overall economic base.

Table 5. WLC TI and Equipment Impact: High-Tech Scenario

Impact Type	Employment (000s)	Earnings ($ Mill)	Output ($ Mill)
Direct Effect	7.7	443.9	2,288.0
Indirect Effect	3.2	135.5	468.6
Induced Effect	2.3	82.4	291.1
Total City Impact	13.2	661.7	3,047.7
Additional County Impact	2.8	114.1	455.0
Total Regional Impact	15.9	775.8	3,502.7

Source: IMPLAN and Beacon Economics

Much of these increases in output are driven by the indirect and induced effects that occur due to increased incomes within the city and county. In fact, Beacon Economics estimates that household income will increase by more than $660 million within Moreno Valley as a result of tenant improvements and equipment purchases, with an additional $114 million being paid out to Riverside County residents who don't live in Moreno Valley specifically. Finally, because of this spending, the state and local economies will enjoy a fiscal bump to the tune of more than $117 million, coming from a variety of tax sources, including payroll, business, sales, and corporate taxes.

Traditional Logistics Operation

Even under the assumption that the World Logistics Center will more closely resemble a traditional logistics operation, the economic impact of tenant improvements and equipment purchases is very large. Although the effects will be smaller than under the high-tech scenario, these expenditures at WLC are expected to create more than 4,800

MV00251388

jobs during the life of the building phase. The Moreno Valley economy will enjoy an additional 3,500 jobs created through indirect and induced effects of these tenant improvements and equipment purchases. In total, these expenditures are expected to create nearly 8,400 jobs within the city. As in the high-tech scenario, our analysis shows that the economic impact will extend to the broader region, with the county benefiting from an additional 1,750 jobs that will be created outside the Moreno Valley city limits but within Riverside County. Thus, the region as a whole can expect to see roughly 10,150 jobs as a result of tenant improvements and equipment purchases at the World Logistics Center—even from tenants with a more traditional mode of logistics operation than their more automated peers.

Beacon Economics estimates that the City of Moreno Valley will experience a $480 million increase in overall economic output above and beyond the $1.46 billion in direct tenant improvement and equipment costs. An additional $289 million in output will be stimulated throughout the rest of Riverside County, bringing the total increase in output attributable to tenant improvements and equipment purchases at WLC to $2.23 billion if the facility is developed as a traditional logistics operation rather than a high-tech logistics center. Beacon Economics estimates that household income will increase by more than $493 million within Moreno Valley in connection with these expenditures, with an additional $73 million being paid out to Riverside County residents who don't live in Moreno Valley specifically. Due to this spending, state and local economies will enjoy a fiscal bump of roughly $75 million from a variety of tax sources, including payroll, business, sales, and corporate taxes.

Table 6. WLC TI and Equipment Impact: Traditional Logistics Scenario

Impact Type	Employment (000s)	Earnings ($ Mill)	Output ($ Mill)
Direct Effect	4.9	282.5	1,456.0
Indirect Effect	2.0	86.2	298.2
Induced Effect	1.5	52.5	185.5
Total City Impact	8.4	421.2	1,939.6
Additional County Impact	1.8	72.5	289.4
Total Regional Impact	10.1	493.7	2,229.0

Source: IMPLAN and Beacon Economics

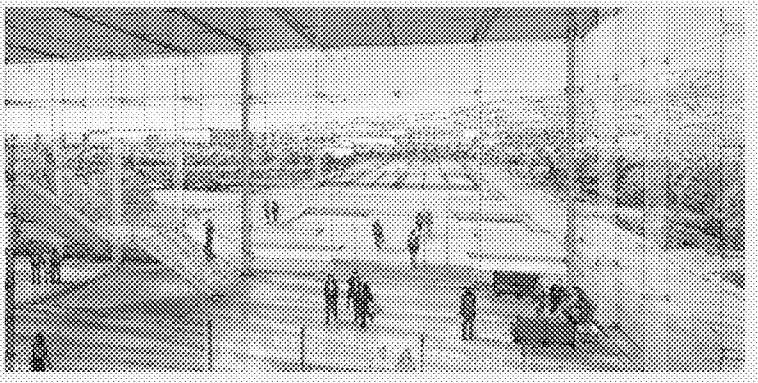
Under either scenario, the cost of tenant improvements and equipment purchases at the WLC in Moreno Valley will provide a significant economic boost for the city and for Riverside County. This spending will provide substantial demand for goods and services throughout the local economy, boosting local incomes and helping to sustain state and local government budgets by generating additional tax revenue. Even if the WLC is developed as a less-sophisticated operation, Moreno Valley will still enjoy significant benefits as a result of tenant improvements and equipment purchases at the World Logistics Center. Importantly, these impacts are in addition to the sizable one-time benefits accruing to the city as a result of the construction of the WLC, thereby compounding the economic impact even further.

MV00251389

Economic Impact of Ongoing Operations

In addition to benefiting from the large, one-time bumps in economic activity associated with the construction and outfitting of the World Logistics Center, both Moreno Valley and the broader Riverside County region can expect to enjoy an ongoing economic impact as the facility comes online and is occupied by future tenants. For this portion of the economic analysis, Beacon Economics created both a high-tech scenario and a traditional logistics center scenario for the purposes of generating a range of likely economic effects.

Artist's Rendering of the World Logistics Center Interior



Source: Lockard Creative

In order to generate these scenarios, Beacon Economics relied upon information regarding the size and employment levels of a variety of logistics centers around the Inland Southern California region. Based upon this analysis, Beacon Economics has concluded that higher-tech operations, which rely much more heavily on automation, industrial equipment, and computers for their operations, are much less space-intensive. In other words, these high-tech logistics operations actually employ fewer workers for each square foot of space relative to their traditional counterparts. For example, some of the newer, more sophisticated operations average roughly 2,600 square feet for each employed worker. In contrast, more traditional logistics centers are much more labor intensive: employing one worker for every 1,635 square feet of available space.

Using these respective estimates for high-tech and traditional operations, Beacon Economics has determined that the completed WLC facility will house between 16,000 and 25,448 workers once it reaches full occupancy. Armed with this information, we can determine the cost of operation under both scenarios.

According to California's Employment Development Department, employees in the Transportation/Warehousing sector in Inland Southern California earn roughly $42,000 per worker, on average. Given that the high-technology operation will be much more capital intensive, and thus require more skilled labor, we have assumed an annual average wage for a high-tech operation to equal roughly $60,000 per worker. In contrast, a more traditional operation, which relies less heavily on skilled labor, is expected to pay an average wage of $40,000 per year—closer to the industry-wide average observed across the region.

In addition to labor costs, tenants of the WLC will incur various other operational expenses. Using information from the U.S. Bureau of Economic Analysis, Beacon Economics derived estimates of the external (non-labor) costs associated with the logistics industry on a per worker basis. Here, we utilized several pieces of information. First, gross domestic product (GDP) for the logistics industry was obtained. This figure reflects the value of all services provided by this sector between 1990 and 2011. From this, we subtracted the value added (the value of production less the cost of intermediate inputs and other costs) attributable to logistics. The net result of this figure represents the sum-total of external costs associated with the logistics industry. Finally, by dividing the total external costs by the number of logistics workers in each year, we arrived at an external cost per worker.

MV00251390

In 2011, the average external expenditure per employee in the logistics industry equaled roughly $29,800 per year. In our high-tech scenario, this figure was adjusted upward to $39,800 to reflect the purchase of additional external equipment, supplies, and services above and beyond labor due to the capital-intensive nature of their production process. For a more traditional logistics operation, Beacon Economics has assumed that the operational costs will be similar to cost structures in the logistics space prior to the influx of high-tech processes after adjusting for inflation. In 1990, the logistics industry spent roughly $11,200 per worker on external expenditures. In 2011 terms, that equates to roughly $19,275 per worker—slightly below the industry-wide average and reflecting a less sophisticated operation overall.

Table 7. WLC Annual Operating Cost Estimates

	High-Tech Logistics	Traditional Operation
Square Footage (Mill.)	41.6	41.6
Sq. Ft. per Job	2,600	1,635
Direct Jobs	16,000	25,448
Annual Wage	$60,000	$40,274
Labor Costs ($ Mill.)	960.0	1,024.9
External Costs per Worker	$39,803	$19,273
Operational Costs ($ Mill.)	$636.9	$490.5
Total Costs ($ Mill.)	$1,596.9	$1,515.4

Source: Estimates by Beacon Economics

Combining both the labor costs and external costs under each scenario yields the annual direct impact of operations on the City of Moreno Valley. Based upon a 41.6-million-square-foot facility, total operational costs will reach nearly $1.6 billion per year at a high-tech incarnation of WLC, while annual operations will total roughly $1.5 billion at a more traditional type of logistics facility.

Based on these estimates, Beacon Economics has calculated the economic impact of the operation of the World Logistics Center once it reaches full capacity. As with our estimates for construction and TI/equipment purchases, we have presented a range of likely economic effects accruing to the City of Moreno Valley and to Riverside County, depending on whether the WLC is fully realized as a high-tech logistics center or whether it resembles a more traditional logistics operation.

High-Tech Logistics Operation

Under a high-tech scenario, the ongoing operations of tenants at WLC are expected to support more than 16,000 jobs. However, due to increased demand for inputs, as well as additional earnings per worker, the Moreno Valley economy will enjoy an additional 6,650 jobs both created and supported annually through the indirect and induced effects of the ongoing operations. In total, these operational expenditures are expected to support 22,645 jobs within the city each year. In addition, our analysis shows that the economic impact will extend throughout Riverside County, with the broader region benefiting from an additional 2,750 jobs that will be supported outside the Moreno Valley city limits. Thus, the region as a whole can expect over 25,000 jobs to be supported each year as a result of the annual operations of the World Logistics Center.

In addition to the increase in the number of jobs, the increases in other local benefits will be sizable. Beacon Economics estimates that the City of Moreno Valley will experience an almost $775 million increase in overall economic output above and beyond the $1.6 billion in direct operational costs. This represents a significant increase in demand for goods and services throughout the local economy and will provide a boost to the city's businesses. Moreover, an

MV00251391

additional $360 million in output will be stimulated throughout the rest of Riverside County, bringing the total output attributable to the ongoing operations at WLC to $2.73 billion—a very large number for the local economy relative to the overall economic base.

Table 8. WLC Annual Operating Impact: High-Tech Scenario

Impact Type	Employment (000s)	Earnings ($ Mill)	Output ($ Mill)
Direct Effect	16.0	968.5	1,596.9
Indirect Effect	2.8	101.4	294.2
Induced Effect	3.8	135.8	479.9
Total City Impact	22.6	1,205.7	2,370.9
Additional County Impact	2.7	100.0	360.5
Total Regional Impact	25.4	1,305.7	2,731.4

Source: IMPLAN and Beacon Economics

Again, much of these increases in output will be driven by the indirect and induced effects that will occur due to increased incomes within the city and county. In fact, Beacon Economics estimates that household income will increase by more than $1.2 billion within Moreno Valley as a result of the ongoing operations at WLC, with an additional $100 million being paid out to Riverside County residents who don't live in Moreno Valley specifically. Finally, the state and local economies will enjoy a fiscal bump due to this spending to the tune of more than $140 million, stemming from a variety of tax sources, including payroll, business, sales, and corporate taxes.

Traditional Logistics Operation

If one assumes that the WLC will more closely resemble a traditional logistics operation, the economic impact of the ongoing operations remains substantial. Given that the operation will be much more labor intensive than under a high-tech scenario, the operational expenditures at the WLC under this scenario are expected to sustain more than 25,500 jobs each year, as more workers are required to do the work if the center is using more limited automation technology. Under this scenario, the Moreno Valley economy will enjoy an additional 6,700 jobs, owing to the indirect and induced effects of ongoing operations. In total, these expenditures are expected to create nearly 32,200 jobs within the city—a sizable increase over the high-tech scenario due to the larger number of direct jobs employed at WLC in the low-tech scenario. As in the high-tech scenario, our analysis shows that the economic impact will extend to the broader region, which will benefit from an additional 2,775 jobs created outside the Moreno Valley city limits but within Riverside County. Thus, the region as a whole can expect to support almost 35,000 jobs each year as a result of ongoing operations at the World Logistics Center—even under the assumption that a traditional form of logistics will dominate the facility.

Beacon Economics estimates that the City of Moreno Valley will experience a $785 million increase in overall economic output above and beyond the $1.52 billion in direct operational costs. An additional $368 million in output will be stimulated throughout the rest of Riverside County, bringing the total increase in output attributable to ongoing operations at the World Logistics Center to $2.7 billion if the facility is developed as a traditional logistics operation

MV00251392

rather than a high-tech logistics center. Beacon Economics estimates that household income will increase by more than $1.27 billion within Moreno Valley in connection with these expenditures, with an additional $102 million being paid out to Riverside County residents who don't live in Moreno Valley specifically. As a result of this spending, state and local economies will enjoy a fiscal bump of roughly $143 million, received from a variety of tax sources, including payroll, business, sales, and corporate taxes.

Table 9. WLC Annual Operating Impact: Traditional Logistics Scenario

Impact Type	Employment (000s)	Earnings ($ Mill)	Output ($ Mill)
Direct Effect	25.5	1,033.0	1,515.4
Indirect Effect	2.7	96.2	279.2
Induced Effect	4.0	143.3	506.2
Total City Impact	32.2	1,272.5	2,300.8
Additional County Impact	2.8	102.4	368.3
Total Regional Impact	35.0	1,374.9	2,669.0

Source: IMPLAN and Beacon Economics

Under either scenario, the ongoing operations at WLC in Moreno Valley will provide a significant economic boost for the city and for Riverside County. Like the spending on equipment, this ongoing spending will provide substantial demand for goods and services throughout the local economy, boosting local incomes and helping to sustain state and local government budgets through additional tax revenue. Even if the WLC is developed as a less sophisticated operation, Moreno Valley will still enjoy significant benefits each year as a result of ongoing operations at the World Logistics Center. These are impacts that will be sustained into the foreseeable future, which is an important point given that the effects presented up to this point have largely consisted of one-time surges in economic activity.

Total Economic Impacts

Overall, through both the construction and outfitting of the World Logistics Center, as well as through the ongoing operations of the facility, the City of Moreno Valley stands to benefit substantially from this project. As noted herein, the WLC will be more than 22 times larger than the largest comparable property in the region, with more than 41 million square feet of logistics space. Beacon Economics has conducted an economic impact analysis and has found that there will be a significant one-time boost to the local economy as the facility is constructed and fitted with industrial equipment. In addition, the local economy will enjoy ongoing effects as a result of the routine operations of the World Logistics Center, with benefits continuing into the foreseeable future.

If the WLC is built as a high-tech logistics center, such as those recently constructed within the region, the facility itself will rely on fewer direct jobs than a facility housing a more traditional operation. However, the high-tech facility will generate more economic output in the region due in large part to the fact that the quality of the jobs in this scenario (as measured by wages) is expected to be significantly higher than the quality of jobs at a more labor-intensive facility.

MV00251393

In addition, the high-tech facility will help to stimulate the local and regional economies through a greater volume of expenditures on advanced industrial equipment, computers, and other technology products. The overall economic impact of the high-tech version of the WLC is presented in Table 10.

Table 10. WLC Total Economic Impact: High-Tech Scenario

Impact Type	Employment (000s)	Earnings ($ Mill)	Output ($ Mill)
Direct Effect	59.9	3,275.0	7,420.9
Indirect Effect	8.5	332.7	1,053.7
Induced Effect	13.3	469.2	1,658.5
Total City Impact	81.7	4,076.9	10,133.0
Additional County Impact	11.5	445.2	1,637.2
Total Regional Impact	93.2	4,522.1	11,770.2

Source: IMPLAN and Beacon Economics

Assuming that the World Logistics Center takes on a more conventional form once completed, the overall economic impact of the construction process, the TI/equipment purchases, and the ongoing operations is expected to be smaller than under a high-tech scenario. However, the economic impact on the City of Moreno Valley remains significant, as shown in Table 11. There will be a larger number of direct jobs created because the operations at WLC will require more labor as a result of a lower-tech process. However, employment, output, earnings, and tax revenues are expected to be substantial in either scenario. Ultimately, this project will have a large positive impact on the City of Moreno Valley and the broader area of Riverside County. Initially, this will consist of a significant upfront investment, followed by a continued boost from ongoing operations at what will be the largest advanced logistics facility of its kind.

Table 11. WLC Total Economic Impact: Traditional Logistics Scenario

Impact Type	Employment (000s)	Earnings ($ Mill)	Output ($ Mill)
Direct Effect	60.2	2,849.4	5,883.4
Indirect Effect	6.8	261.4	816.9
Induced Effect	11.4	402.5	1,422.6

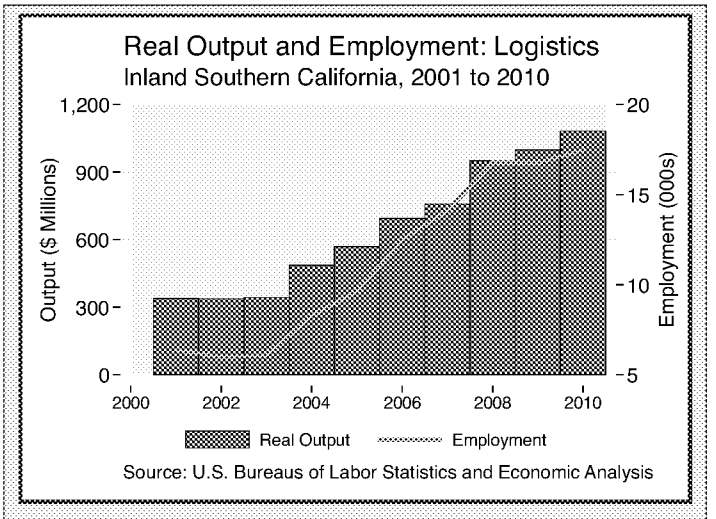
MV00251394

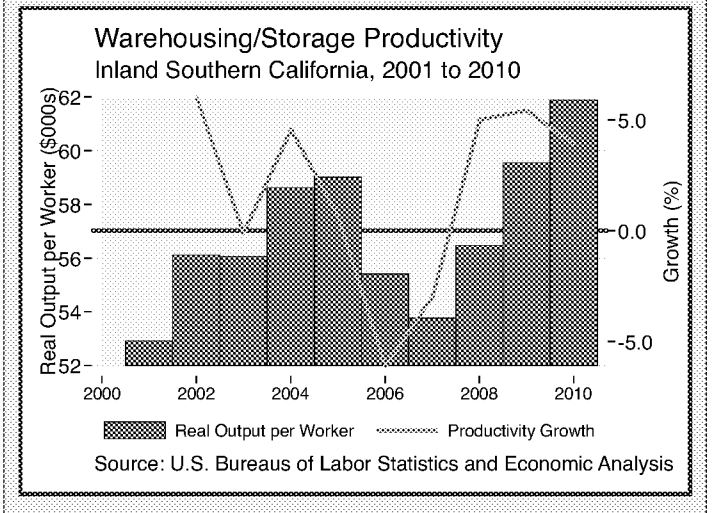
Logistics Workers: Employment and Demographics

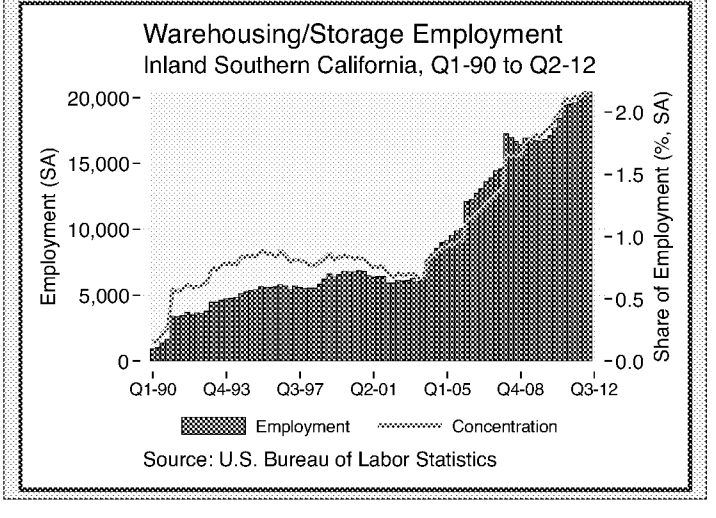
The logistics industry has undergone significant changes over the past few decades. In the past, the logistics industry consisted of primarily labor-intensive operations. Since the advent of the modern computer, the advancements in software and robotics, and the increase in the sophistication of industrial equipment, logistics has become increasingly capital-intensive with automated operations. And, while the new logistics centers, such as the one envisioned here, may not provide the same quantity of direct-jobs for every square foot of occupied space as they did in the past, the quality of those jobs (as reflected by productivity, wages, and levels of educational attainment) has increased significantly.

First, we will consider productivity, which measures the value of all goods and/or services produced by each individual worker within an industry. By 2010 (the most recent metropolitan real GDP figures available), the value of all output produced by the Warehousing/Storage sector within the Inland Southern California region was more than three times larger than it was even a decade ago after adjusting for inflation. Unsurprisingly, this surge in output has also led to a large increase in employment within the region. Specifically, warehousing and storage operations have grown from roughly 6,000 positions in 2001 to more than 17,500 jobs in 2010, according to estimates from the Quarterly Census of Employment and Wages (QCEW). And, with growth at the Ports of Los Angeles and Long Beach playing a key role in the region's economic recovery, employment in this sector has expanded by even more over the past two years.

In fact, data through the second quarter of 2012 show that employment in this sector within the Inland Southern California region has expanded even further, to nearly 20,400 jobs. More important, not only is the number of jobs increasing but so too is the share of this industry within the overall economy. For



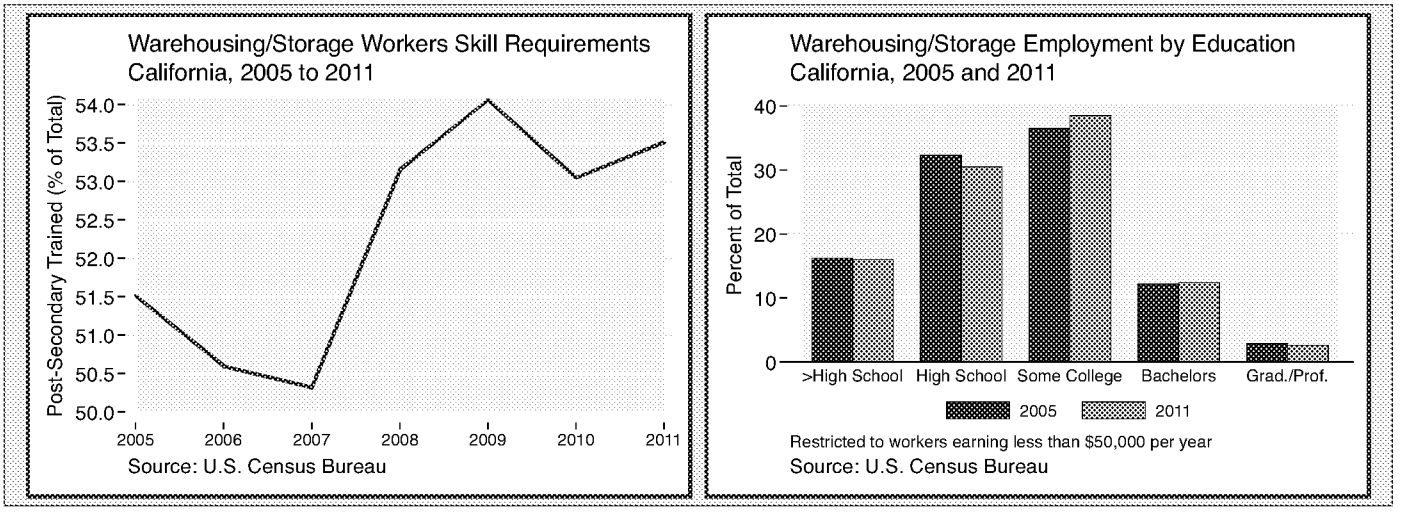




MV00251395

example, in 1990 warehousing and storage facilities represented just 0.2% of private-sector employment within the region. By 2012, that share had increased to over 2% of all private-sector jobs, thanks in large part to an explosion of this industry during the middle part of the last decade. Thus, not only is the level of employment within this industry growing, but this sector is also becoming increasingly concentrated within the regional economy.

Still, despite this surge in employment, real productivity has continued to rise—meaning that workers continue to become more productive. On average, each logistics worker in the Inland Southern California region generated roughly $53,000 of real (inflation-adjusted) output back in 2001. By 2010, the average output per logistics worker had increased to almost $62,000—a 16.9% increase. Indeed, with the exception of the Great Recession, when global exports and port traffic dropped significantly, this sector has averaged roughly 4% growth in worker productivity each year since 2001.



Overall, the quality of the jobs being offered by logistics companies is being affected by the trend toward increased labor efficiency and productivity. This is evidenced by the basic profiles of workers in the industry, who have in general become more skilled and more highly paid over the past few years alone. For example, even as recently as 2006, the level of educational attainment for workers in the logistics industry was fairly evenly distributed, with 49.4% of workers having a high-school diploma or less, and with 50.6% of workers having some form of post-secondary training (community college, vocational training, or college degree). However, the share of higher-skilled workers has increased consistently over the past few years; in 2011, nearly 54% of all workers in this sector possessed some form of post-secondary training.

Indeed, drilling down to specific levels of educational attainment underscores the trend toward higher-skilled workers, even for workers making under $50,000 per year. Logistics workers without a high school diploma have fallen to a share of 16% of all workers, compared with a peak of almost 17% of all workers. Similarly, workers with only a high school diploma represented roughly 30% of total logistics employment in 2011, down from nearly 34% in 2007. At the same time, the proportion of workers with some college or vocational training has increased, from just over 35% of all jobs in the industry in 2006 to 38.5% by 2011. The share of workers with a bachelor's degree has also increased marginally, while the proportion of workers with graduate degrees has remained relatively flat.

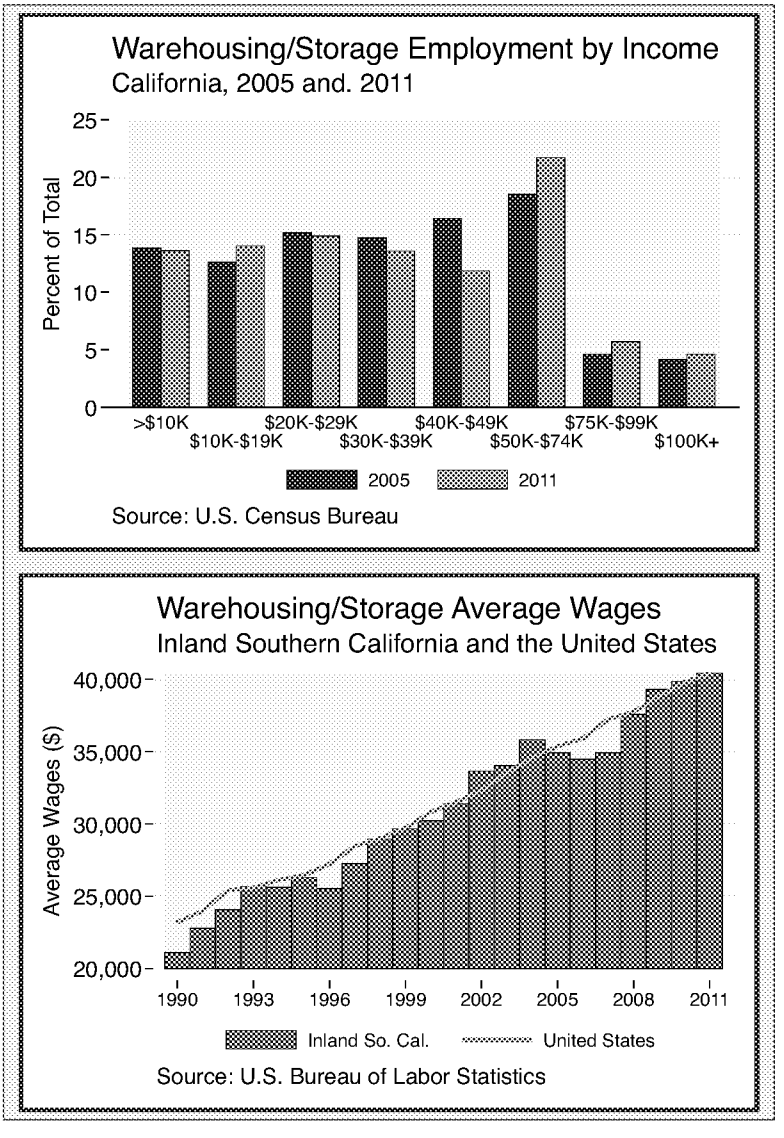
Thus, not only has the number of jobs increased dramatically since the turn of the century, but increasingly, those jobs are being filled by workers with a higher degree of skills and educational training than in the past. This highlights

MV00251396

the increasing quality of the jobs provided by the logistics industry despite the fact that the operations in question have become less labor-intensive in terms of the amount of labor required per square foot. And it is important to keep in mind that the sector overall has been growing—both in terms of output as well as employment. So even though each operation is more capital-intensive, there are more of these operations out there offering a larger quantity of jobs overall at a higher quality of employment.

Indeed, we see these trends in increasing productivity and skill requirements spilling over into higher wages for logistics workers. Overall, the share of logistics workers in California earning $50,000 per year or less has fallen from almost 73% of all logistics jobs in 2005 to just 68% by 2011, according to the 2011 American Community Survey. Stated another way, the percentage of logistics workers earning at least $50,000 per year has grown from 27% to 32% of employment within the sector. If we look at the data in more granular detail, we see that the percentages of workers earning $10,000 or less, $20,000 to $30,000, $30,000 to $40,000, and $40,000 to $50,000 have all fallen, while each of the higher income categories have seen their share of total employment increase.

Annual average wages for warehousing/storage workers are on the rise as well—they have nearly doubled since 1990. Indeed, the annual average wage of a warehousing/storage worker has increased from just $23,400 in 1990 to $41,400 in 2011. This 77% increase in wages over the 21-year period equates to roughly 2.7% growth in pay per year. This reflects both the increases in productivity and the shift in the share of workers with higher-skilled, higher-income jobs. Thus, in sum, this report finds that the number of jobs is increasing despite rising automation and increases in worker productivity. Logistics is becoming increasingly concentrated within the local economy. Moreover the quality of those jobs, as measured by training, shares of workers in higher income brackets, and rising wages, has increased significantly over the last 20 or so years.



Finally, it is important to point out that although logistics is primarily focused on the movement of goods and services, there is significant diversity in the types of jobs being offered in the industry. Roughly 52% of the workers in this sector are classified as having transportation and material moving occupations. These are the logistics worker that one typically associates with the industry, but nearly 48% of all

MV00251397

logistics workers perform some other job function outside of moving goods and materials. For example, office and administrative workers represent 26.5% of all jobs within the industry. Other higher-wage jobs include management (6.7% of all workers), installation/maintenance/repair (4.6%), business/financial/sales occupations (3.3%), and architects/engineers/computer/mathematical occupations (1%). Thus, while this sector does offer a significant number of jobs in the moving and handling of freight and goods, the mix of jobs within the logistics industry, including opportunities for high-wage employment, is significantly more diverse than one might expect. This helps to explain the rising educational training and skill requirements as well as the rising wages and incomes of Inland Southern California residents who work in logistics.

Table 12. California Employment in Transportation and Warehousing, 2011, and Outbound Commuters in Inland Southern California, 2011

Source: U.S. Census Bureau

Overall, the quality and quantity of logistics jobs are improving. With the expansion of the local industrial base as envisioned in the World Logistics Center, there is the opportunity for a variety of well-paying jobs within the region. Many of these jobs (roughly 48%) will involve non-logistics occupations in the business and financial side of the operation, providing solid wages and opportunities for future growth as demonstrated by historical trends. In addition, this project could help to harness some of the assets currently present within the region that have yet to be tapped into.

Inland Southern California is often thought of as a bedroom community—a significant portion of local residents commute outside the region for work each day. Indeed, according to the 2011 American Community Survey, roughly 75.7%

MV00251398

of residents work within Inland Southern California, while 24.3% are outbound commuters. The large number of outbound commuters represents a missed opportunity for the region to capture these skills by keeping employment local. Employing more residents within the region would cut down on road congestion and commute times, thereby helping to improve the quality of life for local residents and the community as a whole. Indeed, many of the outbound commuters are relatively high-skilled. The share of outbound commuters in high-paying occupations, such as architecture, engineering, computer science, and mathematical operations, reaches almost 40% of all residents—much higher than the economy-wide average for these occupations. By bringing the WLC project online, Moreno Valley will help to take advantage of the significant skill sets of residents in the region who currently have to commute to the coastal areas for work each day. Hence, this project will not only create a significant number of jobs but will also enable the broader Inland Southern California region to make better use of its existing assets—namely, its people.

Summary

Beacon Economics has performed an economic impact study of the effects of developing and operating a 41.6-million-square-foot logistics facility in the City of Moreno Valley. Overall, we find that both the city and Riverside County as a whole will enjoy significant benefits from the proposed project.

Our analysis includes two hypothetical scenarios: (1) the World Logistics Center will be a highly-automated and capital-intensive logistics center, and (2) the World Logistics Center will be built as a traditional logistics facility that relies more heavily on labor as inputs to its operations. Under either scenario, the city and the county will enjoy significant economic benefits. Initially, they will benefit from the one-time costs associated with outfitting the facility and equipping it for operations. Thereafter, the City of Moreno Valley and Riverside County will enjoy ongoing benefits from the continued operation of the facility once it reaches full occupancy.

Table 13. WLC Summary of Total Economic Impact

Impact Type	High-Tech Scenario		Traditional Logistics	
	One-Time	Ongoing	One-Time	Ongoing
Employment				
Direct	43,895	16,000	34,713	25,488
Total	59,018	22,645	46,138	32,201
Earnings				
Direct ($ Mill.)	2,306.5	968.5	1,816.4	1,033.0
Total ($ Mill.)	2,871.2	1,205.7	2,240.7	1,272.5
Output				
Direct ($ Mill.)	5,824.0	1,596.9	4,368.0	1,515.4
Total ($ Mill.)	7,762.1	2,370.9	5,822.1	2,300.8

Source: IMPLAN and Beacon Economics

Importantly, the quality and quantity of logistics jobs are improving, and this project provides the opportunity for a variety of well-paying jobs within the region. Many of these jobs involve non-logistics occupations that provide solid wages and opportunities for future growth. In addition, this project could help to harness some of the local assets in the region that have yet to be tapped into. By bringing the WLC project online, Moreno Valley will be able to take advantage of the significant skill sets of residents in the region who currently have to commute to the coastal areas for work each day. This project will create a significant number of high-quality jobs and will also enable the broader Inland Southern California region to make better use of its existing assets—namely, its people.

MV00251399

Finally, this project will introduce many knock-on benefits that will ripple through the rest of the local and regional economy. These benefits include an increased demand for goods and services throughout the economy, increased household earnings for workers at WLC and its suppliers, and increased state and local tax revenues. Ultimately, Beacon Economics concludes that the construction, development, and operations of the World Logistics Center in Moreno Valley will contribute very significantly to the local and regional economies.

MV00251400

About Beacon Economics

Beacon Economics is a leading provider of economic research, forecasting, industry analysis, and data services. The firm's internationally recognized forecasters were among the first and most accurate predictors of the U.S. mortgage market meltdown that began in 2007—and among a relatively small handful of researchers who correctly calculated the depth and breadth of the financial and economic crisis that followed. By delivering independent, rigorous analysis, Beacon Economics gives its clients the knowledge they need to make the right strategic decisions about investment, growth, revenue, and policy. The firm's clients span both the public and private sector, ranging from the California State Controller's Office to major universities to one of Wall Street's most successful hedge funds. Core service areas include economic and revenue forecasting, economic impact analysis, economic policy analysis, regional economic analysis, real estate market and industry analysis, and EB-5 Visa analysis. Visit Beacon Economics' website at www.BeaconEcon.com to learn more.

NOT TO BE PUBLISHED IN OFFICIAL REPORTS

California Rules of Court, rule 8.1115(a), prohibits courts and parties from citing or relying on opinions not certified for publication or ordered published, except as specified by rule 8.1115(b). This opinion has not been certified for publication or ordered published for purposes of rule 8.1115.

IN THE COURT OF APPEAL OF THE STATE OF CALIFORNIA

FOURTH APPELLATE DISTRICT

DIVISION TWO

CITY OF MORENO VALLEY, Plaintiff and Respondent, v. RADENE HIERS, Defendant and Appellant.	E056521 (Super.Ct.No. RIC1200952) OPINION

APPEAL from the Superior Court of Riverside County. Paulette Durand Barkley, Temporary Judge. (Pursuant to Cal. Const., art. VI, § 21.) Affirmed.

Radene Hiers, in pro. per., for Defendant and Appellant.

Orrick, Herrington & Sutcliffe, Michael C. Weed, Cameron L. Desmond, Bill W. Bothwell and Kevin Hale for Plaintiff and Respondent.

MV00251434

I

INTRODUCTION[1]

Radene Hiers, defendant, appeals the trial court's denial of her motion to set aside a default judgment (§ 473, subd. (b)) in a validation action brought by the City of Moreno Valley (City) under section 860 et seq. Hiers argues that she did not have to file a written response and that by personally going to the courthouse on March 5, 2012, the last response date, that she preserved her right to contest the validation action.

The trial court found that Hiers had actual notice of the validation action but she did not file a timely written response as required to contest the validation action. Hiers made no showing of legally excusable neglect or inadvertence. The trial court did not abuse its discretion by denying Hiers's motion for relief. We affirm the judgment.

II

FACTUAL AND PROCEDURAL BACKGOUND[2]

Hiers is representing herself in propria persona.

On January 10, 2012, the City adopted Resolution 2012-03, authorizing the City to enter into an installment sales agreement with the California Statewide Communities Development Authority (Authority) for a project for roadway improvements (the Project). The Project was to be financed by certificates of participation (Certificates).

---

[1] All statutory references are to the Code of Civil Procedure unless stated otherwise.

[2] Many of the facts are not essential to a resolution of the appeal but we present them here to give meaningful context to our analysis.

MV00251435

The City planned to pay for the Project by installment payments, not to exceed $20 million, with revenue from gas taxes and Measure A. The City found the subject transaction would have significant public benefits in the form of savings.

On January 20, 2012, the City filed a validation action in rem seeking approval of the subject transaction and all related proceedings. (§ 860.)

On January 24, 2012, the City made an ex parte application for an order for publication of summons in a newspaper of general circulation. (§ 861.) The court granted the order on January 25, 2012. The summons included notice that interested persons had to appear and file a written responsive pleading no later than March 5, 2012. The summons was published on February 3, 10, and 17, 2012. The summons was also posted in two locations from January 26, 2012, to February 25, 2012. As of March 6, 2012, no interested person contacted the City's attorney about the validation action. The foregoing procedure complied with sections 861 through 864.

In March 2012, the City filed a request for entry of default and an ex parte application for entry of a default judgment. The court granted the default judgment on March 21, 2012.

On April 9, 2012, Hiers filed a motion to vacate the default judgment on the grounds of inadvertence, oversight, and that "[p]laintiff's pleading is incomplete and inaccurate." The substance of Hiers's objections to the validation action, as set forth in her proposed answer and supporting declaration, was that a developer, Aquabella, was contractually obligated to pay for the proposed street improvements and the City should not bear the costs.

MV00251436

On April 23, 2012, Hiers also filed a motion for an injunction that was taken off calendar by agreement of the parties.

The City filed opposition, observing that Hiers offered no support for her claim of inadvertence and therefore she was not entitled to relief from default under section 473, subdivision (b). Furthermore, Hiers had attended the public hearing on January 10, 2012, and spoke in opposition to the Project. Therefore, she was on notice of the validation action.

In her reply, Hiers admitted knowing about the validation action because she attended the public hearing in January 2012. She also admitted going to the courthouse on March 5, 2012, but she admitted that she did not file an answer. The court clerk told Hiers there was a hearing in the case on July 25, 2012,[3] and Hiers believed she "did not have to file any paperwork until closer to" that date. On Wednesday, April 4, 2012, Hiers was surprised to learn about the default judgment. She filed her motion to vacate on Monday, April 9, 2012.

At the hearing on May 11, 2012, Hiers repeated her explanation about misunderstanding the legal procedures required to contest a validation action. The court found that Hiers had actual notice and she knew she had to file a response by March 5, 2012. Therefore, the court denied the motion to vacate.

---

[3] After the City properly obtained the default judgment, the case management conference date set for July 25, 2012, was vacated.

MV00251437

III

SECTION 473

Hiers asserts there are at least nine separate issues to be resolved on appeal, including the merits of the Project and the state and federal constitutionality of California's validation statutes and the financing mechanism of the validation action. Additionally, Hiers challenges the lower court's jurisdiction, its grant of the default judgment, and its denial of Hiers's motion to set it aside. Hiers disputes that the validation statutes require a written answer and instead she claims she preserved her rights by physically visiting the court on March 5, 2012.

We do not address these issues individually and instead focus on the key issue on appeal. In actuality, the only cognizable issue on appeal is whether, according a high degree of deference to the lower court, the trial court abused its discretion in denying Hiers's motion to set aside the default judgment after she failed to preserve her right to contest the validation action by filing a written response. (*Denham v. Superior Court* (1970) 2 Cal.3d 557, 564; *Solv-all v. Superior Court* (2005) 131 Cal.App.4th 1003, 1007.) It is particularly important that a judgment in a validation action be accorded certainty and finality. (*Friedland v. City of Long Beach* (1998) 62 Cal.App.4th 835, 842-843.)

In order to obtain relief under section 473, subdivision (b), Hiers had the burden of proof to establish her default was caused by mistake, inadvertence, surprise, or excusable neglect. (*Hopkins & Carley v. Gens* (2011) 200 Cal.App.4th 1401, 1410.) Hiers had to

MV00251438

show actual cause and an explanation for failure to respond by the mandatory deadline. (*Hearn v. Howard* (2009) 177 Cal.App.4th 1193, 1206.)

In her appellate brief, Hiers argues that she did not have to file a written response because the validation statutes do not require it and because she went to the courthouse on March 5, 2012, in order to make a response personally as opposed to a written answer. Hiers is wrong because she misreads the applicable statute, section 861.1, which expressly states a written answer is required: "The summons shall be directed to 'all persons interested in the matter of [specifying the matter],' and shall contain a notice to all persons interested in the matter that *they may contest the legality or validity of the matter by appearing and filing a written answer to the complaint* not later than the date specified in the summons, which date shall be 10 or more days after the completion of publication of the summons. [Emphasis added.]" Hiers is apparently relying on an older version of section 861.1–before it was amended in 1998, and when it did not refer to "filing a written answer." (Stats. 1998, ch. 529, § 1.)

Hiers may have relied on an invalid version of the validation statute but her error does not constitute mistake, inadvertence, surprise, or excusable neglect justifying relief under section 473, subdivision (b). As the court commented in *Community Redevelopment Agency v. Superior Court* (1967) 248 Cal.App.2d 164, 174-175: "'Ignorance of the law, at least where coupled with negligence in failing to look it up, will not justify a trial court in granting relief . . .' [Citation.] . . . To paraphrase the language of the court in *Evelyn, Inc. v. California Emp. Stabilization Com.*, 48 Cal.2d 588 at 591, the record in this case reveals no set of circumstances which would justify a

MV00251439

finding of good cause for the failure . . . to follow the procedural requirements of the pertinent sections of the codes, however honest [the] mistake may have been. As the court there said: 'A bona fide but mistaken belief that the law does not require a particular course of conduct does not constitute a good cause for a failure to comply therewith.'"

The record unquestionably demonstrates that Hiers knew about the validation action and had actual notice that a written answer was required by March 5, 2012. Showing up at the courthouse without filing a written notice did not preserve her right to contest the validation action. Her effort to blame court staff for giving her information about the date of the upcoming hearing on July 25, 2012, did not offer any valid excuse for not filing a timely written answer. The fact that Hiers did not obtain legal representation or advice is also not an excuse. (*Goodson v. Bogerts, Inc.* (1967) 252 Cal.App.2d 32, 40.) Under these circumstances, Hiers did not preserve her right to contest the validation action and the trial court did not abuse its discretion in denying Hiers's motion for relief from default. (*Hearn v. Howard, supra,* 177 Cal.App.4th at pp. 1207-1207.)

As we enumerate above, Hiers raises a myriad of other issues–none of which are material to the only pertinent issues involving the propriety of the default judgment. We are limited in the scope of review on appeal. Even if we could properly consider the validity of Hiers's other contentions we would not accept her additional arguments about the merits of the Project; the state and federal constitutionality of California's validation statutes and the financing mechanism of the validation action; and the lower court's

MV00251440

jurisdiction. In any event, the validation judgment is conclusive as to any issue that was or could have been adjudicated in the validation action. (§ 870.)

We note, however, the City is correct in its assertion that the last response date was correctly calculated as March 5, 2012, exactly 31 days after the first publication date of February 3, 2012. (§§ 861, 861.1; Gov. Code, § 6063.) Hiers incorrectly relies on section 415.50 to argue the last response date should have been March 19, 2012. Section 415.50 does not apply to validation actions which are governed by section 860 et seq. and Government Code section 6063.

IV

DISPOSITION

By not filing a timely written response to the validation action, Hiers did not preserve her right to contest the action (§ 861.1) and the trial court did not abuse its discretion by denying her relief. (§ 437, subd. (b).)

We affirm the judgment. In the interests of justice, we order the parties to bear their own costs on appeal.

Cross Street Info:	Alessandro Blvd
Parcel # (if available):	
	Resolution Information

Randall Metz, Fire Marshal, 5/15/13 Mr. Rahmon's parcel has been in the Fire Departments Hazard Reduction Program since 2009. In 2009, the parcel received an invoice for $574.00 ($183 contractor fees & $391 city fees). Fees for all parcels were recinded by Council in 2009 on the advice of City Attorney. Due to an address change of the owner, we received one returned mail item.

In 2010, notices were sent to Mr. Rahmon with no reponse and no returned mail. Owner received Statement of Cost letter for 2010 abatement in February of 2011 for $1379.50. He contacted fire prevention to appeal fees associated with tree trimming. An inspector met with him in March 2011 on site and they surveyed the property lines and determined that three trees he was billed for were on the property line of the adjacent parcel. Fees for these trees were remoeved from his invoice as well as disking throught the appeals process. Total fee reduced by $379 to $1000.50 ($596.50 contractor fees & $404.00 city fees). Inspector went over with Mr. Rahmon what needed to be done for the upcoming year to remain in compliance.

In 2011, Mr Rahmon abated his own parcel without city abatement and no returned mail.

In 2012, Mr. Rahmon did not abate his parcel and was billed for $921.04 ($510.24 contractor fees & $410.80 city fees). There was no returned mail. Mr. Rahmon contacted Fire Marshal in May 2013 to contest fees that had already been placed on the parcel through Public Hearing at April 23, 2013 Council Meeting. He was informed that his case was reviewed and fees were appropriate. Infomred him that the appeals process was stated on the Statement of Cost letter had passed.

He stated that he has never gotten any of the notices of violation. He does seem to get all of the statement of cost letters as it is then the he contacts us to complain about our process being unnecessary and feels that his parcel and the trees do not pose a risk to adjacent parcels. He has stated that fire needs to stick to putting out fires and not harrassing parcel owners of small parcels.

In 2013, after having phone discussions with Mr. Rahmon, Fire Marshal directed staff to send notices of violation for this parcel through Certified Mail. Mr. Rahmon acknowledged at May 14, 2013 Council meeting that he has recieved the letter and he will perform abatement. Awaiting followup inspection to confirm owner abated.

Issue: **Weed Abatement, Lot**

Council District:

City of Moreno Valley

Council Summary

5/17/2013 11:57:13 AM

Issue Description:	Please investigate Mr. Rahmon's issues on behalf of Mayor Owings, and advise Mr. Rahmon of the outcome. ***** Mr. Rahmon stated he has property on Wilmot, and the APN is 478171010. He stated every year he gets a bill for $1,000 for weed abatement, but he doesn't receive the letters stating he has to abate. In addition, he stated he gets charged for not trimming a tree, but it is actually his neighbor's tree.

Hi Tom,

In regards to your request of all the Major Donor Contributions Form 461 for Palm Communities, Ridge Property Trust and/or Dennis Rice from 2008-2012; there was only one filing (attached).

In regards to Highland Fairview 2007-2008, I do not show a Major Donor Contribution Form 461, although I did find contributions for 2010 & 2011 (attached).

Per our recent conversation, I have copied the Major Donor Contribution files as well as attached those files electronically. The photocopies will be brought over to you shortly.

If there is anything else, please let me know.

Thanks,

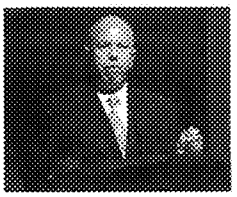
MORENO VALLEY: City manager's job on the line



BY [illegible]
STAFF WRITERS
May 10, 2013, 05:58 PM

As investigators sift through sealed documents and witness statements in a political corruption probe of Moreno Valley, the spotlight has shifted.

City Manager Henry Garcia's job is on the line.

The city council agenda for Tuesday, May 14, calls for Garcia's job performance to be discussed in closed session.

The dominos may tumble quickly. Two items on the agenda include his possible discipline, dismissal or release, and, finally, the appointment of a city manager.

Garcia came to Moreno Valley in January 2011 from a top administrative post in Rialto for a salary and benefits package worth more than $400,000 per year. He could not be reached for comment Friday, May 10.

Moreno Valley City Hall is closed Fridays. Mayor Tom Owings also could not be reached. The recording on his phone said the mailbox was full and could not take messages.

Council member Richard Stewart said he spoke to Garcia late Thursday, May 9, and learned that shortly before City Hall closed that day, Owings had put closed-session consultant on the agenda to review, monitor and replace Garcia.

Garcia's performance review had been delayed since February, Stewart said.

Stewart said Owings added the agenda items after meeting on hours testimony at the conference, before a federal grand jury probing political corruption in the city.

MORENO VALLEY: Kiss (of death) for city manager

Posted: [illegible]

Yo, understand Thursday night's production of the Mighty Merlot Council Players' latest box office smash in Conference Room A at Moreno Valley City Hall, the curtain finally fell on Freddy G. [illegible] fourth.

Freddy Gibbs has a [illegible] shootout dominating a ballot.

Merlot swings up to Tuesday night, when Merlot Mayor Tom Owings says City Manager Henry Garcia "deserving more raises, more perks, more you, Henry."

Councilman Councilwoman Victoria Reed: "We really appreciate you. You're a role model."

As Tom spoke, Victoria was cut off by [illegible] Freddy. Gangs have a sophisticated love instead of a bullet in their package. In exchange for his service, a modern workout.

The curious and wicked overlook of the city Council is just the latest installment in the fast-moving opera.

Tues., April 30: [illegible] turnout votes.

Wed., May 1: Owings crashes Mayfair grand jury.

Thurs., May 2: Beating a dozen accusers, Owings declares victory. Garcia, who has been in hiding, declines to comment. Owings' spokesman Steven Sandoval says Owings won't be seen outside because of continuing [illegible] threats.

But Council rumor mill [illegible] Garcia bopped Gwynedd's own Hemingway with lead in the air. A press release issued that very day, 14 days after a photo of Owings and Garcia shaking hands. You can't even see the knife.

Too cozy, Gwynedd's city is going a gogo? The FBI raided every elected's house -- but not the city manager's. What do Owings seen at the darkest joy room -- that Henry could sing? Did Henry put a Freddy?

Alas, Gwynedd's city won't talk about it. Having a good bye package soundbite "no disparaging comments" clauses, suggesting both outlaw have rocks of dirt on each other. If "Authorities" dig up anything maybe they'll go public.

What are we to assume right now? The wrong, unforgivable. No obvious good guys here. Just a cast of characters from the High School of Hard and Fast Rules or Council members bent on pressure only bringing thousands of jobs or a high-tolerance area in dividing a region with more expenditures, thereof trouble and cancer than it can handle.

MV00251458

Richard Stewart 460 Analysis

01/01/2008 06/30/2008

Shows cash balance increase of 417.64. Since there were no transactions, this should correspond exactly to the bank balance.

07/01/2008-12/31/2008

[illegible] Most increase in Cash of $580 due to the contribution box marked to the increase to cash box. States on Schedule A, Unknown error discovered over 1 year old. The only way this could happen is either intentionally failure to list a contribution or, somehow, failure to look at the bank statement when filling out the forms. Either way, it is a relatively large amount of money to be suddenly discovered after a year. His bank statements must have been showing $1062.64 if the statement is accurate. It is hard to state that kind of error, when there is no activity for 6 months.

01/01/2010-06/30/10

Another "suddenly discovered" error of $416.33. For all of 2008 he shows a cash on hand of $23.11. Again, did he fail to actually look at bank statements or what? For no activity, that is a lot of "errors".

07/01/2010-09/30/2010

Schedule A: $29.94 of an itemized monetary contributions of less than $200. That is a huge increase, not a good idea to accept cash for a campaign and is inadvisable/unwise of the type of campaign Stewart was running there wouldn't be no cash.

09/03/10 Donald Howard $260 checked OTN. How is this on "Other"?

08/26/10 Steve Hannon is not on "Other." $250

08/17/10 Nick Jones. Shows Calendar YTD of $250.00

Page 4 shows Nick Jones for $250, Page 5 shows Nick Jones for $250 and Page 7 shows Nick Jones for $250.00.

09/30/2010 Cash on hand $320.02

10/01/2010- 12/31/2010

Cash on Hand $583.30

Outstanding Debts $6083.78

10/27/2010-12/31/2010

[illegible] no explanation of what because of the $7083.78 Loan Balance but it was previously listed in the payments section where he paid $71 9552.56 although this is not clear.

Hi Cindy,

Here is the form for the sponsership that we discussed for my Pop Warner's upcoming season. Thank you for any assistance that the Mayor's office will be able to provide.

MORENO VALLEY POP WARNER
FOOTBALL AND CHEER

P.O. Box 7043
Moreno Valley, CA 92552

March 1, 2013

Dear Sir/Madam:

RE: MORENO VALLEY POP WARNER FUNDRAISING CAMPAIGN 2013

I am writing this letter on behalf of your local youth football and cheer association: *Moreno Valley Pop Warner*. Moreno Valley Pop Warner Football and Cheer (Association) has a long and rich tradition in our community of teaching youth the fundamentals of football and cheer with a strong emphasis on scholastic excellence! The Association Executive Board is committed to continue this mission in 2013 and beyond.

We need your financial assistance to meet our fundraising goal for 2013. The funds you provide will help us get the players and cheerleaders new equipment and equipment and training for our coaching staff, which is made up of only volunteers. Any financial support from your organization will go a long way and be greatly appreciated, no matter the amount! If financial support is not possible, we would appreciate other types of donations like gift cards or non-perishable items. The donations will help us with our fundraisers. ***More importantly, there are several ways in which your organization will benefit.***

First, we are a non-profit organization. Your donation may be tax deductible; please consult with your tax preparer for limitations. Second, if your organization makes a donation of one hundred dollars ($100) or more, we will put your company name or logo on one of our "Sponsor Banner" that will be displayed at each of our home games. However, if your donation is of five hundred dollars ($500) or more, we will make a 3' x 4' banner solely for your company and display it at each of our home games. Our games are well attended by parents, their friends and family members (your local customers) and an increasing number of spectators from the surrounding community. Your donation will provide you advertisement with your local customers and brand equity. Third, we will put your company's information on our web-site showcasing your contribution. Fourth, we will send your company a plaque at the end of the season – thanking you for your contribution! Fifth, if we produce materials like a newsletter, your company may be listed as a key sponsor. We hope that for all these reasons you will donate to the Association. Please see the attachment for a breakdown of the different levels of sponsorship and its benefits.

In closing, please remember that your donation will benefit the local youth with a positive experience that will last a lifetime. If you have any questions or wish to contact me, please contact me at 951.505.6286 or email: mvpw.pres@gmail.com. I'm very much looking forward to hear from you.

Sincerely,

Gabriel Lucero
President, Moreno Valley Pop Warner Football & Cheer

VIP Sponsorship – (Donation Value of $500.00 or more)
We will make you a Company Banner (3' x 4') and displayed at each of our home games and events,
We will display your Company Name on our web-site on our front page,
We will provide you with a Plaque of Appreciation to display at your company,
We will provide you with a Certificate of Appreciation.
Corporate Sponsorship – (Donation Value of $300.00 to $499.00)
We will feature your Company name or logo on (3' x 4') "Sponsor Banner" together with other corporate donors (no more than 4 Sponsors will be included per banner) and displayed at each of our home games and events,
We will display your Company Name on our web-site on our front page,
We will provide you with a Plaque of Appreciation to display at your company,
We will provide you with a Certificate of Appreciation.
Business Sponsorship – (Donation Value of $100.00 to $299.00)
We will feature your Company name or logo on (3' x 4') "Sponsor Banner" together with other business donors (no more than 10 Sponsors will be included per banner) and displayed at each of our home games and events,
We will display your Company Name on our web-site under our Sponsor section,
We will provide you with a Plaque of Appreciation to display at your company,
We will provide you with a Certificate of Appreciation.
Individual Sponsorship – (Donation Value of $50.00 to $99.00)
We will display your Name or Company's name on our web-site under our Sponsor section,
We will provide you with a Certificate of Appreciation.

Thank you for distributing the information to the city council. I would like for them to co-sponsor this community event if possible.

Denise

Region 19 Family Reunion Project

The purpose of the "Family Reunion" event is to bring the African American community together for educational purposes surrounding GOTV, voter registration, community outreach, community resources, establish a political database, and increase membership of each organization represented by the coalition. We are anticipating 100-200 guests. We want a fun experience.

The event is scheduled for August 31, 2013 at Celebration Park from 10:00 a.m. to 2:00 p.m. There will be a stage area available in the park for entertainment and focus purposes. The entertainment will be informational speakers:

Local Politicians
Local Pastors
Local Dignitaries
Social Services
African American Caucus
Business Owners
National Congress Negro Women
National Council Black Women
National Association for the Advancement of Colored People
Cops and Clergy Representatives
Area Fraternities/Sororities
Young Black Contractors Association
Local DJ

Free food and drinks will be offered, however, we are encouraging families to bring their own food and park recreational items. No vendors are allowed.

For more information or to co-sponsor please contact Black Caucus Regional Director 13, Denise Fleming at [redacted] or Director over RDs, Renea Wickman at [redacted]

Coalition For Neighborly Respect, Relationships, Help and Love

N

R

R

H

L

Our Mission

To go door to door and block by block to encourage, empower, and unite parents, youth, and neighborhoods, with a goal to establish neighborly respect, as well as, work to develop relationships that are centered towards providing help and love to one another. provide help and love to one another.

Our Vission

That we will be able to turn fear into love once we help people realize that we do not have to stand alone in our struggles, and that many needed resources can be found next door or down the street if we reach out to each other and develope relationships through respect and love . We believe that once Gods call to "love your neighbor as your self" has been set on fire in Moreno Valley it will spreed throughout California and the United States.

P.S.P.

Success is not based on an outcome.
Success is continous and is a product of perseverance.
Peace, and simplicity are what allow you to keep going.

To Whom It May Concern:

On September 14, 2013 we will be sponsoring our first annual Walk-a-thon, to raise money to organize a coalition for **N**eighborly **R**espect, **R**elationships, **H**elp and **L**ove (**NRRHL**) in the city of Moreno Valley.

Starting in June we will be going door to door asking people to take the **NRRHL** Pledge and join us in a four (4) mile Walk-a-thon. The funds from this walk will be used to further unite the community by organizing neighborhood "get to know you" events, family orientated dances, and formal dinners. We will have regular meetings with parents, youth, local businesses, and schools to establish real life solutions while using Godly principles to bring **N**eighborly **R**espect, **R**elationships, **H**elp and **L**ove back to our neighborhoods, families, and community.

We need your support and would appreciate any basic resources or monetary donation you can provide. All contributions are tax deductable. We are also requesting that you allow us to put a **NRRHL** poster in your place of business.

The Walk-a-thon and coalition is currently being sponsored by Church Of The Heart Christian Outreach Ministries. With your support and permission we would be honored to add your name to our list of sponsors.

Hello Mayor Owings,

I wanted to provide you with an update on my contact with Pastor Mark from Victory Outreach.

- Victory Outreach has about 10 churches on board for the March. The Pastor is happy with that number.
- The permit process is nearly complete - staff has the necessary documentation and application, so there is no reason to believe there will be a permit issuance problem.
- The announcement was sent to the Sunnymead Blvd. Business group that was created from the meetings last month since it will be held in their area.
- We have slated the event be listed on the Community Calendar, MVTV3 bulletin board, and included in the soon to be released CityLink (the e-newsletter). Additionally, we will send out the announcement to our general Constant Contact group.

I left my direct line with Pastor Mark in the event that he has any questions or runs into any obstacles.

Please let me know if I can do anything else to help or if you have any questions!

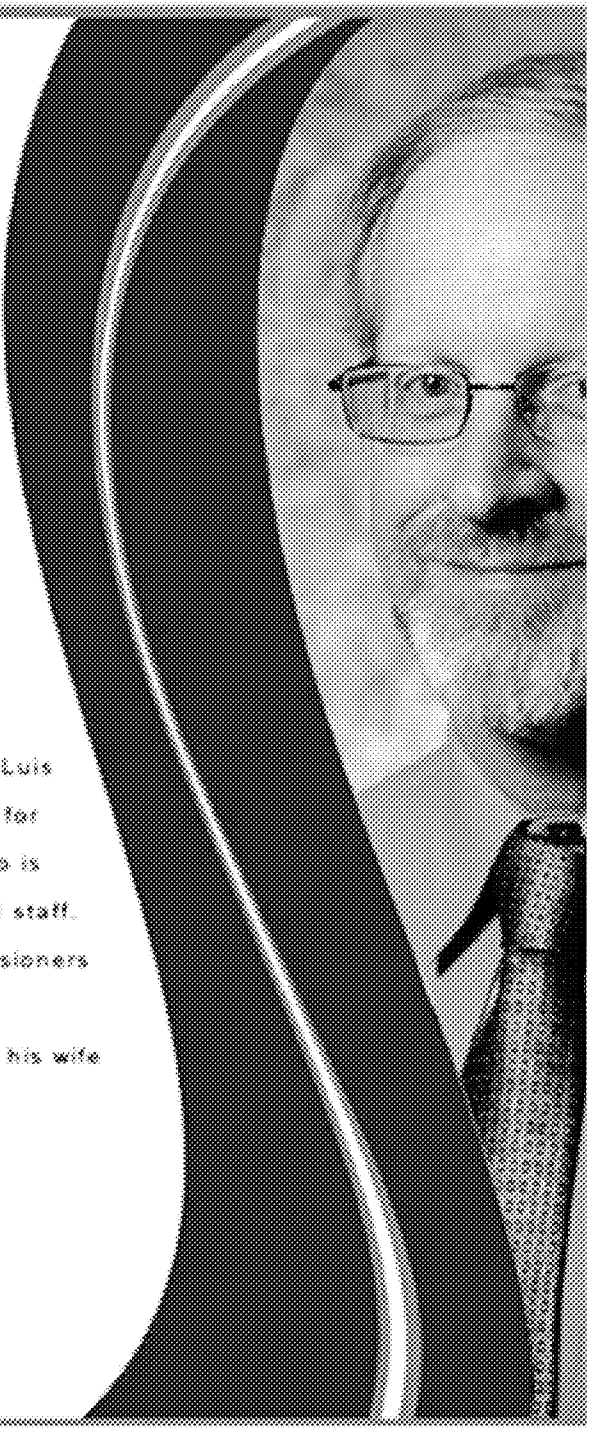
CONGRATULATIONS JOHN TERELL



Congratulations are in order for Planning Official John Terell as he assumes the position of Interim Community and Economic Development Director effective immediately.

John has worked for the City for 23 years and has been the Planning Official since 1995. During his tenure with Moreno Valley John has also worked in Economic Development, Redevelopment, and Neighborhood Preservation.

He has a degree in City & Regional Planning from Cal Poly San Luis Obispo and is the President of the Riverside Chapter of Habitat for Humanity. We know John to be an extremely capable leader who is personable and cares deeply about the City, our customers, and staff. John is well respected by the City Council and Planning Commissioners and his wealth of knowledge about our community and the City organization will serve him well in this new endeavor. John and his wife Kim live in Redlands and he has one stepson, Basil.

Subject: Jose Chavez arrest

Good morning,

Just a heads up. Mr. Chavez was cited at the DUI checkpoint last night. He attempted to bait the officers into forcibly removing him from his car, but they did not take the bait.

Instead, they artfully negotiated with him and got him to exit his vehicle voluntarily. His license is suspended, but he had not been officially notified of the suspension. Officers issued him a citation for the lesser violation of driving without a license, provided him with official notice of his suspension, gave him a ride home, and allowed his family to retrieve his vehicle.

Initially he was demanding to be arrested and that we impound his car for 30 days. Officers followed the law and declined both demands. If Mr. Chavez is caught driving now, his vehicle could, and should, be impounded for 30 days.

I suspect this will be additional fodder for him at future council meetings. I am told much of it was recorded by lapel camera. Should be interesting.

Oh, and my troops made 13 DUI arrests during the checkpoint...

Joel

Cindy Miller wrote:

Hello Mayor Owings,

I wanted to provide you with an update on my contact with Pastor Mark from Victory Outreach.

- Victory Outreach has about 10 churches on board for the March. The Pastor is happy with that number.
- The permit process is nearly complete - staff has the necessary documentation and application, so there is no reason to believe there will be a permit issuance problem.
- The announcement was sent to the Sunnymead Blvd. Business group that was created from the meetings last month since it will be held in their area.
- We have slated the event be listed on the Community Calendar, MVTV3 bulletin board, and included in the soon to be released CityLink (the e-newsletter). Additionally, we will send out the announcement to our general Constant Contact group.

I left my direct line with Pastor Mark in the event that he has any questions or runs into any obstacles.

Please let me know if I can do anything else to help or if you have any questions!

Subject: 4th of July Parade

Please advise if you will be participating in the 4th of July Parade.

==========

The City of Moreno Valley's Annual Independence Day Parade will take place on Thursday, July 4, 2013, and this year's theme is *A Tribute to Stars and Stripes*. A VIP continental breakfast will be provided at 8:30 a.m. The Honor Guard, which will lead the parade procession, will step off promptly at 9:30 a.m.

In order to ensure there is appropriate signage for your vehicle, please RSVP as soon as possible. When you respond, please provide information regarding the vehicle and the name of your driver for the parade. Final details and a parade route map will be provided to you if you are able to join us.

Thanks,

Cindy

Subject: Mildred Hudspeth [redacted]

Ms. Hudspeth resides at 16259 Parkside Lane (District 4). Ms. Hudspeth stated Moreno Valley doesn't have anything to offer its residents. She stated there isn't a courthouse in Moreno Valley, and citizens have to go to Riverside to go to court (she is aware of the courthouse on Heacock). She stated Jurupa gives away free dog food at the dog shelter and there are no free clinics. She stated she works helping people find jobs, and she doesn't see why a person with a non-violent felony can't work at a recycling center. I explained to Ms. Hudspeth many of the things she referred to do not fall under the realm of the city. I explained there are free clinics held throughout the year where they provide blood pressure and diabetes screenings, dental/optical information, fitness, etc. Ms. Hudspeth stated she wasn't aware of any. I also explained the financial issues the city is facing, and she still stated Moreno Valley doesn't offer enough free things to citizens.

Parcel # (if available): 474230010

Resolution Information

4/23/13 - Response from Brian Durfee, Street Maintenance Supervisor:

We received a claim for damages in December of 2012. A request for service was previously received in our office on October 3, 2012. John Baioa, M&O Tree Trimmer, responded the same day to the location and determined that this portion of Kalmia is a public street and the tree is within the right-of-way. John informed Ms. Cuevas that the branch would be removed the following day. The work was completed on October 4, 2012. It should be noted that the damage was caused when a tree branch broke due to wind damage; the damage did not occur during the removal of the branch by M&O. No prior request for service was found in the records.

It appears Southern California Edison had previously topped the tree due to its close proximity to the power lines. This practice has a tendency to make the trees grow outward instead of upward creating heavy growth of the branches.

Since we believe that Southern California Edison (not Verizon) trimmed the tree, we contacted Ms. Cuevas on May 7, 2013, and provided her with telephone number to the claims department for Southern California Edison. Ms. Cuevas was appreciative of the help received in this matter.

	Case Information
Issue Category:	Maintenance & Operations
Issue:	**City Trees**
Council District:	3
Issue Description:	CRM created for M/O to finalize so that response will go through the workflow to the Council office 4/17/13: Ms. Cuevas emailed Mayor Owings: I am writing to you in hopes of some clarification as to a policy of the City of Moreno Valley. A few months ago a branch from a tree (outside of my property line) come down on my fence. I called the City of Moreno Valley and a crew was sent out. When the gentlemen removed the branch from on top of the fence it had caused some damage. They told me that we would have to file a claim with the city of Moreno Valley to have it repaired. I contacted the City of Moreno Valley (after my claim was denied) and their response was that, the tree was last trimmed by Verizon. I was told that I had to go after Verizon in order to get my fence repaired. I have had the hardest time trying to communicate with this company whose Claims Office is in Florida. I need someone to help me with this matter. I do not feel that what is happening to me is fair. Why do I have to be the one has to chase down Verizon in order to have this matter resolved? If the tree had been on my property and I had allowed Verzion to come in and trim it that would be understandable however, the tree sits on city property and the City of Moreno Valley allowed Verzion to do the trimming. I would really appreciate any help with resolving this matter. Respectfully, Gloria Cuevas 26731 Kalmia Avenue Moreno Valley, CA 92555

Michelle:

We will start next Monday. I will let you know the dates Barney Melekian comes there to talk with each City rep. We will draft the letter to them all the beginning of the week so it can go out mid-week, in preparation for his meetings.

Can you send me a list of the cities the Mayor wants to involve in the discussion, with the names of their Mayor's and City Managers? That will be helpful to Barney.

We'll be more specific on Monday. We should be able to pick a date for the meeting by mid-week, as well.

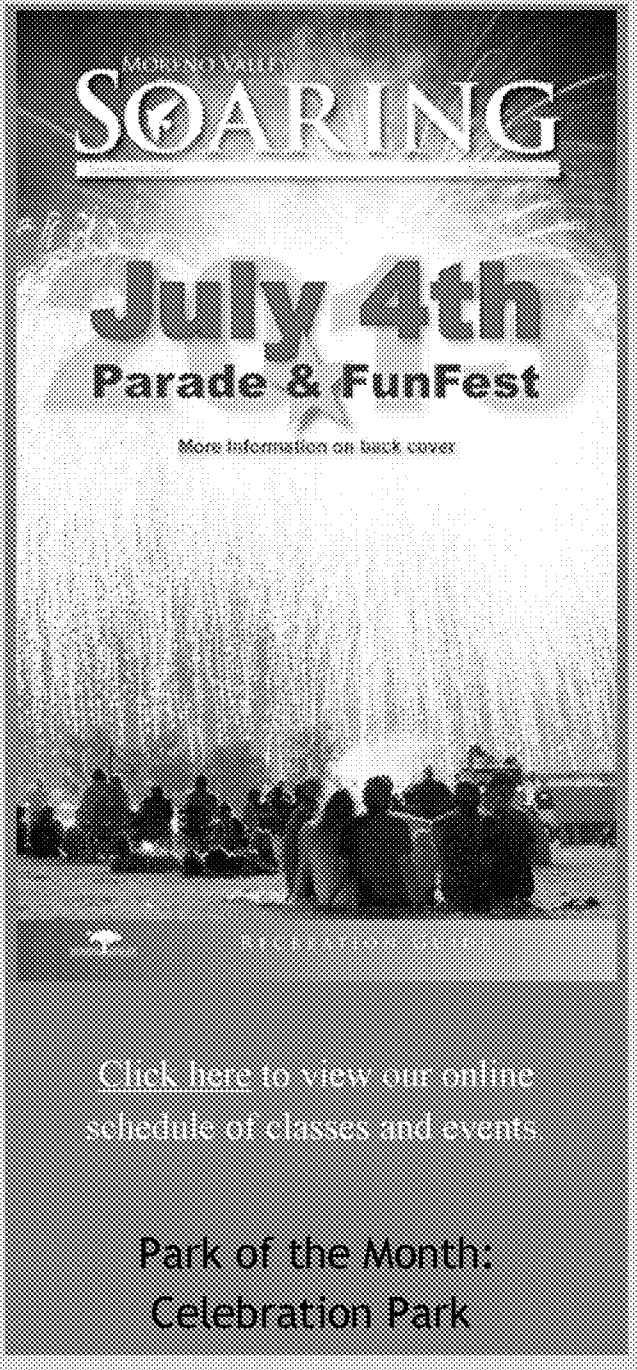
Budget Proposal

This year's proposed City General Fund budget is significant because of the deficit that has persisted for several budget cycles. The extended economic recession continues to produce shortfalls in revenues, plus the cost of providing services continues to rise, leading to the erosion of City services available to the public. The ongoing deficit represents a fiscal crisis that must be dealt with by significantly reducing expenditures.

The City Council recently hosted Neighborhood Budget Meetings



Click here to view our online schedule of classes and events.

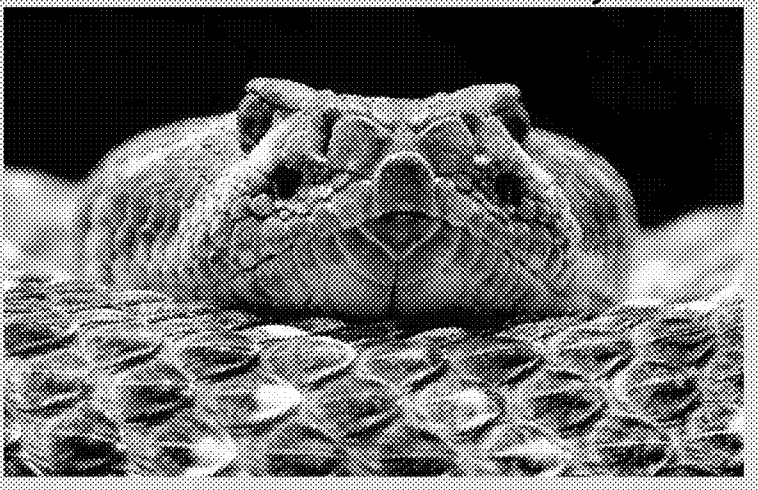
Park of the Month: Celebration Park

in each Council District, where the General Fund and proposed Capital Improvements were discussed. These meetings were videotaped and posted to the City's website: www.moval.org. One more Neighborhood Budget Meeting is being scheduled for residents who missed the earlier meetings. Please join us.

Date/Time: Monday, June 3, 2013 at 7:00 p.m.
Location: Box Springs Mutual Water Company headquarters
21740 Dracaea Ave
Moreno Valley, CA 92553

The City Council will consider the proposed budget at their June 11 Council meeting. Please join us at City Hall at 6:00 p.m.

Snake Awareness: Family



Spring is here! The days are getting longer, the temperatures are getting warmer, and many different animals are coming out of winter hibernation. One in particular, is the rattlesnake.

After a long winter in the den or burrow, snakes are active and in search of food as the temperatures rise. Now is the time to raise awareness levels and pay close attention when outdoors during this spring season.

What do I do if I see a snake?

Walk! Do not run away from the snake. Take two steps backward and watch where the snake goes, then calmly turn around and leave the snake alone. Contact a professional to remove the snake. Do not kill the snake. take a picture so that a professional can provide you with positive identification.

What should I do if bitten by a snake?

- Call 911 and seek medical attention immediately.
- If you know the snake is venomous, remove any constricting jewelry, watches, clothing, etc.
- Keep the injured limb still as you would a strain or break.
- Clean bite area thoroughly (however, do not suck the venom from bite)
- Do not apply ice, do not use a tourniquet, and never cut

Opened on April 29th
Only closes during bad weather
or for repairs

on the fang marks.

Spring and summer is the best time to be outdoors enjoying the season, which is also the best time to be aware of the possible presence of wildlife animals, especially snakes. There have been a recent number of positive snake sightings in Moreno Valley, so the more you know and are aware, the better prepared you will be to deal with an encounter.

West Coast Thunder

The City of Moreno Valley proudly welcomed the annual West Coast Thunder Memorial Day Bike Run/ Parade during it's ride on Moreno Valley's Sunnymead Boulevard on Monday, May 27th.

Moreno Valley residents honored the fallen heroes of the U.S. Armed Services by enjoying the morning West Coast Thunder Bike Run/ Parade and at the annual Memorial Day Ceremony at sunset. Residents came out early Memorial Day Monday, May 27th to line up along the south side of Sunnymead Blvd. from approximately 9:30 a.m. to 11:00 a.m. to became a part of this new tradition.

Then, at sunset, residents attended a special ceremony held at Moreno Valley's Veterans Memorial in the Civic Center (14177 Frederick St., Moreno Valley 92552).

For information about West Coast Thunder, please visit www.westcoastthunder.com.

June 21, 2013 -
Soulsomatik (Motown)

Fridays from 6:00 – 7:30 p.m. at Townsgate Memorial Park, 13053 Ellsworth St. Bring your dinner, blankets, and lawn chairs and prepare to party as we pay tribute to a variety of music.

FREE ADMISSION
For more information call 413-3280

Movies in the Park

Wildfire is coming... Are you ready?

Take personal responsibility and prepare long before the threat of a wild land fire so your home is ready in case of a fire.

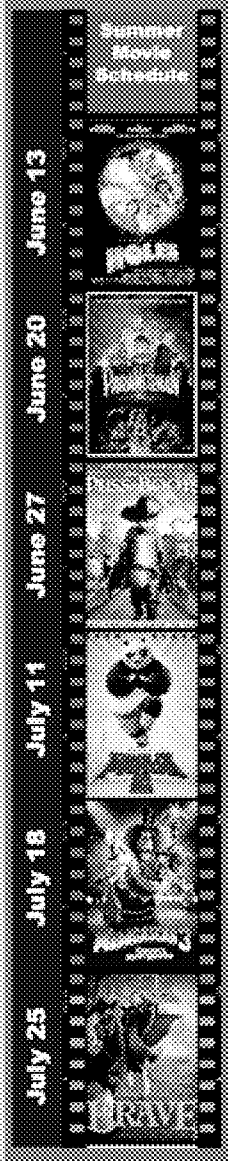
Defensible space is the buffer or area you create between a building on your property and the grass, trees, shrubs or any wildland area that surrounds it. This space is needed to slow or stop the spread of wildfire, while it also protects your home from catching fire from either direct flame contact or radiant heat. Defensible space also protects the firefighters that are defending your home.

For more information about Wildfire Readiness, check out this website.

Energy Audit and Direct Installation Program for Small Commercial Customers

Moreno Valley Utility (MVU) is offering a new energy efficiency program for their small commercial customers to help them lower electricity costs.

This summer, MVU will be conducting energy audits and installing energy efficient products such as lighting, programmable thermostats, and weatherization seals at no charge to commercial customers. This program is being offered through a partnership with Richard Heath and Associates (RHA), who assists utilities across the state in providing energy efficiency programs for customers.



Bring your beach chairs and blankets for family-friendly movies on Thursdays this summer at the Conference & Recreation Center, 14075 Frederick St. Space is limited, so join us early to ensure your seat.

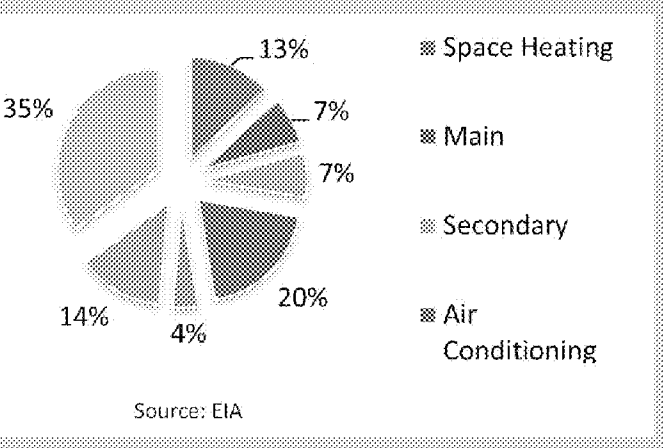
All movies start at dusk. Bring a picnic dinner & a blanket and enjoy pre-show activities.

In the interest of everyone's safety, be aware: No umbrellas, no pop-ups and no alcohol.

For more information, contact: 413.3280.

*Movie selection is subject to change.

Father's Day Pet Adoption



RCRMC Garden Tour

Moreno Valley's own Riverside County Regional Medical Center was the beneficiary of the RCRMC Foundation's Spring Garden Tour. Hosted on Saturday May 4th, the Garden Tour featured five beautiful and unique private gardens. This tour has become an event favorite for local gardening enthusiasts. The tour included a delicious lunch served in one of the featured gardens.

The goal of the RCRMC Foundation's Spring Garden Tour is to benefit the Child Abuse and Neglect (CAN) Unit at RCRMC. This unit provides a much needed service to the children of Moreno Valley and Riverside County. The CAN Unit's dedicated team members and staff show extraordinary care, concern and positive nurturing while providing help to these innocent victims.

There are many ways to partner with the RCRMC Foundation and make a difference. For more information or if you would like to make a donation, and/or volunteer to help, please contact the RCRMC Foundation office at 951.486.4213.

Holiday Closure

Kaiser New Medical Building

On Thursday April 25, Kaiser officials hosted a grand opening reception to show off the new Kaiser Permanente medical office building, located at 27200 Iris Avenue-right next door to the Kaiser's Moreno Valley Community Hospital. The City congratulates Kaiser Permanente for implementing green building technologies and welcomes the following services:

- Internal Medicine
- Obstetrics-Gynecology
- Outpatient Pharmacy
- Additional Office Space for Kaiser Physicians

City staff is also reviewing plans for a 12,000 sq.ft. dialysis center, coming soon adjacent to the Community Hospital.

Citywide Camera Surveillance System

The Citywide Camera Surveillance System project has made significant progress. Below are some of the highlights of the project thus far and the upcoming milestone.

1. 247 cameras have been installed throughout the City either in buildings, at intersections, or in parks.
2. 67 cameras have Pan-Tilt-Zoom capabilities.
3. 180 cameras have fixed lenses, 48 of these cameras existed previously and are being incorporated into the new system
4. 51 intersections have cameras installed on a traffic signal pole.
5. Eight parks have cameras installed.
6. Agreements with private businesses expand camera surveillance capabilities.
7. MVPD has established ten Radio Relay Locations
8. Upcoming Milestone: Complete integration with Sheriff's Dispatch Center via County network.

Charter City

Moreno Valley was incorporated in 1984 as a general law city. General law cities operate according to the State's Government Code. Alternatively, many cities incorporate by charter. Currently, of the 468 cities in California, 83 are charter cities.

A charter is a unique document that, in many ways, acts like a constitution for a City and it allows greater authority for a city's governance, independent of the State Legislature. Cities adopt charters that take into account the unique local conditions and needs of the community. When drafted, a charter must be approved by a majority vote of the represented population.

Moreno Valley's City Council is drafting a charter for our voters' consideration. To maximize participation by our residents, the drafts are published on the City's website.

Click here to review and comment on the drafts.

after 6 p.m.

Come out early to the Family FunFest and enjoy the bands, food, arts and crafts booths, jumpers, petting zoo and pony rides.

Visit www.moval.org for more information on Moreno Valley's 4th of July event.

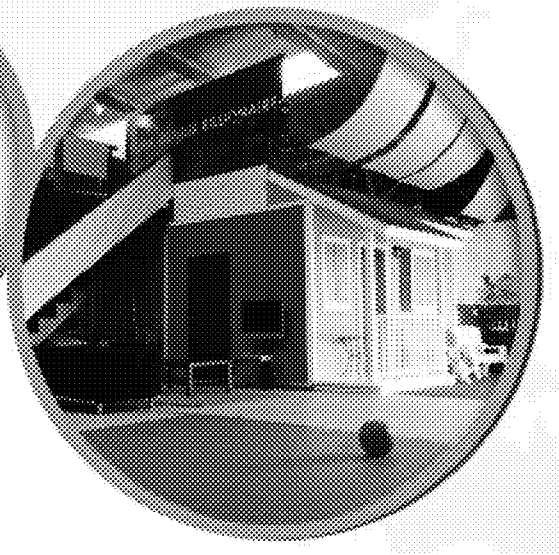
Moreno Valley Black Chamber of Commerce, Small Business Mixer & GO Initiative Pre-Launch Event

Remember to bring a gift for the raffle!
($30 and under)

- Live Music
- Delicious food and drinks provided
- Prize Raffle
- New Membership Plaques
- Sponsorship Awards

Join the Moreno Valley Black Chamber of Commerce as we celebrate the pre-launch of the Get Online Initiative at our monthly mixer, hosted by LinkU Web Design of Corona.

June 6th, 2013
5:30pm - 7:30pm



There will be introductions, awards and a brief introduction on the new GO Initiative program and new benefits soon to be available to MVBCC members. New members are encouraged to attend and receive their plaques along with renewing members to receive their labels.

About the GO Initiative

The Get Online (GO) Initiative was designed to help educate and inform small business owners about the importance of getting their business online. Through a series of free seminars and one-on-one informational sessions, the GO Initiative works with the local community to promote awareness of internet marketing solutions, and pilot small business through an ever evolving technological world.

Subject: Silence Aloud - Search Light Group Home Ribbon Cutting

Hi Cindy,

We would like to invite the Mayor and/or another City Council representative to attend and say a couple of word at the ribbon cutting for our new program (see description below). The event will be held as follows:

Location: Search Light Group Home
14579 Lynn Lee Lane
Moreno Valley, CA 92555
(cross street is Nason & Cactus)

Date: Tuesday, 6/18/13
Time: 12:00pm

We will be doing a more formal invitation along with the Chamber but I wanted to see if we could get one of the Council members scheduled to attend this event. Please let me know how things look for Council. Thanks.

Description

"Silence Aloud is a 501c3 non-profit organization dedicated to providing housing, foster care, advocacy and support in all forms necessary for children, adolescents and young adults who are victims of abuse, whether physical, emotional, sexual or substance related. The organization's newest program in Moreno Valley, is Search Light Group Home, a state licensed residential treatment facility for young males ages 13-17 with substance abuse related issues and histories of abuse and/neglect. The program provides therapeutic mental health treatment, substance abuse prevention, and life skills training in a compassionate and nurturing home environment."

Address to U.S. Attorney

Dear _____:

The purpose of this letter is to respectfully request that the U.S. Attorney's Office conduct, complete, and reveal the results of the current investigation pertaining to Moreno Valley as expeditiously as possible.

While faced with many challenges, the City of Moreno Valley is making great strides to right our fiscal ship and even enhance some City programs and services that are critical to our community. The specter ofyour Office's investigation places our forward progressseverely at risk.

It is our understanding that the U.S. Attorney's Office is conducting a sweeping review in western Riverside County, and perhaps beyond. Until your Office concludes its review of matters pertaining specifically to Moreno Valley, however, this City's progress is severely obstructed…at a crucial point when key stakeholders are relying on our ability to chart a course for our community's future.

Until the U.S. Attorney's Office announces its findings pertaining to the City of Moreno Valley:

- Our residents are left with significant questions about the integrity of their elected leaders. And, really,who could blame them?Homes of the neighbors they elected to represent them were raided by armed agents, and nearly every newspaper article regarding the City restates that investigators seized items and documents from each of us…back in April. The absence of updated, specific information regarding your Office's findings continues to undermine residents' confidence in their local government and its credibility in making decisions on their behalf.

- Development interests, whose investment in our communityis essential to our long-term sustainability, are actively considering other locations over their concern that Moreno Valley is under a cloud related to your Office's pending investigation. We have balanced our budget, we are addressing

key public safety and infrastructure needs, and we are partnering with educational leaders to create a positive future for future generations. Creating jobs and broadening Moreno Valley's economic base, however, require private sector investment. Since announcement of your Office's investigation, our Mayor, Council and City staff have spent countless hours attempting to reassure private investors that this City and its residents remain worthy of their confidence. Delays in announcing your Office's findings will cause irreparable harm to the future of our community, possibly for decades to come.

- City employees, who have firsthand knowledge regarding the sound, ethical daily operations of our public service organization, are unjustly seeing their own actions questioned by those who would inaccurately characterize the City of Moreno Valley as "corrupt." This is not the City of Bell, yet continued delays in your Office's announcement of its findings related to our City subject us to continued comparisons to a community whose leaders violated their community's trust by engaging in criminal acts.

We understand the complexity of the regional investigation your Office has undertaken. Your staff must sort through facts associated with numerous agencies, public officials and private citizens. But we collectively send this letter to ensure that your Office grasps *the profound impact that delayed announcement of findings will continue to have upon our City and its nearly 200,000 residents.*

Our community's future hangs in the balance. United, this City Council calls upon the U.S. Attorney's Office to announce its findings related to the City of Moreno Valley without further delay.

Respectfully,

Tom Owings, Mayor

Marcelo Co, Mayor Pro Tem

Jesse Molina, Councilmember

Richard Stewart, Councilmember

Victoria Baca, Councilmember

Subject: Recap of June 3 WRCOG Executive Committee Meeting

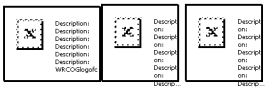
Attached is a summary of actions/activities from the June 3 WRCOG Executive Committee meeting for your information and use in sharing with colleagues and others.

Regards, Rick

Rick Bishop
Executive Director
Western Riverside Council of Governments

4080 Lemon Street
3rd Floor, MS 1032
Riverside, CA 92501-3609
[redacted]

"Respect Local Control...Provide Regional Perspective"



Western Riverside Council of Governments
Executive Committee Meeting Recap
June 3, 2013

HERO Residential Program update

Total HERO Financing approved:	$192+ million in residential
Total applications approved:	6,800+
Completed projects:	2,800+
Completed projects funding:	$49+ million

TUMF Program revenue status

Total TUMF revenues to date:	$570.3 million
Total TUMF revenues FY 12/13:	$18.5 million

The Executive Committee approved number of TUMF Reimbursement Agreements as follows:

1. With RTA in the amount of $159,359 for the Hemet Transit Center Project;
2. With RTA in the amount of $75,000 for the Perris Transfer Nodes Project;
3. With RTA in the amount of 319,403 for the San Jacinto Transfer Stations Project
4. With the City of Eastvale in the amount of $250,000 for the Hamner Avenue Bridge Project

The 2012 TUMF Program Annual Report is completed: The annual report provides information regarding the development of the TUMF Program, fiscal year and cumulative revenue collection by jurisdiction and land use type, a recap of completed projects and a status on projects underway by TUMF zone, by RCTC, and by RTA. Copies of the 2012 Annual Report will be printed and distributed to jurisdictions, agencies and other interests in June, or can be downloaded from the WRCOG website at www.wrcog.cog.ca.us

The Agency budget for Fiscal Year 2013 / 2014 approved: The draft Agency budget was approved by the Executive Committee and will be transmitted to the WRCOG General Assembly for consideration on June 13. The budget proposes overall Agency expenditures of approximately $4.5 million, with revenues projected at $4.85 million for the year. Overall, revenues are projected to exceed expenditures by approximately $350,000 for the year.

The Executive Committee welcomed Ike Bootsma, Mayor of the City of Eastvale, as the City's new representative to WRCOG.

The Executive Committee recommended the following slate of candidates to lead WRCOG during the next fiscal year;

Chair:	Supervisor Jeff Stone, County of Riverside
Vice Chair:	Councilmember Randon Lane, City of Murrieta
2nd Vice Chair:	Councilmember Brian Tisdale, City of Lake Elsinore

These recommendations will be forwarded to the General Assembly for consideration on June 13.

Date

Address to U.S. Attorney

Dear _____:

The purpose of this letter is to respectfully request that the U.S. Attorney's Office conduct, complete, and reveal the results of the current investigation pertaining to Moreno Valley as expeditiously as possible.

While faced with many challenges, the City of Moreno Valley is making great strides to right our fiscal ship and even enhance some City programs and services that are critical to our community. The specter ofyour Office's investigation places our forward progressseverely at risk.

It is our understanding that the U.S. Attorney's Office is conducting a sweeping review in western Riverside County, and perhaps beyond. Until your Office concludes its review of matters pertaining specifically to Moreno Valley, however, this City's progress is severely obstructed…at a crucial point when key stakeholders are relying on our ability to chart a course for our community's future.

Until the U.S. Attorney's Office announces its findings pertaining to the City of Moreno Valley:

- Our residents are left with significant questions about the integrity of their elected leaders. And, really,who could blame them?Homes of the neighbors they elected to represent them were raided by armed agents, and nearly every newspaper article regarding the City restates that investigators seized items and documents from each of us…back in April. The absence of updated, specific information regarding your Office's findings continues to undermine residents' confidence in their local government and its credibility in making decisions on their behalf.

- Development interests, whose investment in our communityis essential to our long-term sustainability, are actively considering other locations over their concern that Moreno Valley is under a cloud related to your Office's pending investigation. We have balanced our budget, we are addressing

key public safety and infrastructure needs, and we are partnering with educational leaders to create a positive future for future generations. Creating jobs and broadening Moreno Valley's economic base, however, require private sector investment. Since announcement of your Office's investigation, our Mayor, Council and City staff have spent countless hours attempting to reassure private investors that this City and its residents remain worthy of their confidence. Delays in announcing your Office's findings will cause irreparable harm to the future of our community, possibly for decades to come.

- City employees, who have firsthand knowledge regarding the sound, ethical daily operations of our public service organization, are unjustly seeing their own actions questioned by those who would inaccurately characterize the City of Moreno Valley as "corrupt." This is not the City of Bell, yet continued delays in your Office's announcement of its findings related to our City subject us to continued comparisons to a community whose leaders violated their community's trust by engaging in criminal acts.

We understand the complexity of the regional investigation your Office has undertaken. Your staff must sort through facts associated with numerous agencies, public officials and private citizens. But we collectively send this letter to ensure that your Office grasps *the profound impact that delayed announcement of findings will continue to have upon our City and its nearly 200,000 residents.*

Our community's future hangs in the balance. United, this City Council calls upon the U.S. Attorney's Office to announce its findings related to the City of Moreno Valley without further delay.

Respectfully,

Tom Owings, Mayor

Marcelo Co, Mayor Pro Tem

Jesse Molina, Councilmember

Richard Stewart, Councilmember

Victoria Baca, Councilmember

Hi,

Just made a few additions.

Thanks!

Michele

REMARKS: MAYOR TOM OWINGS
Salvation Army Annual Appreciation Luncheon
June 6, 2013~~- National Doughnut Day~~

Formatted: No underline
Formatted: Space After: 0 pt, Line spacing: single
Formatted: Different first page header

I am honored to be invited here today to celebrate the Salvation Army's accomplishments over the past year. "Doing the Most Good" – we all recognize that as the Salvation Army's mantra and we take the time to recognize their achievement of this heartfelt goal. The Salvation Armyis a cornerstone for communities blessed enough to have them. Representing the entire Moreno Valley City Council, I want to express our appreciation for the love and commitment that the Salvation Army has for God and His people.Doing the Most Good in Moreno Valley, our own Salvation Army has been the essential hands and feet of Christ to many in this communityand in so doing, has fulfilled many of the City's top priorities.

- The Salvation Army operates a food pantry to provide a helping hand to the poor and underserved and
- The Salvation Army offers programs that helpchildren develop their potential.

Because I understand that children need the help of mentors, whether they are parents, spiritual leaders, educators or other adults and because I believe that it's up to all of us to help those with lower incomes, I want to offer my appreciation to:

1. Captains Julius and Shannon Murphy for your enduring commitment to our community;
2. The Salvation Army Advisory Board for your leadership and support for this much-needed organization;

3. And to the Salvation Army volunteers. You embody the mission "Doing the Most Good" and are truly the people that make the difference!

This new Council is undertaking several new initiatives that seem to fall right in line with core purposes of the Salvation Army.

The **successful development of children** is a responsibility shared by each of us in the community. We don't want to leave their futures to chance. It takes intentionality to serve them well. We thank you for your Sunday School programs that provide spiritual guidance and character development. We thank you for intentionally developing afterschool programs and camps for children in Moreno Valley that give our kids the opportunity to enjoy fresh air, exercise and new friendships while learning new skills and self-reliance. You are truly Doing the Most Good when you serve Moreno Valley's youngest and most vulnerable citizens.

We, too, want to be intentional about how the local government serves the well-being of children in Moreno Valley.Among those things are programs such as Moreno Valley Safe Routes to School. "Safe Routes" was launched in Moreno Valley on National Walk to School Day in October 2011. The program focuses on establishing safe ways to get to school and developing healthy behaviors by encouraging walking, biking, or skating as alternative transportation methods. The work for the program is all done by volunteers.

Because of the "Safe Routes" program

- Residents with school aged children have received education about pedestrian & bicycle safety, and about distracted driving. There has also been a more coordinated effort to have speeds reduced in school zones.
- More children are reaching the recommended goals of 60 minutes of physical activity per day, and they arrive at school energized and ready to learn.
- Civic groups have coalesced as parents, schools, businesses, and the City are united in this goal.

Another intentional way the City is engaged to positively impact the lives of our children is the formation of the Mayor's Ad Hoc Committee on Education. Moreno Valley has alarmingly low high school graduation rates. Less than 75% of children in Moreno Valley are graduating from High School. This City Council agrees that we cannot morally allow that to continue. Without completing a high school education, the majority of our children are left with a marginal chance of lifelong success!

To counter this trend and support the mission to Do the Most Good, I have called to action an Ad Hoc Committee on Education that will be chaired by Dr. Judy White, the Superintendent of Schools for Moreno Valley Unified School District. The sole purpose of this Committee is to work collaboratively, thinking outside the box, to identify where the obstacles to graduation are, to design ways the community can work together to overcome the obstacles, and to intentionally and dramatically improve

MV00251595

thegraduation rates for children in Moreno Valley. To achieve the goal of increasing our graduation rates, we will be introducing AVID training in our elementary schools, supporting our parents and teaching our children necessary skills.

The City is also well tuned to the emotional needs of children. We intentionally reach out especially during the holidays when times are particularly tough for families with limited incomes. Our Police and Fire Departments support the mission to Do the Most Good by running programs that include food and gift distribution.

Formatted: Line spacing: Multiple 1.4 li

Another core purpose I find that we share is **the desire to help the poor or underserved**. I believe that there are sufficient service providers in and around Moreno Valley that are designed and funded to help the myriad of needs that surface in our community. What I think is needed is for us all to connect better- as a community. We could learn a lot from the Salvation Army as you have done well connecting and creating unity to maximize resources and enhance service delivery.

I believe the City of Moreno Valley can and will do better. All we need is to provide a vehicle for organization and communication. The City Council has several ideas on how to achieve this. One such way is to help groups organize. We have a strong faith-based community. What we don't seem to have is one that is organized in a meaningful way that would encourage the sharing information and ideas. There are other groups as well, that, if organized could work together to improve their services or business. I am working to create a Faith-based Collaborative to coordinate our churches' outreach in Moreno Valley, following the Salvation Army's outstanding leadership in connecting, organizing, and unifying for the purpose of helping the poor, and serving our children.

To sum up the Council's admiration for the service of the Salvation Army to the Citizens of Moreno Valley and to recognize you for your enduring dedication to Doing the Most Good, I'd like to offer this Certificate of Appreciation from the Moreno Valley City Council to the Moreno Valley & Perris Salvation Army for your 12 years of committed service to the people of Moreno Valley.

READ AND PRESENT THE CERTIFICATE

Finally, I would like to say three things to the soldiers in this Salvation Army, to the members of the Advisory Board, and to the essential team of volunteers:

First, Moreno Valley is a better place because of The Salvation Army and the investment of time and resources by its volunteers and its leadership;

Second, thank you all for choosing to live lives of service to others. Community only happens when we look beyond ourselves.

And lastly, (~~Assuming that since Doughnut Day is the theme, it will have been mentioned, Cindy will you verify?~~)Happy National Doughnut Day! Now that I understand how the doughnut became an American favorite as it brought comfort to soldiers during WWI in Europe when Salvation Army Women served them to the injured, the hungry, and the homesick American soldiers; I will eat doughnuts with a renewed sense of appreciation for the comfort food that is and was. And I encourage everyone to remember that it doesn't take much to help meet the needs of

MV00251597

others. Even something as simple as the gift of a doughnut can provide comfort.

May God Bless the Salvation Army and the great City of Moreno Valley.

On Jun 5, 2013, at 8:40 AM, "Leonard, Janis" <Leonard@wrcog.cog.ca.us> wrote:

> Good morning WRCOG elected officials,
>
> There seems to be a little confusion with regard to the requested attendance of WRCOG elected officials at this year's **General Assembly Business Session** scheduled for **1:00 p.m. on Thursday, June 13, 2013**, at the Morongo Casino Resort & Spa on the 2nd Floor Ballroom, prior to the General Assembly and Leadership Address scheduled to begin at 4:00 p.m.
>
> For clarification, the purpose of the **General Assembly Business Session** is to approve the Agency's budget, appoint Executive Committee leadership positions for FY 2013/2014, and approve Agency Bylaws Amendments. **This General Assembly Business Session requires a quorum, which consists of 50% plus 1 of every elected official within the WRCOG subregion, as well as 50% plus 1 of every member jurisdiction.** So for example, WRCOG has a total of 105 elected officials within its subregion, and 20 member jurisdictions (each City, the County, and the 2 Water Districts – the Superintendent of Schools is still an ex-officio member and does not count towards quorum). So a quorum would consist of at least 53 elected officials, of which, would have to represent at least 11 of the member jurisdictions.
>
> I hope this helps to clarify any confusion.
>
> In order to ensure quorum, I kindly ask that you RSVP by noon tomorrow, Thursday, June 6, with your intent to either attend the meeting in person, or call in via teleconference call. If you are planning to not

attend in person, but are available to call in, I do require the phone number and address of the location you will be calling in from. Please keep in mind that it must be a location accessible by the public, on a device accessible by the public (such as a speaker phone), and you must post an agenda at that location.

Please feel free to contact me should you have any questions.

Subject: Notice of Intention to Circulate Recall

Mayor Owings & Council Members:

The Notice of Intention to Circulate Recall was served on June 4, 2013 to Mayor Owings, Mayor Pro Tem Co and Council Member Baca. Recall proceedings are governed by the Elections Code. The following are steps giving you a general idea of what to expect.

After the Notice has been filed with the City Clerk, the targeted officer has 7 days (Tuesday, June 9, 2013) to file and serve a written response. The response cannot be more than 200 words in length. It must be signed and be accompanied by the printed name and business or residence address of the targeted officer. It must be served on a least one of the proponents (and filed with the City Clerk) named in the Notice of Intent by personal delivery or by certified mail.

Within 10 days after filing the answer, the proponents would have to file two copies of the blank form of the petition with the City Clerk and proof of publication of the Notice of Intention. The Clerk would have 10 days to review the petition and proof of publication for compliance with the law and notify the proponents in writing of her findings. The proponents would have 10 days to correct the deficiencies and the Clerk would get another 10 days to re-review. The process is repeated until the petition is correct. Once the petition form is approved, the Clerk would notify the proponents and the 120 to circulate the petition and file with the Clerk. The proponents would need to gather 20% of signatures as reported by the Secretary of State. I've been given these figures by the Registrar of Voters office.

District #3 – 17,717
District # 4 – 16,219
District #5 – 14,390

Once the signed petitions are submitted to the City Clerk, the Registrar of Voters office will verify the signatures.

Let me know if you have any questions.

Subject: Notice of Intention to Circulate Recall

Mayor Owings & Council Members:

The Notice of Intention to Circulate Recall was served on June 4, 2013 to Mayor Owings, Mayor Pro Tem Co and Council Member Baca. Recall proceedings are governed by the Elections Code. The following are steps giving you a general idea of what to expect.

After the Notice has been filed with the City Clerk, the targeted officer has 7 days (Tuesday, June 9, 2013) to file and serve a written response. The response cannot be more than 200 words in length. It must be signed and be accompanied by the printed name and business or residence address of the targeted officer. It must be served on a least one of the proponents (and filed with the City Clerk) named in the Notice of Intent by personal delivery or by certified mail.

Within 10 days after filing the answer, the proponents would have to file two copies of the blank form of the petition with the City Clerk and proof of publication of the Notice of Intention. The Clerk would have 10 days to review the petition and proof of publication for compliance with the law and notify the proponents in writing of her findings. The proponents would have 10 days to correct the deficiencies and the Clerk would get another 10 days to re-review. The process is repeated until the petition is correct. Once the petition form is approved, the Clerk would notify the proponents and the 120 to circulate the petition and file with the Clerk. The proponents would need to gather 20% of signatures as reported by the Secretary of State. I've been given these figures by the Registrar of Voters office.

District #3 – 17,717
District #4 – 16,219
District #5 – 14,390

Once the signed petitions are submitted to the City Clerk, the Registrar of Voters office will verify the signatures.

Let me know if you have any questions.

Subject: Copy fees - $11.80

Hi Tom:

Press Enterprise Public Records Requests
49 pages @ .20/page = $9.80
1 CD of Rancho Dorado emails = $2.00

Total: $11.80

You may pay the fees either by check or with your credit card. You will have to be present to process with the credit card. I asked and was advised that I can't process with the number on your behalf.

Thanks,

Cindy

MORENO VALLEY

Office of the Mayor
14177 Frederick Street
P. O. Box 88005
Moreno Valley CA 92552-0805
Telephone: 951.413.3018

June 10, 2013

André Birotte Jr., U.S. Attorney
United States Attorney's Office
Central District of California
312 North Spring Street, Suite 1200
Los Angeles, California 90012

Dear Sir

The purpose of this letter is to respectfully request that the U.S. Attorney's Office conduct and complete a thorough investigation including all members of the City Council and City staff since 2005 and reveal the results of the investigation pertaining to Moreno Valley as expeditiously as possible.

Despite being faced with many challenges on many fronts, the City of Moreno Valley has been making great strides to bring our budget into balance, streamline City services and attracting new employers to our community. Unfortunately, the specter of the current investigation being conducted by your Office places our city's progress severely at risk.

It is our understanding that the U.S. Attorney's Office is conducting a sweeping review in western Riverside County, and perhaps beyond. Until your Office concludes its review of matters pertaining specifically to Moreno Valley, however, this City's progress is severely obstructed…at a crucial point when key stakeholders are relying on our ability to chart a course for our community's future.

Until the U.S. Attorney's Office announces its findings pertaining to the City of Moreno Valley:

- Our residents are left with significant questions about the integrity of their elected leaders. And, really, who could blame them? Homes of the neighbors they elected to represent them were raided by armed agents, and nearly every newspaper article regarding the City reveals that investigators seized items and documents from each of us…back in April. The absence of updated, specific information regarding your Office's findings continues to undermine residents' confidence in their local government and its credibility in making decisions on their behalf. In fact, recall petitions inspired by the April 30, 2013 raids on three City Council members are being circulated as we speak.

MV00251631

- Development interests, whose investment in our community is essential to our long-term sustainability, are actively considering other locations over their concern that Moreno Valley is under a cloud related to your Office's pending investigation. We have balanced our budget, we are addressing key public safety and infrastructure needs, and we are partnering with educational leaders to create a positive future for generations to come. Creating jobs and broadening Moreno Valley's economic base, however, require private sector investment. Since announcement of your Office's investigation, our Mayor, Council and City staff have spent countless hours attempting to reassure private investors that this City and its residents remain worthy of their confidence. Delays in announcing your Office's findings will cause irreparable harm to the future of our community, possibly for decades.

- City employees, who have firsthand knowledge regarding the sound, ethical daily operations of our public service organization, are unjustly seeing their own actions questioned by those who would inaccurately characterize the City of Moreno Valley as "corrupt." This is not the City of Bell, yet continued delays in your Office's announcement of its findings related to our City subject us to continued comparisons to a community whose leaders violated their community's trust by engaging in criminal acts.

I understand the complexity of the regional investigation your Office has undertaken. Your staff must sort through facts associated with numerous agencies, public officials and private citizens and we are committed to assist in any way. However, I am compelled to write in order to ensure that your Office grasps the profound impact that delayed announcement of findings will continue to have upon our City and its nearly 200,000 residents.

Our community's future hangs in the balance.

Respectfully,

Tom Owings, Mayor

Hello Cindy,

My name is Anilu Carrillo and I am from St. Christopher Catholic Church. Our ministry is the Sports Committee and we bring teens closer to God through sports. This Saturday June 15, 2013 I will be hosting a Goodwill Fundraiser and I will be honored to see our Mayor Tom Owings and Council member Victoria Baca attend to this event. We will provide food and drinks around lunch time. St. Christopher Church is very excited for this event and we would love to see the support of everyone. We will take pictures and show our community who came out to support! Hope to see you all soon and thanks for your time! God Bless

Sincerely,
Anilu Carrillo
[redacted]

St. Christopher Soccer Team

Dear St. Christopher Community,

The St. Christopher Soccer Team is a group of teens and young adults that has been participating in the Sports Tournamet of the Diocose and we represent our Parish at this event. This team helps teens and young adults to stay within church events and in the community. We have grown together a lot, not only with our sport skills but with our spiritual lives and it has kept us as a Catholic family for the past year. This group is also here to help one another and learn about sportsmanship. We pray together and we enjoy and use the talents God has blessed us with. We invite YOU to HELP US keep this group so that we continue growing in the family of this community and in the hands of God.

Sincerely,
St. Christopher Soccer Team

On JUNE 15, 2013 we will be hosting a Goodwill fundraiser. The trucks will be picking up the items from 10am to 4pm at St. Christopher Catholic Church.

25075 Cottonwood Ave. Moreno Valley CA 92553

Subject: Kingsley Jones [redacted]

Tom,

I told Mr. Jones you would meet/talk with him later in June. Mr. Jones stated he has put things in place, and he needs clarification from you on how he needs to move forward. Mr. Jones stated he will also email you.

Subject: Pastor Earnestine Poole Anderson - I Am My Sister's Keeper Fundraiser

Pastor Anderson is inviting you to the I Am My Sister's Keeper Fundraiser event. I Am My Sister's Keeper is a mentoring program for 8 – 18 year old girls. Southern California Edison will be presenting a donation check to them at the event. Their church is located in District 4. Next year, May 2014, I Am My Sister's Keeper is hosting the Convoy of Hope, which is a city wide food program give away, and she stated they are expecting about 5,000 people. She stated she is looking for a venue to hold the event. I gave her the phone number for the MVUSD PIO. I also gave her the phone number for Parks in case she would like to hold the event in a park, and I transferred her to Michele Patterson to see about promoting the event.

Please advise if you would like to attend the following:

I Am My Sister's Keeper Fundraiser
Saturday, August 3
11:00 a.m.
Universal Strike Bowling
23750 Alessandro Blvd.
$15 – Includes 2 games of bowling, shoes, hotdog, drink and entrance to talent show

Incident Description

On Thursday, June 13, 2013 at 5:48 AM a fire was reported at Ironwood c/o Helga by a passerby. The engine company arrived at the scene to (26603 Ironwood) a single, story single family dwelling with heavy fire in the interior and beginning to ventilate thru the roof. The fire threatened the dry grass and vegetation on the west side of the structure. The fire was contained to the residence but the structure has heavy damage and required extensive overhaul due a large amount of contents inside the residence. The residence was not occupied at the time of the fire. Two dogs were on the property and were transferred over to animal control. One firefighters sustained a minor injury to the small toes on one foot from a roof tile falling onto his structure boot.

Subject: Checkpoint Statistics - 2013

Follow Up Flag: Flag for follow up
Flag Status: Flagged

Good morning,

During the first 5 ½ months of 2013, the MVPD Traffic Team has conducted nine DUI/Driver's License checkpoints around the city. A total of 8,892 vehicles have passed through those nine checkpoints, an average of 988 vehicles per checkpoint. These nine checkpoints have resulted in the following:

- 61 DUI arrests (34 for alcohol, 27 for drugs) This is an average of 6.7 DUI drivers per checkpoint.
- 171 drivers cited for either being unlicensed (112) or for driving on a suspended or revoked license (59).
- 119 vehicles towed, an average of 13 per checkpoint.
- 01 felony arrest for drug possession.
- 01 misdemeanor arrest for assault on a peace officer.
- 01 DUI driver was arrested and found to have two outstanding arrest warrants for DUI.

These statistics indicate the following ratios:

- One DUI arrest for every 145 drivers who pass through the checkpoint.
- One citation issued for an unlicensed driver for every 52 drivers who pass through the checkpoint.
- One DUI or unlicensed driver for every 38 drivers who pass through the checkpoint.

Tom,

Mr. Bunyak called today to reschedule his meeting with you. I scheduled him for this Thursday, June 20 at 2:30 p.m. The Wolterbeeks cancelled their meeting with you, so I put him in their time slot, but only for a half hour. If this date doesn't work for you, please let me know, and I will look for a different date. As an FYI, Mr. Bunyak will be on a four week vacation starting next week.

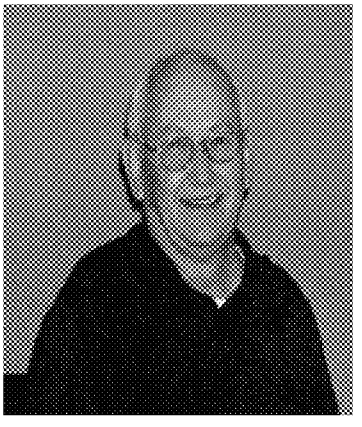
Subject: Welcome Ron Espalin as Interim Building Official

Please join me in welcoming Ron Espalin as the Interim Building Official. Ron will provide office hours on Tuesdays and Thursdays and be available on other days as needed.



Ron is familiar with the City's Building Division and the major projects that are underway in Moreno Valley. His long time role as Director of Building and Safety for Willdan Engineering, will allow for a seamless transition for the City's residents, development community, and City staff.

Mr. Espalin has extensive experience in managing engineering and technical staff and has served as the responsible engineer and building official for numerous cities, counties and other municipal organizations.

Prior to joining Willdan, Mr. Espalin was the Assistant Director of Building and Safety for the County of Riverside. In the private sector, Mr. Espalin was a structural design engineer.

Mr. Espalin maintains a lifetime teaching credential in Engineering with the California Community College system.

Subject: Sr. Electrical Engineer in MVU

Good afternoon all-

With a slight delay, I would like to announce recently hired Sr. Electrical Engineer, Dan Pinsonneau to our Public Works team at MVU.

Dan received a Bachelor of Electrical Engineering Degree from the University of Western Ontario in 1990. His experience includes power generation assignments that took him all over the world, providing metering support to the California Independent System Operator, management of transmission line and substation upgrade projects for the Western Area Power Administration, and assisting PG&E to fully automate their network of distribution substations. Dan has worked alongside the dynamic solar energy movement as well as helped to develop utility scale advanced energy storage systems. He now looks forward to helping to grow Moreno Valley Utility to the next level, while meeting or exceeding its enviable record of uninterrupted service.

Please join me in welcoming Dan Pinsonneau to the City of Moreno Valley.

Subject: Next ED Subcommittee Meeting - July 11th

John,
The next ED Subcommittee meeting is on July 11th. I will have to send the meeting requests and post the agenda by July 3rd. (July 4th is a Holiday, and I am off the following week). I have spoken with Kathi Pierce and she will cover me for the meeting and take the minutes. I have attached a template for the 071113 agenda for items to be added. I also attached the agenda and minutes from the April meeting for your review of what was covered at the last regular meeting.

Thanks,
Karyn

Moreno Valley City Hall Council Chamber
14177 Frederick Street, Moreno Valley

1. Call to Order

2. Roll Call/Introductions

3. Public Comments

Those wishing to speak should complete and submit a BLUE speaker slip to the Secretary. There is a three-minute time limit per person. All remarks and questions shall be addressed to the presiding officer or to the Economic Development Subcommittee of the City and not to any individual subcommittee member, staff member or other person.

4. Approval of Minutes of March 14, Economic Development Subcommittee Meeting.

5. Edgemont Area Revitalization Strategy

6. East End Infrastructure

5. Comments/Questions

6. Next Regular Economic Development Subcommittee Meeting – June 13, 2013

7. Next Developer Workshop – May 9, 2013

8. Adjournment

Upon request, this agenda will be made available in appropriate alternative formats to persons with disabilities, in compliance with the Americans with Disabilities Act of 1990. Any person with a disability who requires a modification or accommodation in order to participate in a meeting should direct such request to Mel Alonzo, ADA Coordinator, at 951.413.3027 at least 48 hours before the meeting. The 48-hour notification will enable the City to make reasonable arrangements to ensure accessibility to this meeting.

MEETING MINUTES
CITY OF MORENO VALLEY
ECONOMIC DEVELOPMENT SUBCOMMITTEE
April 11, 2013 - 2:00 P.M.

CALL TO ORDER
Meeting of the Economic Development Subcommittee called to order at 2:22 p.m. in the City Hall Council Chamber by Mayor Owings. Copies of the Agenda and Minutes from the March 14, 2013, Economic Development Subcommittee Meeting were made available.

ROLL CALL
Council Subcommittee:
- Mayor Tom Owings
- Council Member Marcelo Co

Public:
One member of the public was in attendance (see attached list)

Staff:
- Barry Foster, Community & Economic Development Director
- Dante Hall, Business Support and Neighborhood Programs Administrator
- Denise Bagley, Management Analyst
- Karyn Kiefer, Executive Assistant

PUBLIC COMMENTS
No speaker slips submitted.

APPROVAL OF MINUTES
Minutes of March 14, 2013 were approved. Owings/Co

Edgemont Area Revitalization Strategy
Dante Hall: Provided handouts and discussed strategies as outlined to resolve issues; zoning, existing water system, and blight within the area. The strategy outlines: A. Neighborhood beautification programs B. Landbank Polices. C. Exterior beautification programs, and D. Grant to property owners.

Questions/Comments

Owings: Crucial that focus is given to correct the zoning/flight restriction in order to move forward.

Suggested that there should be some emphasis on creating a more appealing aesthetics along the 215 Freeway as this is a gateway to the City as well.

Suggested that making a point to personally thank the residents and property owners who work at property maintenance for their part in maintaining their property would go a long way in building pride and accomplishment.

Dante: As part of the strategy, he envisions organized community meetings where the residents and property owners can come together and celebrate their accomplishments as a community.

Barry: Will bring the strategy to a future council study session.

Owings/Co: Both in agreement with the plan.

East End Infrastructure

Barry Foster: Discussed with the Committee the needs for the East End Infrastructure. The impacts and needs as were discussed and explained. Improvements should be a combination of public and private. Improvements would be phased over time.

- Public Streets – Citywide. Not within the project but were identified in the HF Impact Study.
- Trails – Will benefit the community. Improvements will be completed over time as property is dedicated and developed.
- Theodore Interchanges – Opportunity for multi levels of financing.
- Public Facilities – New Fire Station needed, plus expansion of Police facilities.
- Electric Utility – New Substation Required.

Questions/Comments:

Owings: Inquired whether a DIF study was conducted for the City and found to have adequate funding and whether payment such as borrowing against another DIF.

Response:

Foster: An updated DIF study was conducted last Fall/2012. A copy will be provided to Mayor Owings per his request. The city can borrow from another DIF Fund by using a loan agreement.

Owings: In regards to the Public Facilities –asked who pays for the operational expenses and inquired why a 2nd Fire station is planned close proximity to an existing station.

Response:

Foster: The City pays for the operational expenses. The City can pursue a bond issue for the utility substation. Explained that the planning of the fire station is for service needs – the one existing station is not sufficient to service the entire WLC area.

MV00251677

FUTURE MEETINGS
The next regular Economic Development Subcommittee meeting is June 13, 2013.

The next Economic Development Subcommittee/Developer Workshop is August 8, 2013.

Subject: Chris Ormsby, Interim Planning Official

Please join me in congratulating Senior Planner Chris Ormsby as he assumes the position of Interim Planning Official.

Chris has worked for the City for 23 years and has been a Senior Planner since 2000. He has worked on a wide variety of environmental and major planning cases during his tenure in Moreno Valley, and has had primary responsibility for a variety of Planning Division administrative activities.

Chris has an undergraduate degree from the University of California, Los Angeles, and a master's degree in planning from the University of Southern California. Chris is a certified professional planner of the American Institute of Certified Planners. He is also a former Chapter Director of the Inland Chapter of the Association of Environmental Professionals, as well as an active member and Treasurer of the Moreno Valley Motivators Toastmasters Club. Chris is an extremely knowledgeable and talented planner who is highly respected by the development community and fellow staff members, which will serve him well in his new role. Chris and his wife Sian have one daughter, Emily, who will be starting college next year.

Subject: And the Emmy nomination goes to..... MVTV-3!!!!

(CLICK THIS IMAGE TO VIEW THE VAL'S OIL PSA)

MVTV-3 RECEIVES EMMY NOMINATION

At 12:01 a.m. this morning the Academy of Television Arts and Sciences released their nominations for the 65th Annual Los Angeles Area Emmy Awards.

We are very proud to announce that the City of Moreno Valley (MVTV-3) is one of the three nominees competing in the Outstanding Public Service Announcement Category for the "Val's Oil" public service announcement.

This P.S.A. stars the very young and talented Val Pazola, daughter of City of Moreno Valley employee Liz Pazola. Val's Oil was created in conjunction with MVTV-3 and the City's Solid Waste and Recycling program overseen by Ariana Ayala. "Val's Oil" was produced and directed by Tim Carroll, produced and edited by Rob Roseen and co-produced by Bob Lorch. MVTV-3 Interns Steven Morel, Trent Terrell and Mike Jimenez played vital roles during the production of this video.

The 65th Annual Los Angeles Area Emmy Awards presentation will be held on Saturday evening, August 3, 2013 at the Leonard H. Goldenson Theatre in North Hollywood.

Subject: Kids safety

Hello all,

I received a call from a Fourth of July Community Stage 2013 PARENT, she was concerned about her children's safety. Her children were selected for this years Fourth of July Community Stage. They were also on the Fourth of July Youth stage 2012. I think it is important that someone gets to the bottom of ALL this, before someone gets hurt or another lawsuit against our city.

Safety for the youth, need to be a huge part of anything the city does.

Maurice Sears had called Georgette child's cell phone and said, "the Moreno Valley Fourth of July Community Stage youth will be rehearsing in his home (garage)."
I do have a concern with anyone calling the child, and so does this parent. This mom is active with her children and Maurice has her number. So, why not call the parent?

Maurice stated that the Fourth of July rehearsals will be at his home and he said "the City has this set up."
This parent did NOT feel that the city would do this, especially after last year a few of the parents (herself) and Anthony Acosta felt so strongly that Maurice may be a child pedophile.
Anthony Acosta said to me that he "ran a FBI background check on Maurice" under Maurice Sears, in late August/September 2012. Anthony Acosta and Maurice Sears continued working with the 4th of July youth after the event, I did not know this.

My concern is Maurice has two last names. Sears and another that starts with a Boudoor, not sure of the spelling, sounds French. No one knows how to spell it and therefore no one ran a background check on that last name. Nor am I sure if Anthony Acosta ran a qualified background check.

With six people saying, in August/September, that Maurice may be a pedophile, it was and still is a concern to me. I did at the time forward the information to MVPD. Not sure what they did?

I only worked with Maurice and the selected youth for the Youth Stage 2012; 5 or 6 days. So I only know a little bit about him. We only met Fridays and Saturdays. He is an armed guard, so I felt safe to have him work the few days with the youth and I was always with the kids during rehearsals.

Outside of Maurice not being able to communicate or show up on time, I only had a few issues with him as he volunteered to help prior to the 4th of July, for those few days.

1) Maurice did feel that it was okay to keep the kids out late, I did post up a paper stating, "if you are with the Fourth of July group, we must end at 10PM." However, some parents and youth wanted to stay later and did so, saying they were working with Maurice on their own.

2) Maurice told a parent that the City was paying $50.00 to a man's daughter and that the daughter would get one hour on the stage. I had to correct the father that she was not getting an hour, nor paid.

3) I did notice that Maurice's neighbors did NOT want their children involved with Maurice. Maurice stated it was due to a bad divorce.

4) Maurice is guilty of being a awful parent, as he left his 6 yr old child with this mother (Georgette) to watch, as he went to work and they did not know each other at all.

5) On the Fourth of July, Maurice was missing most of the time.

Anything other than that is Maurice and Anthony's doing, not City or my involvement.

At this point, I think it is wise for either City or MVPD to check into Maurice for the safety of the youth. I get that volunteers are not perfect, but, my point is trust only Law Enforcement when doing a background check.
And after six parents thought the same thing.. maybe it would be wise just to double check.

Plus, I want Park and Rec to know what is being said, so they can correct anything that may not be true.

This is my third call/text from parents, not knowing anything. I did tell them all to call Park and Rec and ask for Sarah. I hope that was correct?

Good Luck!

Tom and Marcelo,

Ms. Berridge asked if you could be at the church no later than 2:45 p.m., and to enter on the west side of the church as there will be no line there.

Juliene

Tom and Marcelo,

Please advise if would like to attend the following:

Rising Stars Business Academy Graduation
Saturday, June 22
3:00 p.m.
Crosswords Church

Ms. Berridge stated there will be 142 graduates this year (their second year). They had 109 graduates last year.

MVTV-3 RECEIVES EMMY NOMINATION

At 12:01 a.m. this morning, the Academy of Television Arts and Sciences released their nominations for the 65th Annual Los Angeles Area Emmy Awards. We are very proud to announce that the City of Moreno Valley's MVTV-3 is one of the three nominees competing in the Outstanding Public Service Announcement Category for the "Val's Oil" public service announcement (PSA).

This PSA stars the very young and talented Val Plazola, daughter of City of Moreno Valley employee Liz Plazola. Val's Oil was created in conjunction with MVTV-3 and the City's Solid Waste and Recycling program overseen by management analyst Ariana Ayala. "Val's Oil" was produced and directed by Tim Carroll, produced and edited by Rob Roseen, and co-produced by Bob Lorch. In addition, MVTV-3 Interns Steven Morel, Trent Terrell, and Mike Jimenez played vital roles during the production of this video.

"Val's Oil" is available to view on the City's YouTube channel by using the following link: http://youtu.be/1gIgUFgQ93k. The 65th Annual Los Angeles Area Emmy Awards presentation will be held on Saturday evening, August 3, 2013 at the Leonard H. Goldenson Theatre in North Hollywood.

For more information, please feel free to contact Tim Carroll, Media and Production Coordinator, at 951.413-3056 or visit the Emmys Website.

Subject: FW: March JPC mtg notes 6/21/13

Hi Suzanne and Michelle,

QUORUM

Brown:

Appears our colleagues from Moreno Valley are once again indisposed. Quorum consists of presence of 5 commissioners, with at least one representative of each of the member agencies... named document (?) had been amended to allow the presence of 5 commissioners to be a quorum even if both representatives from one agency are absent twice. With that advice, they confirmed that the meeting had been noticed and Lori Stone indicated that the notice had been published plus staff had called to confirm knowledge of the special meeting. At that point, they declared that they had a quorum and proceeded with the meeting.

Public Comment: Deanna Reeder – wants Ashley replaced on the Litigation Ad Hoc committee because he is "too close to the developer, which is the reason for the lawsuit and the boycott" by the Moreno Valley representatives.

CONSENT CALENDARS

Item 9a6 – pulled at County EDA request, to be brought back
Item 9a8 moved to 10c as a public hearing
Everything else was approved.

PUBLIC HEARING

10.a March Business Center Implementation Committee. Presentation by Dan Fairbanks: 4800 acres. 2 specific plans. Committee would review ministerial applications for 1032 acres. This is an ongoing Committee, whose members are appointed by resolution - . To anticipate the workload volume, Fairbanks indicated the Committee has reviewed 8 apps in the last 10 years.

Particulars of the proposed ordinance changes:

- To require 3 reps of JPC and eliminate representation by LNR
- Clarifies that the representatives are paid, because Commissioners receive stipends for public meetings

- Reso appoints specific named representatives to the Committee. Recommended Co, Jeffries, Melendez, based on annual Committee appointments in January.

Busch: suggested reso language be amended to be consistent with chair appointments. However, Stone indicated that the reso is part of the specific plan, not so easily amended.

Ashley: asked if Moreno Valley has made any statements opposing this action or the Committee membership? They confirmed we had not.

Yarbrough: Suggested the appointment of an alternate that could step in if Moreno Valley doesn't attend.

Public Comments:

Reeder: discussed conflict of naming individuals if they may not be in office through the appointment term.

Givens: Object to moving the Committee forward without Moreno Valley representation

Ashley: "Not our choice they're not here. Can't hold up the process because MV isn't here. Don't think we should wait even a second."

Gardner: Recommended the Commission adopt the 4 on the screen. Substitute with a rep from Perris. If Moreno Valley is able to attend meetings in future, put representation back. Now Moreno Valley is not able to participate, meetings are infrequent, but important.

YARBROUGH: Not the intent to isolate Moreno Valley. Really think an alternate is the preferred way to proceed. Now, seems like we're punishing MV. They are a partner. Proposed that Moreno Valley population should have representation. If Moreno Valley chooses not to participate, appointment an alternate to step in and get it done.

Brown: Make 2 appointments specifically. Then list 1 from Moreno Valley with JPC chair to have authority to appoint an alternate.

Melendrez: Too early to know Moreno Valley intentions. If there's a Committee mtg and Moreno Valley doesn't attend, do they still have a quorum?

Brown confirmed they only need 2 of the 3 Committee members to establish a quorum.

With that, Yarbrough made a motion to approve Committee membership as recommended. Approved unanimously.

10b. LLMD assessments were approved.

No Closed Session.

If there were **Commissioner Comments**, they were brief…I didn't catch any.

That's it. Have a nice weekend!

Michele

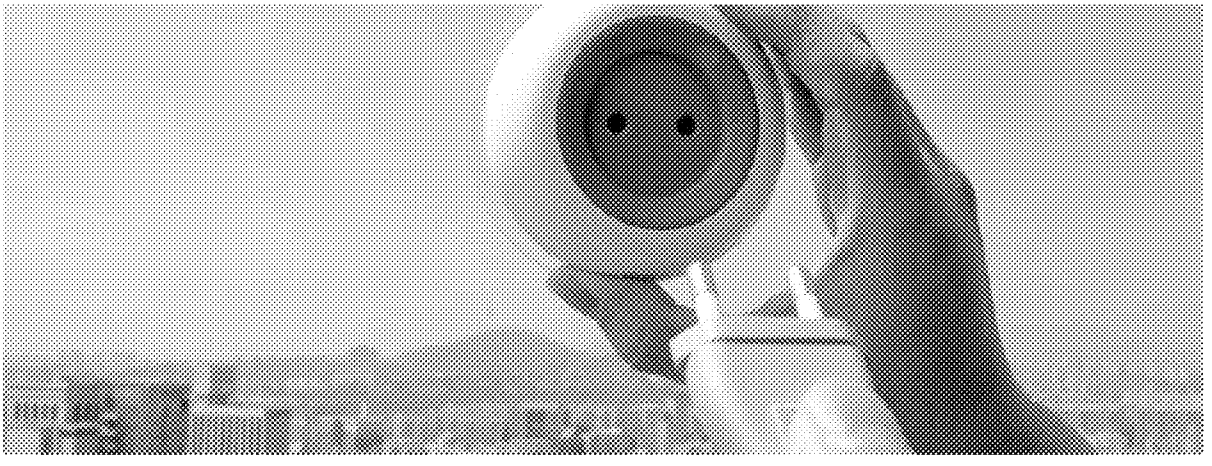
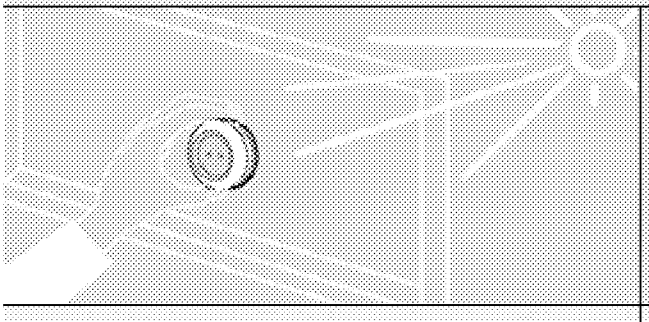
Subject: Amazing technology…

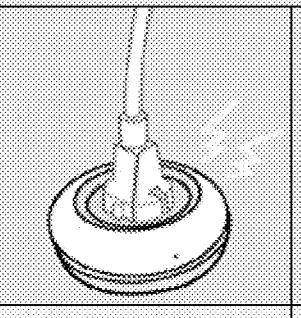
Portable solar powered receptacle!



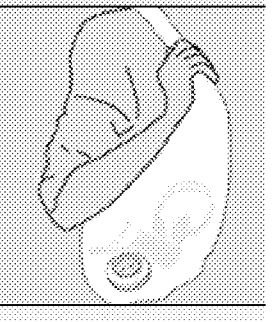
HOW TO USE



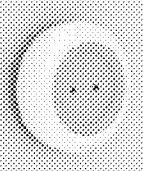
You can use it anywhere available to charged with solar energy, such as on an indoor window in a plane, a car, and a ship, outdoors, etc.



The solar energy supplied for charging is converted into electric energy through a converter.



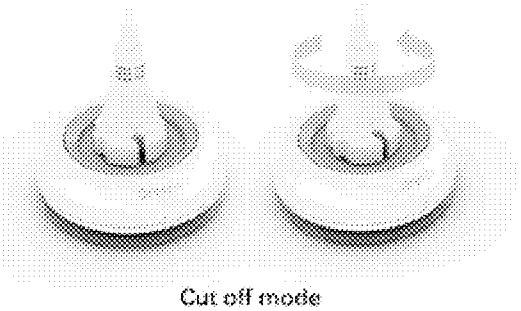
When charging is complete, you can use it anywhere electricity is needed.



This product is intended to enable you to use electricity freely and conveniently in a space restricted in the use of electricity, such as in a plane, a car, and outdoors.
Thus, this product was meant to draw out a socket used indoors outward.
We tried to design a portable socket, so that users can use it intuitively without special training.

DETAIL

The product appearance is made of plastic materials and the lower of the transparent absorption unit consists of solar energy panels as a material.
The solar energy panels are used to be charged with solar energy.
The solar energy supplied for charging is converted into electric energy through a converter.



Cut off mode

If you unplug or turn it, while you aren't use electricity, it is cut off.

The charging capacity reaches 1800mAh and it takes 6-8 hours to be charged completely. It lasts 10 hours after completely charged.

Subject: Your questions on Items A.4 and A.12

Dear CM Baca-
Below and attached, please find responses to your questions. Please feel free to contact me w/ any additional questions or comments. Thanks.

- Item A.4 MVU rate adjustment: ***How much is the increase and why do we automatically adjust according to SCE rates?***
  The rate change is actually a decrease in rates for most customers – the average household will see a very small decrease over the summer (only about 1 cent per month), and a decrease of about $3.85 per month over the winter. The average small business customer will see a decrease of $126.42 per month over the summer, and a $14.91 per month decrease in the winter. Only the largest business customers will see an increase.
  We follow SCE's rate adjustments because it has been the policy of the council to prevent one part of the community from having an advantage (or disadvantage) over another. In addition, the City's agreement with ENCO stipulates that payments for their services be based on SCE rate schedules. The rate study performed last year (2012) showed that our current rates do align to costs by customer class, so it was recommended that we continue this policy. (See the attached rate comparison including the calc's for the street light component)

- Item A.12 Award Contract for Maintenance and landscaping for the water quality control basins. ***What is a water quality control basin?***
  A water quality basin (WQB) is a depression in the ground generally the size of a single-family residential lot (7,200 sq. ft.). A WQB temporarily stores a certain amount of runoff (between 48 and 72 hours) from single-family residential subdivisions within the City. WQBs are designed to provide water quality enhancements by trapping and treating target pollutants associated with the particular subdivision in which it is located before the runoff is released and makes its way to Canyon Lake, Lake Elsinore and finally the Pacific Ocean. The City maintains 25 water quality basins within single-family residential subdivisions constructed after 2003. A location map of the water quality basins the City maintains is attached.

Hi Lisa:

Didn't we don a dedication of the Peace Garden when the trees were planted?

Thanks,

Cindy

Tom,

Mr. Baker stated he would like to know about doing a Peace Garden dedication at the C & RC. He also stated he would like to know if it's a violation of the Brown Act if he talks to other Committee Chairmans.

Subject: Local PAC & Candidate/Treasurer Webinars Scheduled

The FPPC has scheduled free webinar training for local PACs, candidates and treasurers. Your help in getting the word out to committee treasurers is appreciated as we have scheduled the webinars at times that may be more convenient for those that have other full time employment. The one-hour programs specifically address the semi-annual filing deadline. Here is a link for sign-up information: http://www.fppc.ca.gov/index.php?id=674

John Hawkins, Riverside County Fire Chief
California Department of Forestry and Fire Protection
210 W. San Jacinto Avenue
Perris, CA 92570

Subject: Service Levels for the Moreno Valley Fire Department

Dear Chief Hawkins,

In a letter dated May 1, 2013 the City of Moreno Valley notified the Riverside County Fire Department that our City is proposing significant cuts to City services in order to balance our budget, which included the closure of Fire Station 99 (Morrison Park) effective September 1, 2013. Based upon the recommendation of the Fire Department, I would like to modify that request to defund the personnel currently staffing College Park Truck 91 effective October 24, 2013. Also, as part of the budget adoption, City Council elected to enhance the services provided by the remaining aerial ladder truck company by upgrading the truck company from providing basic life support services to advance life support services effective January 1, 2014.

We understand that the above action will result in the defunding of eight (8) personnel associated with Truck 91 which includes two (2) Fire Captains, two (2) Fire Apparatus Engineers, and four (4) Firefighter II's. Please consider this as our 120-day notice.

Please modify Exhibit "A" of the Cooperative Fire Protection Services Agreement to reflect these service level changes. Should you have any questions, please contact Abdul Ahmad at [redacted]

Sincerely,

Michelle Dawson

Subject: Press Release - Pedestrian Decoy Program

RIVERSIDE COUNTY SHERIFF'S DEPARTMENT

Sheriff Stanley Sniff

Moreno Valley Police Department

Press Release:

Type of Incident:	Pedestrian Decoy Program
Date/Time Written:	June 28, 2013 / 11:30 AM
Date/Time of Incident:	June 28, 2013 / 08:45 AM
Location of Incident:	John F. Kennedy Dr. X Pepper St., Moreno Valley
Reporting Officer:	Sgt. Lee Tainter
File Number:	Various

Pedestrian Decoy Program

Moreno Valley, CA -- In response to complaints from the public, the Moreno Valley Traffic Team conducted a Pedestrian Decoy Program today. The Department has received numerous complaints regarding motorists not stopping for pedestrians in various crosswalks and intersections throughout the City. The California Vehicle Code requires motorists to yield to all pedestrians in a crosswalk.

Today's operation was conducted at John F. Kennedy Dr. X Pepper St. This operation is just one aspect of the Department's Directed Enforcement Program. This program utilized an undercover police officer walking in the crosswalk. In previous operations many of the motorists stopped for these violations said they never saw the pedestrian in the crosswalk. In an effort to make our pedestrian more visible, he was dressed today in a large "Traffic Cone" outfit. Many motorists who were stopped today said they never saw the "Traffic Cone" in the crosswalk. Our goal is to make motorists more aware of their surroundings and to be vigilant while driving, especially near schools and crosswalks.

During today's one hour decoy program, 14 motorists received citations for "failing to yield to a pedestrian in a crosswalk" and 1 motorist received a citation for using their cell phone.

This program is scheduled to run throughout the year at various locations throughout the city. For additional information the Moreno Valley Police Department Traffic Division may be reached at (951) 486-6900.

The Riverside County Sheriff's Department is seeking applicants for Deputy Sheriff, Deputy Sheriff Trainee, Correctional Deputy, Sheriff's 911 Communications Officer, and other employment opportunities such as clerical and support positions. If you are interested in a career with us, please apply at www.joinrsd.org or call 1-888-Join-RSD

Subject: Sheriff statement re: City budget

Mayor, Mayor Pro Tem and Members of the City Council: The Sheriff distributed a press release regarding our City budget and the related cuts to our police department. I was not provided with a copy of this in advance nor given a "heads up" that it was being drafted. The statement is posted on the Sheriff's web site:

http://www.riversidesheriff.org/press/admin13-0628.asp

Tom DeSantis and I have spoken with a reporter from the P-E and I understand that Council Members have been contacted. As you know public safety is still the City's top priority and we look forward to a time when our community is fully recovered from the recession. I know that the Sheriffs department will seek innovative ways to continue to keep our community safe regardless of budgetary issues.

Mayor Owings & Council Members:

Please be advised that the Notices of Intention to Circulate Recall Petitions for Mayor Pro Tem Marcelo Co, Council Members Richard A. Stewart and Jesse Molina are valid. A second NOI for Council Member Stewart was filed in my office on June 26, 2013 and is also valid. Signature verification by the County has identified the proponents as registered voters in the City. The **original** NOI, Proof of Service and a copy of E.C. 11023 were filed. The NOI complies with E.C. 11020.

The incumbents may file an Answer/response to the recall notice. Answers/responses to the recall notices need to be served by personal delivery or certified mail to the proponent.
The deadlines to file/serve answers are as follows:

For Mayor Pro Tem Co – by July 2
For Council Member Stewart – to the first recall notice by July 2; to second notice by July 3 – (received both responses today, 7/1/13)
For Council Member Molina – by July 3

Subject: Constituent Concerns About Our City

I'm sure by now you and/or one of your fellow council members has received a call from my husband, Donald
Cole. He has some legitimate issues about our city, which I'll list just in case they got lost in his dissertation:

1. **Heacock between Gentian & Iris:** The trucks that travel down this street cause our house, and I'm sure others in this area, to shake and rumble as they pass by Gentian. The back of my house has a flood control channel and abuts Gentian. This has been going on for 10 years and we've asked for an environmental study only to be advised there is a budget shortfall.

2. **Heacock between John F. Kennedy and Gentian:** Truckers that have been given the o.k. by our City Council to park overnight in this section, have turned it into a literal hog pen with all the trash they leave behind. Mattresses, urine in bottles, wooden 2 by 4's, you name it, it's here. And by the way, it's directly behind March Air Reserve Base! Seems like a national hazard.

3. **Overgrown grass and weeds and dead trees:** In the flood control channel I mentioned, along the back edge of March Air Reserve Base, and along Gentian between Heacock and Indian Streets.

4. **Illegal dumping on the vacant field at Gentian, Heacock and Iris Streets:** This is a pet peeve of mine. I don't know how many times I have called and emailed the City to report illegal dumping. It's most likely renters who are moving in or out who have no stake in the upkeep of the neighborhood. We believe the owners of these rental properties should be held accountable and have to pay higher property taxes as it becomes the job of the city to clean up after them, thus raising our taxes.

5. **Parking RV's and appliances on the front & back yard:** On my own street, Puddingstone, neighbors place refrigerators, RV's, and inoperable vehicles in their front yards and backyards. I understand this is a code violation but nothing gets done about it. Someone from the city stated that the police officer who writes the tickets on street sweeping day hands out tickets for this type of issue, but I beg to differ. He only gives out tickets to people parking on the street during the prohibited hours.

6. One last thing that I want to report is an individual selling popsicles from his bicycle on my street and in the neighborhood. This I'm sure is a health hazard. He rides in our area between 4:00 and 5:00. I reported him a few months ago and he stopped but it has started back again a couple of weeks ago. Until a child gets sick and his or her parents sue the city and it becomes a taxpayer issue, it continues.

As you can see, we're getting fed up with "business as usual" in our city. We want it cleaned up and we want code enforcement to do their job! What in the world did we hire you do to? We understand you are responsible to get the businesses to locate/relocate here and you're doing a good job at that, but the overall appearance of Moreno Valley is suffering. This may take action from the higher ups and perhaps you can have a say in it, but all the American youth that our law enforcement locks up each year, the same could be used to work to clean up the city. Pay them minimum wage and contract **THEM** out rather the immigrants that I see throughout the City doing all the work.

Yes we are two of your constituents who voted for you Mr. Co and we can only speak on the things that have gone on in our neighborhood. We see the changes and improvements happening on the southeast portion of the city, and we would hope to see some action from you in just cleaning up our district as well as the other Councilmembers doing likewise in their districts. You probably will be meeting us as we intend to start coming to the City Council meetings to voice our concerns.

Thank you,

Donald & Stephanie Cole

Tom,

Mr. Capiz owns Interstate Concrete Cutting and Demolition. Mr. Capiz stated he has a contract with Lumber Liquidators on Day Street to demolish their trash enclosure so they can place it in a different area. He stated he received the job six months ago, and since then he has been having problems getting the permits he needs. He stated Lumber Liquidators wants to cancel the contract because it has taken so long to do the job. Mr. Capiz stated Lumber Liquidators' lease is almost up at the shopping center, and they are talking about moving to a different city due to the problems with obtaining permits. Please advise if you would like me to schedule this meeting; and if you do, do you want staff at the meeting, and who would you like to attend.

Mayor Owings & City Council:

A Notice of Intention to Circulate Recall Petition of Council Member Victoria Baca has been filed with the City Clerk's office today. Within 7 days (July 10) the officer/incumbent may file an Answer/Response with the City Clerk's office and serve a copy of the Answer by personal delivery or certified mail to one of the proponents.

Let me know if you have any questions.

Thank you.

Subject: City Manager's Update on Several Items Affecting the Organization

Follow Up Flag: Flag for follow up
Flag Status: Flagged

The following are a number of items that affect the City organization that I want to share with you:

2-Year Balanced Budget Adopted: On June 11th, the City Council adopted a two-year budget that, ***for the first time since 2008, is balanced without the use of reserves.*** Doing so required significant expenditure cuts, including reductions in our law enforcement contract with the Sheriff that equate to the loss of 25 police officers and the removal of a fire truck from service which represents the loss of 8 firefighter positions. We appreciate the cooperation of Fire Chief Abdul Ahmad and Police Chief Joel Ontiveros as they worked with City staff to help us balance the budget. Special thanks to Budget Officer Marshall Eyerman for his hard work and expertise in preparing the budgets for FYs 2013/14 and 2014/15.

New MOUs: Restored Work Hours and Pay: Last week, the City Council approved new memoranda of understanding with the employee associations that ***eliminate half of the furlough in place since 2009 and restore 5% of employee pay.*** Employee schedules will change beginning July 6th; the corresponding 5% increase in earnings will appear in paychecks issued on July 25th. Among the other items that are included in the MOUs:

- Administrative Leave (MVCEA Only): the City Manager (or Department Head as delegate) may grant limited administrative leave to recognize extraordinary service;
- Employees enrolled in family coverage will receive an additional monthly contribution by the City of $150 to help defray increased health insurance costs;
- Public Service Recognition annual payment of $500 per employee, prorated ($250) for career part-time employees, to be distributed the first payday in December.

The full MOU documents are available for review on the Human Resources web page on the intranet.

Extended Service Hours: An announcement with the new work schedules and hours has already been distributed for your information. While we anticipate that Fridays will be quiet initially, we believe that these extended hours will enhance our development partners' ability to get business done in Moreno Valley and result in additional revenue for the City and jobs for our residents. Thank you to our team members in Planning, Building & Safety, Land Development, Fire Prevention, Treasury Operations (cashier), Transportation/Traffic Engineering and Technology Services.

Casual Dress Day Changed to Friday: With the addition of Friday public service hours, I am extending special accommodations to those employees who will be working on Fridays. To do so, I am modifying the Workplace Image Policy ***to designate Fridays as casual dress days rather than Thursdays.*** What this also means is that standard professional business attire is to be worn Monday-Thursday of each week (with the exception of employees who wear uniforms or other clothing unique to their specific assignments). This change takes effect on Monday, July 8th. Additional guidance will be forthcoming regarding the Summer Dress Policy.

Library Outsourcing: Last week, the City Council approved my recommendation to outsource the operation of the Moreno Valley Public Library to a private contractor (LSSI). We initially explored this option when developing the Deficit Elimination Plan two years ago, but decided at that time not to pursue contracting this service. Based on our ongoing structural deficit and Council's direction to present a balanced budget without the use of reserves, this year I contacted LSSI again and asked them for a specific proposal which was reviewed along with a proposal prepared by the Library staff. To summarize, my recommendation to outsource is based upon the fact that ***LSSI can save the City at least $250,000 annually and provide enhanced services to the public by keeping the Library open 7 days per week (it is currently open 5 days) while tripling the annual budget for books and materials.*** Unfortunately the result of this action is that current City Library employees, whose dedication and loyalty to our Library is without question, will be laid off. LSSI has committed to interviewing all current Library employees and giving them priority for employment opportunities within the LSSI-operated library system (they currently operate 35 library branches in Riverside County). The City will maintain control over library services, the facility, etc. The target date for the transition is September 9.

Crossing Guard Outsourcing Recommendation: The July 9th Council meeting agenda includes a recommendation to outsource the City's crossing guard program. The recommended action would achieve a budget savings of just over $100,000 annually and would result in the layoff of the City's current crossing guard employees (33 regular / 10 alternate guards -- all of whom are part-time employees -- one part-time Assistant Supervisor, and one full-time Supervisor). However, as a condition of the proposed agreement, the contracting agency, All City Management Services, will offer employment to all qualified employees of the City's crossing guard program at their current hourly rate.

As always, thank you for all of your hard work and dedication to the City of Moreno Valley. I hope you and your families have a safe and fun holiday weekend!
--Michelle

Subject: Recall Process

Follow Up Flag: Flag for follow up
Flag Status: Flagged

Mayor Owings & Council Members:

I want to keep you informed of the recall process from this point.

The proponents for the recall of Council Members have 10 days from the date the Response/Answer is filed in the Clerk's office to submit their Petition Forms. From that point the Clerk has 10 days to approve/reject the Petition Form. The proponent would have 10 days to correct any deficiencies. Once the Petition Form is approved and the proponent is notified, the signature gathering process can begin. Proponents will have 120 days to gather signatures of 20% registered voters in the district to qualify for an election. Please see the number of registered voters and number of signatures required below.

These are estimates and the numbers are based on last County report to the Secretary of State. The numbers could change slightly when the petition is approved.

District #1 – 15,148 - 20% is 3,030
District #2 – 19,622 - 20% is 3,924
District #3 – 17,717 – 20% is 3,543
District #4 – 16,219 – 20% is 3,244
District #5 – 14,390 – 20% is 2,878

If the proponents are successful in obtaining the required signatures, the Council has 14 days from the Council meeting date at which the petition is certified as sufficient to call the election to be held not less than 88, nor more than 125, days after the issuance of the order. The election will consist of (1) the question to recall the officer and (2) (a) the names of the candidates nominated to succeed the officer sought to be recalled and (b) write-in spaces. If the proponents take the full 120 days and with the 30 day County signature verification, it will be close to January 2014 when the item would go to a Council Meeting. Then with the legal mandate of not less than 88 days and not more than 125 days, an election could be held between April 26 – June 1, 2014 time period.

I am waiting on the County for a cost estimate and elections dates in the Spring and will forward the info to you.

Let me know if you have any questions.

Thank you.

Victoria,

There is no set date in the Election Code for the publication, but it has to be early on in the process because they are bound per Election Code to submit a copy with the Petition Form for approval by the City Clerk and if approved they can start their signature gathering.

Jane

MORENO VALLEY
WHERE DREAMS SOAR

Financial and Management Services
Special Districts Division

MEMORANDUM

To: Honorable Mayor and City Council Members

From: Candace E. Cassel, Special Districts Division Manager

Approval: Richard Teichert, Chief Financial Officer

Copy: Michelle Dawson, City Manager

Date: July 3, 2013

Subject: Hidden Springs Residents Committee – Zone E-2 Award of Contract

Staff met with two representatives of the Hidden Springs Residents Committee (HSRC) to discuss concerns expressed in emails received regarding the June 25th agenda item to award a Landscape Maintenance Services contract for CSD Zone E-2, Hidden Springs. At the conclusion of the meeting, the residents advised that they are comfortable with award of the contract as outlined in the staff report.

As a result of the RFP process, the 2013/14 Zone E-2 budget is under budget by $10,000 for this service. Preliminary numbers suggest that Zone E-2 will also have its reserves fully funded by the end of Fiscal Year 2013/14, leaving a surplus in funds to reinvest into the landscaping. This is, however, subject to the audit which is expected to be completed before the end of the calendar year.

Over the next several months, staff will work with the residents to identify priorities on how best to reinvest the $10,000 savings into the landscaping, as well as utilizing $3,000 of unused funds which were designated for replants from the 2012/13 fiscal year and the $3,000 budget for replants within the 2013/14 fiscal year (total $16,000). The 2012/13 replants were unable to occur due to backflow thefts during the ideal planting season.

Staff will be working with the HSRC to identify specific projects and prioritize them. The priority list will provide the starting point for reinvestment of Zone E-2 funds confirmed as surplus upon completion of the audit. Provided we have the financial resources

during the 2013/14 fiscal year, any necessary budget adjustments will be presented for Council consideration during the City's mid-year budget review process which is tentatively scheduled for February 2014.

In addition to the three regularly scheduled Hidden Springs Residents Committee meetings each year, staff will also meet with HSRC representatives every other month to discuss specific areas of concern. Staff will also attend a special meeting of the HRSC's (either August or September), prior to its next regularly scheduled meeting in October, to receive concurrence and/or direction on the initial $16,000 landscape reinvestment from property owners who attend the HSRC meetings.

Subject: Sepcial Meetings for HSRC in August & September 2013

Candance -

Earlier today, I visited the MVUSD Facilities Office and requested the use of the Hidden Springs Elementary School for:

1) Thursday, August 22, 2013 at 6:30 p.m.

2) Thursday, September 19, 2013 at 6:30 p.m.

Final approval by the District's Facilities Office takes about a week. As soon as I hear back from the school district, (regarding the August 22nd & September 19th dates), I will notify you. Thank you.

Art

P.S. A word of thanks to Mr. Teichert and you as well, for meeting with Steve and I this morning. Our open dialogue with both of you was very productive & encouraging. Later today, I will send Councilmember Stewart, an e-mail recommending that the City Council approve an award of bid to the new landscape service contractor for Hidden Springs, at their July 9, 2013 meeting.

Financial and Management Services
Special Districts Division

MEMORANDUM

To: Honorable Mayor and City Council Members

From: Candace E. Cassel, Special Districts Division Manager

Approval: Richard Teichert, Chief Financial Officer

Copy: Michelle Dawson, City Manager

Date: July 3, 2013

Subject: Hidden Springs Residents Committee – Zone E-2 Award of Contract

Staff met with two representatives of the Hidden Springs Residents Committee (HSRC) to discuss concerns expressed in emails received regarding the June 25th agenda item to award a Landscape Maintenance Services contract for CSD Zone E-2, Hidden Springs. At the conclusion of the meeting, the residents advised that they are comfortable with award of the contract as outlined in the staff report.

As a result of the RFP process, the 2013/14 Zone E-2 budget is under budget by $10,000 for this service. Preliminary numbers suggest that Zone E-2 will also have its reserves fully funded by the end of Fiscal Year 2013/14, leaving a surplus in funds to reinvest into the landscaping. This is, however, subject to the audit which is expected to be completed before the end of the calendar year.

Over the next several months, staff will work with the residents to identify priorities on how best to reinvest the $10,000 savings into the landscaping, as well as utilizing $3,000 of unused funds which were designated for replants from the 2012/13 fiscal year and the $3,000 budget for replants within the 2013/14 fiscal year (total $16,000). The 2012/13 replants were unable to occur due to backflow thefts during the ideal planting season.

Staff will be working with the HSRC to identify specific projects and prioritize them. The priority list will provide the starting point for reinvestment of Zone E-2 funds confirmed as surplus upon completion of the audit. Provided we have the financial resources

during the 2013/14 fiscal year, any necessary budget adjustments will be presented for Council consideration during the City's mid-year budget review process which is tentatively scheduled for February 2014.

In addition to the three regularly scheduled Hidden Springs Residents Committee meetings each year, staff will also meet with HSRC representatives every other month to discuss specific areas of concern. Staff will also attend a special meeting of the HRSC's (either August or September), prior to its next regularly scheduled meeting in October, to receive concurrence and/or direction on the initial $16,000 landscape reinvestment from property owners who attend the HSRC meetings.

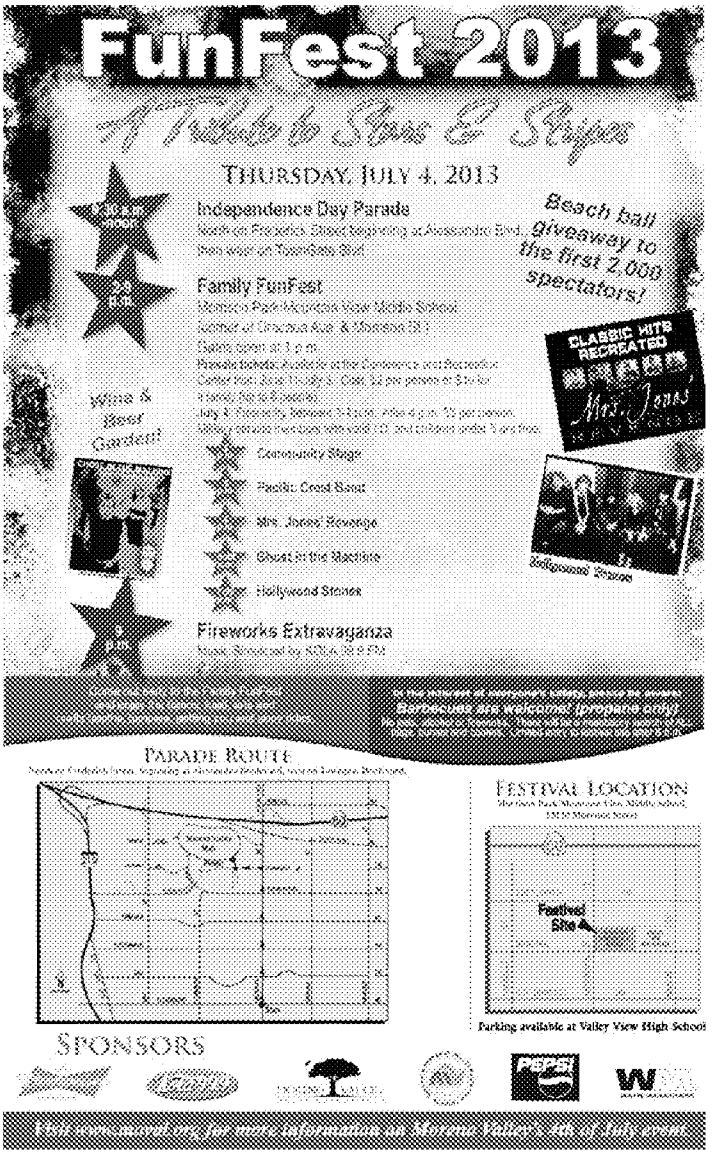
Thursdays

Movies start at dusk

14075 Frederick St. on the Greens of the Moreno Valley Conference and Recreation Center

This exciting 8 week movie series features both animated and live-action movies for residents of all ages. Bring your dinner, blankets and lawn chairs for summer fun which includes kid-friendly pre-show activities.

For a full list of scheduled movies, please contact the city of Moreno Valley Parks and Community Services. Free admission. In the interest of everone's safety, please no umbrellas, no pop-ups, no alcohol. Phone: 951.413.3280 or www.moval.org



Moreno Valley Welcomes New Business

Residents can also look forward to two new store openings in TownGate Center on Frederick Street reoccupying the vacant Staples building: **Ulta Beauty** is scheduled to open this summer and **BevMo!** Is targeting an early fall opening.

The business community knows that Moreno Valley is a great place to do business. **Aldi Foods** has chosen Moreno Valley for its new regional office and warehouse facility. Located west of the intersection of Eucalyptus Avenue and Redlands Boulevard, the 835,000 square foot warehouse facility will include a 50,000 square foot regional office facility.

Aldi Foods is a national retailer with over 1,200 stores in the United States. The grocer is building its facility with their move

LifeStream Community Blood Drives

Help save a life. Give blood. Walk-ins are welcome. Donors should maintain their regular eating schedules and increase their intake of fluids (water is best) in the 24 hours prior to donation. Photo ID is required. All donors must be at least 15 years of age (15- and 16-year olds require a signed parental consent form; the form is available at all drives and at www.LStream.org), be in general good health, and weigh a minimum of 110 lbs. Donating blood takes about one hour, but may give someone a lifetime.

July 7: 9 a.m. - 1 p.m.

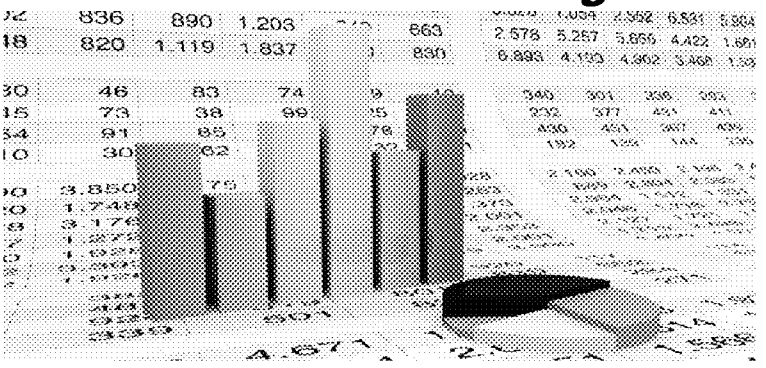
hours open for business

WE'RE BACK ON FRIDAYS TO SERVE YOU. After four years with city hall closed on Friday's. Moreno Valley city hall will now have development services staff available on the 2nd and 4th Fridays from 7:30 a.m. to 1:30 p.m., plus Monday through Thursday hours have been extended to 6:00 p.m.

The office hours were reduced in 2009 in response to a significant budget deficit. While the impacts of the Great Recession can still be felt in Moreno Valley, signs of economic recovery are continuing to emerge. A balanced budget, excellent customer care, and a proactive business and development environment is how Moreno Valley is moving forward at City Hall.

Come on in and let's do business!

New Year / New Budget



The City has adopted two-year operating budgets to plan for services available to Moreno Valley citizens and businesses. The two-year cycle began on July 1, 2013.

This General Fund budget is significant because of the deficit that has persisted for several budget cycles. The extended economic recession continues to produce shortfalls in revenues, plus, the cost of providing services continues to rise. Combined, this situation is leading to the erosion of City services. The resulting budget preserves core levels of service while absorbing reductions, including some in the public safety services. This is necessary because Police and Fire represent approximately 72% of the General Fund. With cuts in personnel and operations that already occurred over the last several years, there are few alternatives left.

In the case of Police, there will be reductions to the special team forces that address issues such as traffic, gangs, narcotics and specialized detective activities.

In the case of Fire, the major impact will be the anticipated closing of the Morrison Park Station 99 or the discontinued use of a fire truck.

Library Services under the provisions of the Library Services and Technology Act, a federal grant program administered in California by the State Librarian.

4th of July Safety

The 4th of July is one of the biggest holidays of the year. People enjoy barbeques, picnics and huge fireworks displays. Unfortunately, in the pursuit of fun, safety often gets overlooked. This is when accidents happen. However, many accidents are preventable by taking very simple precautions and by making safety a top priority.

The Moreno Valley Fire Department would like to remind all residents and visitors that personal use of fireworks is illegal in Riverside County; meaning that you may not sell, purchase, transport, store or use fireworks in the County.

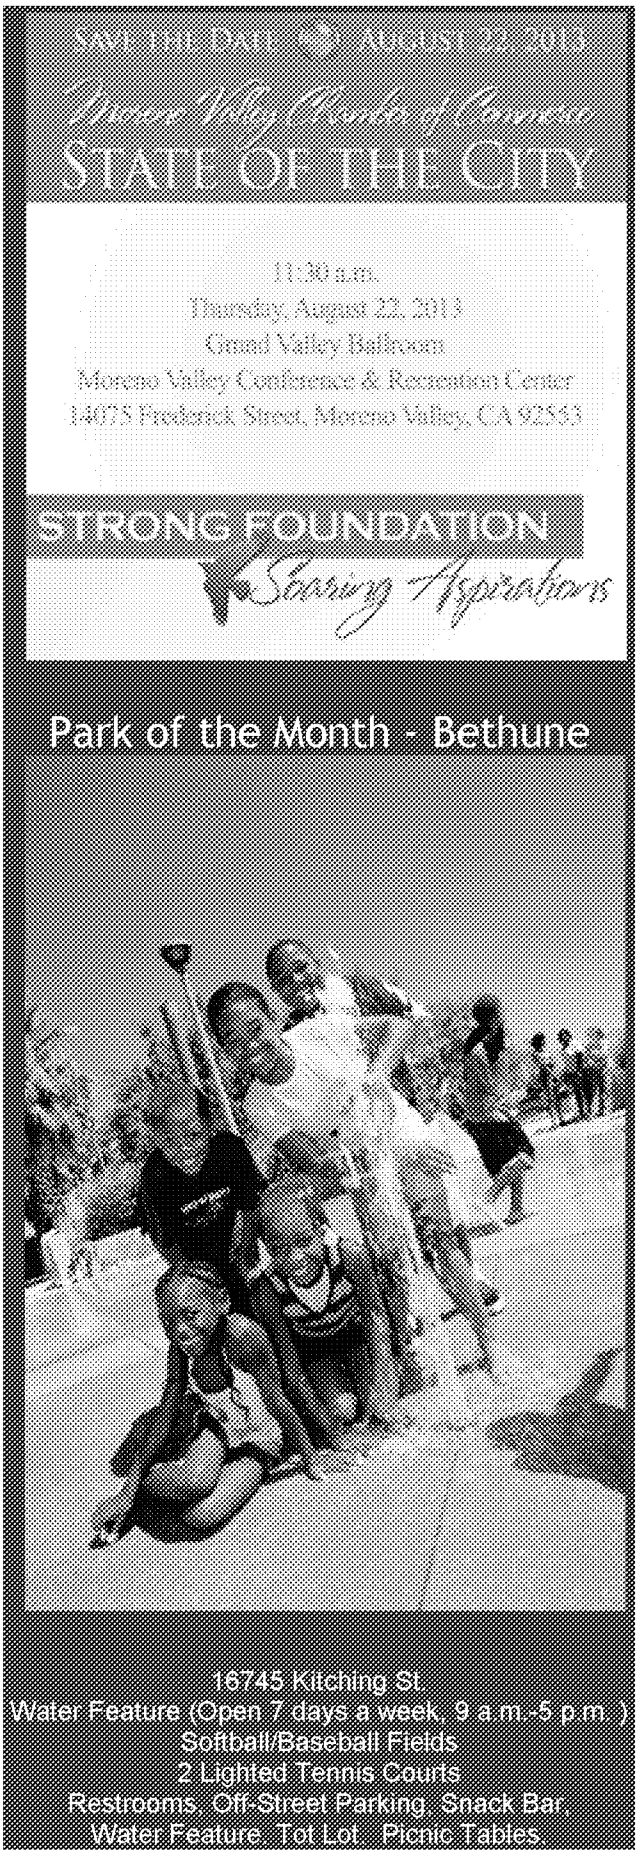
The cities of Blythe, Coachella, Cathedral City, Desert Hot Springs and Indio are the only cities that allow the sale and use of State Fire Marshal approved "Safe and Sane" fireworks. Fireworks purchased in these cities must not be transported, used or possessed outside of the cities in which they were purchased.

To report the use of illegal fireworks in non-emergency situations: 951-776-1099 or 1-800-950-2444.During the first week in July, please visit our website at www.rvcfire.org and follow the link to view a list of approved public fireworks shows for the 2013 July 4th holiday.

4th of July Responsible Drinking

Here are a few safety tips to help keep your 4th of July holiday fun, safe and enjoyable.

- You and your guests must make sure you are drinking responsibly. If you let someone leave your home after they've had one too many of your cocktails, you could be at fault if something happens to them or someone else.
- If you will be serving alcohol at your 4th of July party make sure to have designated drivers to drive those who will be drinking home.
- For everyone's safety, do not let people who are drinking cook foods on the grill or light fireworks. This can cause serious injury or fire.



Moreno Valley Animal Shelter needs YOUR support to win the 2013 ASPCA $100K Rachael Ray Challenge

The Moreno Valley Animal Shelter needs your help to save lives and win significant grant funding.

The Animal Shelter was selected along with 49 others nationwide to participate in the 2013 ASPCA Rachael Ray $100K Challenge.

Competing from June 1st through August 31st, each is trying to break their own record at saving animals' lives. Throughout the summer, each competing shelter must save more dogs, cats, puppies and kittens than they did during 2012.

Several summertime very low cost pet adoption events are scheduled. Click here to find events, information, and the listing of local businesses supporting this important cause!

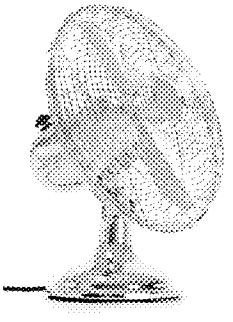
CHOC Children's Drowning Prevention Program

Do you want to escape the heat? Visit a Cool Center!

Beat the Summer Heat!



Many simple measures can be taken to significantly reduce the chance of getting heat exhaustion and heat stroke.

Everyone is at risk when temperatures rise above 90 degrees, but the elderly and the very young are most susceptible.

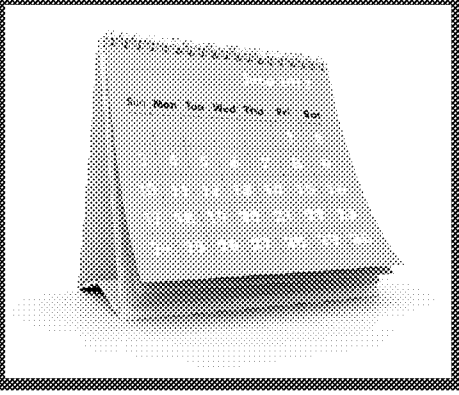
Signs of heat-related illnesses include nausea, dizziness, flushed or pale skin, heavy sweating and headaches.

Victims of heat-related illness should be moved to a cool place, given cool water to drink and ice packs or wet cloths should be applied to the skin. If a victim refuses water, vomits or loses consciousness, call 9-1-1 or your local emergency number immediately.

Tips to Prevent Heat-Related Illness:

- Never leave infants, children or the frail elderly unattended in a parked car.

our Community Calendar.



- Drink plenty of fluids. Don't wait until you're thirsty.
- Dress in lightweight, loose-fitting clothing. Use a hat and sunscreen as needed.
- Drink fruit juice or a sports beverage to replace salts and minerals lost during heavy sweating.
- During the hottest parts of the day, minimize hysical activities nd stay indoors in air-conditioning / out of the sun.
- Use fans as needed.
- Use cool compresses, misting, showers and baths.
- Avoid hot foods and heavy meals-they add heat to the body.
- Avoid alcohol and caffeine, which dehydrate the body.

Visit a Cool-Center

Community Action Partnership of Riverside County is coordinating Cool Centers to provide drop-in sites for individuals, such as seniors, the disabled and others in need of temporary relief from the heat.

Cool Centers are open to the public when the Riverside County Department of Public Health issues a "Heat Warning" on television, the radio and the local newspaper.

The Centers located in Moreno Valley are:

Subject: Petition Form Submitted for Approval

Mayor Owings & Council:

The Petition Form for the Mayor Owings recall was submitted today. The City Clerk's Office has 10 days to approve the form and advise the proponent.

Let me know if you have any questions.

Jane Halstead, City Clerk

Subject: Re: notification to council members

Hi Tom,

Staff began preparing/scanning these documents (valid notice of intents and incumbent's Answer/response)last week for distribution. We will include correspondence and get these documents to Council per your direction.

Only one petition has been submitted for approval thus far. Thorough examination of these documents will begin Monday morning.

The 10 day deadline submittal of the petition forms for the rest of the Council Members is approaching. The 10th day is at the end of next week and staff will scan the items as soon as received from the proponents. I will advise Council the outcome.

All filings will be forwarded to our CA for review.

Let me know if you have any other concerns.

Jane

> I think it would be helpful to the entire City Council if your office would adopt a SOP to notify each member about every aspect of the recall efforts. This should include forwarding of all correspondence with attachments from proponents, staff and media. Also, include Cc's of all staff correspondence with attachments concerning the recall.
